PART II.

LATITUDE AND LONGITUDE OF KINGSTON.

DURING the years 1875 and 1876 the latitude and longitude of Kingston were determined by Commander F. M. Green, U.S.N., with great accuracy.

The station at Kingston was 12 feet west of the centre of the pedestal on which the statue of Lord Rodney was then mounted, and on which the statue of Sir Charles Metcalfe now stands, at the lower end of King Street, near the market-place and overlooking the harbour.

A tablet was inserted in 1893 by the Institute of Jamaica in the north side of the pedestal which states that the above-mentioned longitude refers to a point 12 feet west of the centre of the pedestal.

The latitude of this station was obtained from 43 observations of pairs of stars, by means of an instrument suited for the purpose. It was a combination of a transit-instrument and a zenith-sector. The latitude thus found was $17^{\circ} 57' 41.0''$ N.

The longitude of this station was determined by telegraphic signals between Greenwich and Washington, Washington and Key West, and so on, to Havana, Santiago de Cuba and Kingston; the latter three sections forming part of the work conducted by Commander Green U.S.N. The longitude thus found was in arc $76^{\circ} 47' 39.8''$ west of Greenwich; or in time 5 hr. 7m. 10.65 sec.

STANDARD TIME.

By notice in the Gazette, January 18, 1912, the Governor approved of the adoption of Standard Time in Jamaica, namely Mean Time on 75th meridian west of Greenwich—the time of New York and Washington, and known in the United States as “Eastern Time”

On 1st February, accordingly, the chronometer of the Jamaica Time Service was put forward 7 minutes 11 seconds, and all Railway and other Government clocks were similarly regulated.

Standard Time is derived, daily, from the Wireless Signals broadcast by Rugby, England (GBR), or by Annapolis, U.S.A. (NSS), correct to a fraction of a second, and is supplied to the General Post Office, Jamaica Government Railway, and as often as may be required to other Government Offices in Kingston.

TIDES ON THE COASTS OF JAMAICA.*

THE rise and fall of the tides round Jamaica do not exceed 16 inches.

From the late Mr. Charlton Thompson's observations in Kingston harbour it appears that there are two kinds of tides on the coasts of Jamaica. The first and more important kind are *diurnal*, giving high and low water once in every 24 hours; they occur when the moon's declination is greater than 9° north or south. The second kind are *semi-diurnal*, giving high and low water twice in every 24 hours; they occur when the moon's declination is 9° or less, north or south.

For the diurnal tides, when the moon's declination is north, the time of high water does not greatly differ from the time of the moon's lower meridian passage; and when the moon's declination is south, the time of high water does not greatly differ from the time of the moon's upper meridian passage.

* Compiled by the late MAXWELL HALL.

For the semi-diurnal tides the times of high water do not greatly differ from the time of the moon's upper and lower meridian passage.

In Kingston harbour the Mean range of the diurnal tide is only 8 inches; and the range of the semi-diurnal tide is only 3 inches; but these small ranges are frequently obscured by larger irregular fluctuations in the ocean level which cannot be attributed to the action of the sun or moon. Further particulars will be found in Weather Report, No. 227.

ECLIPSES IN THE YEAR, 1930.

In the year 1930 there will be four Eclipses, two of the Sun and two of the Moon.

I. Partial eclipse of the Moon, April 12-13. Visible in Jamaica.

Moon enters penumbra, 10.43 p.m. on 12th
 Moon enters umbra, 12.21 a.m. on 13th
 Middle of Eclipse 12.58 a.m. "
 Moon leaves umbra 1.36 a.m. "
 Moon leaves penumbra, 3.14 a.m. "

The middle of the Eclipse will be seen at the SSW limb of Moon, but the magnitude will be small: being about one-ninth of the Moon's diameter.

II. A central Eclipse of the Sun, April 28th. Invisible in Jamaica. Central eclipse will be seen across the U.S.A. Continent.

III. A partial eclipse of the Moon, October 7th. Invisible in Jamaica, but visible, generally, in Asia, Australia, the Indian Ocean, Europe and Africa.

IV. A total eclipse of the Sun, October 21-22. Invisible in Jamaica but visible in the South Pacific Ocean.

THE MAGNETIC DECLINATION.

(Or Variation of the Magnetic Needle in Kingston.)

ABOUT the year 1890 the variation was decreasing rapidly; then it was found in 1895 that the rate was diminishing; and further observations in 1906 render it necessary to readjust the former table.

PART III.

DESCRIPTION OF JAMAICA *

THE island of Jamaica is situated in the Caribbean Sea between $17^{\circ} 43'$ and $18^{\circ} 32'$ N. lat., and $76^{\circ} 11'$ and $78^{\circ} 20' 50''$ W. long., about 4, 120 miles to the south-west of England, 100 miles west of Haiti, 90 miles south of Cuba, 445 miles north of Carthagen, and 540 miles from Colon.

The islands of Grand and Little Cayman, with Cayman Brac, are situated—the first about 170 miles, and the second about 130 miles, and the third about 120 north-west of Negril Point. The Pedro Bank and Cays commence about 40 miles south of Portland Point, and extend westerly for 100 miles; this bank is about three-fourths of the size of Jamaica. The Morant Cays are 32 miles from Morant Point in a south-easterly direction. These several islands and cays, together with the Turks and Caicos islands, are all dependencies of the Island of Jamaica.

The nearest part of the continent of America to Jamaica is Cape Gracias a Dios, in the Mosquito Territory, which is 310 miles south-west of the west end of Jamaica.

From its central situation as regards the other West Indian islands and the fact of its being in the direct track between Europe, and the United States and the Isthmus of Panama, Jamaica furnishes special advantages and conveniences for trade and commerce between these points.

The aboriginal Arawak name of Jamaica, *Xaymaca*, which it has retained till to-day, is supposed to imply an overflowing abundance of rivers.

The extreme length of Jamaica is 144 miles, its greatest width is 49 miles and its least width (from Kingston to Annotto Bay) $21\frac{1}{2}$ miles. The island is divided into three counties and fourteen parishes, namely:—

SURREY.		MIDDLESEX.		CORNWALL.

Total	$827\frac{1}{4}$	Total	2,060	Total ..	1,563

giving a total of $4,450\frac{1}{4}$ square miles, equal to 2,848,160 acres, of which only about 646 square miles, or 413,440 acres, are flat, consisting of alluvium, marl and swamps.

GENERAL GEOLOGICAL FORMATION.

The foundation or basis of the island is composed of igneous rocks, overlaying which are several distinct formations.

*The description was originally written by Thomas Harrison, a former Surveyor-General.

COUNTY OF SURREY.

The coast formation is of white and yellow limestone: the interior consists chiefly of the metamorphosed and trappean series, with carbonaceous shales and conglomerate. The greater part of this county is very mountainous; the only flats are the plain of Liguanea (north of Kingston) and the valleys of the Morant and Plantain Garden rivers, and smaller flats at and near the mouths of the other chief rivers. Mineral deposits are numerous in the mountain districts. Iron, copper, lead, manganese and cobalt have been found and worked to some extent, but no profitable industry has been the result. Marble of good quality has also been found at the head of the Blue Mountain Valley.

The only volcanic formation in the island is that at Lowlayton and Retreat estates in the parish of Portland, a mile from the sea; there is, however, no defined crater, and the volcanic materials are the only evidence remaining.

COUNTY OF MIDDLESEX.

The parish of St. Mary exhibits a great diversity of formation, consisting of white and yellow limestone, carbonaceous shales, metamorphosed, porphyritic, granite and conglomerate rocks with many mineral-bearing rocks. The district of St. Thomas-in-the-Vale is of granitic formation, overlaid considerably by cretaceous and white limestone and marl beds.

St. Catherine possesses an extensive alluvial flat stretching from Kingston harbour to the boundary of Clarendon; the rest of the parish is of white limestone.

In Upper Clarendon the metamorphosed trappean and conglomerate series prevail; the central districts are of white limestone, and the southern part, with the district of Vere, is alluvium, and embraces an area of about 132 square miles, which is the largest continuous flat in the island. The mineral deposits of upper Clarendon are considerable, and, it is believed offer a fair field for mining enterprise.

The parishes of Manchester and St. Ann consist almost entirely of white limestone.

COUNTY OF CORNWALL.

The parish of St. Elizabeth has an extensive area of alluvium from the boundary of Manchester to the boundary of Westmoreland, narrowing so considerably at Lacovia that the north and south limestones nearly meet; much of this flat is covered by swamp.

In the north-east of the parish there is also an extensive flat called the Nassau valley. The rest of the parish is white limestone with some patches of yellow limestone.

The parish of Westmoreland also presents extensive alluvial deposits and marl beds. The north-western part of the parish furnishes trappean rocks with yellow and cretaceous limestone. The eastern part is chiefly white limestone with some trap formations at the head of the Great River.

In Trelawny the district called "The Black Grounds" consists of trap formation. The rest of the parish is of white limestone with some alluvial valleys; that called "The Queen of Spain's Valley," on the borders of and extending into the parish of St. James, is remarkable for its picturesque beauty and great fertility. The interior of St. James presents a trappean formation, with some overlaying yellow and cretaceous limestones.

The rest is of white limestone with some alluvial deposits round the coast.

The eastern part of Hanover is chiefly white limestone, and the western part black shale, with some metamorphosed rocks and yellow limestone.*

MOUNTAIN RANGES.

The surface of the island is extremely mountainous and attains considerable altitudes, particularly in the central part where the central range is known as the Blue Mountains,

*For a more complete account of the geology of the island see Sawkins's "Geology of Jamaica," Hill's "Geology and Physical Geography of Jamaica," and "Some Recent Contributions to the Geology of Jamaica" by C. A. Matley, in the "Handbook of Jamaica" for 1923.

The following table will give a general idea of the area in square miles embraced in the different zones of elevation, above sea level, in the several parishes:—

From the above it will be observed that a great diversity of climate is obtainable

From a tropical temperature of 80° to 86° at the sea coast the thermometer falls to 45° and 50° on the tops of the highest mountains, and with a dryness of atmosphere that renders the climate of the mountains of Jamaica particularly delightful and suitable to the most delicate constitution.

The midland parts of the island are the highest. Through the county of Surrey, and partly through Middlesex, there runs the great central chain which trends generally in an east and west direction, the highest part of which is the Blue Mountain Peak attaining an elevation of 7,360 feet.

From this range subordinate ridges or spurs run northerly to the northside of the island and southerly to the southside; these ridges in their turn are the parents of other smaller ridges, which branch off in every direction with considerable regularity and method; and they again throw off other ridges, until the whole surface of the country is cut up into a series of ridges, with intervening gullies.

Many of the subordinate ridges vie with the main ridge in importance and elevation; such, for instance, as the great ridge starting from Catherine's Peak, above Newcastle, and passing through the parish of St. Andrew in a south-easterly direction, culminating at great elevations at Newton and Bellevue, and expending itself at Albion in the parish of St. Thomas. Also the ridge known as Queensberry Ridge, starting from the Blue Mountain Peak, passing by Arntully, Belle Clair and Windsor Castle, where it is known as Coward's Ridge, and extending to the sea at Belvedere and Creighton Hall, to the north of which place it forms the conspicuous mountain known as Yallahs Hill, 2,408 feet high. On the northern side of the island three great ridges may be mentioned, one extending from the Blue Mountain Peak through the parish of Portland dividing the waters of the Rio Grande from those of the Swift River, and expending itself at St. Margaret's and Hope Bays. Another starting from Silver Hill, dividing the waters of the Buff Bay and Spanish rivers, and the other very high ridge extending from Fox's Gap at the boundary of St. Mary and Portland, north-easterly, culminating in a conspicuous elevation called Hay Cock Hill, 2,500 feet above the sea, and terminating on the coast near Dover.

The John Crow Mountains, named also the Blake Mountains in honour of Sir Henry Blake, a former Governor of the Island, which run in a north-westerly and south-easterly direction in the parish of Portland divide the Rio Grande valley from the eastern coast of the island. They form a plateau of about 2,000 feet elevation rather than a mountain range. In their higher parts they are a barren, waterless tract of limestone formation; much of it covered by the sharp rocks known as honeycombed rocks, over which it is almost impossible to walk. These mountains may be said to be an offshoot from the great central range which, from the depression known as the Corn Puss Gap, north of the town of Bath, turns suddenly north and forms itself into this plateau.

GEOLOGICAL MAP OF JAMAICA

The central range suffers a considerable depression at Stony Hill, in the parish of St. Andrew, where the main road to the north side crosses it at an elevation of 1,360 feet. Here the range is divided into two ridges; one of limestone formation, extending westerly through the district known as Mamee Hill, reaches a conspicuous elevation known as Lunan Mountain, at Highgate, in St. Catherine, and expands itself at Bog Walk; the other, which is the continuation of the central dividing ridge, is of granite formation and extends in a north-westerly direction. It passes the district of Lawrence Tavern and Mount Charles, where it commences to form the boundary line between the parishes of St. Mary on the north and St. Catherine on the south-side; continuing north-westerly it passes Pear Tree Grove and turns suddenly to the south-west at Windsor Castle and Decoy, and it then joins the limestone formation at Guy's Hill and Middlesex township, continuing as a well defined range to Mount Diablo, where the main road crosses it at an elevation of 1,800 feet. It continues on to Holly Mount, a little beyond which it unites with the St. John's range, which forms the eastern boundary of Lluidas Vale.

From this point, although these mountains continue as a separate range, they become irregular and broken, chiefly on account of their limestone character, and with this formation they extend through the parish of St. Ann, expending themselves in the Cockpit country to the east of the district called "The Black Grounds," from the rich black soil in contra-distinction to the red soil of Manchester, in the parish of Trelawny. To the south of this locality, along the borders of Clarendon and Manchester the trappean series is again met with and two great inland rivers flow there.

Running in an irregular north-westerly line, almost parallel with the last range of mountains described, is another limestone range which may be said to commence from the western bank of the Rio Minho or Dry River above Lime Savanna, and, forming first the range known as Mocho Mountains, it includes the Whitney valley and joins the Manchester Mountain range at Cumberland. Thence trending north-westerly it passes through the northern district of Manchester and enters the parish of St. Elizabeth at Hector's River Sink; thence it continues on to Accompong and becomes lost in a peculiarly wild formation of what is usually known as Cockpit Country. In this quarter, and extending for a considerable distance into the parishes of Trelawny and St. James, the Cockpit land bids defiance to the traveller.

This formation is of white limestone, sharp, irregular and jagged, with little earth, and formed into a series of circular arenas like inverted cones with extremely irregular sides but preserving the circular formation throughout and terminating in most instances with a sink hole in the apex.

These arenas are of all diameters, from half-a-chain to two and three chains. The ridges or edges where these cones unite are of course, very irregular and sharp, presenting very steep or vertical rocks of considerable height. Such a country may be said to be almost inaccessible.

The May Day and Carpenter's Mountain pass through the parish of Manchester in a diagonal direction. Commencing at the Round Hill in Vere at the south-east extremity of Manchester, they traverse the parish to its north-western angle, where they join the main ridge near the Hector's River Sink; one off-shoot forming the Nassau Mountains of St. Elizabeth.

The Santa Cruz Mountains in the parish of St. Elizabeth run parallel with the Manchester Mountains. They commence at the sea at the precipice called The Lover's Leap, 1,660 feet high, and terminate near Lacovia, where the passage of the Black River produces a break in the hills. These mountains, as well as those of Manchester, are justly considered to be very salubrious.

Another range of mountains, a continuation of the same line as the Santa Cruz Mountains, commences above Lacovia, to the north, and extends to Mulgrave near the line of St. James, and traverses the parish of St. James in a northerly direction, terminating in the hills south of Montego Bay.

The last and most westerly range of mountains, extending through Westmoreland and Hanover, commences about the locality called Middle Quarters and extends northerly, with some irregularities, to Chesterfield at the head of the Great River, which forms the boundary between St. James and Westmoreland; it then trends north-westerly to Chester Castle and Knockalva, near the boundary of the parishes of Westmoreland and Hanover, and then westerly, culminating in a conspicuous hill called Dolphin Head, with an elevation of 1,816 feet, and terminating in several small ridges towards the west end of the island. There is also a coastline in Westmoreland called the Bluefields or Surinam Range commencing at Middle Quarters in St. Elizabeth and extending towards Savanna-la-Mar.

RIVERS AND GENERAL DESCRIPTION.

The numerous rivers and springs which abound along the coast in most parts of the island to a considerable extent justify the name of "The Land of Springs," although there are extensive districts in the midland and western parts of the island singularly barren of water.

When it is remembered that the chief range of mountains, or back-bone of the island, runs generally east and west, it will be easily understood that the chief rivers, starting from the northern and southern slopes of this range, would generally run, the ones northerly, the others, southerly, to the sea. There are some exceptions to this general rule, the chief of which is the Plantain Garden River in the parish of St. Thomas, which, rising in the Cuna Cuna Mountains, runs southerly in its upper course, but suddenly meeting the coast range of hills turns easterly, and flowing through the fertile district to which it

gives its name, empties itself at Holland Bay. Another is the Montego River, which, although it flows northerly in its upper course, turns westerly through the greater part of its flow, discharging at Montego Bay.

There are interior rivers (which have no outlet) which are also exceptions to this general rule, such as the Cave and Hector's Rivers.

While most of the rivers have generally either northerly or southerly directions, it must not be forgotten that the subordinate ridges which are nearly at right angles to these lines will produce subordinate streams meeting the rivers on their eastern and western banks.

In consequence of the great elevations from which most of the rivers flow they are very rapid in their descent, and, in times of flood, become formidable torrents, sweeping everything before them and operating as dangerous obstructions to the traveller. Many of these rivers now, however, have substantial bridges erected across them.

Some of the chief of these are the Plantain Garden River already mentioned and the Morant and Yallahs in the parish of St. Thomas. The Rio Grande, in the parish of Portland, is one of the finest rivers in the island; it flows from the northern slopes of the Blue Mountains. The Back and Stony Rivers, two of its great affluents, furnish not only some of the loftiest and most picturesque waterfalls but the wildest and most romantic scenery in the island.

It was on one of these naturally fortified ridges, nearly surrounded by the Stony River that the notorious Nanny, the renowned Maroon leader, held out against the regular troops about the year 1739.

All the upper part of the parish of Portland remains unsettled to the present time in consequence of the steepness of the country and the want of roads, but there is no other part of the island richer in valuable timbers and other natural productions, and possessing greater advantages for the growth of coffee, cacao and cinchona than this district. The character of the soil and climate is the same as that of the St. Andrew and Port Royal Mountains where the best coffee is produced, but where the coffee fields are fast wearing out.

The other rivers of Portland are the Swift, Spanish and Buff Bay, all possessing the same character as the Rio Grande.

In St. Andrew there is the Wag Water (corruption of Agua Alta) River, which, rising in the mountains behind Stony Hill, runs through the parishes of St. Andrew and St. Mary, debouching at Annotto Bay. The Hope River rises in the hills around Newcastle and joins the sea at the sixth mile stone from Kingston on the windward road; from this river the city of Kingston and district of Liguanea receive part of their water supply. From the Above Rocks district of St. Andrew flow the sources of the Rio Pedro, a large tributary of the Rio Cobre, which, with its numerous affluents, traverses the parish of St. Catherine. The gorge known as Bog Walk, through which the Rio Cobre flows, is remarkable for its picturesque scenery. This river is utilised for irrigating the plains of St. Catherine, and for the motive power for the Kingston electric tramways.

The rivers of St. Mary, besides the Wag Water, are the Dry River, the Annotto, the Port Maria, Oracabessa, Rio Nueva and the White River, which latter forms the boundary between the parishes of St. Mary and St. Ann.

The volume of water in the White River is considerable, and the great cascade above Industry and the fall at Prospect are very grand and form objects of attraction to visitors.

The parish of St. Ann, being chiefly limestone formation, furnishes no rivers of any consequence in the interior. The sea coast rivers are numerous; the Roaring River and the Llandovery River possess large volumes of water.

The cascades on both these rivers are very beautiful, particularly those of the Roaring River, where the main road crosses it. In the yellow lime-stone and granite formation at Guy's Hill the Great River flows and sinks at Middlesex township, rising again at intervals of from 12 to 23 years at Rio Hoe, where it forms the Moneague Lake; which receives additional water forced up on Unity Valley, Riverhead and Tadmore, the waters of which disappear in sink holes at Walton, Rio Hoe.

The Cave and Hector's Rivers near the junction of the parishes of Clarendon and Manchester with St. Ann and Trelawny, and, running in opposite directions form the northern and southern boundaries of these parishes respectively.

The Cave River, with its affluent the Yankee River, flows easterly, sinking at Greenock estate; thence it is supposed to have a subterranean course of $13\frac{1}{2}$ miles or more and, rising near Dornock pen with considerable volume, is called Rio Bueno, and, with a course of $6\frac{1}{2}$ miles to the sea, forms the boundary between St. Ann and Trelawny.

Hector's River runs westerly and, after a course of about 12 miles terminates in several sink holes in a wild and broken country. This river again makes its appearance at Oxford, in Manchester, where it goes by the name of One Eye River, and, again sinking there, it passes through a ridge to the north of the Bogue Hill and rises in considerable body at Mexico and Island estates, from which point to the sea it is called the Black River. This is certainly the finest river in the island. With a tortuous course of about 44 miles it debouches at Black River Bay near the town of that name. It is navigable for boats of considerable size for a distance of about 25 miles, and is used for conveying the produce of a large district to the sea.

The Black River receives several tributaries of considerable size, which are also partially navigable, such as the Y.S., Broad, Grass and Horse Savanna Rivers.

The Rio Minho, or Dry River, rises with numerous tributaries in the Clarendon mountains, and, flowing through the entire length of the parish of Clarendon and district of Vere, discharges near Carlisle Bay.

In consequence of the arenaceous character of the soil the water of this river sinks a little below Longville estate, 16 miles from the sea. The lower part of this river, say from Seven Plantations estate to a little above the Alley in Vere, is, therefore, usually dry, except a considerable spring at Parnassus estate where the water flows for a short distance; the water appearing a little above the Alley flows to the sea. In floods this is a most formidable river and formerly, when "down," (as the expression is) all communication along the south side of the island was cut off, until an iron bridge was erected across the river at May Pen.

The Cock Pit and Salt Rivers are short but deep rivers. The Milk River, a very fine river, navigable for some two miles, supplies a system of canals for the irrigation of Vere. A considerable quantity of logwood and fruit is shipped from it.

Along the foot of the Manchester Mountains considerable water rises and, with short channels, flows to the sea. The largest of these rivers are the Alligator Hole, Swift and Gut Rivers.

Trelawny furnishes only one river of importance; this is the Martha Brae River. This river rises at Windsor in the interior of the parish and seems to be the waters of the Quashie and Mouth Rivers, as well as many other small streams which are interior rivers that rise and sink in the black grounds. The Martha Brae is a fine river, navigable for some distance up, and discharges to the east of Falmouth.

The Montego River rises in the trap formation near Maroon Town and is there called Tangle River. It sinks and re-appears, and after receiving numerous tributaries, enters the sea south-west of the town of Montego Bay. The Great River is the boundary of St. James next to Hanover and Westmoreland. It is a long river, but has few tributaries, the Lamb's and Seven Rivers being the chief.

The rivers of Hanover are the Flint, Maggoty, Lucea (east and west) Lance's, Davis, Cove, Pell and Green Island Rivers; none of these are large rivers or demand any special notice.

In Westmoreland the chief river is the Cabaritta. This is also a very fine river and with its tributaries, the Thicket and Morgan's Rivers, waters the alluvial districts of the parish. There are also the Dean's Valley or Sweet River, from which the town of Savanna-la-Mar is supplied with water, New Savanna and Negril Rivers.

CAVERNS.

The limestone formation, prevalent in Jamaica, furnishes many caverns and sink holes of great size and grandeur, the chief of which is the beautiful cave at the place called Cave Hall pen, two miles east of Dry Harbour, near the main road. This cave is of great length and has two branches; the various apartments are designated grottoes, halls, domes and galleries; and the stalactites and stalagmites, formed by the dripping of calcareous water, glittering in the torch light, impart a magical effect to the scene.

The Grand Cave at River Head in St. Thomas-in-the-Vale is a very remarkable place. The Rio Cobre, after sinking at Worthy Park, emerges from this cave. It is of great dimensions and in former years was a favourite resort for picnics; it is traversable, with the assistance of a raft to cross some deep water, for a distance of over a quarter of a mile, until the "floodgate" is reached where the water gushes from the rock.

The cave at Mexico, in St. Elizabeth, is probably the longest in the island; it is near a mile from the One Eye Gulf to Mexico Gulf (the mouth of the cave). The One Eye or Black River passes through this cave.

It has been explored for some distance in, but, in consequence of some deep bodies of water obstructing the passage, less is known of it than of the cave on the Rio Cobre. A thorough exploration of this cave would be most interesting.

The Peru Cave, also in St. Elizabeth, is very beautiful, and the stalactites and stalagmites here show to great effect. There is also a very fine cave at Mount Plenty in St. Ann, which can be traversed for a distance of ten chains; it has two branches and the vaulted chambers are particularly fine. At some distance from the mouth it is illuminated by a sink hole from the top.

Another very fine cave is that from which the Mouth River flows in the black grounds of the parish of Trelawny. There is also a remarkable cave near this at Spring Garden. The cave at Portland, in Vere, is very fine and used formerly to be a great place for picnics.

There is also a remarkable cave and subterranean river at Epping Forest in the parish of Manchester.

There are numerous other caves of smaller dimensions throughout the island. Sink holes, as already stated, are also very numerous. The Light Hole at Tingley's in St. Ann, is a sink hole on a large scale. This is a great arena of vertical rocks some three or four chains in diameter and of considerable depth, with large trees growing at the bottom.

Many of the sink holes and caves throughout the island have springs at the bottom, such as the Governor's Cave at Healthshire; a sink hole near Fort Clarence opposite Port Royal; a cave near Salt River and one at Swansea on Lluidas Vale.

MINERAL SPRINGS.

There are many mineral springs in Jamaica, some of them possessing valuable qualities for the cure of various diseases and infirmities of the body.

There is a small mineral bath which is situated at Rockfort near Kingston. The bath is fed by a cold spring which made its appearance after the earthquake in 1907. The water is slightly saline and it possesses a Radio-activity of about twice that of the waters of Bath in St. Thomas.

The Chemical analysis is as follows:—

	Parts per 100,000.
Calcium ..	19.80
Magnesium ..	13.20
Sodium ..	85.02
Bicarbonate ..	24.40
Sulphate ..	31.43
Chloride ..	168.00
Silica ..	4.40
<hr/>	
Total ..	346.25
<hr/>	

In St. Andrew there are two springs. One is a series of springs which come to the surface at Rock Hall Estate, near the Ferry and form the source of the Salt River. The other, at Silver Hill in the Blue Mountains, was formerly known as the Jamaica Spa, and was maintained as a government institution. The waters are chalybeate aerated, cold tonic; beneficial in most cases of debility, particularly after fever, dropsy and stomach complaints.

At Garbrand Hall there is a series of warm springs. On the Adam's River, about $\frac{3}{4}$ of a mile south of Downer's Hut Gap on the main range, there is a spring which belongs to the Crown.

At Moffat there is a spring on the White River, a tributary of the Negro River.

In Portland, on the Guava River, about one mile north of Downer's Hut Gap, on the main range there is a spring which belongs to the Crown.

A spring formerly at Golden Vale disappeared after the Earthquake of 1907. A spring also referred to in the past as being at Priestman's River, cannot now be discovered.

In St. Mary, a spring at Quebec, mentioned by Dr. Phillippo, does not now exist.

Windsor Spring, which is near St. Ann's Bay, has enjoyed for many years a reputation for the healing of ulcers and skin complaints. The water is exceedingly saline, much more so than sea water. The water is non-thermal and it is an extraordinary fact that the dissolved solids consist almost entirely of the chlorides of the alkalies and alkaline earths. Sulphates are absent and bicarbonates are very small in amount. It would be well if this mineral spring was utilised to a greater extent, and investigations conducted to enquire further into its undoubted high therapeutic qualities.

The Chemical analysis is as follows:—

Parts per 100,000.		
Calcium	..	249.60
Magnesium	..	3.00
Sodium	..	1,470.90
Potassium	..	32.09
Chloride	..	2,750.00
Silica	..	1.60
Bicarbonate	..	1.25
Sulphates	..	Nil
<hr/>		
Total	..	4,508.44
<hr/>		

Radio-activity 0.23 by 10-10 curies per litre.

In Hanover, there is a Hot Spring at Buxton on the Carbaritta River.

In Westmoreland, the spring alluded to as Rickett's Savannah, cannot now be identified.

In St. Elizabeth, there is a Sulphuric Spring at Lower Works near Black River.

The Baths at Bath in St. Thomas and at Milk River in Vere are treated of separately.

In St. Catherine, there is at St. Faith's in the St. John's district a spring on Good Hope. The Spring at Port Henderson was once a favourite bath for the inhabitants of Spanish Town.

An analysis of the water of the spring at Manatee Bay is given by Dr. Phillippo.

(July) £6,700 damages were given against the Governor and Collector-General for detaining the ship on her way from Venezuela to St. Thomas. The British Government instructed the Governor to get the Legislative Council to vote the amount. This they declined to do, on the ground that the action was taken in Imperial interest, the Auditor-General and Crown Solicitor resigning their seats; and they were supported by public opinion. It was subsequently settled by the Council voting half the amount, the six unofficial members resigning on being beaten.

POLITICAL CONSTITUTION.

In the first two years after Penn and Venables conquered the Island of Jamaica in 1655, control was by Commissioners. In 1657 Doyley governed by Court Martial. In 1661, Doyley was made Governor, with the advice of an *elected* Council. Later the Governor's Council was nominated by the Crown, in the main on the recommendation of the Governor. In 1663-4 the first elected House of Assembly met. Soon after this the Council had a dual existence as a Privy Council and, while the Assembly sat, as a legislative Upper Chamber. It kept the two sets of its minutes in the same minute book in chronological order. The Council was often recruited from the Assembly, and not unfrequently a patriot left the Assembly and became a King's man in the Council. There was constant jealousy between the Board (Council) and the House (Assembly).

Lynch in 1671 sent home "The present state of the Government of Jamaica, on the 20th of August, 1671." "His Majesty is sovereign and proprietor is stiled King, &c. and Lord of Jamaica; and the Governor and Lieutenant Governor are appointed during his pleasure. The present Lieutenant-Governor has a council of 14 of the best men in the island, viz., Major-General Jas. Banister, Sir Jas. Modyford, Colonels Thos. Modyford, John Coape, Thos. Freeman, and Thos. Ballard, Lieutenant-Colonels Wm. Ivy, Robert Byndlos, Chas. Whitfield, and Thos. Fuller, Major Anthony Collyer, Capt. Hender Molesworth, Lieutenant Colonel Robert Freeman, Secretary, and John White, Chief Justice; they may be suspended for misdemeanour, but the Lords of the Council of Foreign Plantations must judge if it is reasonable. There is an assembly numbering 18, viz., two from each of the districts of St. Catherine, Clarendon, St. Andrew, Port Royal, St. John, St. David, St. Elizabeth, St. Thomas and North Side: these are chosen indifferently by the people, and make laws which are of force for two years, and ever after with the Royal Assent. The people look on it as their Magna Charta, that they shall be governed by these municipal laws and those of England, and not have any thing imposed on them but by their own consents as in Barbadoes and the Caribbees."

In March, 1674 a Draught Commission for the Earl of Carlisle, appointed by his Majesty Governor of Jamaica, was offered to his Majesty by the Council for Trade and Foreign Plantations. The Council, was to consist of 12 persons, seven to be a quorum. Vacancies to be certified to his Majesty by the first opportunity, meantime the Governor to fill up the number to nine, and no more, out of the principal freeholders of the island. With the power to administer the oaths to each of the Council and Deputy Governor, and to suspend or expel any member of Council. Also with consent of the Council to call general

assemblies of the freeholders, according to the custom of the island, whose representatives, duly elected, shall have power, with consent of the Governor and Council, to make laws as near as may be agreeable to those of England, which shall be of force for two years, and no more unless confirmed by his Majesty. To exercise a negative voice in the passing of all laws; to dissolve all general or representative assemblies, with consent of the Council, to establish courts of judicature, and appoint judges, justices, sheriffs, and other necessary officers, transmitting copies of all establishments for his Majesty's approval; to pardon offences before or after sentence, treason or wilful murder excepted in which cases he may grant reprieves till his Majesty's pleasure be known; to present to churches, chapels, and other ecclesiastical benefices; to levy and arm persons under his Government for resisting enemies by land or sea and transport them to any of his Majesty's Plantations in America for defence of the same from invasion of enemies, and to execute all things which to a captain-general belong. To raise and build cities, boroughs, towns, and fortifications, and arm them or demolish or dismantle them; to erect a Court of Admiralty, and exercise all powers of a vice-admiral in those seas according to Commission and Instructions from Commissioners for executing the office of Lord High Admiral of England; to grant lands on moderate quit rents, to hold fairs and markets, and appoint ports and havens, custom houses, warehouses. But not to dispose of any office granted by His Majesty under the great seal. All inhabitants of the island to be obedient to him, and in his absence to the Deputy Governor, who shall exercise all powers hereby granted. In case he shall happen to die or be absent, and there be no Deputy Governor upon the place, the present Council of Jamaica to take upon them the Government and execute this commission. And lastly to hold office during his Majesty's pleasure.

Money bills originated with the Assembly and were a constant source of dispute. In 1678-80 an attempt was made, by Carlisle without success, to force the principle of Ponysing's laws (i.e. laws made in England) on Jamaica.

The Colony soon realized that it was desirable to have an agent to solicit its affairs in England, and Jamaica was so represented from 1664 to 1845, when the office was abolished. In 1767 the Assembly and Council quarrelled over the control of the agent.

In 1728 full legislative power was ceded to the Colony in return for an annual subsidy granted to the King for the support of the civil government and subject to the proviso that no Act should be passed repugnant to the laws of England and that the Crown had

D

power of disallowance within a limited period but the money bills and "tacking" were a constant source of trouble.

The antagonism shown by many of the planters first to the abolition of the slave trade and later to Emancipation created an attitude hostile to the Colony in the minds of many politicians in England.

Emancipation in 1834 was met by many of the planters in an unsympathetic manner. At the same time it encouraged the black people and coloured population to take an interest in the political affairs of the Colony. The dissenting missionaries became their strong advocates, and thereby earned the enmity of many of the planting class.

The Assembly resented the action of the Mother Country in bringing the Apprenticeship system to an early conclusion in 1833, and regarded the legislating for the better government of prisons as an infringement of their rights. A deadlock ensued under Sir Lionel Smith, and a law was passed in the Imperial Parliament to arrange for government by the Governor and Council if the Assembly refused to act. Sir Charles Metcalf did much to throw oil on troubled waters; to reconcile the colony with the Mother Country, and to conciliate all classes of the colonial community.

In the Lieutenant Governorship of General Berkeley (1846) the British Act equalizing the sugar duties on British and foreign production raised the active hostility of the Assembly, and in a petition to the Queen was said to be "a flagrant violation of national faith, consistency and honour." And during the whole six years of Sir Charles Grey's administration (1847-53) a war of Retrenchment was waged. The treasury became bankrupt and a deadlock ensued, the Assembly declining to do any business with the Council. This state of affairs welcomed Sir Henry Barkly to the colony in 1853.

In 1854 an Act was passed for the better government of this island and for raising a revenue in support thereof. (Vic. 17 Chap. 29). By it the old council ceased to exercise its functions as a Legislative Council and a new Legislative Council was appointed consisting of seventeen members, the old members of the Council retaining their seats. The Council enjoyed like political powers and authority exercised and enjoyed by the House of Lords of Great Britain and Ireland. By the same Law the Governor was authorised to appoint three persons members of the Assembly, and one person a member of the Legislative Council to form an Executive Committee for the assistance of the Governor in the general administration of the finances of the island. No member of the Executive Committee was to be the holder of an office of emolument.

Sir Charles Darling (1857-62) fell out with his Executive Committee on the question of the intention of the government in passing the Act for the better government of the island which deprived the Assembly of the right to initiate the money bills, and they resigned.

The appointment of the Executive Committee had led to no permanent improvement, for after the first few years a constant struggle for place and power was maintained, and partisanship became more bitter than before. To use the words of Gardner, "The House of Assembly was generally felt to be a barrier in the way of all progress, and in no proper sense of the word could it be regarded as a representative body": and Dr. Bowerbank, a former member, said it was "the curse of Jamaica." Its deliberations were often interrupted by scenes of confusion and strife.

Jamaica, with a population of upwards of half a million, was divided into twenty-three parishes or electoral districts, returning forty-seven members in all. But in 1864, the united registries showed only 1,903 persons qualified to vote, and only 1,457 persons exercised their privilege.

With such small constituencies, as Gardner points out, it was an easy matter for any man anxious to obtain a seat to do so, and in parishes where bribery and corruption could not be supposed to influence the votes, there was no representation of the great body of the people for whom the assembly was assumed to legislate. That many upright and honourable men were elected by such small constituencies must be admitted, and yet such men occasionally complained to their intimate friends that they were fast losing their self-respect.

In 1864 the island was not prosperous, the American war had raised the price of American bread stuffs, and the Governor was at variance with the Assembly. Agitation ended in riot at Morant Bay on October 11th, 1865. The Commission which reported on the matter said that "the disturbances had their immediate origin in a planned resistance to lawful authority, which resistance was caused in manifold ways, by a desire to obtain land free of rent, a lack of confidence on the part of the labouring class in the tribunals before which most of their disputes were adjudicated, and, in some cases hostility towards political and personal opponents and a desire to attain their ends by the death or expulsion of the white inhabitants of the island."

After the suppression of the disturbances, Governor Eyre urged on the Legislature the unsuitability of the then existing form of government to meet the circumstances of the community, and the necessity of making some sweeping change by which a strong government might be created. The Legislative Council, in their reply, assured His Excellency that he "might confidently rely upon their giving their best consideration to any measure tending to establish that strong government so necessary for the well-being of this community" and the Assembly expressed their "full conviction that nothing but the existence of a strong government would prevent this island lapsing into the condition of a second Haiti." These assurances were followed by the passing of the 29th Vic., Chap. 11 declaring that "from after the coming into operation of this Act the present Legislative Council and House of Assembly, and all and every the functions and privileges of these two bodies, respectively shall cease and determine absolutely." Another Act was also passed in the same session declaring "that it shall be lawful for Her Majesty the Queen to create and constitute a government for this island in such form and with such powers as to Her Majesty might best seem fitting and from time to time to alter or amend such government." Effect was given to these acts of the Colonial Legislature by an Act of Imperial Parliament, 29 Vic., Chap. 12, entitled, "An Act to make provision for the government of Jamaica," which enacted that "in construing the secondly recited act the term government should be held to include Legislature and that the powers exercisable by Her Majesty under the two Acts should be exercisable by Her Majesty in Council."

In pursuance of these enactments a single Chamber was established under the designation of the "Legislative Council of Jamaica," by an order in Council dated 11th June, 1866. The Council thus created, consisted of, the Senior Military Officer for the time being in command of Her Majesty's Regular Troops within the Island, and the five persons for the time being exercising the respective offices of Colonial Secretary, of Attorney General, of Financial Secretary, of Director of Roads and of Collector of Customs; who were declared to be official members of the Council, *virtute officii*, and of six unofficial members nominated by the Governor and appointed by the Queen.

In 1883 a petition was sent from the inhabitants of Jamaica for a change in the Constitution of the Colony. By an order in Council of 19th May, 1884* a "moderate step in advance" was granted: nine members of the Council were to be elected by the people. This did not give entire satisfaction.

For one session in 1893 the Governor was not a member of the Legislative Council, which was presided over by a nominated president.

In 1895 the Elected Members were increased to 14 (one for each parish) the nominated members being increased to 10 (4 being in abeyance) and effect was given to a Resolution of the Council (known as the Kerr-Sharp resolution) to the effect that a member of Council must have been for a twelve month immediately preceding his election either a resident of the parish he represents or possess a clear annual income of £150 per annum arising from property on the parish possessed by himself or his wife. In 1899 the Governor added the dormant 4 to the nominated members of the Legislative Council to pass the Tariff Bill. They were thereafter withdrawn, but in 1900 they were reinstated.

In the "Jamaica Gazette" of November 8th, 1923, appeared the correspondence which had taken place between the Governor and the Secretary of State for the Colonies in regard to a proposed reform of the Constitution. The form as submitted by the Secretary of State was discussed in the Legislative Council in 1926 and rejected.

The first registration under Law 22 of 1886 was in August, 1887. The revised lists showed that there was one elector to every 25 persons in the island.

At the General Election, January 1896, there were 38,376 registered voters. The *estimated* population on 31st March, 1896, was 694,865.

At the General Election, January, 1901, there were 16,256 registered voters. The Registrar General's *estimate* of population on 31st March, 1901, was 755,730.

The number of registered voters on the lists of 1903-06 was 8,607.

* The order in Council is printed in the 1894 edition of the Handbook.

The following table shows the number of voters on the Electoral Lists in 1921 and 1930, and the votes recorded in contested elections in 1920, 1925, 1930. The population as ascertained at the census of 1921 is also given:—

PRESENT CONSTITUTION.

THE Political Constitution of Jamaica consists of a Governor, a Privy Council and Legislative Council.

THE GOVERNOR.

The Governor is appointed during His Majesty's pleasure, but his tenure of Office is as a rule confined to a period of six years.

THE PRIVY COUNCIL.

The Privy Council consists of the Senior Military Officer in the island, not being below the rank of Lieutenant-Colonel, the Colonial Secretary, the Attorney-General, and such other persons, not to exceed eight in number, as may be named by the sovereign, or provisionally appointed by the Governor, subject to the approval of His Majesty. The tenure of office of members so named or appointed is limited to five years. The Governor is to consult in all cases with the Privy Councillors, excepting only when the matter to be decided would in his judgment sustain material prejudice by consultation, or is too unimportant to require their advice. The Governor is authorised to act in opposition to the advice and decision of the Privy Council, if in any case it shall appear right to do so, and to report to the Secretary of State for the Colonies the grounds and reasons of his opposition and any member may record on the minutes the nature of the advice or opinion offered and rejected.

THE LEGISLATIVE COUNCIL.

The Council consists of the Governor, as President: five *ex-officio* members, the Senior Military Officer for the time being in Command of His Majesty's regular troops in Jamaica, and the persons for the time being lawfully exercising the functions of the respective offices of Colonial Secretary, Attorney General, Director of Public Works and Collector General nominated members not exceeding ten in number from time to time provisionally appointed, and fourteen Elected Members, elected one for each parish of the island.

No person shall be capable of being elected a Member of the Legislative Council of Jamaica for any electoral District, or having been elected shall sit or vote in the Council unless he either has resided in that Electoral District for twelve months immediately preceding the day of election, or possesses a clear annual income of 150*l*, arising from lands in that district belonging to him in his own right or the right of his wife.

The Governor, if present, or in his absence any member of the Council appointed by him in writing, shall preside and be possessed of an original vote, and also of a casting vote, if the votes be equally divided.

The votes of the *ex-officio* and nominated members of the Council shall not be recorded in support of any Law, vote, or resolution imposing any new tax, or appropriating any public revenue for any purpose other than the payment of the salary or allowances of any public officer in respect of an office to which he was appointed before the date of the Order in Council of 3rd October, 1895, or of the pension or gratuity payable in accordance with the rules in force at the date of that Order affecting pensions and gratuities to any person in respect of an office to which he was appointed before the date of this Order, if not less than nine elected members shall have voted against such law, vote or resolution, unless the Governor shall have declared his opinion that the passing of such law, vote or resolution is of paramount importance to the public interest.

The votes of the *ex-officio* and nominated members shall not be recorded against the unanimous votes of all the elected members on any question unless the Governor shall have declared his opinion that the decision of such question in a sense contrary to the votes of the elected members is of paramount importance to the public interest.

Six members, besides, the Governor or Presiding Member, form a quorum; and the Council shall not be disqualified for the transaction of business by reason of any vacancy or vacancies among the *ex-officio* or elected members.

In the transaction of business and the passing of laws the Council was required to conform to the Royal Instructions of the 29th July, 1887. Any member of the Council may propose any question for debate. The Governor is not to assent to any bill of any of the classes hereinafter specified unless such bill shall contain a suspension, clause, or unless the Governor shall have satisfied himself that an urgent necessity exists requiring that such bill be brought into immediate operation, in which case he is authorized to assent to such bill, unless the same shall be repugnant to the law of England or inconsistent with any obligations imposed upon His Majesty by treaty:—

1. Any bill for the divorce of persons joined together in holy matrimony;
2. Any bill whereby any grant of land or money, or other donation, or gratuity may be made to himself;
3. Any bill whereby any increase or diminution may be made in the number, salary or allowances of the public officers;
4. Any bill affecting the currency of Jamaica or relating to the issue of bank notes;
5. Any bill establishing any banking association, or amending or altering the constitution, powers or privileges of any banking association;
6. Any bill imposing differential duties;
7. Any bill the provisions of which shall appear inconsistent with obligations imposed upon Her Majesty by treaty;
8. Any bill interfering with the discipline or control of Her Majesty's Forces in the island by land and sea;
9. Any bill of an extraordinary nature and importance whereby the Queen's prerogative, or the rights or property of her subjects not residing in the island, or the trade, or shipping of the United Kingdom and its dependencies, may be prejudiced;
10. Any bill whereby persons not of European birth or descent may be subjected or made liable to any disabilities or restrictions to which persons of European birth or descent are not also subjected or made liable;
11. Any bill containing provisions to which Her Majesty's assent has been once refused, or which have been disallowed by Her Majesty.

No private bill is to be passed whereby the property of any private person may be affected in which there is not the saving of the rights of His Majesty, her heirs and such successors, and of all bodies politic and corporate, and of all other persons except such as are mentioned in the said bill and those claiming by, from, through, and under them. The Governor is not to assent to any such private bill until proof has been made before him in Privy Council and entered in the Privy Council Books that adequate and timely notification was made by public advertisement, or otherwise, of the parties' intention to apply for such bill before it was brought into the Legislative Council; and a certificate must be annexed to every private bill signifying that such notification has been given and declaring the manner of giving the same. The laws are to be styled "Laws enacted by the Governor and Legislative Council of Jamaica."

The seats of the nominated members are vacated by a dissolution but they may be re-appointed.

Public officers hold their offices on condition of serving as nominated members of the Council if so required.

Provision is made for the suspension by the Governor (subject to disallowance by the King) of nominated members, and for provisionally supplying the places of nominated members suspended or incapacitated or absent from the colony.

COLONIAL SECRETARY'S OFFICE.

[*Public Buildings, (East Block) King Street, Kingston.*]

As a consequence of the change in the Constitution of the Island in 1865 one of the first steps taken was the reconstruction of the administrative system in conformity with the form of government to be brought into operation. By an Order of the Queen in Council, dated 11th June, 1866, the offices of Colonial Secretary and of Financial Secretary were created and the duties up to that time exercised by the Executive Committee, together with those previously performed by the Governor's Secretary and new duties arising out of the altered form of administration, devolved upon these officers who were each assigned a salary of £1,500. The office of Revenue Commissioner was also created, the performance of the duties thereof, which were in the nature of a direct supervision of the Revenue Department, being required of the Financial Secretary. As in 1870 the finances of the colony had been satisfactorily re-organized, and a complete reconstruction of the Revenue Departments had been secured whereby the necessity for the special services of a Financial Secretary no longer existed, the opportunity was taken on the occurrence of a vacancy in the office of Colonial Secretary to abolish the office of Financial Secretary and to transfer its duties to the Colonial Secretary, whose salary was then fixed, upon special grounds, at £2,000 per annum, £1,500 being fixed as the stipend of any future holder of the office. Provision was at the same time made for the appointment of an Assistant Colonial Secretary.

JAMAICA GOVERNMENT RAILWAY.

Kingston Terminus: Barry Street.

THE Jamaica Railway, under a private Company, was opened for traffic in 1845 to Angels Station—a distance of 14 miles 5 furlongs. In 1869 an extension from Spanish Town to Old Harbour was opened—a distance of eleven miles. In 1879 the Jamaica Railway Company was bought out by the Government of the island for the sum of £93,932, which at the time of the sale represented a capital expenditure of upwards of £267,000. The extension to Porus, 24½ miles from Old Harbour, was opened for traffic in 1885, and that from Angels to Ewarton, 14½ miles, later in the same year.

The Government sold the Railway in 1890 to an American Syndicate, for £800,000 under covenants for the extension of the line to Montego Bay and Port Antonio. In 1894 the extension to Montego Bay was completed—66 miles. In 1896 the extension to Port Antonio was opened—54½ miles.

Under the powers reserved to the Government by the conditions of the agreement for the sale, the line was forfeited to the Government for default in payment of interest on the mortgage Bonds on which the capital was raised, and in 1900 the Supreme Court signed the order vesting the Jamaica Railway in the Government of the Island. It has since been administered as a department of the Government.

In 1913 an extension of 13 miles of line from May Pen to Chapelton up the Rio Minho Valley was opened for traffic, making the total length of line 197½ miles, and in April, 1921, a further length of 2½ miles, from Linstead to New Works, was opened to traffic.

On the 18th March, 1924, the Chapelton to Frankfield extension was opened for traffic, bringing the total length of the line to 210 miles.

JAMAICA WEATHER SERVICE.

(At the Public Works Building.)

A Meteorological Service was established in 1880 in order to have the usual instruments read and recorded at Kingston, to encourage the registration of the rainfall throughout the island, and to give warning of approaching hurricanes. An annual grant of £150 was made for this purpose, and Mr. Maxwell Hall was put in charge of the service: he had to supply the necessary instruments, and to provide for his own assistants.

A first class station was equipped in Kingston. The registration of the rainfall was encouraged by issuing a monthly Weather Report to all the contributors. Mr., now Sir Daniel Morris, established a very fine high-level station at the Cinchona Plantation, 4,900 feet above sea-level, and also took readings on the Blue Mountain Peak.

A large number of investigations referring to such matters as cyclones, wind movements, earthquakes, lightning, magnetic variation, tides, &c., were published from time to time in the Weather Reports, which were so arranged that they could be bound into volumes. In 1892 Rainfall Maps of Jamaica were published by the Institute of Jamaica. A second edition entitled "The Rainfall of Jamaica from about 1870 to end of 1909 with maps" was published in 1911, and a third edition, 1923.

In 1898 the United States Weather Bureau established a first class station at Halfway Tree, as a part of their service in the West Indies and South America. All their stations reported more or less continuously to Washington, and storm-warnings were issued from Washington which were of great service to the whole of the West Indies. The local Weather Service was disestablished at the end of the financial year, and an annual grant of £50 was made to continue the Weather Reports. The observers at Halfway Tree were recalled, and the instruments were sent to the offices of the Direct Cable Co. in Kingston. The hurricane of 1903 occurred: and the earthquake of 1907 wrecked the instruments. In 1907 the Weather Service was re-established; the United States Weather Bureau undertook to establish a first class station at the Public Works Office, and the Kingston observer was to supply them with cablegrams during the hurricane months. Mr J. F. Brennan of the Public Works Department was appointed as observer in Kingston and Mr. Maxwell Hall was given charge of the whole service.

Upon the occurrence of the death of Mr. Maxwell Hall in February, 1920, Mr. J. F. Brennan succeeded as Government Meteorologist.

There are now a First-class station at Kingston; Second class stations at Morant Point Light House, Negril Point Light House, and Climatological stations at Castleton Gardens, Hope Gardens, Stony Hill Industrial School, Hill Gardens.

Storm warnings are based on the general circulars issued from Washington, and are modified, if necessary, by the local service; notices are posted at all the telegraph stations, and the shipping in the ports are duly warned, according to the system published at the commencement of each hurricane season.

At the request of the Admiralty, for the use of Mariners, a system of Wireless Broadcast Weather Messages, giving data of the forenoon and afternoon daily observations taken at Kingston, was adopted from 23rd May, 1921. No code is used, but messages are broadcast "enclair" at 8 a.m. and at 8 p.m., 75th Meridian Time, giving the 7 a.m. and 3 p.m. barometer readings, wind velocities and weather conditions, but since year 1926 confined to months of August, September, and October. The Call Signal being V.Q.I. and messages addressed C. Q. Wave length used in 600 metres on I. C. W. System. The work of broadcasting is conducted by the Direct West India Cable Company.

At the request of the Air Ministry of England, in the year, 1924, the Jamaica Legislative Council approved of the establishment of a Pilot Balloon Service at Kingston. From the months of May, 1925, until the present time, daily ascents have been conducted by the Weather Service, at about 7 a.m. By this system the upper air direction and velocity in metres per second are determined at specified altitudes. Monthly reports of results are supplied to the Air Ministry, as well as to the United States Weather Bureau, regularly. The pilot balloons are about 25 inches in diameter, arranged for a rate of ascent of 180 metres per minute. The greatest altitude so far attained is 26,200 metres, in October, 1928, or about 16½ miles above the level of the ground. These investigations should prove very valuable in the course of time, for Aircraft Service as well as to Meteorology.

Government Meteorologist—J. F. Brennan, Assoc. M. Inst. C.E., F.R. Met. S.

Address—Kingston P.O.

Assistant Meteorologist.—Major G. S. Cox.

TREASURY.

Public Buildings (West Block), King Street.

THE Office of Treasurer* was created by Law 20 of 1868, which abolished the office of Receiver General. Until the Earthquake of January, 1907, the Treasury was in Harbour Street, where it was first established in 1703.

A Parochial Treasury was established in every Parish in 1868, the Collector of Taxes being placed in charge as Parochial Treasurer. Under this system all local payments were made at the Parochial Treasuries under orders, general or special, from the Treasurer. All the Parochial Treasuries were closed on or before the 30th March, 1929. Payments on behalf of the Treasury are now made at the Collectorates of Taxes and District Post Offices.

On the 1st May, 1879, an Inland Money Order System was also established in connection with the Treasury. Orders obtained at the Treasury in Kingston are payable at the post office in the chief town of each parish and each post office in the chief town of a parish is authorized to issue orders payable at the Treasury in Kingston or at the following post offices: Morant Bay, Port Antonio, Port Maria, St. Ann's Bay, Spanish Town, May Pen, Mandeville, Black River, Savanna-la-Mar, Falmouth, Montego Bay, Lucea. STAMP OFFICE.

Old Grace Building, Olivier Place and Barry Street.

STAMP duties were first imposed in this Colony in the year 1760. The Commissioners of Public Accounts were first appointed to superintend the collection of these duties, they were succeeded by two Commissioners of Stamps and finally the office was confined to one Commissioner in association with the Receiver General. Under Sec. 3 Law 17 of 1910, the Collector General became the Commissioner of Stamps, with power to the Governor to appoint a Deputy.

No Stamp Act was in force during the undermentioned periods.

From 1st January to 9th May, 1809; from 1st January to 24th October, 1833; from 1st January to 31st December, 1842.

The use of Adhesive Stamps was added to that of Impressed Stamps in the year 1855, but they are now legal only on Customs Warrants, receipts and Bills of Exchange and Promissory Notes drawn abroad and in any manner negotiated in this island, also on Letters of Allotment and renunciation, Power of Attorney for Voting by proxy and on Bills of Sight under the Customs Consolidated Law, 1877.

The present system of stamping documents is by direct impress by dies, in self recording presses and also by means of over Embossed Stamps.

The Governor may appoint Distributors of Stamps, and Collectors and Assistant Collectors of Taxes are Ex-officio Revenue Stamp Distributors. A discount of 2½ per cent is allowed on the purchase of £5 at a time made by Vendors of Adhesive Stamps, in no other case is discount allowed.

Stamped forms and papers are obtainable at the Stamp Office, Kingston, and at Offices of several Collectors and Assistant Collectors of Taxes and at all Post Offices in the Country.

Deeds and other documents may be sent to the Stamp Office, Kingston, through the various Collectors and Assistant Collectors of Taxes upon the full duty being paid at the time of handing in the document.

Bills of Exchange, inland and foreign, promissory notes and foreign bills of lading must be stamped within seven days after execution. Any other document of the description of an agreement, power of Attorney, etc., should be stamped before the expiry of 14 days of first execution, otherwise a penalty of £3 is incurred. Any document on which is payable *ad valorem* Stamp duty such as Conveyances, Mortgages, Leases, etc., should be stamped before the expiry of 30 days so as to avoid incurring a penalty of £5 and a further penalty equal to the Stamp duty thereon.

No penalty is imposed on documents first executed out of the island if stamped within 30 days after arrival in the Colony.

Spoilt stamps are exchanged if document is tendered within 6 months of the spoiling or return of document to the island.

Unstamped documents liable to Stamp duty are receivable in evidence in criminal proceedings.

A return of Shareholders of all banking Co-partnership except those established by Royal Charter is required to be lodged yearly in the Stamp Office. A composition of 1 per cent. is payable quarterly on notes issued by any banking Corporation, to whom also a yearly license is issued by the Commissioner of Stamps.

Under Law 32 of 1887 a Stamp duty of 2/- and 1/- per £100 is charged respectively for Registering and transferring debentures.

Estate Duty is payable on property passing on death. The Estate Duty Law 21 of 1916 repeals the payment of Probate duty and imposes duty on value of Real and Personal Property according to the graduated scale denoted at Sec. 1 of Law 15 of 1929.

The rate of estate duty shall be according to the following scale:—

For information and comparison the figures are given below of the English rates of Estate Duty, 1925.

CUSTOMS, EXCISE AND INTERNAL REVENUE.

THE Revenues of the Island—parochial as well as general—are collected and accounted for by a Department under the control and direction of an officer styled the Collector General of customs, excise and internal revenue, in whose office is a staff consisting of a Supervisor of Revenue, chief clerk, and nineteen other clerks, divided into three classes. In the Collector General's office (Public Buildings, King Street) in addition to the duties devolving on a department charged with the management and direction of the officers employed in the collection of a large and varied revenue, the accounts of the collecting officers are thoroughly examined, and the statistical returns for the whole island are compiled.

In Kingston separate establishments are maintained for the collection of customs revenue and the collection of the excise and internal revenues; but in the other parishes the whole of the duties are performed by the collector of taxes or by subordinate officers acting under his supervision.

The staff for the conduct of customs business at the port of Kingston, consists of a collector, who is also shipping master and inspector of invoices; a chief clerk, four first class clerks; six second class clerks; four assistants; a surveyor; and assistant surveyor who is also chief tide surveyor, ten landing waiters; a tide surveyor at Port Royal and twenty-five out-door officers, divided into three classes. The staff for the collection of excise and internal revenue consists of a first class collector; and two second class clerks, one assistant collector; two assistants; and five lockers and gaugers and an officer in charge of Excise Stores.

The staff in each of the other parishes consists of a collector, one or more assistant collectors, landing waiters, lockers and gaugers, clerks and assistants.

Each collector of taxes is stationed at the principal town of the parish, and (except in Kingston) besides the duties devolving on him in connection with the collection of revenue he has to discharge the duties of parochial treasurer, and as such has charge of the local treasure chest, into which all local payments pass and from which all local claims against the Government are met. The collector issues and pays money orders drawn on and by the Treasurer in Kingston or any other collector of taxes. The collectors do not travel except in special cases when ordered by the head of the department. In their offices are prepared and kept the rolls of taxpayers and collections, the valuation roll, the militia register and the register of licenses.

Assistant collectors of taxes possess the same powers of collecting and enforcing the payment of taxes as collectors. One or more are allotted to each parish, according to its size and importance, and they are stationed either at the collector's office or at some place of importance, in the parish. They are subordinate to the collectors and aid them by receiving money at their offices and at fixed stations throughout the parish, which they visit periodically for the convenience of the taxpayers. The several distilleries in the island are under the inspection of these officers, who visit them at uncertain periods for the purpose of comparing the still house books and vouchers and checking the quantity of rum on hand.

Collectors and assistant collectors of taxes are also distributors of stamps.

All collectors and a few assistant collectors are provided with clerks to assist in filling up in-givings and receipts, keeping the office records, and performing clerical duty generally. These officers are not allowed to receive revenue as they are not under security for that purpose. One clerk in each office is required to act as check officer. He is required to give security for the faithful performance of his duty. This clerk initials all vouchers in proof of their correctness; he checks and initials the entries in the cash book, counts the cash at the close of the day with the collector to see that the public money in the chest agrees with the cash book and keeps a second key of the chest.

Collectors and assistant collectors are required to enter into substantial security for the proper collection of, and accounting for, money; and are guaranteed by the Jamaica Civil Service Mutual Guarantee Association.

IMPORT DUTIES.

A Law to Consolidate and Amend the Laws Relating to Duties on Imports.

BE it enacted by the Governor and Legislative Council of Jamaica, as follows:—

1—This may be cited as "The Tariff Law, 1922," 4 of 1925.

2—(1) On and after the coming into operation of this Law, there shall be raised, levied collected and paid unto His Majesty, his heirs and successors, for the use of the Government of this Island, upon the several articles imported into this Island and enumerated in the First Schedule to this Law, the several duties therein set forth, subject to the following conditions, viz.:—

(a) The rates of duties set forth in the column headed "Preferential Tariff" of the First Schedule shall apply to goods the growth, produce or manufacture of the United Kingdom or the Dominion of Canada or of any part of the British Empire to which any preferential tariff in force in the Colony for the time being has hereafter been made to apply by action taken under Sec. 26 of this Law: Provided that such goods shall be accompanied by such evidence of origin as may be prescribed by the Governor in Privy Council from time to time.

(b) The rates of duties set forth in the column headed "General Tariff" of the First Schedule shall apply to all goods not entitled to admission under the column "Preferential Tariff" of such Schedule.

(2) The Governor in Privy Council may from time to time make Regulations for carrying out the purposes of this section. All such Regulations shall be published in the Jamaica Gazette and shall have the force of Law.

3—The articles enumerated in the Second Schedule to this Law shall be admitted into the Island free of duty.

4—Anything in the next preceding two sections to the contrary notwithstanding the articles enumerated in the Third Schedule to this Law when imported into the Island for temporary use either by an owner or by an exhibitor but not for sale, provided that the articles enumerated in items 2 and 3 had been in use abroad, shall be admitted on the security of a deposit of thirty per centum of the duties leviable on similar articles if im-

ported for Island use, such deposit to be refunded on the exportation of the articles by the owner or exhibitor within two months of importation. Should the articles not be exported within two months of importation the Collector shall withhold a sum equal to five per centum of the duty payable at time of importation for each month or part of a month during which such articles are kept in the Island beyond the specified period of two months up to the limit of eight months. But if not exported within eight months of the date of importation the articles shall be deemed to have been finally imported for Island use and shall be entered and the duty thereon paid in the manner prescribed by sections 48 and 49 of Law 18 of 1877, or by any Law passed in amendment thereof or substitution therefor, allowance being made for any deductions already taken and brought to account from the amount deposited.

Articles deemed to have been finally imported for Island use, if not entered and duty paid as aforesaid, shall if sold or kept in the Island beyond eight months be liable to be seized as "uncustomed" goods under the provisions of section 156 of Law 18 of 1877 or under any Law passed in amendment thereof or substitution therefor or the person appearing as the importer may be proceeded against under section 34 of Law 24 of 1885, or under any Law passed in amendment thereof or substitution therefor.

5—The articles enumerated in the Fourth Schedule to this Law shall pay duty at the rate of five per centum ad valorem: Provided that if they are the growth, produce or manufacture of the United Kingdom or of the Dominion of Canada or of any other part of the British Empire to which any preferential tariff in force in the Colony for the time being has hereafter been made to apply for by action taken under Section 26 of this Law, such articles shall be admitted into the Island free of duty.

6—In every case in which the value of goods imported into this Island is to be ascertained for the purposes and in manner provided in section 2 (1) of Law 20 of 1912 or under any Law passed in amendment thereof or substitution therefor and in which exchange is a part of such value the rate of conversion shall be taken as that prevailing between Jamaica and the country whence the goods are imported on the day that due report of the ship bringing the goods shall be made in pursuance of section 42 of Law 18 of 1877, or under any Law passed in amendment thereof or in substitution therefor.

7—(1) In this Law the expression "Cotton Piece-Goods" means all woven fabrics made entirely of cotton in piece lengths but shall exclude all cloth manufactured in the piece with a border or selvedge marking a point for cutting to make up into an article of a distinctive character.

(2) The Preferential Tariff for Cotton Piece-goods shall apply to the following parts of the British Empire:—Empire of India, Dominion of Canada, Newfoundland, Dominion of New Zealand, Commonwealth of Australia, Union of South Africa, British Possessions and Protectorates in Africa, Fiji, Malta, Gibraltar, Cyprus, Hong Kong, Ceylon, Straits Settlements, Mauritius, Falkland Islands, Seychelles, St. Helena, British Honduras, Bermuda, Bahamas, British Guiana, British West Indies.

8—Without prejudice to the generality of the power to make Regulations under other sections of this Law the Governor in Privy Council may by such Regulations provide for the certificates, invoices and bills of lading to be furnished in respect of all or any goods to which any Preferential Tariff in force in this Colony for the time being applies and may also by Regulations prescribe the conditions governing the direct importation of such goods and their passage through another country.

9—The ordinary outside casing or covering of any goods, wares or merchandise liable to a rated duty as set forth in the First Schedule, or exempt from duty as set forth in the Second Schedule shall be exempt from duty under this Law, except as hereinafter stated but in respect of goods liable to duty on the value thereof, the value of all outside and in side coverings or receptacles containing such goods, together with the value of all labels wrappers or other attachments, shall be deemed to be a portion of the value of such goods for duty, and shall be included in such value. Provided, that all packages or coverings containing free or rated goods, apparently designed for use other than in the importation of the goods they contain, shall be subject to the same rate of duty as would thereon be levied if imported empty, or separate from their contents.

All outside packages containing goods liable to rated duties as set forth in the First Schedule as well as goods liable to advalorem duty, shall be liable to advalorem duty and when the package contains advalorem and free goods, the outer package shall be liable to the same rate of duty as such advalorem goods.

10—In the case of spirits subject to duty according to their strength of proof, such strength shall be ascertained by means of Sykes ("or Sikes") Hydrometer; and in case such strength cannot be correctly ascertained by the direct use of the Hydrometer, it shall

be ascertained by the distillation of a sample and the subsequent test in like manner of the distillate.

11—Whenever goods liable to duty on importation according to the value thereof are imported, the invoice of such goods shall include the value of all packages, receptacles coverings and wrappers, in which such goods are packed or contained, together with all charges due or payable in respect of the preparing, packing and putting up of the goods in the condition ready for shipment, and import duty shall be payable on the value of such packages, receptacles, coverings, wrappers and charges.

12—It shall be lawful for the Inspector of Invoices or other proper Officer of Customs without prejudice to the power to take samples for examination conferred by the Customs Consolidation Law, 1877, or by any Customs Law for the time being in force in this Island or by this Law, to accept as prima facie evidence of the character of cement entered for Island consumption a declaration of the consignor attested in writing by a reliable cement tester, in the country of manufacture, recognized as such by the Governor of this Island, that the article so entered is cement, conforming to the standard fixed by the Governor in Privy Council.

13—Any person who, without lawful excuse, the proof of which shall be on the person accused, sends or brings into this Island, or who being in this Island, has in his possession any bill-heading or other paper appearing to be a heading, or blank capable of being filled up and used as an invoice, and bearing any signature or other attestation purporting to show, or which may be used to show that the invoice which may be made from such bill-heading or blank is correct or authentic, is guilty of a misdemeanour and liable to a penalty not less than £20 and not exceeding £100, or in the discretion of the Court, to imprisonment, with or without hard labour, for a term not exceeding twelve months, and the goods entered under any invoice made from any such bill-heading or blank shall be forfeited.

14—Wines and malt liquors may be converted into vinegar in any Bonded Warehouse, under such Regulations as the Collector General may approve, and thereupon such wines and malt liquors shall be liable to the duty on vinegar only.

15—Upon the re-importation of articles once exported of the growth, produce, or manufacture of this Island, upon which no internal tax has been assessed or paid, or upon which such tax has been paid and refunded by allowance or drawback, there shall be levied, collected and paid in such manner as the Collector General may direct, a duty equal to the tax imposed by the internal revenue laws upon such articles, if identified as island produce, and if not so identified, then such articles shall be subject to the same rate of duty as other imported articles of the same kind.

Whenever any goods upon which a drawback has been allowed under section 20 of this Law are returned to this Island such goods shall pay the import duty in force at the time of such return.

16. If any goods, wares and merchandise upon which any duty shall have been paid under this law, are duly exported within two years of their first importation there shall be a drawback in respect of such goods of an amount equal to the preferential duty mentioned in the column headed "Preferential Tariff" of the First Schedule to this Law: provided that where any duty has been paid on goods exported as ships' stores or on any of the articles enumerated in the Fourth Schedule to this Law there shall be a drawback equal to the amount of duty paid if the article is exported within two years of its importation; provided further that such goods are exported in the original, whole and unbroken packages in which the same were imported, and that no drawback of duty shall be allowed unless the amount of drawback on any one transaction is not less than four shillings.

Goods, wares and merchandise upon which any duty under Law 2 of 1922 shall have been paid, on its being proved to the satisfaction of the proper Officer of Customs that a mistake has been made and that such goods are not the goods ordered by the importer and that such goods have been returned to the exporter, if duly exported within three months of their first importation shall receive a drawback of the full duties paid on importation.

17—The duty paid on provisions and stores supplied by local merchants or contractors to His Majesty's Navy or Military Authorities in this Island for the use of His Majesty's Navy or Army, or to Naval Officers, or Naval Messes or to other branches of the Public Service and to Public Institutions, shall be refunded under such conditions and regulations as may from time to time be prescribed by the Governor in Privy Council.

Provided that such drawback, or refund shall be limited to such articles as would have been entitled to be admitted free of duty, had they been in the first instance consigned to the purchaser.

18—There shall be paid a drawback equal to the duty paid on their importation on shipbuilding materials, or accessories of any kind for shipbuilding which shall have been imported into this Island and used in the construction or repairs of foreign-going vessels of any kind, on presentation to the Chief Officer of Customs at the port of importation of a certificate to the effect that such materials and accessories have been used as aforesaid, under the hand of the builder or repairer of such vessel or boat, who used the same together with a declaration from such builder or repairer that he believes such ship-building materials and accessories to have been imported into the Island.

Paints and oils used in painting any foreign-going ship while temporarily in port shall be included in the term accessory.

19—Drawback of duties shall not be payable on goods which have become unmerchantable subsequent to importation or which have been in actual and bona fide use.

20—Where imported materials on which duty has been paid are used in the manufacture or putting up of articles manufactured or produced in this Island there shall be allowed on the exportation of such articles a drawback equal in amount to the duty paid on such materials so used: Provided, that when the articles exported are made in part from domestic materials, the imported materials, or the parts of the articles made from such materials shall so appear in the completed articles, that the quantity or measure thereof may be ascertained.

Provided also that where the actual quantity or measure cannot be ascertained by ordinary methods it shall be lawful for the Governor in Privy Council by regulation made under section 16 of this Law to approve an approximate scale of drawback.

21—On the exportation of bread or biscuit manufactured in this Island of imported flour, there shall be paid a drawback equal to the duty mentioned in the column headed "Preferential Tariff" of the First Schedule, on the flour used in making the same, but not to exceed the duty payable on a like quantity of bread or biscuit imported.

22—The several drawbacks under this Law shall be subject to the regulations and provisions of the several Acts or Laws for the time being in force with reference to such drawbacks.

23—In construing the language employed in Schedule 2 of this Law to describe articles intended to be free of duty the articles named as free must be considered in their primary character in relation to the use under which exemption is given. When the character of such articles has been added to, modified or changed by embellishment or combination with some other article whose primary character is other than that described against the article on the free list the consideration as to whether the composite article is liable to duty shall be the relative value of the component parts considered under the two schedules of the tariff, viz.—the schedule imposing duty and the schedule granting exemption. If the value of the dutiable portion exceeds the value of the portion coming under a description on the free list then duty shall be charged on the composite article; but if the value of the portion formed by any items appearing on the free list exceeds the value of the portion not exempted then the article considered in its complete character shall be exempt from duty.

24—No goods imported free of import duties under the provisions of any law, certificate or concession shall be sold or transferred without the importer notifying the Collector General, and paying such import duties as would be payable if the purchaser or transferee had, on the day of sale or transfer, imported the goods, and any such goods sold or transferred without such import duties being paid as are hereby declared to be payable, shall be liable to be seized wherever found and forfeited, and the person so selling the same shall be deemed guilty of an offence under section 157 of The Customs Consolidation Law, 1877 (Law 18 of 1877) or against any Law passed in amendment thereof or substitution therefor. The provisions of the last mentioned Law, and any laws amending the same or substituted therefor in so far as they relate to goods liable to be seized and forfeited under those Laws, or any of them, shall apply to goods liable to be seized and forfeited under this Law.

25—In amendment of The Customs Consolidation Law, 1877 (Law 18 of 1877) and Laws amending the same it is hereby provided that

- (a) The combined certificate of value and of origin and Form of Invoice set forth in the Fifth Schedule of this Law in respect of goods liable to advalorem duties shall be declared to in all cases where the rates of duties set forth in the

column headed "Preferential Tariff" of the First Schedule shall apply; and such certificate with the omission of the part headed "Origin" shall be declared to in all other cases of goods liable to ad valorem duties; and such certificate with the omission of the part headed "Value" shall be declared to in all cases where preferential duties other than those ad valorem shall apply and in all cases where duties other than those preferential and other than those ad valorem General Tariff, shall apply the Form of Invoice alone shall be required. Invoices shall be presented in original and duplicate to the Collector of Customs who shall retain the original; Provided that in the event of an importer not having received duplicate Invoice the Collector shall retain the original Invoice: Provide that the combined certificate of value and of origin and Form of Invoice above specified may be altered and amended from time to time by the Governor in Privy Council as provided in section 2, subsection 2 of this Law.

- (b) That after the words "any invoice" in the twelfth line of section 25 of Law 18 of 1877, there be inserted the words, "he may order an entry to be made by Bill of Sight under Section 51 of this Law, or"

26—The Legislative Council may from time to time by resolution extend to any part of the British Empire the whole or any part of the preference given by this Law to the United Kingdom and Dominion of Canada, and thereafter all the sections of this Law dealing with the Preferential Tariff shall apply to goods from such part of the British Empire in accordance with the terms of the Resolution.

By Resolution passed by the Legislative Council on the 6th July, 1922, under Section 26 of Law 2 of 1922, the Preferential Tariff was extended to embrace the Dominion, Colonies and Dependencies, viz.: The Dominion of New Zealand, the Colonies of Cyprus, Fiji, Bahamas, Barbados, British Guiana, British Honduras, Trinidad, Leeward Islands, Grenada, St. Lucia, St. Vincent, the Dependencies of the Turks and Caicos Islands and the Cayman Islands. By a further Resolution passed on the 26th March, 1924, the Preferential Tariff was extended to Newfoundland and the Irish Free State.

27—In this Law the letters "p.c." in any one of the tariff columns in the First Schedule represent and have the meaning of the words "per centum, ad valorem."

28—Notwithstanding anything to the contrary contained in The Revenue Temporary Protection Law, 1898 (Law 23 of 1898) no import duty paid during the month of March, nineteen hundred and twenty-five under the provisions of the said Law 23 of 1898 in accordance with an Order issued under the said Law by the Governor in Council to the Collector General shall be repaid to the person who paid the same.

29—In the case of importations of goods the manufacture or produce of a foreign country the currency of which is substantially depreciated the value for duty shall not be less than the value that would be placed on similar goods manufactured or produced in the United Kingdom and imported from that country, if such similar goods are made or produced there. If similar goods are not made or produced in the United Kingdom, the value for duty shall not be less than the value of similar goods made or produced in any European country, the currency of which is not substantially depreciated.

The Collector of Customs may determine the value of such goods, and the value so determined shall, until otherwise provided, or determined by the Governor, be the value upon which the duty on such goods shall be computed and levied under regulations prescribed by the Governor.

30—The Laws mentioned in the Sixth Schedule to this Law are hereby repealed to the extent specified in the third column of that Schedule: Provided that any Regulations made under or by virtue of any of the Laws so repealed and in force at the time of the coming into operation of this Law shall continue in force, so far as the same may not be rendered inapplicable by any section of this Law, until fresh Regulations repealing or adding to the existing Regulations have been made under this Law.

31—The provisions of this Law relating to any preference given to the Dominion of Canada or to any part of the British Empire shall remain in force for and during the term of the agreement made with the Dominion of Canada and subject to the terms of such agreement.

VALUATION COMMISSIONER.

A VALUATION of all real property in the island was undertaken in 1901, under Law 22 of 1901, to enable the Government to see whether one tax for general, and one for parochial purposes could be made to take the place of the many different rates then payable by landowners.

Prior to this, holders of real property were required to pay a house tax on its annual value, a property tax on each acre of land according to the cultivation or crop upon it, and a school tax on the annual value of houses. They also paid a quit rent of one penny per acre, and a holding tax according to the size of their holding. In addition to these, poor, sanitary and other rates were levied for municipal purposes.

A Valuation Commissioner was appointed to direct and bring to completion the preparation of the valuation rolls.

This law was a tentative measure to last for five years, but on its expiration in 1906 the condition of the country did not appear to warrant a re-valuation, and the time was extended for a further period of five years. The law was from time to time amended and in 1911 a consolidation and amending permanent law was passed, Law 3 of 1911 under which a general revision of the values previously obtained was made. This law was amended by Law 23 of 1919 under which the Valuation Commissioner ceased to be a member of the Board of Assessment and the number of members appointed by the Governor was increased to four in each Parish.

Under these laws every person is required to tender an ingiving of the description and value of his property, and where no ingiving is made the Collector issues his assessment. For the purpose of settling cases in which the ingiver and Collector cannot agree as to the value of the property, a Board of Assessment for each Parish has been appointed. The Board is composed of the Resident Magistrate and the Chairman of the Parochial Board of the parish and four other persons appointed by the Governor. The following persons have been selected for the several parishes:—

The Mayor of the Corporate Area of Kingston and St. Andrew is an ex-officio member of the Boards of Assessment for those parishes:—

Kingston	R. E. H. Melhado, A. S. Hendricks, L. C. E. Nunes, Robt. Gillies.
St. Andrew	Hon. G. Seymour Seymour, G. W. Byrnes, H. G. T. Drew, W. H. Landale.
ST. THOMAS	C. E. Randall, Col. L. G. Harrison, R. A. Lightbourne.

Portland	C. A. S. Hinshelwood, E. Ernest Gray, T. Adrian Gray, Geo. D. Henriques.
ST. MARY	A. D. Goffe, J. H. Scarlett, F. H. DeLisser, S. Magnus Walker
ST. ANN	Hon. Sir T. L. Roxburgh, c.m.g.; C. N. Hemming, Chas. Costa, Alex. Gordon.

ST. JAMES	A. B. Lowe, Joseph Shore, Edmund Hart, G. L. McFarlane.
HANOVER	J. G. Robertson, J. Thompson Evans, G. Levy, E. P. Beresford.
WESTMORELAND	Arthur Alcock, Richard Harvey, W. H. Farquharson, John D. Winder.
ST. ELIZABETH	Stafford Maxwell, Hon. A. E. Harrison, W. H. Griffiths, C. E. Isaacs.
MANCHESTER	W. H. Coke, John G. Miller, Dr. L. B. Mickle, Major J. B. Thursfield
CLARENDON	Hon. G. W. Muirhead, Clarence Lopez, H. E. Upton, Theophilus Harty.
ST. CATHERINE	T. H. Sharp, Ian H. Campbell, N. C. Gyles, C. Gilpin-Hudson.
PORT ROYAL	G. W. Clements, I. I. Dahl, James Jones, Anthony Miller.

A Re-Valuation of Property was completed in 1919 and became effective from 1st April, 1920. Taxes are levied on the value of properties thus obtained, under Laws 15 and 16 of 1903, 14 of 1907 and 5 of 1916.

Under the provisions of Law 23 of 1919, the Valuation Roll which was completed in 1919, and which became effective from the 1st April, 1920, should remain in force for a period of seven years. This period expired on the 31st March, 1927. A re-valuation of property should, therefore, have taken place during the year 1926. Law 3 of 1926, however, was passed to provide for the continuation of the existing Roll until the Legislative Council shall by resolution otherwise determine. At the Spring Session of 1929, the Legislative Council determined that the re-valuation should take place within the financial year ending on March 31st, 1930, and this is now proceeding.

MONEY ORDERS.

Money Orders are issued at the Head Office, Kingston, and at the Post Offices of the capital of each parish. Applications for money orders addressed to the Postmaster for Jamaica or to a Postmaster are free of postage. (The registration fee of 2d. must, however, be prepaid.)

The commission on money orders drawn on the United Kingdom, United States, Canal Zone, Canada, and any other country except those named in the following sentence is sixpence for the first £ and threepence for each additional £ or fractional part. The commission on Money Orders drawn on Trinidad, Barbados, British Guiana, Windward and Leeward Islands, Turks Island, Cayman Islands, Bermuda, Bahamas, and British Honduras, is sixpence for first £2 and two pence for each additional £ or fractional part.

TELEGRAPH MONEY ORDERS.

The system of Telegraph Money Orders is in operation between the United Kingdom and Jamaica. The remitter of a Telegraph Money Order is required to pay, in addition to the M.O. commission, the cost of the Telegram of Advice at the ordinary rate (2/4) or at the "deferred" rate (1/2) per word. Every word in the telegram has to be paid for; in the case of a "deferred" telegram, the instruction "L.C.O." is charged as one word, and the word "Postmaster" has also to be sent in every case and must be paid for. Further details may be had from the Chief M.O. Office, Kingston.

POSTAL ORDERS.

Amounts of poundage.—Postal Orders are sold and cashed at all Post Offices in Jamaica, and in the countries marked with an asterisk (*) on page 47 Post Office Guide. These orders are printed on a paper bearing an "all-over" watermark consisting of the Royal Cipher—a crown and the letters G. v R., and they measure slightly less than 7 in. in length.

The commissions charged on orders issued are as follows:—

At 6d., 1s., 1s. 6d., 2s., 2s. 6d.	1d.	At 7s. 6d.	2d.
At 3s., 3s. 6d., 4s. 6d., 5s.	$1\frac{1}{2}$ d.	At 8s., 10s.	$2\frac{1}{2}$ d.
At 20s.	$4\frac{1}{2}$ d.

Postage Stamps Affixed to Postal Orders.—The sender of a postal order, whether made payable in the United Kingdom or elsewhere (excepting Canada), may increase its value by an amount not exceeding 5d. by affixing postage stamps not exceeding two in number to the face of the order. No credit will be given for stamps which are in excess of three or which are affixed elsewhere than in the spaces provided. Odd half pence will not be paid. Stamps perforated with initials or marks, or embossed or impressed stamps cut out of envelopes, post cards, &c., cannot be accepted for this purpose.

REPLY COUPONS.

International Reply Coupons are sold at the Money Order Office, Kingston at 4d. each, and Imperial Reply Coupons at $2\frac{1}{2}$ d. each. The former represent the postage on a single-rate letter mailed in any country of the Postal Union, and the latter the postage on a single-rate letter mailed in any country of the British Empire. Coupons are cashed at the rate of $2\frac{1}{2}$ d. for a 50-centime, and $1\frac{1}{2}$ d. for an Imperial coupon.

REGISTRATION (OVERSEAS.)

If it is proved to his satisfaction that a *letter or packet duly admitted to Registration* has been *entirely lost whilst in his custody* the Postmaster undertakes to *pay an indemnity of 50 francs*, except in cases beyond control (e.g., tempest, shipwreck, earthquake and war.) *No compensation*, however, is payable *except in the case of the loss of the entire letter or packet*; and *no claim will be admitted if made more than a year after the letter or packet was posted.*

The Postal Administrations of all countries and colonies included in the Postal Union give the same undertaking in respect of registered letters or packets lost whilst in their custody.

If it is desired to obtain *compensation* in the case of *abstraction of contents* of a letter, or to provide for a higher maximum than 50 francs, recourse must be had to the *Insurance System*. See "Insurance" below.

INSURANCE—OVERSEAS (For Letters only.)

Letters tendered for insurance will be accepted by the Post Office on payment of the fee and subject to the conditions stated below:—

Fee—5d. for every £12 of value *in addition to the postage and registration fee.*

A LETTER is the only article of mail matter which will be accepted for insurance; post cards, printed papers, commercial papers or sample packets will not be accepted.

Letters containing coin, anything made of gold or silver, precious stones, jewellery, or any article liable to customs duty in the country of destination cannot be sent by insured letter-post. Objects of value which cannot be sent in insured letters may generally be sent in insured parcels.

The insurance system is specially applicable to letters which contain bank-notes, coupons, securities, bonds and other documents of the kind.

PARCEL POST.

A parcel post exchange exists between Jamaica and most foreign countries.

The parcel mail for the United Kingdom and Irish Free State, United States of America, Bermuda, Canal Zone, Canada, Costa Rica, Panama, Honduras and Turks, Cayman and Bahama Islands is forwarded by each available *direct* opportunity. That for the majority of the W. I. Islands is sent and received via Trinidad and Barbados.

The parcel mail for Ecuador, Nicaragua and Venezuela is forwarded via Panama.

Parcels for the majority of other countries are forwarded via the United Kingdom.

Foreign (except to U. S.) and Colonial parcels cannot be registered, but they may be insured to certain countries.

For rates of postage, dimensions, weight, conditions of insurance, etc., etc., consult Post Office Guide, sold separately.

For information concerning the rates of duty levied on parcels received from abroad, reference should be made to the "Schedule of Import Duties," (vide "Revenue Department") in earlier pages of this Handbook.

A Customs clearance fee of 6d. will be collected on every parcel-post parcel (whether it contains dutiable matter or not), and on every package (other than parcel-post) which on examination is found to contain dutiable matter.

TELEGRAPHS.

The charge for telegrams throughout Jamaica is ninepence for any number of words up to twelve, and a half-penny for every additional word. The address and signature are both counted. The charge is paid in postage stamps affixed to the message.

If the addressee resides within one mile of the terminal office the telegram is delivered by messenger without any additional charge; but if beyond that limit the following portorage fees must be prepaid:—

a. At the rate of 6d. per mile (one way) counting from boundary of free delivery.

b. If delivery by horse messenger is required, at the rate of 1/ per mile (one way) counting from the office.

The above rates are maintained whenever practicable. If messengers cannot be obtained at these rates the Postmistress is authorised to make the most reasonable arrangement possible.

The office hours are from 7 a.m. to 5 p.m., daily—Sundays and Public Holidays excepted.

Night, Sunday and holiday* services may be obtained at the following rates:—

* In respect of holiday services, note conditions set out in par. d.

a. After 6 a.m. until 8 p.m., double rate for telegram, plus a fee of 1/ to each clerk handling the telegram and 6d. for the messenger.

b. After 8 p.m. until 6 a.m. double rate for the telegrams plus a fee of 2/ to each clerk handling the telegram and 1/ for the messenger.

c. The charges of 6d. and 1/ respectively, for messengers, refer only to telegrams for delivery up to one mile from the office.

d. On Public Holidays all offices are open from 7 a.m. to 9 a.m., and telegrams are accepted at the *ordinary week day rates during these hours*.

e. Certified copy of a telegram may be obtained on application to Postmaster for Jamaica, on payment of a fee of 6d. If special search is necessary the cost incurred will be charged in addition.

Inland telegrams are retained on file for 3 months, and foreign telegrams for 6 months.

f. Abbreviated telegraphic addresses (inland) for use at any office, may be registered with the Postmaster for Jamaica at a cost of 5/ per annum, or upon payment of £2 for a permanent address.

Cablegrams. Full rate cablegrams for any part of the world may be handed in at any Telegraph Office on payment of the inland tolls in addition to the amount charged by the cable company.

Cablegrams addressed to the United Kingdom and Ireland or Europe, will be routed "Via Imperial," unless otherwise marked by the sender.

The route offers the advantage of a direct, speedy and reliable service between Jamaica and the United Kingdom and Ireland and Europe; it is entirely British owned and operated, and touches only British territory.

Patrons are urged to mark their cablegrams "Via Imperial," for which indication no charge is made.

Deferred Cablegrams, in plain language are accepted at half rate to most parts of the world.

Week End Letter Cablegrams in plain language are accepted for the United Kingdom and Ireland, United States of America, Canada, Newfoundland, Bermuda and Turks Island and certain other places.

S. A. and Canada at rates varying from 7/6 to 10/10 for a minimum of 20 words, and 4½d. to 6½d. for each additional word.

The prefix "W. L. T.," which is counted and charged as one word, must be written as the first word of the address.

These cables must be written entirely in plain language, and must reach the cable Company's Office in Kingston before closing hour on Saturday, and are deliverable on the Monday morning following.

All British Route to the B.W.I.—The new "All British" cable to the British West Indies is now open. Messages for this route should be routed "Via D.W.I. Cable Co., Ltd." Rate, 1/3 per word to British West Indian Islands only. Deferred messages 7½d. per word.

MEDICAL SERVICE.*

Districts—There are 45 Medical Districts at present under the charge of 45 District Medical Officers, and the affairs of the Public Hospital have been entrusted to the direction of the Superintending Medical Officer, who has under him at that Institution a Senior Medical Officer, assisted by 5 Resident Medical Officers, and a Supernumerary who however, is liable to be sent away at any time to fill a temporary or permanent vacancy in any district. During the year 1886-87 the Lunatic Asylum was placed under the direction of the Superintending Medical Officer. A Medical Superintendent and 3 Assistant Medical Officers are employed and reside at the institution.

Cost of Medical Service.—The actual expenditure for the Medical Service of the colony for the year ending 31st December, 1928, was £153,690 10s. 5d. The receipts were £5,452 6s. 1d., and the actual cost after deduction of the receipts was £148,238 4s. 4d.

* Historical details of the development of the Medical Department will be found in earlier issues of the Handbook.

Full information concerning the duties of District Medical Officers, Medical attendance on the Poor, etc., can be obtained from the Island Medical Office, North Street, Kingston.

Leave and Pensions.—As an outcome of the Report of the Royal Commissioners instructions were issued that District Medical Officers are not to be allowed to engage in any business unconnected with their profession; or to occupy land except in cases where the occupation of the land necessarily accompanies that of the house.

During the first year of the constitution of the Government Medical Service its officers received no concessions from the Government by way of pension or leave of absence. If a Medical Officer required to quit the island on the ground of ill-health he had to forfeit all his subsidised salary in order to provide a substitute, but in the year 1877 the Regulations in respect to leave of absence and pensions, were sanctioned by the Secretary of State. Section 24 of the Pension Law, 34 of 1885, preserves the right to pensions to those District Medical Officers who entered the service before the coming into operation of that law and officers joining the Department since and holding appointment at the time of the passing of the Pensions Regulation Law, 26 of 1892, or who may subsequently be appointed, were at liberty to contribute to a Pension Fund.

A recent law has abolished contributions to the Pension Fund.

Medical attendance on the Poor.—The subject of medical attendance on poor persons who, although not paupers, are unable to pay the fee of four shillings, nominally considered the lowest charge by the Medical Practitioners, having been under consideration for some time, the Governor, pending the establishment of Government Dispensaries throughout the island, passed in September 1880, certain rules for affording medical aid to them under a ticket-system.

Dispensing School.—A Dispensing School has been established at the Public Hospital for the purpose of training efficient Dispensers for the several medical institutions of the colony; there are at present 16 students undergoing a course of instruction.

Hospitals.—The accommodation allowed in the Public General Hospitals and Lepers Home, as far as room for beds is concerned, is as follows, namely:—

Morant Bay Hospital	30 beds	Cave Valley Hospital	12 beds	Chapelton Hospital	33 beds
Hordley Hospital	40 "	Falmouth	" 25 "	Lionel Town Hospital	50 "
Port Antonio	" 55 "	Ulster Spring	" 6 "	Spanish Town Hospital	70 "

Admissions to the Public General Hospitals are now restricted to the following classes of cases by order:—1. Cases of serious accident; 2. Cases of acute disease requiring hospital treatment; 3. Cases likely to be benefited by operation, and, of course, constables and coolies who have to be admitted under the Law.

Accidents and Acute Illness.—Cases of serious accident or acute illness, if in a condition to be moved, should be sent to the nearest Public General Hospital, where they will be admitted at any hour of the day or night. If the person is too poor to pay for a conveyance the police should be informed, and they will in such special cases make the necessary arrangement for removal to the hospital. The following are the rules governing the admission of patients to the Public Hospital, Kingston, and to Public General Hospitals:—

Regulations for the guidance of the Out-door Department at Public General Hospitals.

1. There will be an Outdoor Department at each Public General Hospital.
2. The Outdoor Department will be opened daily. Patients must attend between the hours of 9 and 10 a.m., Sundays excepted, or between such other hours as the Governor may sanction, and those patients only who come within those hours will be attended to by the District Medical Officer.
3. (1) Persons entitled by law or regulation to free medical attendance may, on presenting themselves, be treated as outdoor patients without prejudice to any other claim they may have on the services of the Medical Officer, such as persons on the pauper roll, constables, and East Indian Immigrants.
- (2) Other persons seeking medical aid under this system must produce a written recommendation from a person authorized by the Governor in that behalf. A person with a ticket from a Ticket Distributor may also attend under the provisions of sub-section (4).
- (3) Medical Officers may also treat under this system
 - (a) persons who come without a recommendation but whose circumstances are known to them, and who are deserving cases for treatment;

(b) persons seeking admission to hospital, but whose cases are unsuitable for treatment there;

(c) persons for whom there is no room in hospital.

(4) Persons presenting tickets from distributors of medical relief tickets, may also be treated, and for this purpose distributors are authorised to issue tickets representing fees of 3s. and 2s. respectively, the amount being determined in accordance with the measure of relief necessary in each case. One-third of the fees is to be credited to Government to cover the cost of drugs, etc., and two-thirds to be retained by the Medical Officer.

4. Any person who, except under the instruction of the District Medical Officer, has allowed more than one month to elapse between visits or applications for medicine must produce a fresh recommendation.

5. Persons authorised to grant recommendations shall be appointed by the Governor, and the Custos or senior Resident Justice of the Peace of each parish may nominate suitable persons to the Governor for such responsibility, and any appointment so made shall only be held during the pleasure of the Governor, who may at any time cancel the appointment.

6. Persons authorised to grant recommendations for outdoor treatment at a hospital must in each case state from their own personal knowledge that the person recommended is unable to pay any fee for medical attendance.

7. Each patient treated and prescribed for shall have his or her name, age, and sex, with date of attendance, noted in a book to be called the "Register of Out-patients."

8. The treatment given to each patient shall also be entered in the register on each occasion on which he attends hospital and the name of the patient and date of attendance shall in each case be marked on the bottle or package of medicine delivered. Medicine shall not be prescribed for more than one week at a time.

9. Every patient shall provide his own bottle or may pay 1d. for a bottle.

10. Medicines shall be made up by the Government Dispenser at the hospital daily.

PUBLIC HOSPITAL, KINGSTON.

All cases of accident or emergency will be admitted at any hour of the day or night by the Resident Medical Officer on duty.

A Venereal Diseases Clinic was re-started at the Public Hospital, Kingston, on 1.9.23. On Saturday of each week persons unable to pay for continuous treatment outside are given Salvarsan injections on payment of a small fee.

No seaman, hired, articulated or apprenticed to any vessel, and no person apprenticed to any person, shall be admitted into the hospital except on occasion of serious accident or other extreme emergency, until the consignee of such vessel, or the proprietor or agent of such estate, or the master or employer of the person indentured or apprenticed, shall have given a letter of guarantee to the Chief Medical Officer and Director undertaking to the extent of £20 for the payment of the hospital dues at the rate of 2s. 6d. per diem for each seaman and 1s.6d. per diem for each apprentice, and for payment also of funeral expenses in case of death.

All persons (other than articulated seamen, indentured immigrants or apprenticed servants) who are admitted into the wards of the hospital for medical treatment as in-door patients, who are not wholly destitute of means may be required to contribute towards their maintenance in the hospital by payment of such proportion of the hospital dues fixed by Law as may be determined by the Chief Medical Officer and Director.

ATTENDANCE AT HOME.

The following are rules regarding action to be taken in case of childbirth occurring among poor persons who are at the time destitute of the means of procuring such aid and where, at the same time, there is danger to the woman's life:—

- The cases to be relieved under this system must combine the two conditions of danger to the woman's life (or to that of the child) and evidence of destitution of the means to procure medical aid at the time.
- The applicant for this form of relief in all cases where practicable is required to sign a promise to refund to the parish within a specified time the amount of the medical officer's fee and mileage, if any, in such instalments as may be named in the form.
- Should the applicant bring any portion of the fee it should be accepted as an instalment and be brought to account as a refund by the Inspector. In cases where the medical officer receives any money (on being applied to in the absence of the Inspector) he should forward it to the Inspector, and it is the Inspector's duty to endeavour to procure the remainder, the Medical Officer being in all cases paid his claim in full by the Parochial Board.

The order to visit should ordinarily be sent to the District Medical Officer. When his services are not immediately available it should be sent to the nearest registered medical practitioner willing to attend for the fee and mileage allowed.

- In the absence of the Inspector (or Assistant Inspector) application should be made to the medical officer direct.
- The fee to a medical officer or practitioner for his services in a case of this kind has been fixed at one guinea, and mileage of 1/6 per mile one way.

QUARANTINE.

THE practice of Quarantine in this Island has been considerably modified since the official investigation into its working in 1851. The laws now in force are 38 of 1893, 23 of 1894, 23 of 1895, 6 of 1903, 26 of 1908, 39 of 1909, 8 of 1913, 28 of 1914 and 11 of 1918.

The Governor in Privy Council is authorised to declare any port or place to be an infected port or place within the meaning of the Quarantine Law of 1893, and vessels arriving from such port or place are liable to quarantine, the duration, &c., of which depends upon the circumstances of each case, and is left to the discretion of the Quarantine Board.

Whenever a vessel arrives at any port in this island, not coming from any place declared by the Governor in Privy Council to be "infected," and not having at the time of arrival any infectious disease on board, or not having had any death from such disease during the voyage, the Health Officer or Visiting Officer is authorised to admit her to free pratique, or pratique under restrictions according to circumstances.

If a vessel on arrival is not provided with a bill of health from the last port touched at, the Visiting Officer shall, under the provisions of Section 2 of Law 28 of 1914, order such vessel to hoist a Quarantine Flag and anchor at the Quarantine Ground until released.

Vessels arriving with ballast are placed in quarantine pending the decision of the Quarantine Board. Provision is made for the discharge of ballast and subsequent admission to pratique of vessels with or without disinfection as may be ordered.

There is power to the Governor to appoint quarantine stations and to frame rules for the same.

Rules.—The following Rules were made in 1918 for carrying out the Quarantine Laws :—

1. Ships placed in quarantine by the Visiting Officer are to hoist the yellow flag on the top of the main mast and are to take up their anchorage without delay in the quarantine ground where they are to remain until released by order of the Quarantine Board.

2. The quarantine ground shall be pointed out by the Health or Visiting Officer.

3. A Constable is to be placed on board each ship in quarantine and is to see that all Rules and Regulations in respect of quarantine are strictly carried out.

4. No personal communication is to take place between a vessel in quarantine and the shore without permission from the Quarantine Board. No boats from the shore or from other boats or vessels whether in quarantine or not, shall be allowed to have personal communication with a ship in quarantine without permission from the Quarantine Board.

5. No ship shall be allowed to make fast to the quarantine buoy at Port Royal placed to mark the quarantine ground there, or to anchor within a hundred yards of that buoy.

6. Lighters or boats conveying cargo or coal, or other supplies to ships in quarantine may be towed to the quarantine buoy; and to prevent personal communication with a ship in quarantine, all persons on board such boats or lighters must then quit them and return outside the limits of the quarantine ground, unless otherwise ordered by the Quarantine Board.

7. The boats or lighters so left may then be towed alongside the ship in quarantine by her crew and unloaded, but no packages are to be returned to the boats or lighters from the ship. When the boats or lighters are empty they are to be towed back by the crew of the ship to the quarantine buoy, and after the men so employed have left them the

persons who may be in charge of such boats or lighters may proceed to the quarantine buoy to fetch them away, unless otherwise ordered by the Quarantine Board.

8. All boats belonging to ships in quarantine are to hoist a yellow flag in the bow when absent from their ships.

9. Passengers in a ship that is placed in quarantine may, with the sanction of the Health or Visiting Officer, be landed in the ship's boats at such quarantine station or place as may be pointed out by the Health or Visiting Officer and subject to his instructions and supervision.

10. Cases of sickness among the crew or passengers of a ship in quarantine may, with the sanction of the Health or Visiting Officer, and under his instructions and supervision, be landed in the ship's boats at the quarantine station.

11. No articles of clothing or bedding that have been used in cases of disease shall be permitted to be landed without the permission of the Quarantine Board or Health Officer.

12. The mail bags from a ship in quarantine shall, before being handed over to the Postal Authorities undergo such process of fumigation as the Quarantine Board or Health Officer may consider necessary.

13. Any person who may have died on board a ship in quarantine shall be buried in such place as shall be pointed out by the Health Officer.

14. In case of a ship in quarantine proceeding to sea the Constable shall be previously landed at the quarantine station if so ordered by the Quarantine Board. The Pilot who accompanies the ship to sea shall proceed on his return to the quarantine station if so ordered by the Quarantine Board, and both Constable and Pilot shall remain there in quarantine for the same period as the ship would have been kept if she had remained at anchor.

15. Any person who may be found guilty of any infringement of any of these Rules or Regulations shall be subject to a penalty not exceeding ten pounds.

16. Quarantine Rules—1 to 17 passed in Privy Council, 2nd April, 1874, are hereby cancelled.

The following further Rules were approved by the Governor on the 2nd April, 1884, for carrying out the Quarantine Law:—

"If at any time by reason of the failure to comply with any Rule of this Board or for any other sufficient reason, it should be found impracticable to receive passengers that are on board a ship placed in quarantine into the Quarantine Station, or other place that may be approved of by the Quarantine Board, such passengers will be required to remain on board until the ship is released from quarantine or until arrangements can be made for removing them from such ship.

"No passenger or other person on board a ship in quarantine will be allowed to leave the ship for the purpose of being landed at the Quarantine Station, or other place that may be approved by the Quarantine Board, before payment has been made to the Visiting Officer of the amount payable, in accordance with the following scale, for the maintenance of such passenger during the period of detention in quarantine:—

The following is the scale of charges for maintenance of persons detained in quarantine approved by the Governor in Privy Council on the 14th May, 1923:—

For first class passengers at the rate of 12/- per day. For second class passengers at the rate of 8/- per day. For third class passengers at the rate of 5/- per day. Labourers, 4/- per day.

Children, according to class, charged as under:—

8 years of age and under 12 years—half rates; 3 years of age and under 8 years—quarter rates. Under 3 years of age—free.

These rates to be increased by half in the case of passengers under treatment in the hospital at the Station.

The Governor in Privy Council has allowed a somewhat more liberal dietary being given the occupants of the Quarantine Station. Ice, soup, also coffee and tea at dinner; fruit, jam, marmalade and cocoa for breakfast and luncheon; mutton and English sausages once a week for 1st class passengers. An improvement in the diet scale for 2nd and 3rd class passengers, has also been made.

The following Rule was made by the Governor in Privy Council on the 16th January, 1889:—

Should the Master of any vessel that has been ordered into quarantine in any port of the island desire to proceed to any other port of the island before such vessel has performed, and been duly discharged from quarantine, he should give notice of such desire to the Visiting Officer of the port at which his vessel is in quarantine, and shall in such notice name the port to which he desires to proceed, and it shall be the duty of the Visiting Officer to furnish to such Master a certificate showing the number of days the vessel has

been in quarantine, and the number remaining to complete the quarantine term; and thereupon it shall be lawful for him to proceed to such last mentioned port; but he must enter such port flying the quarantine flag, and proceed straight to the quarantine ground at such port.

The Master of any vessel neglecting or contravening any of the provisions of this rule shall incur a fine or penalty not exceeding ten pounds.

The Governor in Privy Council on the 24th October, 1895, under Section 1 of Law 23 of 1894, declared the diseases of Scarlet Fever, Diphtheria, Measles and Whooping Cough, to be diseases against the introduction of which into this Island the provisions of the Quarantine Law 38 of 1893 were intended to provide; and His Excellency in Privy Council fixed the following periods for the purpose of the proviso to Section 2 of Law 38 of 1893. viz.:

The following Rules for the government and direction of the Quarantine Station at Green Bay are binding on the officers, servants and inmates of the Quarantine Establishment.

1. During the existence of quarantine restrictions the Quarantine Station shall be under the direction of the Health Officer for the ports of Kingston and Port Royal for the time being.

2. It shall be the duty of the Health Officer, during the continuance of such restrictions to visit the Quarantine Station daily, if practicable, or as frequently, as may be deemed necessary with a view to ascertain the health of the inmates; and in case of the existence or outbreak of any contagious or infectious disease as plague, cholera, small pox or yellow fever, the Health Officer shall be empowered to take all necessary measures to secure the separation and isolation of those who are sick of any such infectious disorder from those who are well.

3. It shall be the duty of the matron to take charge and care of the equipment of the quarantine station to receive and issue stores, and to superintend the ordering and preparation of meals, to direct and control the nurses and domestic servants placed under her, and to maintain the cleanliness of the wards and dormitories.

4. The inmates of the Quarantine Station are strictly enjoined not to damage or destroy the property of the institution.

5. The inmates are also strictly enjoined to observe all the sanitary arrangements that may be made by the Medical Officer and the domestic arrangements made by the Matron and in case of the violation of any such arrangement any such inmate shall be liable to a fine or penalty not exceeding ten pounds.

6. Smoking within the dormitories is strictly prohibited under a fine or penalty not exceeding forty shillings.

7. All lights in dormitories other than those sanctioned by the Medical Officer shall be extinguished at 10 p.m., after which hour all loud conversation, singing or noise must cease, and quietude conducive to sleep must be maintained during the night. Any person violating this rule shall be liable to a fine or penalty not exceeding five pounds.

8. It shall be the duty of the Constables placed in charge at the Quarantine Station to see that rules 4, 5, 6 and 7, are strictly observed.

The Quarantine Station which was opened on the 5th April, 1881, is situated at the mouth of the Harbour of Kingston at Green Bay, opposite Port Royal, from which it is

distant about two miles, its distance from Kingston being six miles. It stands on a projecting cliff overlooking the harbour, and is some 50 to 60 feet above sea-level. The grounds belonging to it are ten acres in extent. The Quarantine Station buildings consist of blocks standing somewhat apart from one another. The 1st class quarters measure 112 ft. x 21 ft. x 20 ft., and have a spacious piazza on all 4 sides, 22 ft. wide. They consist of 24 rooms, 12 for males and 12 for females, with 4 rooms for married couples in addition. The second-class quarters were built to hold 10 male and 5 female passengers. There are 160 cots for the accommodation of 3rd class passengers. When the wards are full, accommodation can be found in the piazzas for a large number of cots. Each division is supplied with separate lavatory and bathroom. The hospital is placed higher up the hill than are any of the other buildings, being about 100 feet above the sea level. Accommodation is provided for 8 male and 6 female patients with a dispensary and room for attendants. The hospital at the station is now completely mosquito proof screened. A second hospital, mosquito proof, to hold four patients, is situated higher up the hill than the old hospital.

There is a Lyons's Steam Disinfector at the station, where passengers' clothes, bedding and other articles may be properly disinfected. Water is stored in two tanks having the following capacities: 13,500 gallons and 10,000 gallons. These have been recently made mosquito proof. A third tank capable of holding 10,000 gallons has been erected alongside the hospital. A jetty has been erected running out into the sea some 150 feet. Good fishing is abundant, and there is a fine beach for sea-bathing and for a promenade.

The immediate neighbourhood of the grounds is an uncultivated hillside; but all the buildings command extensive prospects. There is an uninterrupted sea view to south and south-east, and the inland view to the eastward is striking. Looking across the harbour there is the city of Kingston in the foreground, and beyond it lie the magnificent mountains of the eastern part of Jamaica; conspicuous among them is the Blue Mountain Peak, 7,360 feet above the sea. A fine sea breeze blows during the hottest part of the day, and the nights are cool.

The Secretary of the Quarantine Board, is responsible for the interior economy of the establishment; but when it is occupied by passengers the Health Officer at Port Royal is in medical charge. A superintendent, a labourer and a house-cleaner, reside permanently in the Institution, while a nurse and sewing woman generally reside in the institution, but may be removed when there is no one undergoing quarantine. Other nurses or servants are employed when required.

CO-OPERATIVE HEALTH WORK, 1929.

In 1929, a Malaria Survey, a Tuberculosis Survey, a Tuberculosis Dispensary and a Health Unit were inaugurated. The Hookworm Treatment campaign extended its activities to Manchester and St. Ann, and the preliminary sanitation of St. Thomas was started. It has been found necessary to employ a second unit to undertake the preliminary sanitation of districts, and this unit is at present working in St. James.

The most important development in public health during the past year, however, was the acceptance by the Legislative Council of the Report of the Medical Commission, which provides for the employment of a full time Health Officer in each parish; the Health Officers to be selected, paid, and supervised by the Central Board of Health. This plan, if approved by the Colonial Office in England, will become effective during 1930.

The present co-operative health work consists of the following units:

1. The Control of Hookworm Disease through Sanitation and Treatment; 2. A Bureau of Health Education; 3. School Hygiene Work; 4. A School for Sanitary Inspectors; 5. Malaria Control Work; 6. A Tuberculosis Survey and Study Clinic; and 7. Parochial Health Departments. The above health work, with its varied activities, is an outgrowth of the Hookworm Campaigns which were begun in 1919. These campaigns and, to a large extent, all the co-operative units of health work, have been conducted from an educational standpoint with the object of making a demonstration of what can be accomplished by intensive work under suitable direction. This intensive method, first used by Dr. H. H. Howard in British Guiana, has proved very suitable for Jamaica, since here the responsibility for sanitation and the prevention of epidemics is in the hands of local Boards elected by the people. Education in public health is cumulative and in Jamaica at present the results of the intensive method are becoming evident in reduced sickness and death rates (the death rate for 1928 was 19.7, this being the first year it has been so low) and the manner in which the people are building better homes and improving their conditions of living.

1. *Sanitation and the Control of Hookworm Disease.*—The control of hookworm and the other bowel filth diseases is undertaken by four Units, two engaged in sanitation and two in treatment work. The sanitation staffs consist of two Supervising Inspectors called "Overseers of Works," each assisted by from six to eight Sanitary Inspectors. These inaugurate latrine building and carry out the sanitation of areas selected for demonstration hookworm campaigns. No treatment work is undertaken in areas which have not been sanitized in advance, and, after the treatment campaigns, the trained inspectors are left as the permanent sanitary staff of the parish. In the work of sanitation, the cost of latrines is borne by home owners except in the case of paupers. The latrines erected during the past year in St. Thomas and St. James are of a more substantial type than any thus far erected in the Island.

* For historical information, see issues of the Handbook prior to 1927.

Up to the present time the parishes of Clarendon, St. Catherine, St. Mary, St. Andrew, Portland, St. Ann and Manchester have had sanitation and treatment campaigns, while sanitation campaigns are at present being conducted in St. Thomas and St. James. Leaving out Kingston, where the city comprises the entire parish, there remain only four parishes to be reached and two of these, Westmoreland and Trelawny, have already arranged for and are awaiting hookworm work.

The head of the Colony's sanitation and public health work until November was the Senior Sanitary Medical Officer, Dr. G. C. Strathairn, whose work included activities designed to have local boards of health maintain sanitation and enforce the health regulations in a uniform manner.

The two Units of Hookworm Treatment have been conducted in the parishes of Manchester and St. Ann during 1929. A total of 29,617 persons had been examined for hookworm infection, of whom 19,294 were found infected; 45,586 treatments had been administered to 18,514 patients and 16,680 of those treated had been cured. A total of 96 lectures had been given by members of the staffs to an estimated audience of more than 17,000 people; this being in addition to house to house instruction and demonstrations in the districts under treatment.

Each treatment unit consists of a staff of 16 with a budget of £3,000 per year, while an additional £1,000 is provided for drugs, printing and stationery. Although the Director for Jamaica for the International Health Division of the Rockefeller Foundation still has supervision of the work of sanitation and treatment of hookworm disease, the work is now entirely financed by Government.

In addition to the units of sanitation and treatment as outlined above, Clarendon parish provides a full time Health Officer and a staff of seven who conduct hookworm examination and treatment work in connection with their other duties. The budget for this work amounts to £2,000. St. Andrew parish also provides a full time Health Officer and eight inspectors at a cost of £2,000; while Portland spends £1,500 for public health work. St. Catherine provides a budget of £1,750 for health and sanitation work. St. Mary has a co-operative health department with a budget of about £2,500, while a similar department was opened in Trelawny, November first. St. Ann spent more than £1,200 on its health programme for 1929.

The total amount being expended by Government and the parishes which have had co-operative work, amounts to more than £18,000.

2. *Bureau of Health Education.*—Greater demands are being made on the Bureau of Health Education than during any previous year. The monthly circulation of Jamaica Public Health has increased to 19,000 copies; the bulletin is now used as a text-book of hygiene in more than 200 of the larger Elementary schools of the island. In addition to the monthly publication, literature on sanitation, hookworm disease, typhoid, malaria, and other subjects, has been prepared for distribution. A collection of the stories appearing in Jamaica Public Health have been used in book form for use in the schools. This book has met with the approval of the Colonial Office in London who has obtained copies for distribution to all Colonies of the Empire.

A Pre-Natal Division forms an important part of the activities of the Bureau. A series of letters has been issued and is sent to expectant mothers. Applications for these letters come from all parts of the colony.

The financial accounting of the Hookworm Commission, the School Hygiene Unit, the Tuberculosis Study Clinic, the Malaria Commission, and the Parochial Health Unit is carried out in the office of the Bureau of Health Education. Also the Bureau assists a number of local organizations in public health programmes; among these may be mentioned the Salvation Army, the Child Welfare Association, the Anti-Tuberculosis League, and the Empire Health Week Movement.

The International Health Division provides a budget of £480 to meet the salaries of two clerks and the office expenses of the Bureau, while the Director for Jamaica for the Rockefeller Foundation is the Director of the Bureau. Government provides offices, printing and stationery—the Bureau had more than 225,000 bulletins printed during 1929—amounting to more than £1,800 per year. In addition it provides free postal facilities and, also, an annual sum of £300 for the purchase of educational material.

3. *School Hygiene.*—Units of School Hygiene were conducted in the parishes of Kingston, St. Andrew, St. Mary, and Trelawny during 1929. The International Health Division, from March, co-operated financially only with the Trelawny Unit, the cost of the other Units having been assumed by the local Boards.

School Hygiene work consists of the examination of pupils for physical defects and for hookworm disease and the treatment of these. Great success has been met in the

correction of dental defects at clinics held at schools. In connection with these clinics, with which the Division has given co-operation, lectures and demonstrations are given at each school by the dentists and the Health Officers.

The budget for a Unit of School Hygiene amounts to £500; in Trelawny, 25% of this amount is being contributed by the International Health Division. 9,213 pupils were treated in the four parishes during the year and the total number of treatments being 21,314.

4. *School for Sanitary Inspectors.*—The third session of the school was held from January to April and was attended by inspectors from twelve of the fourteen parishes. The course of study was extended and more detailed than that given during previous sessions; it included lectures and demonstrations, laboratory and field work. The local boards of health have already become highly interested in the work of the School and most of them now require sanitary officers to have special training before taking up their appointments. Up to the present 57 Inspectors have had training at the school, all of whom are employed in public health work. The School is affiliated with the Royal Sanitary Institute; more than half of the students have taken the examinations of the Institute and obtained its certificate.

The School is financed by Government, but the laboratory was partly equipped by an appropriation of £100 from the International Health Division during 1927. The Director for Jamaica of the Rockefeller Foundation is a member of the faculty of the School.

5. *Malaria Commission.*—The Malaria Survey, conducted during 1928 under the direction of Dr. Mark F. Boyd of the Foundation's Staff, was completed in March, 1929, and control measures based upon the findings in the survey were begun in the parishes of St. Mary, St. Thomas, and St. Catherine, by Dr. F. W. Aris who assisted Dr. Boyd. During the spring and summer three areas were selected where various methods of control such as ditching and drainage, the use of larvacides, the treatment of cases and the relocation of dwellings could be tried out. A fourth area, Annotto Bay, was mapped and surveyed in September and October, and anopheline control by Paris Green dusting began in November.

At its last session, the Legislative Council provided £4,000 for malaria control work during 1929. The Foundation contributes the salary of a technician to assist in blood examinations, mosquito identification and dissection, as well as a small contingent fund. The report of Boyd and Aris on malaria in Jamaica was distributed by the Bureau of Health Education during the year.

The personnel at the end of 1929 consisted of a Medical Officer, two technicians, three field officers and incidental field labour. The Director for Jamaica, of the Foundation, acts as Director of the Commission.

6. *Tuberculosis Study Clinic.*—Under an agreement with Government the International Health Division is conducting a Tuberculosis Study Clinic to determine the extent and manner in which the disease spreads in Jamaica. Dr. Eugene L. Opie of the Henry Phipps Institute is conducting the survey; he first visited the island in February, 1928. Returning in June of the same year for a stay of five weeks, he directed the opening of a Dispensary at Headquarters House and inaugurated other activities of the Survey. Upon his third visit, June to July, 1929, Dr. Opie made a study of the records of the Dispensary and suggested plans for the establishment of an Infirmary as a means of extending the work of the survey. Studies are also being made through tuberculin tests at schools, the asylum, the prison, the reformatory, and other institutions, and a autopsy material is being collected and studied.

Parochial Boards are taking steps to isolate tubercular inmates in separate wards and new buildings for this purpose have been erected in three parishes. The staff of the clinic consists of a Medical Officer, Dr. E. Joyce Isaacs, a Head Nurse, and a Secretary paid by the International Health Division. Government provides offices and drugs, while the Anti-Tuberculosis League provides an additional nurse for home visits and a fund for the purchase of food for indigent patients. During the year 527 patients were examined of whom 56% were found to be suffering from the disease. 3,217 home visits were made by the nurses. 2,018 tuberculin tests were carried out and 1,369 sputum examinations made.

7. *Parochial Health Departments.*—As a final step in the development of Public Health work in Jamaica, on October 1st, 1928, there was opened in the parish of St. Mary, a demonstration Unit of Parochial Health Work. This department is under the direction of the Central Board of Health for three years and the object is to demonstrate the best methods of conducting parochial health activities. The yearly budget of the Department

amounts to £2,000, of which the parish provides £1,000, Government £500, and the International Health Division £500. Dr. I. J. Cruchley, who received a year of study leave at the Johns Hopkins School of Hygiene, is Health Officer of the St. Mary Department.

The first work of the department is the control of communicable diseases. The control of typhoid, especially, has been undertaken and along with this has been the supervision of sanitation and the installation of latrines. As a necessary adjunct to the control of the communicable diseases has been public health education through lectures and demonstrations. School medical inspection and the treatment of pupils for hook-worm and dental defects is also under way, and a Tuberculosis Dispensary is being conducted. The examination of food handlers, the control of water supplies, and the improvement of general health conditions in towns and villages are other activities undertaken by the Health Officer and his department.

The staff of a Parochial Health Department consists of a Health Officer who has had special training, a chief and four sanitary inspectors, and an office clerk, all being employed for their full time. At the end of the first six months, the St. Mary Parochial Board increased the number of sanitary inspectors to eight, the three additional inspectors being paid entirely by the Board.

On November 1st, 1929, the second Parochial Health Department was opened in Trelawny. Dr. J. M. Hall, who had spent a year of study at Johns Hopkins School of Hygiene, took charge of the Department. The personnel consists of a Health Officer, three inspectors and an office assistant, all employed full time. The problem of communicable diseases, especially typhoid and tuberculosis, are receiving first consideration.

The manner in which Public Health work has developed in Jamaica is shown in the yearly expenditures of the Central and Local Boards of Health during the past few years:

Year.	Amount.
1922-23	£45,121
1923-24	56,653
1924-25	60,957
1925-26	69,107
1926-27	75,689
1927-28	83,941

MIDWIFERY.

The Midwifery Law, 1919 (Law 25 of 1919), makes provision for the registration of persons qualified to practise midwifery in Jamaica.

The Registrar under the Law is the Registrar General of Births and Deaths, General Register Office, Spanish Town.

The following persons may be registered as Midwives:—

- (1) Any person who has before the passing of this Law practised successfully as a midwife for more than three years as shown by a certificate signed by a District Medical Officer.
- (2) Any person who produces to the Registrar a certificate of competency from a Board appointed, under Section 7 of the Law, partly by the Central Board of Health and partly by the Governor to examine candidates for certificates of competency. Examinations are to be held in January and July in every year.
- (3) Any person who produces to the Registrar a certificate of competency as a midwife granted by the Examining Board of the Victoria Jubilee Lying-in Hospital or by any Body or Institution approved by the Governor in Privy Council.

Fee for registration under (1) is one shilling (1/-); but registrations thereunder must

have been made within twelve months from the first day of January, 1920. Fee for Registration under (2) is ten shillings and six pence (10/6). Registration under (3) is free.

POLICE.*

In 1866 it was considered necessary to abolish the old police force, dating from 1834, and a law was passed in 1867 (No. 8) establishing a new and improved police or constabulary force. Under that Law the Governor is empowered to appoint an Inspector General and a staff of inspectors and sub-inspectors; and the Inspector General is authorised to admit persons as sub-officers and constables. No person is eligible for membership unless he can produce a certificate of character from a magistrate or other gentleman of position and can pass a satisfactory medical examination. He must not be less than five feet eight inches in height and 33 inches round the chest; not less than 20 or more than 25 years of age, and unmarried; and be able to read, without hesitation any printed or written document and to write a fair hand. Every candidate is enrolled for five years (3 months on probation—Law 2 of 1901) and he is bound to serve and reside in any place to which he may be appointed—his native parish and the parish with which he may be connected by marriage or family ties not being one of the districts to which he may be sent.

REGISTRATION.

The offices of Registrar General and Deputy Keeper of the Records have been amalgamated and are located in Spanish Town.

General Register Office, Spanish Town

Compulsory registration of births and deaths came into force on 1st April, 1878. During the years 1844 to 1855 there was a voluntary system of registration of births and deaths under the Acts 7 Victoria chapter 54 and 8 Victoria chapter 47. These Acts were repealed in 1855 by the Act 18 Victoria chapter 29 as the voluntary system of registration was found to be ineffectual.

*For general information on Education see Part VIII.

Baptisms and Burials by Ministers of the Church of England were, previous to 1st April, 1878, recorded at the Island Secretary's Office, Spanish Town (now the Island Record Office). These registers have been transferred to the custody of the Registrar General.

From the 1st April, 1878, births and deaths have been registered throughout the island, each parish being divided into registration districts with a Registrar for each district, the central office being at Spanish Town.

The present system of registration of marriages came into operation in 1880. There are in the registry records of marriages by ministers of the Church of England beginning in 1666, and by ministers of other denominations beginning in 1840.

BIRTHS.

When a birth takes place personal information of it must be given within 42 days to the Registrar of the district in which it took place, and the register be signed in his presence by one of the following persons:—1. The father or mother of the child; if they fail 2. The occupier of the house in which the birth took place 3. A person present at the birth or 4. The person having charge of the child.

The duty of attending to the registration thus rests firstly on the parents. One of them must within 42 days of the birth give to the Registrar *by word of mouth* the information needed and must sign the register in his presence. If they fail, without reasonable cause, they become liable to a penalty of forty shillings. In case of their failure one of the other classes of informants above named must give personal information and sign the register within the same period.

If at the end of 42 days registration has not been effected the Registrar may send a requisition to any qualified informant requiring him or her to attend for the purpose and any person who fails to comply with such requisition is liable to a penalty of forty shillings.

After three months a birth can only be registered on the informant making, before the Registrar and some Justice of the Peace, or in place of such Justice some other respectable witness, a solemn declaration as to the correctness of the particulars required to be registered and on payment of a fee of one shilling to the Registrar.

After twelve months a birth can be registered only on the express authority of the Registrar General and on payment of a fee of ten shillings.

It is often of great importance to persons of all classes to be able to prove their age and the place of their birth. Legal proof of these is to be obtained from the civil registers as kept by law. Parents owe to their children, therefore, a careful attention to registration.

DEATHS.

When a death takes place personal information of it must be given within five days to the Registrar of the district in which it occurred, and the register be signed in his presence by one of the following persons:—

1. The nearest relative of the deceased present at the death, or in attendance during the last illness; if they fail
2. Some other relative of the deceased in the same Registrar's District. In default of any relatives
3. (a) A person present at the death; (b) the occupier of the house in which the death happened. If all the above-named fail
4. (a) An inmate of the house; or (b) the person causing the body to be buried.

Relatives present or in attendance are, therefore, firstly required to attend to the registration. One of them must give to the Registrar of the district *by word of mouth* the information needed and sign the register. In case of their failure one of the other persons above-named must give personal information and sign the register in their stead.

When a registered Medical Practitioner has attended the deceased during the last illness that Practitioner must sign and give to some person qualified as an informant

certificate of the cause of death, and the person so receiving the certificate must deliver it to the Registrar at the time of registration. The penalty for not giving or duly delivering the certificate is two pounds.

It is advisable that every death should be registered and a certificate of registry (which is given free of charge) be obtained from the Registrar before the funeral. This certificate should be delivered to the Minister or other person who performs the funeral or religious service.

If no such certificate of registration is thus delivered the Minister or person who buries, or performs any funeral service, or who presides at the burial, must, within seven days after the burial, give notice thereof in writing to the Registrar of the district, and if he fails so to do he is liable to a penalty of ten pounds.

After twelve months a death can be registered only on the Registrar General's express authority and on payment of a fee of two shillings.

A careful attention to these requirements is likely to prove of the highest importance to the surviving relatives and friends of the deceased persons.

MARRIAGES.

There are four ways of obtaining the necessary legal authorisation for the performance of a marriage in Jamaica, (Law 25 of 1897 and Law 28 of 1905).

I.—Publication of Banns—In this case the persons intending marriage must each give written notice to a Ministerial Marriage Officer of the congregation to which he or she belongs, or to any Ministerial Marriage Officer having charge of a place of worship in the parish in which they reside (when both belong to the same congregation a single notice will suffice, or when one does not reside in Jamaica a single notice by the other will suffice) and thereupon the Marriage Officer, if satisfied that the notice is conformable to law, will publish the banns in legal form for one Sunday, or one Saturday in the case of persons professing the Jewish religion. In addition to such publication the particulars of the marriage notice must be entered on a specified form and affixed on the outside of the principal door of the place of worship at which the banns are published for a period of seven clear days. After due publication the Marriage Officer will give a certificate of the fact to the person who gave the notice and thereupon the marriage may be contracted and solemnized (a) by or before a Ministerial Marriage Officer, according to such form and ceremony as the parties may see fit to adopt, provided that the requirements of the Marriage Laws as to witnesses, &c., and the form of contracting words be observed; or (b) in the presence of a Civil Registrar of Marriages and two credible witnesses, with the declaration and form of contract provided. No religious service is permitted before the Civil Registrar.

II.—By a License from the Governor.—In this case application must be made and the prescribed form of declaration be furnished to the Colonial Secretary, together with the sum of five pounds; the value of the stamp to be borne upon the Governor's license. Immediately upon the issue of such license the marriage may be solemnized by or before a Ministerial Marriage Officer, or in the presence of a Civil Registrar of Marriages as above described in the case of banns.

III.—By Public notice at the Office of a Civil Registrar of Marriages.—In this case residence in the parish for not less than fifteen clear days before the giving of notice is requisite. When both persons intending marriage reside within the same parish a single notice will suffice. When one of them does not reside in Jamaica a single notice by the other will suffice. The notice must be posted up in a conspicuous place on the outside of the Civil Registrar's Office during seven clear days, at the end of which time a certificate of due publication will be given by that officer, and the marriage may then be solemnized in either of the ways already described as after publication of banns or Governor's License.

IV.—By License from a Justice of the Peace, &c., Law 28 of 1905.—By special license from a Justice of the Peace for any parish, the Clerk of the Resident Magistrate's Court for the parish in which the parties or one of the parties intending marriage resides, or any person appointed for the purpose. Before the granting of such license there must be produced to such Justice of the Peace, Clerk of the Resident Magistrate's Court, or other appointed person, a notice of marriage signed by the applicants for the license, together with a statutory declaration from some minister of religion (being a Marriage Officer), stating that the applicants are well known to him and that the statements

made by them in their marriage notice are to the best of his knowledge and belief in every particular just and true. Before the issue of any Marriage Licence, the person issuing it must secure that such licence be stamped with revenue stamps to the value of two shillings and sixpence, and shall himself cancel the stamps before he delivers the licence.

If the marriage is not solemnized within three months from the date of the licence or certificate of publication the licence or certificate becomes void and of no effect.

Registration, Certified copies, &c.—Indexes of marriage, birth and death registers, are kept at the General Register Office, Spanish Town. Searches can be made there and certified copies of entries in Registers be given on application and payment of the prescribed fees.

TRADE MARKS.

Law 37 of 1911 consolidates and amends the Laws relating to Trade Marks. It came into operation on March 1st, 1912, and supersedes Law 17 of 1888 and the Laws amending the same. Rules made thereunder will be found in the Supplement to the Jamaica Gazette of 13th March, 1913.

The Registrar General is the Registrar of Trade Marks, and he keeps a Register of Trade Marks at the General Register Office, Spanish Town.

Any person claiming to be the proprietor of a Trade Mark who is desirous of registering the same must apply in writing to the Registrar in the prescribed form, copies of which can be obtained from the General Register Office.

A registrable Trade Mark must contain or consist of at least one of the following essential particulars:—

- (1) the name of a company, individual, or firm represented in a special or particular manner; (2) The signature of the applicant for registration or some predecessor in his business; (3) An invented word or invented words; (4) A word or words having no direct reference to the character or quality of the goods, and not being according to its ordinary signification a geographical name or a surname; (5) Any other distinctive mark, but a name, signature, or word or words other than such as fall within the descriptions in the above paragraphs (1), (2), (3), and (4), will not, except by order of the Court, be deemed a distinctive mark.

Special provision is made as to the registration of Trade Marks used before 1st April, 1889, and of Trade Marks registered in England.

Applications have to be advertised and the procedure to be followed in opposed and unopposed applications is prescribed.

REGISTRATION OF BOOKS.

The Registrar General is also Registrar of Books under Law 2 of 1887. Under this Law three copies of every book printed in the colony must, within one month of the printing thereof, be delivered to the Registrar-General by the printer at the General Register Office, Spanish Town, together with a memorandum of the particulars of the book. A form of the memorandum may be obtained at the General Register Office.

COPYRIGHTS.

The local laws as to Copyrights were repealed in 1913. An Imperial Act on the subject is now in force in the colony. No registration is required.

The owner of any unpublished original literary, dramatic, musical or artistic work is entitled to copyright therein if at the date of the making thereof the Author was a British Subject or resident in Jamaica, or in some other place in His Majesty's Dominions to which the Imperial Act extends. The owner of a published work is entitled to Copyright therein if the work was first published in Jamaica or in some other place on His Majesty's Dominions as before mentioned. Copyright extends throughout all parts of His Majesty's Dominions to which the Imperial Act extends.

ISLAND RECORD OFFICE,

Spanish Town.

THIS office was established under Law 6 of 1879 in place of what had been the ancient office of "Island Secretary."

The Chief Justice for the time being is *ex officio* Keeper of the Records and has an official title as such.

The Deputy Keeper of the Records is appointed by the Governor. His duties comprehend the enrolling in proper registers of all deeds and conveyances, patents, wills which have been admitted to probate, annual produce accounts of estates and accounts current of executors, administrators, trustees, attorneys, agents and persons acting in a fiduciary character, as well as the custody and preservation of the authenticated impression of the laws of the island. Law 23 of 1886 (the Incorporated Companies and Societies Law) requires a register of all Companies incorporated under the provisions of the 27 Vic., sess. 2, chap. 4, of all Friendly Societies established under the provisions of the 6 Vic., chap. 27 and of all Building Societies established under the provisions of the 28 Vic., chap. 17, to be kept in the Record Office. Transcripts of the Rules and Regulations of these Societies (when certified by the Attorney General) are to be filed in the Record Office; and the annual general statements of the funds and effects of the Societies and certain of the Companies are to be sent to the Deputy Keeper of the Records and by him published in the Jamaica Gazette. The Island Record Office is under Law 16 of 1918 (the Registration of Business Names Law, 1918) the office for the registration of firms and persons under that Law and under Law 37 of 1919 the office for the registration of Trade Unions and under both Laws the Deputy Keeper of the Records is the Registrar.

Abstracts or notes from the registers may be taken by persons interested in searching the records, but copies of all public records must be made and certified as a true copy and sealed with the seal of the office at the cost of the person desiring the same. Office copies so made and certified are evidence in all Courts of Justice, without further proof in every case in which the original record would have been received as evidence.

Deeds or writings presented for registration shall, if required, and on production of the receipt be returned at any time after registration, but if application for the return of the deed or writing be not made within two months after the same has been recorded and the record thereof examined and certified, it shall be returned to the party presenting it by registered letter, addressed to him at the postal address furnished in the declaration of counting. No public record may be taken out of the Record Office unless under an order of some competent Court. All revenue is paid over to the Treasury for the use of the public.

IMMIGRATION.

Office at Headquarters House

SINCE the commencement of Asiatic immigration in 1845, 36,584 East Indian immigrants have been introduced into the colony up to the end of 1916, of whom 15,303 have returned to India. 1,152 Chinese have also been introduced.

In 1871 the system of permitting immigrants returning to India to make remittances by Government bills was inaugurated, and since then 13,937 men, women and children have been repatriated, taking bills to the amount of £151,807.

In accordance with a decision of the Government of India emigration to the Colonies of labourers under indenture has now ceased. The last shipment of immigrants arrived in 1916.

Under Law 13 of 1903 an Indian immigrant may not leave the island, except for the purpose of returning to India, unless he shall first satisfy the Protector of Immigrants that he possesses independent and sufficient means of subsistence.

Law 22 of 1896 applies not only to immigrants but also to their descendants.

The estimated East Indian population on 31st December, 1929, was 17,424.

BOARD OF SUPERVISION.

By Law 15 of 1881 certain powers were vested in the Governor in questions of poor relief, but it had not been found practicable to carry out any real supervision under that law, even when the Parochial Boards were nominated by the Governor, and his difficulty was increased when Boards came to be elected, while various circumstances led to the conviction that it was essential to have some central authority to lay down and enforce general principles of poor relief and to interpose when there was neglect.

These requirements were provided by Law 6 of 1886, which vests all matters relating to the poor in a Board of Supervision, consisting of nine members appointed by the Governor. The Board, in so far as its authority goes, is analogous to the Local Government Boards in England, Scotland and Ireland. These latter Boards control the administration of other acts than those of the relief of the poor, notably those relating to the public health, besides many others which it is not necessary to enumerate here.

There was considerable opposition to the local law while it was in progress through the Legislature, chiefly from the Parochial Boards, some of which transmitted petitions against it to the Secretary of State for the Colonies, while on the other hand other Parochial Boards petitioned in favour of the law.

The then Secretary of State (Earl Granville) answered in detail the objections urged against the law and stated that he thought it was "likely to prove a very useful measure," and that he was "unable to agree in the opinion of the petitioners that supervision and control over the Local Bodies entrusted with the administration of poor relief, is unnecessary," and that there did not "appear to be reasonable ground for complaint that the system of supervision by a Central Board established by this Law, had been substituted for the much greater power of interference vested in the Governor by the previously existing law." Both the Secretary of State and the Governor expressed the hope that the law would be accepted by the community in a spirit of loyalty and that the various Parochial Boards would continue to conduct that important branch of their duty which embraces poor relief with zeal and good will. With reference to this it may be remarked that the Board of Supervision in its first annual report stated that "it only remains for us to add with gratification, that with very few exceptions the Parochial Boards of the island have accepted the provisions of the Law and have joined with more or less cordiality in working with the Board of Supervision under it, realizing no doubt that the interests and aims both of the Parochial Boards and the Board of Supervision are not antagonistic." The Governor also in his report on the Blue Book of the colony for the year 1886-87 addressed to the Secretary of State for the Colonies, stated that in their first annual report the Board of Supervision, gave "evidence of the good service of organization upon which they have been engaged" and that the opposition to the constitution of this Body had died away in the face of experience of the Board's working "greatly owing to the tact and good reason which have characterized the proceedings of the Board."

The general duties of the Board of Supervision are thus described in the 10th Section of Law 6 of 1886:—

"It shall be lawful for the Board of Supervision to examine into the manner in which poor relief is administered in the several parishes, and in cases where it shall appear to the Board that the arrangements in any parish are defective, to require the Parochial Board of such parish to remedy such defect, to audit the accounts and books of the Parochial Boards in so far as these relate to the relief of the poor, to investigate and determine all charges of misconduct against the Inspectors of the Poor, Masters of Poor Houses, Medical or other officers who may be appointed by the Parochial Boards, and to investigate and report to the Governor any charge preferred against a District Medical Officer, such charge having been brought to its notice in writing and duly authenticated, to settle any question of difference arising between two or more Parochial Boards or the officials of such Boards: to hear and decide appeals from poor persons who have been refused relief, or who may consider the relief afforded them inadequate, and generally it shall be the duty of the Board of Supervision to see the law effectually administered by the several Parochial Boards, without injustice to the persons entitled to relief on the one hand, and with due regard to the interest of the taxpayers on the other, and so far as may be to secure unity of system in its practical administration throughout the island."

The total number of paupers on the 31st December, 1928, was 8,288.

The percentage of paupers to the population was highest in the parish of Kingston, viz., 1.9, and lowest in the parish of St. Catherine, viz., 0.5, while the average for the island was 0.9.

The total cost of inspection of the poor in the various parishes allowed by the Board of Supervision for the year ended 31st December, 1928, was £4,240, the area to be inspected 4,450 square miles, the estimated population, 95¹/₂, 793, the out-door poor, 6,843, the in-door poor, 1,445 making a total of 8,288. The total cost of the relief of the poor inclusive of industrial school children chargeable to parochial rates in 1928, was £73,872.

INCOME TAX.

INCOME TAX DEPARTMENT.

The first Income Tax Law (No. 24 of 1919) introduced into this Island, received the assent of the Governor on 20th June, 1919.

The introduction of an Income Tax into Jamaica marked a definite turning point in its fiscal system, and the Governor aptly described the new impost as a "very great financial engine."

Under this Law—subject to certain specified exemptions—all persons (including corporate bodies) in receipt of incomes in excess of £100 for the preceding year, were brought within the purview of the tax. Duty on such incomes was imposed on a graduated scale commencing with 2½d. in the £1 up to the first £400 of income (less relief in respect of the first £100 thereof), increasing by progressive stages of ½d., 1d., 2d. and 3d., on various ranges of income above £400, and culminating in a rate of 2/- in the £1 on every pound of income beyond £10,000.

On the arrival from England, on 26th November, 1919, of Mr. C. H. Rickman, a retired Special Commissioner of Income Tax, as an expert in Income Tax matters—"to advise and assist the Colonial Government in connection with the introduction of an Income Tax," steps were taken to put the new enactment into active operation.

The Income Tax Law, 1919, came into operation on the 1st January, 1920, and by 5th February, the Assessment Committee, which under Section 16 (1) of the Law was to consist of three persons appointed by the Governor, was finally constituted.

The "Rules" came into operation on 1st April.

Under Section 45 of the Law which authorises the appointment of persons to assist persons to make out the Returns required by this Law, the Governor duly appointed as such the Collectors in each Parish or Place, as being best suited for that duty.

RETURN FORMS.

The total number supplied to the Collectors of Taxes for service for the year of assessment 1928, was approximately 15,470; 403 further forms were issued from this Office and 3,100 forms were issued to Public Departments. In all 18,973 Return Forms.

It has since been recognised that the smaller class of cultivators in this Island do not keep proper—if any—accounts, and hence find it difficult to enter their actual profits in the Return Form in general use. To meet this condition, the use of a simpler form applicable to those persons whose incomes are mainly derived from the cultivation of land—the total value of which does not exceed £400 on the Valuation Roll—has been prepared, approved, and brought into use.

RULES.

Section 26 of the Income Tax Law 24—1919—as amended by Section 10 of the Income Tax Amendment Law, 39—1920—enacts that Income Tax payable on official salaries, wages, and pensions may be deducted therefrom. The Governor in Privy Council on 25th June, 1927, approved of Rules giving effect to the above provision.

Section 24 (3) of the Income Tax Law, 24—1919, provides that the Chief Justice may—with the concurrence of the Puisne Judge—make Rules governing Appeals. The necessary "Rules of Court" were accordingly made on 28th April, 1920.

APPEALS.

Under Section 7 (3) of the Income Tax Amendment Law, No. 21 of 1928, if a person disputes the assessment made on him he may apply to the Assessment Committee, by notice of objection in writing, to review and revise the assessment. In the event of any person failing to agree with the Assessment Committee as to the amount at which he is liable to be assessed he may appeal against the assessment to a Judge in Chambers.

The total number of appeals listed in the year ended 31st March, 1929, was 90, of which in 81 cases the amount of the reduction, etc., had been agreed in this Department prior to the hearing of the appeals. Of the balance 2 cases were unheard on the 31st March, 1929, while in 5 cases the assessments as made were confirmed by the Court. In the other 2 cases the assessments as made were increased by the Court.

REVISION OF ASSESSMENTS.

4. Under the provisions of the Income Tax Amendment Law No. 21 of 1928, 128 persons applied to the Assessment Committee for revision of the assessments made on them. Of this number 106 cases were dealt with between the 1st January and the 31st March last, of which in 103 cases the amount of the reduction was agreed on and in 3 cases the assessments were confirmed—leaving 22 cases to be disposed of during the current year. Of the total number of applications received 105 were made by taxpayers who had been assessed in default of Returns.

MEETINGS OF THE ASSESSMENT COMMITTEE.

The Assessment Committee met on twenty-four occasions during the financial year under review, for—inter alia—the purposes referred to in Section 21 of the Income Tax Law, No. 24-1919, viz., (a) to consider the Returns rendered—after their exhaustive examination, etc., in this Department, and “to assess the amount of Income Tax payable by every person liable thereto,” and (b) in cases where no Returns have been rendered” to determine according to the best of their judgment “the amount of the income of the person liable and to assess him accordingly.”

PROGRESS OF WORK.

For the year of Assessment, 1928, the number of persons on whom assessments were made by the Assessment Committee up to 31st March, 1929, was 13,090 (including Public Officials, etc.)

LEGISLATION.

Income Tax Amendment Law, 1920 (39-1920) passed 31st July, 1920—extended exemption from duty to the incomes of Parochial Boards, the Kingston General Commissioners, and any Government Institutions, also to the pay and allowances of members of His Majesty's Regular Forces on the Active List, wounds and disability pensions, and war gratuities.

No provision was made in the original Law for repayment of duty except (under Section 13) in the case of incomes “doubly assessed.” This omission was remedied in the Amendment Law.

Income Tax Amendment Law, 1920, (50-1920) passed 29th November, 1920, laid down the precise basis on which the Returns of the assessable incomes of Life and other Insurance Companies should be rendered.

Income Tax Amendment Law, 1921 (21-1921) passed on the 2nd September, 1921, contained several important provisions, the principal being the repeal at the instance of the Secretary of State for the Colonies of Section 39 of the original Law which dealt with “Double Income Tax within the Empire.” By such repeal a large amount of duty has been automatically added to the Jamaica Income Tax Revenue entirely at the expense of the Home Government, the total aggregate duty payable by persons assessed to Income Tax both in this Island and the United Kingdom remaining unaltered.

Relieving Sections permitting the trading, etc., losses of one year to be carried forward and set against the profits of the three following years, and a deduction in respect of “Obsolescence” in cases where Plant and Machinery are replaced by that of an improved type were also included, as well as the addition of a Section repealing Section 27 of the original law by which interest was charged on Income Tax in arrear.

Income Tax Amendment Law, 1928 (7-1928) assented to on 19th March, 1928, exempts from Income Tax the official emoluments of the officer administering the Government of the Island for the time being.

Income Tax Amendment Law, 1928, (21-1928) assented to on 30th November, 1928, raises the exemption limit to £300 on all incomes arising or accruing from 1st January 1928, increases the relief in respect of wife and child to £50 and £20, respectively, and provides for the revision by the Assessment Committee of assessments which are disputed by the Income Tax payers.

The actual net duty collected during the year to 31st March, 1929, was £103,459 19s. 8d., of which £101,179 10s. 5d. was paid to the local Collectors of Taxes and £2,280 9s. 3d. was deducted by the various Public Departments on payment of official salaries, etc., as against the net duty collected to 31st March, 1928, viz., £99,521 17s. 2d. of which £97,395 11s. 1d. was paid to the local Collectors of Taxes and £2,126 6s. 1d. deducted departmentally.

The following statistics relating to the year of Assessment ended 31st December, 1928, based on the incomes of the preceding year ended 31st December, 1927, will be of interest :—

THE INSTITUTE OF JAMAICA

(FOR THE ENCOURAGEMENT OF LITERATURE, SCIENCE AND ART.)

East Street.

THE General Library is open daily from 9 a.m. till 9 p.m. The public reading room is in the centre of the ground floor with the books arranged on either side. Upstairs are the Members Room, the West India Reference Library, and a Lecture Hall, in which are hung portraits and pictures forming the Jamaica History Gallery, open from 9 a.m. to 5 p.m. The Museum is open daily from 9 a.m. till 5 p.m.

HISTORY.—One of the earliest of the important scientific societies in the island was the Royal Agricultural Society of Jamaica, which was founded as the General Agricultural Society of Jamaica in 1843 during the governorship of the Earl of Elgin, although there had existed from time to time, since 1807, various local agricultural societies in certain of the parishes, and in 1830 the Jamaica Society had taken steps towards founding a natural history museum in Kingston. In 1854, during the administration of Sir Henry Barkly, the Royal Society of Arts was established, under the patronage of Queen Victoria and the Prince Consort. In the year 1864, these two associations were amalgamated, by the passing of Act 27, Vic., chap. 22, with a view "to the augmentation of the sources of public industry and the extension of the arts and manufactures of the colony," and became the Royal Society of Arts and Agriculture, of which the Governor for the time being was President. In 1873, owing partly to the fact that the annual grant of £150 was not sufficient for its needs and partly to the fact that voluntary subscription had failed, the Society was wound up. The articles in the Museum were handed over to the Government, and were, with the Sawkins and Brown collection illustrative of the geology of the island, placed under the care of the Island Chemist in Date Tree Hall (where a Public Library was opened in 1874), and they now form part of the Museum of the Institute.

The Institute of Jamaica was constituted during the governorship of Sir Anthony Musgrave by Law 22 of 1879, which created a Board of Governors consisting of seven members, (increased in 1889 to eleven and in 1908 to twelve) their duties being to establish and

maintain an institution comprising a library, reading room and museum, to provide for the reading of papers, the delivery of lectures, and the holding of examinations on subjects connected with literature, science and art, to award premiums for the application of scientific and artistic methods to local industries and to provide for the holding of exhibitions illustrative of the industries of Jamaica. Members of the Board hold office for four years and any casual or recurring vacancy is filled by the person or persons appointing. The vote is at present £3,400. The law above mentioned, transferred to the Institute the libraries of the House of Assembly and the old Legislative Council, both of which had ceased to exist in the year 1866, and the museum of the Royal Society of Arts and Agriculture, together with the building in East Street, Kingston, known as Date Tree Hall.

By the earthquake of 1907, the Museum was wrecked, the Library building seriously damaged, and the Art Gallery rendered unsafe. The new Institute, built on the old site, of re-inforced bricks and concrete, from designs by Mr. A. E. Herschel was completed in November, 1911, and the Library and Museum objects were at once removed back from 133 Orange Street, which had been their temporary home for upwards of four years, to East Street, the new Institute being opened on the 6th January, 1912.

LIBRARY—The books, newspapers, manuscripts and maps on Jamaica and books on the West Indies form a special feature in the Library. In addition to the volumes of scientific, historic and general literature, there is a collection of popular works, whilst the quarterly and other leading reviews and periodicals of the day are regularly obtained from Europe and America.

There are 29,345 volumes catalogued in the Library, made up as follows:—

In the General Library.—West India, 543; Theology and Philosophy, 1,047; History, 2,386; Biography, 2,168; Travel, 1,164; Law, Politics and Sociology, 702; Education, 482; Art, 864; Science and Natural History, 2,145; Poetry and the Drama, 802; Prose Fiction, 5,248; Miscellaneous, 1,465; Dictionaries, etc. 943; Reports of Societies, 1,157; Juvenile, 889; with a total of 22,104.

In the West India Reference Library.—Jamaica Books and pamphlets, 2,727; Jamaica Newspapers, 649; West Indies (excluding Jamaica) 3,539; West Africa, 326; with a total of 7,241; Manuscripts, 1,392; Maps and Plans, 706.

MUSEUM.—The collections aim at representing as completely as possible the fauna and flora of the island, along with its geology and anthropology. The Mammals are represented by various species of bats, the Jamaica Coney (*Capromys brachyurus*, Hill), the Manatee, Mongoose, etc. The collection of native Birds is nearly complete, and has, in addition, a series of migrants obtained from America. The Snakes, Lizards, Chelonians, the Crocodile, and the Amphibians of the colony are nearly all represented. The series of Fishes does not contain all the species known from the surrounding seas. Of the Invertebrates, many Insects, Decapod Crustaceans, Scorpions, Arachnida, and Myriapods are shown, but much yet requires to be done upon these groups. The land Mollusca abundant in the island, are partly exemplified. The Echinodermata—star fishes, sea-urchins, sea cucumbers—are illustrated, and the Coelenterates—sea-anemones, corals, sea-fans are represented, but these suffered from the earthquake. Conchology is well represented by the valuable Vendryes collection of the Land and Fresh water Shells of Jamaica. A Herbarium contains examples of many of the dicotyledons, orchids, grasses, sedges and ferns of Jamaica, and is often consulted by amateur collectors for the purpose of naming specimens. Collections of the economic woods of the island, cut and polished, serve for purposes of reference, and there is a collection of water-colour drawings of Jamaica plants and birds.

The mineralogical and palæontological specimens include the collections formed by the Officers of the Geological Survey during the years 1860 to 1866. Tertiary and Cretaceous fossils are represented, but the older formations are almost entirely wanting in Jamaica. The series is so arranged as to show what is obtained from each district in the island, while maps, illustrating the geology of the several parishes, are available for reference. A map of Jamaica, modelled in relief, shows the conformation of the surface of the island.

The objects connected with the Arawaks, the aboriginal Indian inhabitants, include a large series of stone implements, mostly petaloid in shape, all carefully finished, and some highly polished, others wedge or chisel shaped, while a few are made of shell. From the numerous kitchen-middens or refuse heaps are shown collections of perforated shells, broken pottery, fish, coney and crab-bones, beads and ashes. The relics from caves, consist of human skulls and bones, and the more perfect examples of Indian pottery. Photographs of various rock carvings are on view and several examples of aboriginal

images. Slavery relics, include an iron cage gibbet in which criminals were hung to die of starvation.

In the ground is a small Vivarium containing pelicans, various doves, iguanas, lizards, mongoose, conies, a crocodile, turtle and land turtle, a yellow snake.

HISTORY GALLERY—The Jamaica History Gallery contains Portraits of Jamaica Governors and other persons celebrated in the history of the island (to the number of 420 of which 265 are exhibited on the walls); paintings and engravings, including a series of Jamaica scenery in oils by Lady Barkly, (to the number of 245 of which 119 are exhibited) Pine's oil painting of "Rodney on board the Formidable," a contemporary oil painting of the Battle of the Saints, two water-colour drawings by Pocock and a series of engravings illustrative of Rodney's victory over DeGrasse and the subsequent fate of some of the fleet, and autographs, coins, medals and other works of art, as well as the Spanish bell of the old church of Port Royal, submerged during the earthquake of 1692; the papers found in a Shark's maw, which led to the condemnation of the Brig "Nancy," at Kingston, in 1799, and the two silver gilt maces, formerly used on state occasions, one of which was erroneously supposed to be the "Bauble" removed from the House of Commons by order of Cromwell. A carved tortoise shell comb and case of the year 1671, is the earliest known specimen of Art workmanship made in Jamaica.

In the Vestibule downstairs, is a small War Memorial Collection: upstairs is a portion of the frieze from the West Indies Pavilion at the British Empire Exhibition.

1. To fill such vacancies as may occur in the Offices of the Public Service the Governor may employ young men who shall be known as "Assistants" and who shall not be on the permanent Establishment of the Civil Service.

2. An Assistant will be paid salary at the rate of £100 per annum for the first year and will be granted after 12 months efficient service and good conduct (as to which the Head of the Department in which the Assistant serves shall certify) an increase of £15 to his annual salary, and after each period of 12 months service a further increase of £15 per annum until the salary of such Assistant reach £160 per annum.

3. No one shall be admitted to the Public Service as an Assistant who is under 16 or over 25 years of age. Provided nevertheless that the Governor shall have power to make an exception in any case in which he considers special circumstances justify him in doing so.

4. An Assistant shall be liable to have his services dispensed with at a month's notice which notice may be given at any time, by the Head of the Department, with the approval of the Governor. In the case of misconduct, he shall be liable to dismissal by the Governor without notice, or to such other and less punishment as the Governor may think fit to order.

5. Subject to the requirements of the Public Service, an Assistant may be granted 4 weeks vacation leave of absence in a year, nor not more than 8 weeks leave of absence during and in respect of any two years. He may be granted the same departmental leave and sick leave as are allowed under the local regulations governing the same to officers on the Civil Establishment.

6. As a rule vacancies in the subordinate offices of the permanent offices of the Civil Establishment will be filled by selection from among the Assistants, and while seniority will always be taken into account, it is to be distinctly understood that regard will chiefly be had to superior merit and official qualifications.

7. In addition to Assistants, it shall be in the discretion of the Governor to appoint temporary Officers in any Office or Department as circumstances may require and with such remuneration as His Excellency may see fit.

8. The following are the Rules for the selection of "Assistants."

I. Every candidate will be required to show attainment of a certain educational standard. This standard shall be either

- (a) The certificate of the Cambridge Senior Local Examination or
- (b) An educational record of equal value in the opinion of the Governor.

II. Each candidate shall obtain a recommendation from either

- (a) a Head of a Department of the Public Service, or
- (b) the Custos of the Parish in which the candidate resides, or
- (c) a Member of the Legislative Council,

and such recommendation shall be in the form of a certificate that the candidate is in the opinion of the person certifying a fit and proper person for admission to the Civil Service in Jamaica, and the certificate shall also contain a brief statement by the person certifying of the particulars known to him concerning the antecedents and character of the candidate.

III. Candidates may make their applications at any time and will be notified when their names are entered in the List of approved candidates. They are expected to inform the Colonial Secretary if at any time during the year for which their names have been entered they cease to be candidates for appointment. The list will be made up annually on the 1st April in each year, and only those will be re-entered as candidates who renew their application to the Colonial Secretary before that date.

IV. On a satisfactory compliance with the requirements of Rules I and II the Governor shall cause the candidate's name to be placed on the list of persons from whom Assistants are to be selected, such list to be kept by the Colonial Secretary.

V. When an Assistantship becomes vacant the selection of the person to be recommended to the Governor for appointment to fill the vacancy shall be entrusted to a Public Service Selection Committee to be appointed by the Governor.

VI. Such Public Service Selection Committee shall consist of the following:—

- (a) As permanent members, the Colonial Secretary (Chairman) and two other persons to be appointed by the Governor, to whom shall be added on each occasion as a temporary member,
- (b) The Head of Department in which there is the vacancy—or, if he is already on the Committee, some other person.

For the purposes of this last provision the Attorney General shall be regarded as the Head of the Offices of the Resident Magistrate's Courts.

VII. The permanent Selection Committee shall at some time interview each approved candidate and on the occasion of a vacancy the full Committee specified shall consider the following points in respect of each candidate, viz:—

- (a) his educational record,
- (b) his general fitness,
- (c) any previous service he may have in a Government Department or in outside employment, and
- (d) any reports they may choose to call for, *e.g.*, from the Head Master of a candidate's school or from any referees named by the candidate,

and shall then submit to the Governor the name of the candidate whom they recommend for appointment.

The Selection Committee may, if they think it necessary, test the educational qualifications of candidates by special examination.

VIII. The Governor will usually appoint the candidate so recommended, but it shall be open to His Excellency for any cause which may seem to him fit to abstain from so doing and to ask the Committee for another recommendation.

IX. No candidate will be appointed until he has passed a satisfactory Medical Examination by the Senior or two other Medical Officers of the Public Hospital, Kingston, or two District Medical Officers.

WOMEN.

1. Subject to the exigencies of the work of the Department concerned, and, having regard to the ratio of the number of the women to the number of the men already employed in the same Department, the Governor may, in his discretion, appoint women who possess the qualifications required by these Rules, to positions such as Assistants, Clerks, Typists, or Stenographers.

2. Candidates may make their applications at any time, and will be notified when their names are entered in the List of Approved Candidates. They are expected to inform the Colonial Secretary, if, any time during the year for which their names have been entered, they cease to be candidates for appointment. The List will be made up annually on the 1st April in each year, and only those will be re-entered as candidates, who renew their application to the Colonial Secretary before that date.

3. No woman shall be admitted to any office in the Public Service who is under 16 or over 25 years of age: Provided nevertheless that the Governor shall have power to make an exception in any case in which he considers special circumstances justify him doing so.

4. Every candidate will be required to show attainment of a certain educational standard. This standard shall be either

- (a) The Certificate of the Cambridge Senior Local Examination, or
- (b) An educational record of equal value in the opinion of the Governor.

5. Each candidate shall obtain a recommendation from either:—

6. In addition to the foregoing qualifications, candidates will be required to be proficient in Typing and Stenography.

7. The salary to be paid to any woman so appointed, shall be such as may be provided by the Legislative Council for the particular office to which she may be appointed, or as may be approved by the Governor.

8. A person appointed to any such office shall be on the non-pensionable establishment, and shall be liable to have her services dispensed with at a month's notice, which notice may be given at any time by the Head of the Department with the approval of the Governor, but will be eligible for such Compassionate Allowance as may be prescribed in any Law. In the case of misconduct she shall be liable to dismissal by the Governor without notice or to such other and less punishment as the Governor may think fit to order.

9. Subject to the requirements of the Public Service, such persons may be granted 4 weeks vacation leave of absence in a year, or not more than 8 weeks leave of absence during and in respect of any two years. They may be granted the same departmental leave and sick leave as are allowed under the local regulations governing the same to officers on the Civil Establishment.

10. The Selection Committee may, if they think it necessary, test by special examination the educational qualifications of candidates.

12. The Governor will usually appoint candidates so recommended; but it shall be open to His Excellency, for any cause which may to him seem fit, to abstain from so doing and to ask the Committee for another recommendation.

12a. No candidate will be appointed until she has passed a satisfactory medical examination by the Senior or two other Medical Officers of the Public Hospital, Kingston or by two District Medical Officers.

13. Women who have served in any of the aforementioned positions in the Public Service, shall be entitled to be considered for promotion to the permanent establishment as 2nd Class Clerks, and, after having served as such as 1st Class Clerks, in the various departments of the service; but shall have no prescribed claim to appointment to those posts. Each case will be considered on its merits, and will be determined by the Governor on the advice of the Head of the Department concerned.

14. Any woman appointed as a 2nd Class Clerk will be entitled to the same leave and other privileges and to the same salary as a man would have been entitled to if appointed to such office.

15. Married women shall not be eligible for any appointment contemplated by these Rules, unless in the opinion of the Governor, there exists exceptional circumstances:

16. If a woman marries while in the service, she shall be liable to be called on to vacate her office without having any claim to pension, compassionate allowance or gratuity.

OFFICIAL CORRESPONDENCE.

PERSONS in the colony, whether public functionaries or private individuals, who have any representations to make to Government should address them to the Governor of the colony through the Colonial Secretary. The following are the local orders on the subject:

The Captain-General and Governor-in-Chief requests that all persons having occasion

to address His Excellency, or the different Departments of the Government, will do so on foolscap, or large paper, and in official terms.

The practice of writing applications or communications on sheets of note paper, and in the form of private notes, is very inconvenient and contrary to official usage.

His Excellency also requests that persons will sign their names in distinct characters as much of his time is lost in endeavouring to decipher illegible signatures.

The attention of the Governor having been called to the great number of petitions addressed to His Excellency on matters in which he cannot interfere, and to the prevalent practice of affixing to petitions marks purporting to be those of the persons whose names are attached thereto, but unaccompanied by any authentication, and also to the fact in some instances, that the names of persons have been subscribed to petitions without their knowledge, or that the petitioners have subsequently represented that their case has been mis-stated in their petitions. His Excellency has been pleased to direct it to be notified for the information of those concerned, that in future no attention will as a rule, be paid to any petition treating of a purely private matter, or of a question which either is in course of settlement or has been settled by a court of law, and no petition will be entitled to consideration which does not conform to the following rules as respects the signatures.—

1. The marks of persons unable to write their own names must be attested by the signature of some person of position, or of respectable character, as witness to the fact of such marks having been made in his or her presence, and that the person or persons was or were fully aware of the facts and objects of the documents to which the marks are so appended.

2. In the case of the names of persons being written for them in their absence, the name and abode of the persons assuming the power of attaching such signatures must be written at full length, and in the handwriting of such persons.

Ministers of Religion, Schoolmasters, and others who are brought in communication with the humbler classes of petitioners are requested, when opportunity offers, to explain this requirement.

Petitions having been in many instances addressed in an informal manner to the Governor and to the Governor in Council, it is hereby notified, for general information, that petitions can be conveniently addressed to His Excellency on all matters requiring Executive action on the part of the Government; and that it will facilitate the consideration of such petitions if they are enclosed to the Colonial Secretary in the first instance for submission to His Excellency.

2. Petitions to the Governor and Legislative Council may be sent by bodies or by individuals to the Clerk of the Council, or they may be presented by any member of the Council when the Council is in session, as required by the rules.

The Governor requests that all petitions and letters to His Excellency on questions of an official character, or requiring official action, may be addressed to the Colonial Secretary instead of being addressed to the Governor direct.

PENSIONS AND GRATUITIES.*

Up to the time of the passing of Law 34 of 1885 (the 16th November 1885) all applications from Officers in the Public Service of Jamaica, for pensions and gratuities were dealt with under the Imperial Superannuation Acts, the various Treasury Minutes thereunder and certain Regulations drawn up in the year 1879 known as the "Jamaica Pension Regulations."

A law was passed in 1885 confirming these pensions and further providing for persons in the Public Service at the time of the passing of the Law. Another Pension Law, 26 of 1892 was passed enabling public servants who were not provided for in the Law of 1885 to qualify for pension by contributing 2 per cent. of their salaries annually to a Pension Fund. Both these laws were repealed by Law 24 of 1904 which embodies the provisions of both laws and which regulates all Public Service Pensions now granted. Law 4 of 1910, "Police Pension and Reward Fund Law" provides for payment from Public Revenue of pensions to sub-officers and constables of the Police Force. Law 16 of 1912 provides for payment from General Revenue to subordinate officers of Prisons. In March, 1912, the Legislative Council resolved that pensions should be granted to Teachers in Government Elementary Schools. Law 22 of 1912 provides for payment of pensions and gratuities to Railway Employees. Law 29 of 1924 provides for Pensions and Gratuities to Teachers of Secondary Schools.

The Court is a Superior Court of Record and now exercises the jurisdiction, power and authority formerly possessed by the Supreme Court of Judicature, the High Court of Chancery, the Incumbered Estates Court, the Court of Ordinary, the Court for Divorce and Matrimonial Causes, the Chief Court of Bankruptcy, the Circuit Courts or any of the Judges or those Courts or the Governor as Chancellor or Ordinary acting in any Judicial capacity and all ministerial powers, duties and authorities incident to any part of such jurisdiction, power and authority.

The Supreme Court now consists of a Chief Justice and two Puisne Judges.

In case of an appeal from the judgment of one of these Judges, such Judge does not sit in the Full Court on the hearing of the appeal but his place is taken by the Judge of the Kingston Court who while sitting rank after the junior member of the Court.

The Full Court holds a Session in Kingston three times a year, but a special sitting of the Court may at any time be appointed by the Chief Justice.

Rules of Court for regulating the practice and procedure (including scales of fees and evidence) in respect of proceedings under the Reciprocal enforcement of Judgments and Awards Law 1923 (No. 16 of 1923.)

Under the powers conferred upon the Chief Justice of Jamaica by the Judicature Law 1879, the Reciprocal enforcement of Judgments and Awards Law, 1923 (No. 16 of 1923) and all other powers enabling in that behalf, and with the concurrence of the Puisne Judges of the Supreme Court of Judicature of Jamaica, I do hereby order and direct as follows:—

1. Any application under Section 2 (1) of the Reciprocal enforcement of Judgments and Awards Law, 1923 (No. 16 of 1923) for leave to have a judgment obtained in a superior court in the United Kingdom or in a superior court in any part of His Majesty's Dominions to which the said Law extends registered in the Supreme Court of Judicature of Jamaica shall be made ex parte or by summons to a judge. If the application is made ex parte the judge to whom it is made may direct a summons to be issued.

2. The application shall be supported by an affidavit of the facts exhibiting the judgment or a verified or certified or otherwise duly authenticated copy thereof and stating that to the best of the information and belief of the deponent the judgment creditor is entitled to enforce the judgment and the judgment does not fall within any of the cases in which under section 2 (2) of the Law a judgment cannot properly be ordered to be registered. The affidavit must also, so far as the deponent can, give the full name title, trade or business and the usual or last known place of abode or business of the judgment creditor and judgment debtor respectively.

3. The affidavit and the summons (if any) shall be entitled:

"In the Matter of the Reciprocal enforcement of judgments and Awards Law, 1923.
.....(describing the court) and.....
In the Matter of a judgment of the.....obtained in.....
.....(describing the cause or matter) and dated the.....day of.....
.....19...."

4. The summons (if any) for leave to register shall be an originating summons and (unless otherwise ordered by a judge) shall be served in the same manner as a writ of summons is required to be served. The Judgment debtor shall not be required to enter any appearance thereto.

5. Any order giving leave to register shall be drawn up by or on behalf of the judgment creditor and when the order is made on a summons the order shall be served on the judgment debtor but where the order is made on an ex parte application service of the order on the judgment debtor shall be required.

6. The order giving leave to register the judgment shall state the time within which the judgment debtor is to be entitled to apply to set aside the registration. Such time where the judgment debtor is, or is ordinarily resident, within the jurisdiction of the Court shall ordinarily be fourteen days and when the judgment debtor is, or is ordinarily resident, out of the jurisdiction of the Court shall be such time as the Court may fix.

7. The register of judgments ordered to be registered under the Law shall be kept in the Office of the Court by or under the direction of the Registrar. The judgment shall be registered therein in accordance with the order giving leave to register it.

8. The register shall be arranged in alphabetical order in the surname of the judgment debtor and there shall be entered in the register the date of the order for registration and of the registration, the name, title, trade or business and usual or last known place of abode or business of the judgment debtor and judgment creditor and the amount for which the judgment is signed and any special directions in the order for registration as to such registration and or execution thereon and the particulars of any execution issued thereon.

9. Notice in writing of the registration of the judgment must be served on the judgment debtor within a reasonable time after such registration. Such notice shall (in the absence of an order by the judge as to the mode of service thereof) be served on the judgment debtor by personal service (with power to order substituted service or service out of the jurisdiction or both) as in the case of a writ of summons, but the judge may at any stage of the proceedings authorise or direct some other mode of service and if he does so the service shall be effected in accordance with such authority or direction.

10. The notice of registration shall contain full particulars of the judgment registered and of the order for such registration and shall state the name and address of the judgment creditor or of his solicitor or agent on whom and at which service of any summons issued by the judgment debtor may be served. The notice shall state that the defendant is entitled, if he has grounds for doing so, to apply to set aside the registration and shall

also state the number of days for applying to set aside the registration limited by the order giving leave to register.

11. The party serving the notice shall, within three days at most after such service; endorse on the notice or a copy or duplicate thereof the day of the month and the week of the service thereof, otherwise the judgment creditor shall not be at liberty to issue execution on the judgment; and every affidavit of service of such notice shall mention the day on which such endorsement was made. This rule shall apply to substituted as well as other service. The three days limited by this rule may under special circumstances be extended by order of a judge.

12. The judgment debtor may at any time within the time limited by the order giving leave to register after service on him of the notice of the registration of the judgment apply by summons to a judge to set aside the registration or to suspend execution on the judgment and the judge on such application if satisfied that the case comes within one of the cases in which under section 2 (2) of the Law no judgment can be ordered to be registered or that it is not just or convenient that the judgment should be enforced in Jamaica or for other sufficient reason may order that the registration be set aside or execution on the judgment suspended either unconditionally or on such terms as he thinks fit, and either altogether or until such time as he shall direct: Provided that the judge may allow the application to be made at any time after the expiration of the time herein mentioned.

13. The summons referred to in rule 12 shall be an ordinary summons intituled in the same manner as the affidavit referred to in rule 3.

14. No execution shall issue on a judgment registered under the Law until after the expiration of the time limited by the order giving leave to register after service on the judgment debtor of notice of the registration thereof. Provided that the judge who makes the order for such registration or a judge at Chambers, may at any time order that execution shall be suspended for a longer time.

15. Any party desirous of issuing execution on a judgment registered under the Law must produce to the Registrar an affidavit of the service of the notice of registration.

16. A writ of execution on a judgment registered under the Law may be thus varied:— Instead of “which said sum of money and interest were lately before us in our said Court, etc.,” insert “which said sum of money and interest were lately in (describing the court in which judgment was obtained)” etc., and which judgment has been duly registered in our Supreme Court of Judicature of Jamaica pursuant to the Reciprocal enforcement of Judgments and Awards Law, 1923, (No. 1923.)

17. Any application under section 3 of the Law for a certified copy of a judgment obtained in the Supreme Court of Judicature of Jamaica shall be made ex parte to a judge of the said Court on an affidavit made by the judgment creditor or his solicitor giving the particulars of the judgment and showing that the judgment debtor is resident in the United Kingdom or some (stating what) part of His Majesty's Dominions outside the United Kingdom to which the Law has been extended and stating to the best of his information and belief the title, trade, business or occupation of the judgment creditor and judgment debtor respectively and their respective usual or last known places of abode or business.

18. The certified copy of the judgment shall be an office copy and shall be sealed with the seal of the Supreme Court of Judicature of Jamaica and shall be certified by the Registrar as follows:—

“I certify that the above copy judgment is a true copy of a judgment obtained “in the Supreme Court of Judicature of Jamaica and this copy is issued in accordance with section 3 of the Reciprocal Enforcement of Judgments and Awards Law, 1923 (No. 16 of 1923.)”

(Signed)

Registrar of the Supreme Court of Judicature
of Jamaica.

APPEALS FROM THE SUPREME COURT OF JAMAICA TO HIS MAJESTY
IN COUNCIL.

By Order of King Edward VII. in Council made (in pursuance of the provisions of the Imperial Statute 7 and 8 Vic. c. 69) on the 15th day of February, 1909, it was ordered that any person may appeal to His Majesty, his heirs and successors, in His or their Privy Council.

- (a) as of right from any final judgment of the Supreme Court of Judicature of Jamaica where the matter in dispute on the appeal amounts to or is of the value of £300 sterling or upwards, or where the appeal involves directly or indirectly some claim or question to or respecting property or some civil right amounting to or of the value of £300 sterling or upwards and:—
- (b) at the discretion of the said Court, from any other judgment of the said Court whether final or interlocutory, if, in the opinion of the Court the question involved in the appeal is one which, by reason of its great general or public importance or otherwise, ought to be submitted to His Majesty in Council for decision, the person feeling aggrieved to apply to the Court by motion or petition for leave to appeal within 21 days from the date of the judgment to be appealed from, notice of the intended appeal to be given to the opposite party. And the Court is empowered to direct that the Judgment appealed from shall be carried into execution, or that execution shall be suspended pending the appeal as to the Court may seem just. In all cases security is to be given by the Appellant in the sum of £500 for the prosecution of the appeal and the payment of any costs which may be awarded to the Respondent—such security to be entered into within a period to be fixed by the Court, but not exceeding three months from the date of the hearing of the application for leave to appeal.

By this Order the Court appealed from is required to certify and transmit to the Privy Council a copy of the evidence, proceedings, judgments, decrees and orders made in the case appealed, under the Seal of the Court, and also a copy of the reasons given by the Judges of the said Court for or against the judgment appealed from.

The order also contains directions as to the transcript records to be sent by the Registrar of the Supreme Court to the Registrar of the Privy Council and the printing of such transcript by the Appellant or his Agent and as to the power of the Judicial Committee of the Privy Council to suspend or relax the regulations of the Order. Directions as to the form and type used in the printing of these proceedings in appeal are also contained in the said Order.

By this Order it is directed that in appeals from any judgment of any Court in the colonies the reasons given by the Judges of such Court for or against such Judgment shall be by the Judges communicated in writing to the Registrar of such Court, to be by him transmitted in original to the Registrar of the Privy Council at the same time when the record is transmitted.

ADMINISTRATOR GENERAL'S OFFICE.

(Public Buildings, East Block, King St.)

THE want of a duly authorized Officer to take charge of the property of persons who died either intestate, or without leaving executors who will act, having for a considerable time pressed itself on the consideration of the Government, a law was passed in 1873 (Law 34 of 1873) for the appointment of an Administrator-General. Under this Law the Administrator General is bound to administer on the estates, of which the personalty amounts to £50 and upwards, of persons (1) who die intestate without leaving a widower, widow, brother, sister or any lineal ancestor or descendant, or leaving such relative if no such relative shall take out letters of administration within three months or such other time as may be fixed by the Court; (2) who die leaving a will but leaving no executor, or no executor who will act, if no such relative as aforesaid of such deceased shall take out letters of administration within the same period. He may administer on the estate of any person who shall appoint him the sole executor of his will, but he cannot act as a co-executor with any other person. The Administrator-General may be appointed trustee of any real or personal property in the same way that any other person might be appointed. He may also be appointed guardian of any infant, committee of any lunatic or idiot and receiver in chancery.

The Administrator-General is subject to the immediate control of the Supreme Court of Judicature, he being an Officer of that Court and accountable to it for the due and efficient discharge of his duties.

This Department was combined with that of the Stamp Commissioner on the 1st September, 1893, but was again separated on the retirement of Mr. Chapman.

The amending Law, 26 of 1894, provides that the Administrator-General shall be paid such salary as the Governor may from time to time determine; and that all commissions, fees and remuneration of office, other than salary formerly payable to the Administrator-General, shall be paid into the Public Treasury and form part of the General Revenue of the Island.

It also provides that all expenses of clerks and assistants, together with all expenses incurred in and about the duties of his Office which formerly had to be defrayed personally by the Administrator-General, shall be paid out of General Revenue.

During the year 1928, Letters of Administration to the estates of 6 deceased persons (one with Will annexed) and Probates of the Wills of 5 deceased persons were granted to the Administrator General in the Supreme Court.

There were also granted to him in the Kingston and Resident Magistrates' Courts of this Island, Letters of Administration to the estates of 35 deceased persons.

The Administrator General was also appointed Guardian and Committee of the estates of 3 persons of unsound mind, not so found; and to act under 2 appointments of Trustee of Estates of Infants; 3 appointments of Trustee under The Settled Land Law 1888; 1 Deed of Separation and appointment of Trustee; and 1 appointment of Liquidator in the Winding up of a Company.

The estates of 124 deceased persons who died in Panama, Costa Rica and Cuba, were also during this period referred to the Administrator-General to be dealt with under the provisions of Law 21 of 1906.

At the 31st December, 1928, the amount at credit of the estates of deceased persons, Lunatics, Receiverships and Trusts was £357,637 16s. 1d.

The accounts of the Administrator General are audited and passed half-yearly by the Supreme Court.

BANKRUPTCY.

The Bankruptcy Law of 1879 declares that the Administrator-General for the time being shall be *ex-officio* the Trustee in Bankruptcy in the Supreme Court, and it places the administration of debtors' estates in bankruptcies occurring in that Court in the hands of that officer, who is directly accountable to the Supreme Court of Judicature. The same Law provides for bankruptcy administration in the Resident Magistrates' Courts of the Island; the Clerks of which Courts are Trustees in their respective Courts. The Law as amended by 24 of 1892 places the question of a Bankrupt's discharge, and of the conditions to be attached thereto, in the hands of the Court, and gives the Court the power of inflicting punishment for culpable bankruptcies or other fraudulent transactions. The amending Laws now in force *inter alia* provide:—

- (a) that it shall be incumbent upon Bankrupts to pay 10s. in the £; otherwise their discharge may be suspended for two years;
- (b) for the administration of deceased persons' estates in Bankruptcy;
- (c) for books of account of debtors to have been kept in English;
- (d) that undischarged Bankrupts obtaining credit to the extent of £20; or more, without disclosing disability, are liable to imprisonment, not exceeding two years;
- (e) that sale by a trader of his stock-in-trade, etc., without consent of three-fourths, in number and value, of his creditors; or unless made after 21 days notice in Jamaica Gazette, and a daily paper published in Kingston; shall be void against creditors in case of his Bankruptcy; and
- (f) that such advertisement may be alleged as an act of Bankruptcy, after notice in the prescribed form by the Petitioning Creditor.

The following table shows the number of persons who took the benefit of the Insolvent Debtors Law during each of the eight years previous to 1868:—

1861 .. 16	1863 .. 75	1865 .. 39	1867 .. 64
1862 .. 76	1864 .. 40	1866 .. 47	1868 .. 39

The following table shows the number of persons declared bankrupts in the Supreme Court during each of the last 16 years under the provisions of the new Bankruptcy Law:—

1913-14 27	1917-18 .. 14	1921 .. 64	1925 .. 33
1914-15 42	1918-19 .. 10	1922 .. 36	1926 .. 50
1915-16 18	1919-20 .. 3	1923 .. 46	1927 .. 40
1916-17 19	1920 .. 7	1924 .. 63	1928 .. 37

During the year 1928, there were 37 Provisional Orders in Bankruptcy made in the Supreme Court upon Creditors' Petitions, of which 13 were made Absolute, 7 were revoked; 1 was administered under Deed of arrangement confirmed by the Court; and the remaining 16 were pending at the end of the year.

There were also made in respect of proceedings commenced in previous years, 2 Absolute Orders, 2 Orders of Discharge and 1 Receiving Order.

One debtor was committed to Prison during the year for an offence under the Bankruptcy Law.

On the 31st December, 1928, the amount at credit of Bankruptcy Estates was £14,814 8s. 1d.

The accounts of the Trustee in Bankruptcy (like those of the Administrator-General) are audited and passed half-yearly by the Supreme Court.

PRIZE COURT.

PRIZE JURISDICTION in Jamaica is vested in and exercised by the Supreme Court, that Court being the Local Court of Admiralty under the Imperial Statute 53 and 54 Vic. c. 27. This jurisdiction is derived from the warrant of the Lords Commissioners of the Admiralty (published in the Jamaica Gazette of the 7th December, 1905), authorizing the Supreme Court to act as a Prize Court. The warrant by its terms

* Off the Island.

defines and limits the jurisdiction which became exercisable when the proclamation of the outbreak of war was made. There is an appeal to His Majesty in his Privy Council.

The Order in Council prescribing the Rules and Tables of Fees to be observed and taken in Prize Proceedings is published in the Jamaica Gazette of September 12, 1914.

The Judges of the Court are the Chief Justice (President) and the Puisne Judge; the Registrar is the Registrar of the Supreme Court, and the Marshall is Mr. R. E. Seaton.

During the war the following causes were adjudicated by the Court:—

- (a) "The Bethania" captured at sea by H.M.S. "Essex" (Captain Hugh Dudley Richard Watson). The ship was delivered to the Crown by order of the Court on an undertaking being given. Part of the cargo was condemned and sold, and part released to neutral claimants.
- (b) The Lighters 1/16, 2/16, 3/16 and the "Atlas" (a launch) were seized in the port of Kingston by Officers of the Customs and orders of detention made.

These orders were subsequently superseded and orders of condemnation made and the Lighters and "Atlas" were delivered to the Crown on an undertaking being given as provided in the Prize Rules.

KINGSTON COURT.

By Law 36 of 1909, a special Court was created "to transact the civil jurisdiction of the Resident Magistrate's Court for the parishes of Kingston and St. Andrew." This Law came into operation on 1st January, 1910, by proclamation of the Governor, and the late Jasper Farmer Cargill, Esq., was appointed to be the judge, under letters patent, during His Majesty's pleasure.

RESIDENT MAGISTRATES COURTS.

On the coming into operation on the 2nd April, 1888, of Law 43 of 1887, the Resident Magistrates Law, 1887, the District Courts, which had been in operation since the year, 1867 ceased to exist. Law 43 of 1887, with its amending laws have been consolidated by The Resident Magistrates Law, 1927, (Law 39 of 1927). The Resident Magistrate's jurisdiction is similar to that of a Judge of an English County Court, and a Recorder. His Court took the place of the late District Courts. He also presides in the Petty Session Court. The Resident Magistrates Court is the Intermediate one between the Supreme Court, and the Petty Sessions Court. There is a Resident Magistrate's Court for each parish of the Island, with as many stations as may from time to time be fixed by the Governor.

The Governor is empowered to appoint not less than nine and not more than fourteen Resident Magistrates for the Resident Magistrates Courts, and an Assistant Resident Magistrate for the parish of Kingston. Each Resident Magistrate has the Resident

Magistrate's Court of one parish assigned to him. But in addition to this a Resident Magistrate shall, if the Governor so direct, also have and exercise the jurisdiction of the Resident Magistrate's Court in any other parish or parishes, either generally, or at such one or more stations therein as may from time to time be assigned to him by the Governor.

Every Resident Magistrate is Coroner for the parish or parishes to which he is assigned by the Governor.

The qualifications for a Resident Magistrate are that he must be a member of the English or Irish Bar, or of the Faculty of Advocates of Scotland, or a Solicitor of the Supreme Court of Judicature of England, Scotland, Ireland or Jamaica, or a writer to the Signet of Scotland.

The Resident Magistrates Law also provides for the appointment of Clerks to the Courts in the several parishes, whose qualifications are the same as those of a Resident Magistrate, or the passing by an Assistant Clerk of Courts of an examination equal to that required of an Articled Clerk presenting himself for examination prior to being admitted as a Solicitor.

Tariff of Fees in the Resident Magistrates' Courts for Practitioners, for Court Fees, and for Bailiffs' Fees published in the Jamaica Gazette of the 2nd March, 1899, 7th July, 1921 and 12th December, 1907, and referred to in Section 144 of Law 39 of 1927.

augment the Solicitor's costs and Counsel's fees charged on the basis of this tariff by a further sum not exceeding £10.

In any action where the trial has in the opinion of the Judge, been unnecessarily protracted by reason of the calling of unnecessary witnesses or otherwise by the conduct of the Solicitor or Counsel in unnecessarily prolonging the proceedings, the Judge shall be empowered to award in addition to the above rates costs not exceeding £3 3s., per day for every day of the trial after the first day.

HOLDING OF COURTS.

Under Section 70 of Law 39 of 1927 it is the duty of every Resident Magistrate on or before the 31st day of October in each year to fix the times and places for the holding during the ensuing year of Courts of Petty Sessions and Resident Magistrates' Court throughout the parish or parishes assigned to him by the Governor.

These fixtures are however subject to the approval of the Governor in Privy Council, who may alter the times and places proposed as he may see fit. Should a Resident Magistrate fail to fix the times and places within the time aforesaid, it is lawful for the Governor in Privy Council to fix them without reference to the Resident Magistrate.

The Law also requires that notice of the times and places fixed for the holding of the Courts shall be published in the Gazette, and shall be put up in some conspicuous place in each Court House in the parish and in the Office of the Clerk, at least one month before the time appointed for the holding of the Courts. This provision applies also to any alteration in the times fixed, which it may be found desirable to make, but does not in any way interfere with the powers of the Resident Magistrate or in his absence, of a Justice of the Peace, or failing a Justice, of the Clerk or Assistant Clerk, by declaration in open Court, to adjourn any Court to any day or place whether or not such day or place has been fixed and approved as provided in the first paragraph of Section 69.

The Resident Magistrate has the power also to hold his Court for the exercise of its Criminal Jurisdiction at any time and place that he may see fit.

Power is given by Section 71 to the Resident Magistrate to sit in Chambers and there to make Orders as to the mode of trial of persons brought before him charged with any indictable offence, to hear and determine any application for a change of venue from one station to another in his parish, for any stay of execution for a *habeas corpus* to bring up any witness or prisoner, and any application respecting the taxation of costs, and also any unopposed application for Probate or Administration and also any application that may properly be made *ex parte* and without notice to the other side.

A sitting in Chambers may be fixed by the Resident Magistrate for any place or time, and he has jurisdiction to act without notice of such sitting being given.

In order to provide the means of dealing as early as possible with persons charged with indictable offences, the law enacts that the Resident Magistrate shall at all times be deemed to be sitting in Chambers for the purpose of making Orders as to the mode of trial of such persons.

The Resident Magistrate may refer any matter brought before him in Chambers to be disposed of in Court, if owing to its importance or for any other reason he thinks it should be so disposed of.

COURTS OF PETTY SESSIONS.

PETTY SESSIONS COURTS were established in this island shortly after the English conquest of the Island when the judicatories for the peace and good order of the island were settled. They are constituted as in England. Justices of the Peace are appointed to each parish by commission from the Governor under the great seal of the island as conservators of the public peace. They derive their power from their commission and their jurisdiction is conferred by various local laws. Generally one of the body is selected by the Governor and appointed Custos—an office similar to that of Custos Rotulorum in England. Where there is no Custos the Magistrate next in seniority to him or the Senior Magistrate of the parish and resident in the parish and in the habit of acting as Justice of the Peace therein, is the individual falling under the designation of Custos. (18 Vic., chap. 31, section 6.) The course of procedure in the Courts of Petty Sessions is regulated by the 13th Victoria, chapters 24 and 35, which consolidate the previous provisions on the subject.

By Section 21 of Law 23 of 1904 every Resident Magistrate appointed under that law is *ex officio* a Justice of the Peace for every parish of the island.

The Clerks of the Courts act as Clerks in the Courts of Petty Sessions and in the Resident Magistrates' Courts and Circuit Courts. They are authorised to take information on oath and to issue summonses, warrants and subpoenas in criminal and quasi criminal cases. The Assistant Clerks when appointed by the Governor as Deputy Clerks of the Courts, have similar powers except that of issuing warrants.

PETTY SESSIONS COURT FEES.

"All proceedings in cases of persons charged with indictable offences, and all proceedings before a Justice of the Peace or Justices of the Peace in Petty Sessions on summary trials for larceny or under any act or law now or hereafter to be passed making the case a public prosecution, and all proceedings instituted by any member of the Constabulary Force in his capacity as such, shall be free of all stamp duty, whether imposed by this or by any other law."—Law 3 of 1870, s. 9. CURRENCY OF JAMAICA.

THE Acts relating to the metallic currency are 3 Victoria, chap. 39, "to provide for the assimilation of the currency of this island with the currency of the United Kingdom, 5 Victoria, chap. 28; 6 Victoria chap. 40; 7 Victoria, chap. 51; Law 49 of 1869; and Law 13 of 1880; and the several Proclamations bearing on the coinage are of the following dates: 14th September, 1838, 19th August, 1853, 9th March, 1854, 23rd October, 1863, 10th November, 1866, and 11th November, 1869.

A Proclamation was issued on 23rd October, 1863, calling attention to the fact that the fractional parts of the dollar of Foreign States were not legal tender, and prohibiting their reception in payment of Customs duties or taxes. Subsequently, under Law 8 of 1876, the silver dollar itself ceased to be legal tender.

By Law 49 of 1869 the issue of a nickel currency of pennies and half-pennies is authorized, and these coins are legal tender to the extent of one shilling and of sixpence respectively. Law 13 of 1880 authorizes the issue of nickel farthings, which are legal tender to the extent of threepence in one payment.

In 1904 the Currency Note Law was passed constituting a Board of Commissioners to issue notes called currency notes of the value of 10s. each, redeemable on demand at the office of the Commissioners. This Law was amended by Law 17 of 1918 authorising the issue of Currency Notes of such denominations as may be approved by the Secretary of State. These notes are made legal tender by Law 27 of 1904.

The Island Act regulating Banks not established under Royal Charter or by Act of Parliament, is the Act 7 Victoria, chap. 47.

Under the Currency Note Law, 27 of 1904, the Commissioners of Currency issued their first notes on the 15th March, 1920, aggregating £17,500.

The notes in circulation on the 31st March, 1929, amounted to £81,044 as under:—

2/6 :	£128 15s.	..	5/ :	£31,295 5s.	..	10/ :	£49,620
-------	-----------	----	------	-------------	----	-------	---------

The Commissioners had on the 31/3/29 invested in British Securities, £50,297 10s.

Currency Commissioners.—The Island Treasurer, Hon. Collector General, Sir Thomas Roxburgh, K.T., C.M.G. *Secretary*—John R. Lewis.

The paper money within the island consists of the notes of Barclay's Bank (formerly the Colonial Bank), the Bank of Nova Scotia, the Royal Bank of Canada and the Canadian Bank of Commerce. Bank notes were made legal tender under Law 36 of 1914 by Proclamation in the Extraordinary Gazette of the 20th August, 1914. By Gazette Notice, No. 457 of 3rd July, 1919, Bank Notes ceased to be legal tender. Currency Notes of One pound and of Ten shillings value, issued by H.M. Treasury under the Currency Bank Notes Act of 1914, were made legal tender by Law 2 of 1917 "in the same manner and to the same extent and as fully as Sovereigns and Half Sovereigns are current."

The money of account in Jamaica is pound, shillings and pence, sterling. British Silver coins of sixpence and upwards are legal tender to any amount. British Silver Coins of smaller denominations than sixpence are legal tender only to the extent of forty shillings in respect of any one payment. (7 Vic. Chap. 51.) Copper Coins current in Great Britain were legal tender in Jamaica to the extent of twelve pence in one payment, but to no greater extent (6 Vic. Chap. 40). By Law 11 of 1882, "The Bronze or Copper penny and the several sub-divisions thereof" ceased to be legal tender. By notice, No. 583 in the Jamaica Gazette dated the 29th September, 1921, British Bronze and Copper Coins are declared negotiable at the Public Treasury and the several Parochial Treasuries. Jamaica Nickel Pennies and half-pennies are legal tender up to 1/- and 6d., respectively (Law 49 of 1869). Jamaica Nickel Farthings are legal tender up to 3d. (Law 13 of 1880.)

PART VIII.

EDUCATION.

SECONDARY EDUCATION.*

BEQUESTS were from time to time in years gone by made for the education of the children of free people, but these were to a great extent misappropriated and mismanaged, and the trust funds would have all disappeared had not the Government in 1865 taken possession of what remained, paying a high rate of interest.

In 1879 a law was passed putting all these endowments under the control of the Jamaica Schools Commission, and all are now expended in the cause of secondary education. (See below "Schools Commission" and "Endowed Schools"). From 1881 a Jamaica Scholarship has been awarded yearly, and since 1912 one for boys and one for girls have been awarded.

The Secondary Education Law of 1892 provided for the establishment of secondary schools in any important centres declared by the Governor in Privy Council, on the recommendation of the Board of Education, to be without adequate provision for secondary education. A secondary school was established under the law at Montego Bay in 1895, and in 1911 it was moved into new buildings at Pleasant Hill with accommodation for boarders, and by an amending law its control was transferred from the Board of Education to the Jamaica Schools Commission.

During the year 1909, the attention of the Jamaica Schools Commission was drawn to a letter from the Secretary of the Board of Education in England, in which it was stated that amongst other ways of assisting public education in different parts of the Empire, the Board of Education undertook "to meet so far as they could the desire of the Government of any Colony for an English Inspector to go out either to inspect the schools or to consult with the educational authorities as to the best means of improving the educational conditions. In this case the Board would make no charge for the services of the Inspector, but would only ask that the travelling and maintenance expenses should be defrayed by the colony in question."

The Commission communicated with the local governing bodies of the various Trust Schools in the Island on the subject; and, on favourable replies being received from them, a request was sent to the Government, that arrangements might be made by the Government with the Board of Education for the sending out of an English Inspector to inspect the Secondary Schools of the island on the lines indicated above. Besides the schools actually under the control of the Commission at this time, Westwood High School, at its own request, and the Montego Bay Secondary School, now known as Cornwall College with the concurrence of the Board of Education, were included in the scheme. As the result of later negotiations, Mr. H. H. Piggott, M.A., H. M. Inspector, arrived in the island on the 20th January, 1911, and after inspecting the schools, finally left the colony on March 22nd. The report received by the Schools Commission in July, 1911, afforded a most useful account of the state of secondary education in Jamaica and gave wise and helpful advice as to development of secondary education in Jamaica in the future. Another visit by Mr. Piggott which had been arranged for 1915 was abandoned on account of the war.

In the Session of the Legislative Council in 1914, a Law consolidating and amending the Laws relating to Secondary Education was passed.

In 1917 a Consultative Committee for Secondary Education was formed by the leading head masters and mistresses, with the Director of Education and the Secretary of the Jamaica Schools Commission.

In the Session of the Legislative Council in 1924, a Law was passed providing Pensions or Gratuities for Teachers in recognized Secondary Schools. This Law (29 of 1924) came into operation on the 1st of September, 1924.

In November 1926, the 5th section of the Secondary Education Law, 1914, (Law 34 of 1914) was amended in order to provide scholarships for children in such centres of population as are unprovided with Secondary Schools.

In December, 1927, under this amendment the parishes of St Thomas, St. Mary, Trelawny and Clarendon exclusive of the old parish of Vere were declared to be important centres of population without adequate provision for Secondary Education by Proclamation in the "Jamaica Gazette."

* For a fuller account of the History of Secondary Education, see the Handbook for 1911.

In the early part of 1928 the Schools Commission drew up a Scheme of Regulations under which these Scholarships may be held. This Scheme was approved by the Acting Governor in July, 1928, and the first examination was held at four centres in December, 1928, viz., Morant Bay, Port Maria, Falmouth and Chapelton. Under the Scheme provision is made for two scholarships for pupils resident in St. Thomas, three for St. Mary, two for Trelawny and two for Clarendon exclusive of the old parish of Vere, to be awarded annually. The Scholarships are of the value of £50 per annum tentable for four years at any Secondary School approved by the Schools Commission.

Regulations for grants-in-aid of Secondary Schools were passed by Resolution of the Legislative Council on the 28th May, 1920, and came into force on the first of August following. Two-thirds of £7,000 was voted for the Michaelmas and Easter terms, the Commission being the authority for administering the Regulations, the Director of Education administering the moneys in accordance with the provisions of the Regulations and the requirements of the Commission. The Commission is required to establish a List of Schools recognised by it as efficient under the Regulations, the List to include the Schools on the Grant List and Schools not eligible or not applying for grants but which apply for recognition and which the Commission determines to be efficient upon inspection. £8,000 was voted for the financial year 1928-29.

The Regulations for Grants-in-aid were converted into Law 31 of 1924.

The following Schools are in receipt of Government Grants under this Law:—

First Grade—Jamaica College, Wolmer's Boy's School, Wolmer's Girl's School, Munro College, Cornwall College, Hampton, Westwood, Calabar High School, Diocesan High School. Second Grade—Manning's School, Rusea's School, Titchfield, Beckford and Smith's School, Cathedral High School, Manchester School, Happy Grove, St. Hugh's High School, St. Helena's High School, St. Andrew High School.

ELEMENTARY EDUCATION.*

The Secondary Education Law, No. 34 of 1914 was amended by Law 25 of 1926 to make provision for scholarships to be competed for by pupils from such centres of population as are unprovided with Secondary Schools. It is enacted that such scholarships shall be held at any Secondary School approved by the School Commission. The following are the latest statistics:—

The following shows the state of education in the Island at the dates of the taking of the Census in 1891, 1911 and 1921:—

No child is allowed to be admitted into any public elementary school under seven years of age or to be retained after completing his fifteenth year, except that with the special sanction of the Inspector a limited number of children may be given an extra year at school and serve as monitors. In Infant Schools the limit of age is from 4 to 8 years.

Public elementary schools are inspected and examined by Inspectors and Assistant Inspectors of Schools, and the scholars are examined in the prescribed subjects.

* For historical summary see Handbook for 1926.

Grants are made by the Government, based on the average attendance, the schools being placed in grades according to size and salaries with annual increments fixed for each grade for Head Teachers, who are also graded according to qualifications and length of service. Salaries of Assistant Teachers are also provided on a fixed scale with increments, depending upon qualifications and experience. The payments to Pupil Teachers depend upon their qualifications. Special Grants are paid for Advanced Manual Training where taught and for Sewing in schools which have no assistant or pupil teacher on the staff, also for School Appliances and equipment. The average attendance on which grants are made is the mean of the average attendances of the three preceding calendar years, and for the average attendance of each year the best 288 sessions only are taken.

Any person who pays a fee of 5s. may be examined with the Pupil Teachers of any year and is informed of the results of his examination: a fee of 2/6 is paid for the preliminary examination which is largely taken by pupils still in attendance at Elementary Schools. In July, 1929, 437 Pupil Teachers and 4,979 other candidates presented themselves for examination.

The control of the Elementary Schools is as follows:—

Government, 131; Church of England, 173; Baptist, 103; Wesleyan, 71; Moravian, 57; Church of Scotland, 6; Presbyterian, 50; Congregational, 19; Methodist, 7; American Missionary, 5; Roman Catholic, 30; Society of Friends, 5; Undenominational, 14; belonging to no Denomination, 1. According to parishes they are divided as follows:—

Kingston 31; St. Andrew 42; St. Thomas 33; Portland 45; St. Mary 60; St. Ann 57; Trelawny 26; St. James 33; Hanover 32; Westmoreland 50; St. Elizabeth 70; Manchester 63; Clarendon 62; St. Catherine 68.

By an Order in Privy Council dated August 21st, 1923, school attendance was made compulsory as from September 1st, 1923, between the ages of eight and fourteen within the districts of Kingston, Halfway Tree, Port Antonio, Brown's Town, Falmouth, Lucea, Sav-la-Mar, Black River, Porus, Spanish Town, Montego Bay, Port Maria, Morant Bay and May Pen. The regulations on the subject of Compulsory School Attendance under Section 18 (3) of Law 31 of 1892, and the names of the members of the Kingston, Falmouth, and Lucea School Boards first appointed by the Governor were printed in the Handbook of Jamaica for 1911. In March, 1914, a Law consolidating and amending the laws relating to Elementary Education was passed.

TRAINING COLLEGES.

THE following means are employed by the Government for the college training of Elementary School Teachers.

1. 40 students are supported at the Mico Training College in Kingston who are being trained as schoolmasters. In addition to the number supported by the Government there are 20 students on the original foundation supported by the Mico Trustees in England
2. A Training College is maintained at Shortwood, in St. Andrew, for women, in which 47 students are under training as teachers.
3. Provision is made for the payment of grants to the managers of certain voluntary Training Colleges for a specified number of resident students under training, and of an additional grant for every student, resident or non-resident, who passes the yearly examination. Under this provision 28 women students are trained at Bethlehem, a Moravian College in the Santa Cruz Mountains, 7 resident and 30 day students, women, at St. Joseph's (Roman Catholic) College in Kingston.

There are also regulations providing for an annual examination of students in Training Colleges and of teachers of Elementary Schools with a view to the granting of Certificates after a period of four years probationary work in school to those who are successful.

The number of Registered Teachers engaged is about 1,450 and approximately 940 of these have received a college training.

BOARD OF EDUCATION.

THE Board of Education was constituted under Law 31 of 1892.

The Board's functions are—

- (5) Any changes in the Education Laws it may consider advisable to be made.

It is also provided that when alterations are made in the Code, "all such alterations shall either have been recommended by the Board of Education or shall have been submitted to the Board for its consideration and advice."

MICO TRAINING COLLEGE.

INSTITUTIONS and Schools under the Lady Mico Charity were founded in the year 1834 by the late Sir Thomas Fowell Buxton. The idea was to afford the benefit of education and training to the black and coloured population of this and the other West India Islands, as well as to train out of this population Teachers for their own Schools and the Schools of all denominations of Christians.

Training institutions were established in Jamaica and Antigua; and schools in Trinidad, Demerara, Bahamas, St. Lucia, Mauritius, and the Seychelle Islands. Of these the Training College in Jamaica alone remains.

The origin of the Charity is as follows:—

Jane Mico, widow of Sir Samuel Mico, Knt., of London, a member of the Mercers Company, who died in 1666, bequeathed the sum of £1,000 "to redeem poor slaves." This money was invested by direction of the Court of Chancery in certain London properties which were conveyed to Lady Mico's executors.

The original sum towards the middle of the 19th century increased to £120,000, and in 1834 Sir Thomas Fowell Buxton conceived that the interest of the money might be legitimately applied to the Christian instruction of the children of West Indians, a purpose as charitable as that for which the money was originally left. A charter was obtained, and the British Government added a grant of £17,000 per annum for five years. The system adopted from the commencement was liberal, comprehensive and undenominational in schools and training colleges.

The original Trustees were:—

James Gibson, The Rt. Hon. Stephen Lushington, D.C.L., Sir Thomas Fowell Buxton, Bart., Thomas Richard Warren, Q.C., John Gurney Hoare, John Elliott Drinkwater Bethune. The present Trustees are:—

Alfred Powell Buxton, *Chairman*, Sir Samuel John Gurney Hoare, Bart., *Treasurer*; Eliot Howard, Henry Fowell Buxton, Miss Susan Lushington, Brig.-General Stephen Lushington; *Secretary*, John Barnett, 114 North Station Road, Colchester.

The institution in this island belonging to the Charity was for many years situated in Hanover Street, in Kingston, and consisted of a training college for 65 students and a school for 120 scholars. In the year 1894, however, these premises were sold to the Government for a graded elementary school, and the Trustees purchased Quebec Lodge at the north of the race course where they erected a spacious set of buildings at a cost of over £12,000. The college was wrecked by the earthquake of 1907, and was rebuilt. It was destroyed by fire in February, 1910, and again rebuilt in 1911.

The expenditure of the training college and school is about £5,294 per annum. Of this sum £2,250 is allowed by the Local Government for training forty teachers, and the day school earns upwards of £800 per annum from the Government.

Students are admitted once a year, after a competitive examination, by a selection committee. They remain three years, go out as teachers in elementary schools on the completion of their college course and are under bond to teach for six years. During residence they receive free teaching, board, lodging and medical attendance. Each student pays an entrance fee; First year £10. Second year £7 10/. Third year £7 10/. There are now sixty-five students in residence, including one from Grand Cayman.

The objects for which the institution was originally founded are being more and more realized. Its benefits are not confined to the people of any creed, class or colour. It holds out its advantages to all.

The practising school in connection with this institution occupies a high place among the first class elementary schools of the island, and the results of the annual examinations of training colleges by the Education Department show that the Mico Training College, which is the largest school of its kind in the West Indies and the oldest training college for teachers in the Western Hemisphere, is also one of the foremost in respect of the attainments of the young men under training for the office of teacher in the elementary schools of the island.

A fully equipped workshop is fitted up for manual training, and the students receive instruction in practical agriculture from a visiting Instructor. There is a model school garden at the college.

The Governor of the island for the time being is the patron of the institution. It is locally managed by a Board of Directors consisting of fifteen clergymen and laymen, representing the various Protestant Churches.

MORAVIAN TRAINING COLLEGE FOR WOMEN, BETHLEHEM

A SCHOOL for the training of female teachers for service in the day schools belonging to the Moravian Church was opened at Bethabara, in 1861, by the Rev. J. J. Seiler. It is now also made use of for the higher education of the daughters of the native Jamaica ministers and missionaries of the church. In 1885 the School was placed on the Government list of voluntary training colleges, in consequence of which the number of students was increased and the premises at Bethabara were found to be quite inadequate. New buildings were therefore erected by the Moravian Church at Bethlehem in the Santa Cruz Mountains, the school meanwhile being temporarily removed to Salem. The new school was opened in February, 1889. In the course of 1895 the building was considerably enlarged and improved. It has now accommodation for 30 students. The Government granted 25 maintenance scholarships to the school for the current year. Boarders pay £32 annually. All students pay an entrance fee of £7 10/.

SHORTWOOD TRAINING COLLEGE FOR WOMEN TEACHERS.

THIS College was established in September, 1885, to meet the want, long and pressingly felt, of a greater number of trained women teachers for the elementary schools of the island. Formerly under the management of a Board of Visitors consisting of ladies and gentlemen appointed by the Governor, it is now under a Board of Directors similarly constituted. The college is strictly undenominational; students are admitted after a competitive examination, by a selecting committee which, besides considering their position in this examination, takes into account (1) the report of the Medical Officer (2) position in the Pupil Teachers' Examination, (3) recommendation of responsible persons in the district to which they belong, (4) general bearing. A fee of six pounds for each year of residence is charged. Students are boarded and lodged during the period of their training, subject to an undertaking on their part to teach in Jamaica elementary schools for six years at least.

The ordinary College course occupies two or three years, during which the instruction is in accordance with the schedule attached to the Government Rules for Training Colleges. The course of training includes the study of subjects generally taught in the public Elementary Schools and, in addition, History, Practice in Teaching and the management of a class and Domestic Economy, both theoretical and practical. In addition a limited number of students are received who undergo a course of training for domestic work only, extending over a period of not less than four terms.

Under the will of Michael Cuff Morgan, two scholarships of £9 a year each are held at this college, tenable for two years by two respectable poor girls of the parish of St. Elizabeth.

GOVERNMENT TECHNICAL, CONTINUATION AND COMMERCIAL SCHOOL, KINGSTON.

This school takes the place of the Manual Training School which was established by the Government in January, 1896, as a "model school" and for the purpose of introducing a system of "hand and eye training" into the schools of the island.

Until the Earthquake in 1907, the Manual Training school was situated in Hanover Street, Kingston, in premises formerly occupied by the Mico Training College. It included three Departments, Kindergarten, Boys and Girls—having accommodation for 500 pupils and a fully equipped Manual Training room. After the Earthquake the Boy's school was removed to new quarters in the Elletson Road, and in Sept., 1911, the present school was opened in reconstructed buildings at 82 Hanover Street. The manual training and technical work which was at first carried on temporarily in the old Treasury buildings in Harbour Street, was transferred to Hanover Street in 1913; it now includes metal work, and a plant of electrically driven woodworking machinery.

The chief purpose of the school is to extend the education given in the ordinary Public Elementary Schools of the Island and to provide special vocational training—Technical and Commercial for boys, and Domestic and Commercial for girls. The average numbers on roll in 1929 were as follows:—

Continuation Department	198
Commercial Department	91
Technical Boys Department	58
Technical Girls Department	25

Evening classes also are held in Commercial subjects. The school also provides Manual Instruction (Woodwork and Metalwork) for boys and Domestic Instruction (Cookery, Laundry, etc.,) for girls, for selected pupils from the Public Elementary Schools in Kingston. About 500 pupils attend weekly.

The Headmaster is also Organising Inspector of Manual Training, and examines the work of the other Manual Training Centres in the Island.

The Technical School is affiliated with the City and Guilds of London Institute, and many local teachers, having been trained in the school, have gained the full Teacher's Diploma of the Institute for Manual Training (woodwork).

The centres for Manual Training, working in connection with the school are situated respectively at:—Mico Training College, Mandeville, Porus, Lucea, Falmouth, Port Antonio, Brown's Town, Montego Bay, Old Harbour, Savanna-la-Mar and Spanish Town.

Facilities for manual training are gradually to be established at all the town centres in the Island.

The Commercial Department prepares boys and girls for the Examinations of the London Chamber of Commerce, and the school is an approved examination centre.

The school is under the control of a Board of Management appointed by the Governor.

UNIVERSITY OF CAMBRIDGE LOCAL EXAMINATIONS.

The University of Cambridge Local Examinations were held in Jamaica for the first time in December, 1882, the Governors of the Institute of Jamaica taking the necessary

steps to establish a Local Centre. At the outset none but Senior and Junior Candidates were presented, but in 1895 the Preliminary Local Examination was introduced: the Higher Local Examination was held for the first time in 1901, and the Higher School Certificate Examination, (on the results of which the Jamaica Scholarship and the £80 Scholarship are awarded), in July, 1919. The Higher Local Examination has now been discontinued and the Examination formerly known as the Senior Local Examination is now known as the School Certificate Examination.

The examination of Junior and School Certificate candidates is now held every December and July. The Preliminary Examination, which has been discontinued in England, is held in December only and the Higher School Certificate Examination in July only.

The School Certificate Examination, is intended to be a test of general education for pupils in a form of the average age of 16-16½ years before they begin to specialise in any particular branch of study. It is hoped that, for the examination as designed, whole forms may be sent in rather than selected candidates.

The Higher School Certificate Examination is designed to test the work of students whose age is about 18, and who have as a rule given about two years' study mainly but not exclusively to some definite group of subjects.

In July, 1929, there were Centres at Kingston, Calabar High School, Happy Grove, and Mandeville.

In December, 1929, there were centres at Kingston, Jamaica College, Wolmer's Schools, Munro College, Hampton School, St. George's College, Kingston College, Half-way Tree, Brown's Town, Montego Bay, Lucea, Sav.-la-Mar, Port Antonio, Westwood and Spanish Town.

The fees are as follows:—Higher School Certificate, University, £3; Local 10s.; School Certificate, University, £1 15s. 0d.; Local 9s., ('Over age' 10s.); Junior, University, £1 5s. 0d.; Local 8s.; ('Over age' 10s.); Preliminary, University 15s.; Local 6s.; Late fees, University 5s.; Local 1s.

Arrangements for conducting these examinations are made by the Cambridge Local Examinations Committee of which body Mr. W. H. Mitchell, M.A., Education Office, Kingston, is the Honorary Secretary.

EXAMINATIONS IN MUSIC.

In April, 1908, the examinations of the Associated Board of the Royal Academy of Music and the Royal College of Music, of London, England, for local examinations in Music in the British Empire, were held for the first time in Jamaica.

The examinations of the Associated Board are as follows:—

1st. *School Examinations*: (a) for individual certificates (to which students receiving private tuition are also admitted) in four divisions, viz.: Primary, Elementary, Lower, and Higher: (b) A general school examination for a collective report on the teaching generally: (c) A class singing examination.

2nd. *Local Centre Examinations*:—Intermediate, Advanced and Final grades for individual certificates.

3rd. *Examinations for the Licentiatehip of the Associated Board*, (a) for teachers: (b) for solo performers of concert standard.

The colonial examinations, which are precisely similar to those held in the United Kingdom, are held in Australia, New Zealand, Canada and elsewhere.

As far back as 1896, the Board of Governors of the Institute of Jamaica, recognising that they were the highest form of musical examinations obtainable, commenced a correspondence having for its object the holding of the examinations of the Associated Board in Jamaica. Arrangements were made to hold the examinations in this colony in 1907, but the earthquake caused their postponement till 1908, when there were 78 candidates. Since then they have been held yearly.

The Board offers annually, to candidates in its examinations in the combined centres of the British West Indies, British Guiana, and Bermuda, one Exhibition, entitling its holder to free tuition at the Royal Academy of Music, or the Royal College of Music, London, for two or possibly three years. The Exhibition is awarded on the recommendation of the Examiner to the candidate showing the greatest musical promise. Exhibitions were awarded in 1908, and yearly from 1915. There is no limit of age, but the Board may decline to award the Exhibition in any year in which, in its opinion, sufficient promise has not been shown by any candidate. The Board of Governors of the Institute of Jamaica offers a Prize of £12 to the best candidate in the Advanced and Final Grade Examinations combined.

In 1929, Mr. B. McCara Symons, A.R.A.M., one of the Examiners of the Associated Board conducted the Practical Examinations in pianoforte, violin and singing at fifteen

schools: Hampton, Westwood, Montego Bay, (2) Brown's Town, Mandeville, Spanish Town, St. Andrew, (3) and Kingston (5) at which Centres with the exception of all those in St. Andrew, four in Kingston and one in Montego Bay, the theory examinations were also held. As a result of the examinations, 616 certificates (7 Licentiate, 109 Local Centres and 500 School) were awarded; there being 133 failures (6 Licentiate, 35 Local Centre and 92 School).

EXAMINATIONS IN DRAWING.

The examinations of the Royal Drawing Society (for the encouragement of the natural development of drawing as an integral part of general education) are held at certain schools in Jamaica. The examinations are held in June at schools of recognized standing which pay a fee of £1 ls. a year and in addition 6d. for each paper drawn upon in the examination. There are seven divisions of the examination, ranging from the Preparatory to Division VI. The examination in Division VI. is in four different parts, including, painting, figure drawing, pictorial composition and decorative composition.

A full Honours Certificate is awarded to those candidates who obtain Honours in Divisions I, II, III, IV, V, and in one part of Division VI.

The general prospectus of the Society can be obtained by payment of 6d. from The Art Director, the Royal Drawing Society, 50 Queen Anne's Gate, Westminster, S.W., England.

The Illustrating Syllabus provides for examinations of six grades for more advanced students, Candidates who have secured the full Honours Certificate of the Schools Examinations are excused from Divisions I and II of the Illustrating Syllabus.

An Exhibition of Work from Schools is held in London each Spring. Exhibits which have to be mounted must be forwarded in January.

local Committee of Selection. The Memorandum and notes on the Memorandum are obtainable on application to the Secretary of the Jamaica Schools Commission who is also Secretary to the Committee of Selection for Jamaica. Copies of the Memorandum can also be obtained from the offices of the Trust. The Rhodes Trust, Seymour House, Waterloo Place, London, S.W.1.

The following are the conditions under which Candidates are eligible to compete:—

- (a) Candidates must be British subjects and unmarried.
- (b) A candidate must be a British subject who was himself born in Jamaica, or of whose parents (or guardian) either one has been domiciled and resident in Jamaica for at least five years immediately preceding January 1st in the year of his candidature or, in the event of both being dead, one had been domiciled and resident in Jamaica for at least five years immediately prior to his or her death.
- (c) Candidates must have been educated in Jamaica for at least five years between the ages of nine and twenty.
- (d) Candidates must have passed their nineteenth birthday but not have passed their twenty-fifth birthday, on October 1st of the year for which they are elected.
- (e) Candidates, at the time of their election, must have passed the Responsions Examination of the University of Oxford or its equivalent. The Committee of Selection is free to apply to candidates, or to any selected number of them, such further intellectual tests as they may consider necessary.

Committee of Selection.

3. The Committee of Selection shall consist of:—

- His Excellency the Governor, or Officer administering the Government (Chairman).
- His Honour the Chief Justice.
- The Director of Education.
- The Chairman of the Jamaica Schools Commission.

The first four members of the Committee hold their places *ex-officio*, and their places will be filled as vacancies occur, by their successors in office. One member will be elected by co-optation, subject to the approval of the Rhodes Trustees. One or two ex-Rhodes Scholars resident in Jamaica may be appointed members of the Committee by co-optation, subject to the approval of the Rhodes Trustees. Three members of the Committee shall form a quorum. The Chairman shall have both an original and a casting vote in decisions made by the Committee.

7. The election must be completed in any year by November 25th. Candidates must send their applications with all the required material, to the Secretary of the Selection Committee for Jamaica, not later than *June 20th*.

Principles governing the Selection of Scholars.

1 The Trustees desire that the selection of Rhodes Scholars shall be carried out with careful regard to the definition of fitness given by Mr. Rhodes in his will, viz:—

- (a) Ability and scholastic attainments.
- (b) Force of character and capacity for leadership as shown by "manhood, truth, courage, devotion to duty, sympathy for and protection of the weak, kindness, unselfishness and fellowship."
- (c) Physical vigour as shown by "fondness of and success in manly outdoor sports"

2. Mr. Rhodes wished his Scholars to be chosen especially for the possession of those mental and moral qualities which would be "likely in after-life to guide them to esteem the performance of public duties as their highest aim." He explained for the guidance those who would have the choice of Scholars that his ideal Scholar would be characterized by a strong combination of the first two sets of qualities. While he also desired

that all his Scholars should have manliness and physical vigour, his main emphasis was laid upon intellectual and moral force, and he did not intend that his Scholars should be chosen for "athletic" pre-eminence in the narrower sense of that term. The Trustees hope that Committees will bear these wishes of the Founder most carefully in mind when determining the weight to be attached to the different qualities in each of the candidates who offer themselves for selection. Some distinction either of character or of intellect should be looked for, and close attention should be given to Mr. Rhodes' wish that the performance of public duties should be his Scholars' highest aim.

3. The Committee will summon to a personal interview such of the candidates as they choose. Save under exceptional circumstances, no candidate will be appointed without such an interview. Should the interview be dispensed with, a statement of the reasons will be forwarded to the Trustees.

4. Poverty does not give any special claim to a Scholarship. The Trustees desire that the strongest candidate be appointed, irrespective of his financial circumstances.

5. In the absence of strong candidates, the Trustees hope that Committees will make no appointment.

6. Committees are responsible for satisfying themselves, before nominating a candidate to a Scholarship, that he fulfils the conditions as regards age, domicile, academic qualification, etc. No exceptions to the age conditions can be admitted.

7. While candidates are eligible so long as they will not have passed their 25th birthday on October 1st of the year for which they are elected, this upper limit should be regarded as intended to cover exceptional cases. Normally, it is desirable that a candidate should be younger than this when he comes into residence—say 20 or 21 years of age.

The Secretary may give unofficial advice to a candidate, but the Committee of Selection can accept no responsibility in the matter.

The Scholar is selected in the year previous to that in which he takes up residence.

ENDOWED SCHOOLS.

JAMAICA COLLEGE (*Hope*.)

PROVISION was made by Law 34 of 1879, for the establishment, under the control of the Jamaica Schools Commission, of a School to be called "The Jamaica High School," at which there should be provided a good liberal education.

Under this law "The Jamaica Free School" in St. Ann, and all funds and property thereof were absolutely vested in the Schools Commission, and are used for the purposes of the Jamaica College.

The School Buildings at Hope, in the parish of St. Andrew, about 5 miles from Kingston, on the car line, were opened by Sir Henry Norman, on the 9th of July, 1885. A College was opened in September, 1890, in connection with the School. By Law 26 of 1902, the Jamaica High School and University College were amalgamated under the name of the Jamaica College.

The Buildings were much damaged by the earthquake of 1907; they were repaired so that they could be used within a few weeks, and were completely restored during the following year with the help of a vote of £2,500 made by the Legislative Council in the session of 1907.

Additional Buildings—Science Laboratory; Assembly Hall, Class Rooms, Dormitory and School Chapel (a War Memorial)—were erected in 1908, 1913, 1922 and 1924 and the College Buildings now contain accommodation for the Head Master and his family seven other masters, three special Students and 150 pupils of whom 82 may be boarders. "Drax Lodge," a detached bungalow with garden on the School premises about $\frac{1}{4}$ mile from the main building, is allotted to the second Master if he is a married man.

The Jamaica College has an income, irrespective of fees, of £1,696 (£700 Government Grant, £996 Endowment), besides a Government grant of £500 for payment of debentures, and the sum awarded under the new scheme for Grants-in-Aid to Secondary Schools (in 1929-1930, £564).

Regulations for the management of the College have been framed by the Schools Commission, of which those of most general interest are the following:—

The number of Drax Scholars has been reduced to seven, three Scholarships being allotted to girls.

The College is open to all religious denominations.

Scholars—The College consists of the following classes of boys:—

- I.—Foundationers. (a) Drax scholars (seven in number), elected from the parish of St. Ann. (b) Foundationers other than Drax Scholars elected from parishes other than St. Ann, thirteen in number. II.—Holders of Endowed Schools. Special Scholarships. III.—Paying Term Boarders. IV.—Paying Day Boys.

Admission of Foundationers.—Foundationers are elected by the Schools Commission subject to the results of an Examination and to their meeting certain requirements:—

1. Boys are eligible as Candidates for admission as Foundationers only in case of the inability of their parents to provide a liberal education for their children.
2. Their age must be between 9 and 13 on January 1st in the year in which their tenure of the Scholarship begins.

3. Satisfactory testimony must be furnished as to their good character.

Special Scholarships from certain Endowed Schools.—It has been deemed desirable that certain Endowed Schools, which do not provide advanced Secondary Education should found Scholarships to be held at the Jamaica College or some other School approved by the Commission, which does give such advanced education, by boys and girls entitled to enjoy the benefits of the said Local Endowed Schools. The general qualifications for competition for such Scholarships are fixed and the scholars are elected by the Local Trustees, provided that the boys or girls nominated by them must be prepared at least to pass such Examination as is required by boys coming in to the Jamaica College as paying boarders. At present there are no such Scholarships provided, but the Vere Trust has offered Scholarships of £50 per annum, four of which are held in the Jamaica College.

Exhibitions.—The Schools Commission is prepared to grant exhibitions to paying terminal boarders either at admission, or, on the report of the Examiners and Head Master, to boys already in the School. Exhibitions are given as the reward of merit only, and vary in value according to merit and the financial resources at the disposal of the Commission.

Entrance Examination of Paying Boarders.—Those who come in between the ages of 9 and 13 are subject to an Examination of the same nature as that for Foundationers. Boys entering after the age of 13 years are subject to an examination which tests their ability to take a proper place in the school. Information on this point will be supplied to intending applicants by the Head Master.

School Terms.—The annual work of the School is divided into three Terms. The Lent Term commences on the third Wednesday in January in each year and, as a rule, ends on the Thursday preceding Easter Sunday. The Summer Term begins ten days after the end of the Lent Term and ends on the third Friday in July. The Christmas Term commences on the second Wednesday in September and ends on the Saturday on which the Cambridge Local Examination ends. In the event of any of these dates falling on a public holiday the Term commences or ends as the case may be on such day nearest hereto as may be most convenient.

Payment for Scholars.—Payments must be made in advance at the beginning of each Term. Term boarders pay at the rate of £18 6s. 8d. per Term if under twelve years of age. If over twelve years of age at the rate of £20 per term. Day Boys under twelve years of age pay for tuition and breakfast at the rate of £5 per Term; over 12 years at the rate of £6 per Term. Day Boys may have dinner with the boarders for £2 a Term. The charges of the School for the holders of Endowed School Scholarships are at a sum not exceeding £50 each per annum. The whole of this must in each case be paid by the Treasurer of the Endowed School to the Treasurer of the Jamaica College; but it will be a matter for local arrangement whether any portion of such charges be contributed to the Local Trustees by parents or guardians, or whether the Scholarships granted by Local Trustees shall be in all cases sufficient to cover the whole cost of £50.

Secular Instruction.—The School is divided into a Junior and a Senior School.

In the Junior School the subjects of Secular Instruction include the following subjects:—English, Latin, and French Arithmetic and Mathematics, Geography and History, the elements of Natural Science, Drawing, Vocal Music, Drill.

In the Senior School the same subjects are continued and extended and in addition boys take such additional subjects as the Head Master may arrange, such as Greek, Commercial Subjects and Political Economy.

Age at which Scholars leave the College.—Foundationers shall not remain in the School after the end of the calendar year in which they attain the age of sixteen years; and no boy shall remain in the School after the end of the year in which he attains the age of eighteen years except with the express permission of the Schools Commission, on the recommendation of the Head Master. The Commission, however, will be prepared, on the advice of the Head Master, to retain at the School any Foundationer showing marked ability or special diligence for such further period beyond the age of sixteen years as they may determine.

At the end of the Christmas Term of 1929 there were in the College 7 Drax Foundationers, 12 Open Foundationers, 47 Paying Boarders, 44 Day Boys making a total of 110.

All communications respecting Boys, or on School matters, should be addressed to "The Head Master, Jamaica College, Kingston;" letters on general business matters affecting the School should be addressed to "The Secretary of the Jamaica Schools Commission, Kingston."

WOLMER'S SCHOOLS.

(Marescaux Road, Kingston.)

THIS Trust was established in the year 1736 by an Act of the Island Legislature (9 Geo. II. cap. 6) to give effect to the bequest of John Wolmer, of Kingston, a goldsmith, who by will dated the 21st May, 1729, devised, after some small legacies mentioned therein, the rest and residue of his estate for the foundation of a Free School in the parish in which he should happen to die. The original sum was £2,300.

The School is now administered under the following scheme of the Schools Commission:

i. Trustees—Six Members of the Kingston and St. Andrew Corporation elected from time to time, and five other persons nominated by the Schools Commission and appointed by the Governor, three of whom are required to be persons of position, and influence connected with Kingston, and the remaining two chosen for their scholastic attainment and experience. The Chairman and Vice-Chairman are elected annually by the Trustees: the quorum consists of 5, except in certain specified cases when it is reduced to 3.

ii. The funds and property are devoted to the maintenance of a modernized Grammar School, with mathematical, classical and commercial sides, and with additional special subjects suitable to girls. The head master and head mistress are appointed by the Trustees, and all other masters and mistresses are appointed by the Trustees on the recommendation of the head master and head mistress, respectively. The school consists of such number of foundationers as may be fixed in the by-laws, and of other scholars paying such fees as may be similarly fixed. The boys and girls who are eligible as foundationers are the children of inhabitants of Kingston who are not able to pay for such higher education; and "inhabitants of Kingston" are defined to be persons who have continuously lived in Kingston for not less than two years immediately preceding the examination held for filling places on the foundation. In addition a number of Open Scholarships are awarded annually.

iii. Religious teaching is given in all sections of the School, and it is required that this teaching shall aim at securing a knowledge of the leading facts in the Old and New Testaments, especially the history and teaching of the Lord Jesus Christ; but any scholar can be exempted from this on the written request of the parent.

There are three terms in the year. The first term begins on the fourth Monday after the Saturday in the Cambridge Local Examination week, so long as this Examination continues to be held in December, and ends on the Wednesday before Easter Sunday. The second term begins on the Thursday after Easter Sunday and ends on the second Thursday in July. The third term begins on the ninth Thursday after the close of the Summer term and ends on the Saturday of December before the Cambridge Local Examination week.

In 1908 a special law was passed empowering the Trustees to move the School to the Quebec Lodge Lands, in the parish of St. Andrew, north of the Race Course. The new buildings were occupied for the first time for the first term of 1909. In December, 1929 there were 154 paying scholars, 39 free scholars and 6 exhibitors in the Boys' School, and 223 paying scholars, 25 foundationers, 3 exhibitors and 30 open scholars in the Girls' School.

CALABAR HIGH SCHOOL.

(Chetolah Park, Kingston).

THIS School was opened on the 12th September, 1912. At first it was a simple endeavour on the part of the Baptist Denomination to extend the scope of Calabar College in order to provide education for the sons of its own Ministers. The scheme, however, was modified at the request of some parents outside the Baptist Churches who proposed to send their sons, if opportunity were afforded, and in response to this demand accommodation was provided for 20 boarders and 20 day boys. The preliminary prospectus set forth that an endeavour would be made to give a thoroughly modern education in a definitely religious atmosphere, with a view to earnest life in the professional or commercial world either in Jamaica or elsewhere, and that the whole aim of the School life would be to develop self-reliance, honour and courage, and to train boys to these by allowing them as much liberty as possible and by the introduction of self-government under the monitorial system. The School was soon full, and a demand for further places led to an increase in the accommodation, until now there are over 140 boys in attendance, more than half of whom are boarders. In 1914 a chapel was added, which was in 1924 enlarged, and a pipe organ has been installed.

All ordinary school subjects, English, Latin, Greek, Spanish, Mathematics, History, Hygiene, Geography, Woodwork and Drawing are taught, and the School's curriculum each year is arranged in order to prepare for the Cambridge Local Examinations. The year begins in January. The fees are as follows—For Day-Boys, £12 per annum, for Boarders from £54 to £60 per annum. Books are charged extra.

The School is in no sense sectarian. Families of every branch of the Church have their boys at the School; but parents who do not share the views of the Governors as to the importance of definite Christian instruction are not allowed to send their children.

The School is recognised by the Jamaica Schools Commission under the 1906 Act as a Secondary School of the First Class, and receives from the Government a grant-in-aid. It is also recognised by the Education Department as one at which scholarships may be held. The Purscell Scholarships are tenable at Calabar.

BOARD OF MANAGERS.—Rev. W. D. Henderson, (Chairman), Rev. F. C. A.T.S., (Secretary), Arthur V. Kingdon, J. L. King, Kent Phillips, two members of the staff, F. E. Reed, E. V. Lockett, (the two last appointed by the Governors).

MANNING'S SCHOOL, SAV-LA-MAR.

THOMAS MANNING in 1710 left thirteen slaves with land and the produce of a pen at Burnt Savannah and cattle, to endow a Free School in the parish of Westmoreland.

It was incorporated in the year 1738, and since then has flourished in the town of Savanna-la-Mar, proving of great advantage to the inhabitants of Westmoreland and the neighbouring parishes.

In addition to the fees of paying scholars the income of the school consists of £471 3s. 3d. per annum being a perpetual annuity to the charity under the 28 Vict. c. 23 in lieu of £7,852 14s. 8d. appropriated by the Government.

In 1920 a Government grant was given to such Secondary Schools as satisfied certain requirements. The main object of the grant was to increase the salaries of the members of the staff. Manning's School obtains about £170 annually by this means.

The grant is still being made.

A new scheme was drawn up in the year 1897 by the Schools Commission for the future management of this school, and was approved by the Governor in Privy Council under the 36th Section of Law 34 of 1879. The scheme which has since been amended provides for the maintenance of both a boys and a girls school furnishing a good middle class education up to Cambridge Local Examination standard. There are 31 boys and 29 girls in the schools.

By the by-laws it has been provided that 15 boys and 15 girls shall be on the foundation and shall be educated free of cost, 5 boys and 5 girls shall be elected on the same condition as the foundationers, but shall pay £5 per annum.

Paying scholars are received who pay £10 per annum, with a reduction to £9 in the case where two members of a family are in the school at the same time.

The Head Master and the First Mistress have authority to receive boarders on such financial terms as may be approved by the Trustees.

In 1897, a sub-centre for the Cambridge Local Examinations was established in connection with the school.

RUSEA'S SCHOOL, LUCEA.

MARTIN RUSEA, a French refugee, in grateful recollection of the hospitality manifested towards him on his arrival and settlement in the colony, left by his will dated 23rd July, 1764, all his real and personal estate, which afterwards realized £4,500 (£2,700 sterling), for the establishment of a free school in the parish of Hanover.

The devise was disputed; but in 1777, an Act was passed (18 Geo. 3 cap. 18) settling the Trust and establishing an undenominational school. The income from the endowment amounts to £270 per annum being a perpetual annuity secured to the charity under the Act 18 Vic. chap. 23.

Eight boys and eight girls are received on the free foundation, and the Trustees admit in addition, paying pupils at a maximum fee of £10 per annum. Only the children of persons belonging to the parish of Hanover are eligible as foundationers.

The school is now held in the Long Barracks, Lucea, where instruction is given to both boys and girls. There are excellent grounds for recreation surrounding the school premises which are situated in a most healthy locality. Organized games consist of cricket, football and tennis.

The curriculum includes Latin, Greek, French, Mathematics, Religious Knowledge, History, Hygiene, Geography with the usual English and commercial subjects, and pupils are prepared for the Cambridge Local Examinations. Instruction in manual occupation is also given.

The school year is divided into three terms, fees being payable (i) at the re-opening of the school in January; (ii) at the re-opening in April; (iii) at the re-opening in September.

Boarders are received by the Head Master in his private residence.

The Fees for Tuition are as follows: £9 per annum, or £3 0s. 0d. per Term, for pupils under 12 years of age; £10 per annum or £3 6s. 8d. per Term, for pupils over 12 years.

TITCHFIELD TRUST AND SCHOOL, PORT ANTONIO.

SCHOOL MOTTO—*Virtute et Eruditione*.

THE Titchfield Trust was established under the Act 26 Geo. III., cap. 7, by which 350 acres of land adjoining the town of Port Antonio, or Titchfield, were vested in certain Trustees for erecting a Free School and for creating a fund for its endowment and support. The school was in active operation from its foundation till 1855, when it got into difficulties, after which it was relieved by the Government, and in 1884 it was placed under the control of the Jamaica Schools Commission.

Under authority of Section 39 of Law 34 of 1879, schemes were drawn up and amended for the better management of the Trust School.

The school is managed locally, subject to the supervision and control of the Jamaica Schools Commission, by a Local Board of nine Managers, seven of whom are appointed by the Governor on the recommendation of the Schools Commission, and two are members of the Parochial Board of Portland, elected by the Board.

Under the scheme a Day School for boys and one for girls were established in 1886 under the Head Mastership of Mr. W. H. Plant, and there have since been added an Infant Department, 1894, which is carried on on Kindergarten lines; a Secondary Department for boys and girls in 1897; and a Manual Training Department in 1902 with a fully equipped workshop, and a qualified master in charge.

In 1907 an amalgamation of the boys and the girls departments was effected.

By operation of Law 11 of 1926, the lower branches of the Titchfield School (Upper, Intermediate, and Infant) now entitled the Port Antonio Government Schools, passed from the management of the Titchfield School Board to the East Portland School Board.

The regulations affecting the Trust have been amended, a new scheme of management drawn up by the School's Commission.

On December 31st, 1926, Mr. W. H. Plant went on three months leave prior to his severing his connection with the School.

The School gives 22 Local Scholarships of £8 each, open to children of the parish of Portland.

The School is housed in the old Military Barracks at Fort George in Port Antonio which have been leased to the Commission by the Government.

In connection with the school there is a cricket club, a football club, a basketball club, and a miniature rifle club, a girls club and a club for present and past boys.

BECKFORD AND SMITH'S SCHOOL, SPANISH TOWN.

PETER BECKFORD, of the parish of St. Catherine, by his will dated 1730, bequeathed the sum of £1,000 towards the building of a free school or hospital for the poor. A further sum of £1,000 left by the same Peter Beckford was applied towards the same object. John Ellis bequeathed a sum of £200 towards the building of the school which was established in 1744 and remained open for many years as the "Free School of St. Jago de la Vega." Other bequests about the same date were made by Thomas Barrett (£40 per annum in 1742) and Mary Baldwin (£50 per annum in 1759.) In 1749 the Assembly voted £400 for repairing the premises, which were situated at the corner of Young and Beckford Streets, Spanish Town.

Francis Smith, by his will dated 1830, bequeathed £3,000 to the Bishop of Jamaica, the Custos and the Rector of the Parish, "to be invested in some institution permanently for the instruction of the poorer classes of all colours, free and slave, in the doctrines of the Church of England, and the promotion of industry." The school, known as Smith's Charity, and situated near the Cathedral was opened in 1833, but closed after a few years.

The amalgamation of the two schools was recommended by the Charity Commissioners in 1846 and was finally effected by legislation in 1869. The Beckford and Smith's School thus formed and placed under the direct control of the Governor in Privy Council, was opened in August, 1876. In 1895 it was the subject of a report made by the Schools Commission, who drew up rules for its management. The present scheme and By-Laws of the School were drawn up by the Schools Commission and approved by the

Governor in Council in 1914. As the accommodation in the old school building became insufficient a part of the old Assembly Hall was handed over to the school and was opened in January, 1926. There are nine exhibitions open in the first place to boys of the parish of St. Catherine between the ages of 9-12. The fees per annum are £7 10s. for boys under 10 years and 9 guineas for boys over 10 years of age and include a supply of school stationery. The school year is divided into three terms of about 13 weeks each, ending respectively at Easter, the middle of July and Christmas. The school curriculum aims at keeping well above the minimum of what are considered to be the essential requirements of an up-to-date Secondary School. A thorough English Education is given with Latin, French, Spanish and Mathematics. Boys are prepared for the Cambridge Local Examinations and for professional or commercial life. Attention is given to physical exercises, games. There are 47 boys in the school.*

VERE SCHOOLS.

SEVERAL persons of the old parish of Vere, which included a part of the parish of Manchester, having made several charitable donations, consisting of lands, slaves and money for the use of the said parish without giving any particular directions or making any particular appointments touching the management or disposal of the proceeds of these gifts, an Act of the Island Legislature was passed in 1740 vesting the funds of the Charity in certain Trustees for the purpose of erecting buildings and endowing a Free School at the Alley in the then parish of Vere, for the education and maintenance of as many poor children as the Trustees might approve of.

A Secondary School at the Alley, Vere, which was established in 1908, was closed in 1917.

The funds and property vested in the Trustees of the Vere Free Schools are at present appropriated towards supporting certain schools conducted as free elementary schools according to the provisions of the Elementary Education Law by such aid towards the up-keep of the buildings and by such other form of assistance as are provided by the by-laws. The schools thus maintained are those at the Alley, Race Course, Hayes and Mitchell Town. The funds also provide Scholarships for boys and girls at recognized secondary schools in Jamaica. Five are at present held at £50 p.a. Further Scholarships will be offered as funds allow.

The buildings and sufficient land for compounds at Portland and Milk River formerly Trust property were handed over to the Government in 1924 to be Government Schools proper. Arrangements are being made to hand over the remaining Schools at Alley, Race Course and Hayes to the Government and the Incorporated Lay Body of the Church of England and so free the Trustees of any responsibility for Elementary Education, thus making the Funds wholly available for Secondary Education purposes.

ST. HILDA'S SCHOOL, BROWN'S TOWN.

THIS School began life in Brown's Town in 1907, as one of the Church of England schools in connection with the Deaconess Home, and was known as the Deaconess High School. In 1915, however, owing to the increase in numbers, the late Archbishop of the West Indies, Dr. Nuttall, appointed a Committee to consider the advisability of establishing the school upon a somewhat firmer basis. The new buildings (Major Caws, Architect) were opened in 1922. WESTWOOD HIGH SCHOOL FOR GIRLS, STEWART TOWN.

This School was founded in January, 1882, at Manchester Pen, in the parish of Trelawny, to provide at moderate cost, on Evangelical and undenominational principles, a higher education and training for Jamaican girls of all classes. In 1881-82 the Rev. William M. Webb, Baptist Minister of Stewart Town, brought the need to the notice of Dr. and Mrs. Trestrail of Bristol, who enlisted the aid of other wealthy and influential friends in England, and the result was his being placed in a position to found "The Trelawny Girls School."

In August 1895, the name of the school was changed to "Westwood High School for Girls," on its removal to its present site. Buildings were erected for the purpose, at a cost of over £2,500. Many additional buildings have since been erected.

Generous English friends stood by the school, and gave financial aid till 1913, when it seemed able to stand alone. Four Scholarships have been established in the school, called respectively, the Trestrail, Underhill, Trafford and Webb Scholarships, in honour of the founders; and an effort is being made to raise an endowment sufficient to put these on a secure financial base and for general purposes. A fifth Scholarship of the annual value of £12 10s. Od. provided by an anonymous friend, is open to residents in Brown's Town, St. Ann. The school is a first class Secondary School, receiving a Government grant under Law.

CONSULTATIVE COMMITTEE FOR SECONDARY EDUCATION.

A CONFERENCE of Head Masters of Secondary Schools was held in September, 1916, at which the Director of Education and the Secretary of the Jamaica Schools Commission were present by invitation. At this meeting it was resolved that it was desirable that the University of Cambridge Higher School Certificate Examination should be made the Jamaica Scholarship Examination for Boys in July, 1919, and thereafter. In 1917 a Committee, which adopted the above name, met in September, the Committee

to consist of the Head Masters and Head Mistresses of all Secondary Schools in the Colony with a properly constituted governing body, together with the Director of Education and the Secretary of the Jamaica Schools Commission ex-officio. At that meeting the Regulations of the Jamaica Scholarship Examination (Boys) were considered in detail in readiness to be laid before the Legislative Council. These Regulations were adopted by the Council in April, 1918. At its request Archdeacon Simms joined the Committee and at a meeting held in September, 1918, it was decided that the Committee should be convened by the Director of Education and should when in session elect its Chairman for the occasion.

LUDFORD BEQUEST.

THE following is an extract from the will, dated 12th July, 1875, of Thomas Ludford of the St. Dorothy's district of St. Catherine:—

"And as to the residue and remainder of my said estate, I direct my said executors to pay the same to the Governor of this island, for the time being, to be by him appropriated in the establishment and maintenance of a school, first in the town or village of Old Harbour, and then of such other schools in the old parish of St. Dorothy as the Governor may think fit, with the view of providing for those of all denominations who are destitute of the means of elementary instruction, such as is provided by the 18th Victoria, chapter 54, in the parishes of Vere and Manchester. And I hereby declare that I leave to the Governor of this Island, for the time being, the establishment of such schools upon such rules and regulations for their proper conduct and government as he shall think best, so that whilst the instruction of the destitute poor may be provided for, others who may be in better circumstances may also be admitted to the said schools on such terms and conditions and under such regulations as the Governor may think proper."

There are three elementary schools supported by the Trust, with the help of the usual government grant, at Old Harbour, Old Harbour Bay and Good Hope.

Old Harbour Bay and Good Hope have been made Government Schools under the School Board from 1st July, 1927, but these occupy buildings maintained by the Trust.

GUTHRIE DAVIDSON BEQUEST.

THIS Fund was founded by the benevolence of James Guthrie-Davidson, of Montego Bay and later of Ardgath, Scotland. The bequest of £1,000 sunk under the provisions of the 4th sec. of 28 Vic. cap. 23, yields a perpetual annuity thereunder of £60 for the maintenance and education of one boy and one girl of the parish of St. James.

The Jamaica Schools Commission drew up a scheme which came into force on the 1st of November, 1898, under which the half of the bequest hitherto devoted to the education and maintenance of one boy was to be devoted to the education of four boys at the Montego Bay Government Secondary School (now Cornwall College), and the other half to the education of four girls.

Four boys are now being educated under the provisions of the trust at the Cornwall College. Four girls, elected as beneficiaries, are now being educated at the St. Helena's High School, Montego Bay. The election of beneficiaries is in the hands of the Parochial Board of St. James.

MORGAN BEQUEST.

CALABAR COLLEGE, KINGSTON.

THIS Institution was projected immediately after the abolition of slavery but was not opened until the month of October, 1843. It was commenced at Calabar near Rio Bueno. The buildings were erected by funds supplied by the Baptist Missionary Society in England in which the entire premises were vested in trust. The objects of the Institution, as set forth in the trust, were the education of Ministers of the Gospel and Day School Teachers for Jamaica, the neighbouring islands and Africa. The institution has the distinction of being the first in the world for training for the ministry the converts of the modern foreign missionary movement.

Under the Rev. President David Jonathan East, the premises were transferred in the year 1874 to a site at Kingston at the back of the East Queen Street Baptist Church, but were transferred in the year 1904 under the Rev. President James to Chetolah Park, Kingston. The Normal Department for training Day School Teachers was closed at the end of 1900 owing to the withdrawal by the Government of all aid to Colleges for male students that were under denominational management. 235 students were trained in this department. The Theological Department for the training of ministers was still continued, provision being made for an average number of eight students in residence. In the year

*For historical data, see Handbooks prior to 1927.

1911 a new departure was made by extending the scope of the college's work to young men in England who wished to devote their lives to the ministry for the gospel in Jamaica, and five men have already been trained under this scheme.

There are now eight Baptist Students in the Theological Hall.

The ordinary course of study is four years. This may be extended to five in special cases. The students are examined annually by examiners in England.

The conditions of entrance are set forth in the Annual Report and can be obtained on application to the President. The minimum standard set forth therein for entrance is low, but in actual practice more is expected of and offered by candidates.

The Institution is maintained in the following way:—1. The Baptist Missionary Society in England appoints and pays the teaching staff. 2. The Baptist Churches of Jamaica provide for the board and residence of the Theological Students and for the general current expenses of the College.

The local management of the Institution is vested in a Committee representing contributing churches in the island. The Theological Students of the Wesleyan College at Caenwood take some classes at Calabar, and the Calabar Students go to Caenwood for some classes, as part of a united education scheme between the two churches.

FRANCISCAN CONVENT OF THE IMMACULATE CONCEPTION.

The Sisters of the Third Order Regular of Saint Francis, established a Boarding School at 76 Duke Street in 1858, and since that time have devoted themselves to the education of the children of Jamaica.

Although the Course of Studies in the Boarding School is not mapped out to fit any particular examination, but rather to give a good general education, still those pupils whose parents desire them to sit for the Cambridge Local Examinations are prepared for these. The fee is £13 Os. a quarter. Drawing and Painting, Vocal and Instrumental Music form extra charges. In connection with the Academy there is a Business Course where girls are prepared for Commercial Life.

Besides the Convent and Academy in Kingston the Sisters have a country residence where with the Boarders they spend the vacations.

The Franciscan Sisters also have charge of Saint Joseph's Training College for Catholic women teachers, Saint Bonaventure's Preparatory School for boys, Saint Joseph's first class Elementary and Infant Schools on the premises, Saint Aloysius Boys School in East Street, Saint Francis School, Hope Road, Saint Ann's Elementary and Infant Schools in North Street, and Saint Anthony's Orange Street. In 1925, an Elementary School in connection with St. James Catholic Church in Montego Bay and Mt. Alvernia High School on Prospect Hill, Montego Bay, were opened.

CONVENT OF MERCY, ST. MARY'S ("ALPHA").

The Convent High School comprises boarding and day schools in which pupils are prepared for the Cambridge Local Examinations, and for the Examinations of the Associated Board of the Royal Academy and the Royal College of Music.

The Orphanage contains at present 45 children. A sound elementary education is given them in addition to a training in such domestic duties as may assist them afterwards in the earning of a livelihood.

The House of Mercy is for the protection of young women of good character, irrespective of religious belief. The girls who have been in the industrial schools are encouraged to pass on to this part of the Institution where the training commenced in the Industrial School is continued.

The Industrial Schools are certified for 250 boys and 125 girls. In these schools whilst being grounded in elementary education, the girls are trained for domestic service and the boys receive practical instruction in the culture of vegetables, fruits and flowers, carpentry and cabinet making, tailoring and bootmaking under experienced masters.

The elementary schools have 900 children on the books. There is a Kindergarten for the little ones. A Commercial School has been opened. Shorthand, typewriting and book-keeping are taught. A cane-seating department has been opened in both the Boys' and Girls' Industrial Schools. The Sisters are also in charge of the elementary school known as East Branch, an elementary school in Spanish Town, a High School and a voluntary school in Port Antonio and a voluntary school in Gordon Town.

BELMONT ORPHANAGE AND INDUSTRIAL SCHOOL, STONY HILL.

The Belmont Orphanage was established by Archbishop Nuttall in November, 1892, as a home and industrial school for orphan and destitute children, and was registered to accommodate twenty-six girls. The object of the institution was to provide a comfortable, though frugal home, where a number of children, so limited as to be not much larger than a good sized family, might be cared for and trained for the duties of life, chiefly as domestic servants. The orphanage was built, and was partly supported, by voluntary contributions; it received also the Government grant-in-aid under the Industrial Schools Law. The training provided included the ordinary branches of household work, cooking, house cleaning, washing, baking and needlework, straw plaiting and dairy work. Miss Nuttall from its inception until 1921, conducted the Institution,

and subsequently was Secretary and Treasurer till November, 1924, when the Orphanage, was temporarily closed.

The Institution was re-opened in October, 1925 as a Boys' Home and has been recognised as an Industrial School. There are now 23 boys in the Home.

HAPPY GROVE SCHOOL, PORTLAND.

HAPPY GROVE is a co-educational school, recognised as efficient by the Jamaica Schools Commission. The school offers a good secondary education, under Christian influences, to boys and girls of good character. The school has an Endowment Fund, which has been steadily increasing, by voluntary gifts since 1918, and at present amounts to over three thousand pounds. Besides this Endowment the school receives an annual subsidy from the Religious Society of Friends, who are the founders and sponsors of Happy Grove School.

There are separate buildings of residence for boys and girls, but academic classes are held jointly. There is a large playing field which offers full opportunity for football, cricket and other games.

Happy Grove is located in the eastern portion of Portland, twenty-five miles east of Port Antonio, on the main road between Port Antonio and Kingston. The property of thirty-five acres is well watered, and located in a district entirely free from malaria. The educational standard is that of the Cambridge Local Examinations.

CHILDREN'S HOME, CONSTANT SPRING.

THE Children's Home which was opened at Halfway Tree in May, 1918, and was in 1921 removed to Constant Spring, is chiefly for destitute children of respectable parentage who are unsuitable for Industrial Schools or Alms Houses and for whom no provision is made by Government. This Home is entirely supported by voluntary contributions.

A trained nurse is on the staff always. The children receive ordinary education and are trained in household duties, sewing, and gardening.

In connection with the Home, a Home for East Indian Orphans was opened in 1921.

The Government made a grant of £100 towards the cost of the buildings and assist in the maintenance of the children. During the year 1929 fifty young people were maintained in these Homes including girls who have left the elementary schools and are being trained for domestic service.

Hon. Superintendent—Mrs. Wortley, Maurice Hill, Constant Spring.

MANNING HOME, ST. ELIZABETH.

A very protracted period of drought, extending from 1907 to 1914, caused keen suffering in various parts of this parish of St. Elizabeth, but more particularly in the south-eastern districts. Infantile mortality was particularly noticeable and the Parochial Board on the suggestion of Mr. Bowen, opened food depots at several centres. These depots continued for over a year, but they did not seem to check the mortality amongst the children. Then it was that the idea occurred to Mr. Bowen to take over all the children in the district, house, feed and clothe them. The late Hon. J. M. Farquharson, then Chairman, and other members of the Board adopted the suggestion and Sir William Henry Manning gave his support. Belvue House was then rented for the purpose of a Rescue Home and opened on the 4th April, 1913.

At present there are 91 children in the Home under the care of a matron. These children are taught to read, write and do arithmetic. They are also taught hat-making, sewing, elementary domestic work, agriculture, and in short, to make themselves generally useful.

The Home is financed by the Parochial Board aided by a grant from the Government.

Several of the bigger girls have left for their own homes and are now earning their livelihood through the teaching they received at Manning Home. In February, 1919, the Board bought the property. Consequent on the high price of labour, cultivation has been discontinued. Several boys and girls have been sent out to service, employment having been obtained for them.

Matron—Mrs. Lamb.

LYNDALE INDUSTRIAL SCHOOL AND GIRLS' HOME, HIGHGATE.

FROM 1904 the Friend's Jamaica Mission conducted an Industrial School for girls (East Indian) at Happy Grove, Hector's River. In 1921 larger premises were secured at Highgate and were certified by the Government in June of that year, as an Industrial School for 18 East Indian girls.

The Government supports the 18 girls, whom the Protector of Immigrants has committed to Lyndale and a grant of £50 was received from the Orphanage Grant of 1929.

Besides the 18 East Indian Orphans, supported from School Funds, there were 12 East Indian girls, 18 Jamaicans, 1 white and 1 Syrian, supported by relatives or friends.

Three have been supported by the St. Mary's Parochial Board, and 1 through the Immigration Office.

The total number of girls in the Home for 1929 was 54. Of this number 32 were orphans.

The Home has accommodation for 50 girls.

BOARD OF MANAGERS—Mrs. H. A. Swift, *Chairman*; Miss A. M. Andrews, *Secretary*; Mrs. H. B. Wolcott, *Superintendent*; Miss S. F. Stanley, Miss F. M. Smith, *Matron*—Mrs. B. Giles; *Hon. Physician*—Dr. F. A. Ritchie.

THE SWIFT INDUSTRIAL SCHOOL AND HOME FOR BOYS.

THE Swift Boys' Home was organized in 1919 as a home for orphan boys after the influenza epidemic of 1918. Mrs. H. Alma Swift opened her home at Buff Bay for the Institution and it was recognized as a Government Institution and Industrial School in 1923. The American Friends Board of Foreign Missions accepted this work as a part of their responsibility in 1924. From the time of the Founding until 1929, the Home was under the care of Mrs. H. A. Swift and her assistants, Misses Stella Lewis and Phulmat Brown. In 1928 a larger property was purchased for the Home near Highgate.

The new location is known as Glenleigh and includes ten acres of land. In January, 1929, the Home was moved from Buff Bay to Glenleigh, Highgate.

Beside the regular school work given in the Home, the boys are taught Agriculture and Manual Training a part of each day. Each boy is also given an opportunity to learn some particular trade. A total of 22 boys were maintained in the Home during 1929.

BOARD OF MANAGERS—F. M. Jones, J.P., H. A. Swift, S. F. Stanley, A. I. Kennedy, M. E. White.

THE PURSCCELL ORPHANAGE.

THE Purscell Orphanage was opened in 1929, though the formal opening ceremony, performed by Miss Barbara Stubbs, the Governor's little daughter, did not take place till January 31st, 1930. Miss Purscell, of Moneague, a lady unknown to public life, though well known to travellers in St. Ann in years past as the owner of a livery establishment, left the residue of her estate amounting to £8,100 to a body known as the Purscell Trustees to found "an Orphanage for needy children." (The Purscell

Trust had been formed some years before to hold property in the interest of a Scholarship fund, the beneficiaries of which were to hold their Scholarships at Calabar High School, or if that school should ever cease to exist, at some other secondary school), Miss Purscell died in June 1927.

The Trustees have so far only spent a quarter of the sum left, leaving the balance invested for the support of the home, which they have purchased at Camp Lodge, Arnold Road, Kingston. There are twelve boys now in residence, under the care of the Matron, Miss Gordon, and of the Honorary Superintendent the Rev. S. C. Gordon. The Home is undenominational.

PRINGLE HOME.

THE Home at Carron Hall in the parish of St. Mary, is under the care of the Presbyterian Church of Jamaica. Destitute and Orphan Girls are received from six years of age and retained in the Home until they are fitted to go out as domestic servants or to take situations as children's nurses.

At the close of 1929, there were 43 inmates in the Home.

The Home is supported by a grant from Government and by voluntary contributions. The Parochial Board also sends girls to the Home and pays for their support.

It is under the care of Mrs. Gellatly.

Honorary Superintendent, Rev. James Macnee.

CHURCH OF ENGLAND DEACONESS HOUSE.

THE work of Deaconesses in the Diocese of Jamaica was founded by the late Archbishop Nuttall in 1890. The Deaconess House serves a two-fold purpose, (a) as a headquarters for the Deaconesses working in Kingston, (b) as a training centre for women wishing to undertake religious work in the Diocese.

There is a Bureau at the Deaconess House in connection with the Nurses Union, through which nurses can be obtained for private cases on application to the Deaconess in charge, either personally or by telegram, telephone or letter.

The Church Book Stall in connection with the Deaconess House was opened in 1906. Theological books, Sunday School literature, Devotional books as well as Bibles, Prayer and Hymn books may be obtained there.

ASTRONOMICAL STATION, MANDEVILLE.

THE Astronomical Station of Harvard College, founded in 1912, on a site which had been used for the same purpose in 1901, was abandoned by the University and taken over personally by the present Director in 1924. It is located about a mile and a half out of Mandeville, and is maintained as a private institution. The work on which it specializes is a study of the surface of the Moon and planets. It is provided with a 12.5 inch reflecting telescope, but is not open to the public at night. *Professor, William H. Pickering.*

PART II.

ECCLESIASTICAL AND RELIGIOUS.

THE CHURCH OF ENGLAND IN JAMAICA.

THE early history of the Church of England in Jamaica from its establishment in 1662 under the deputy Governorship of Sir Charles Lyttleton up to the year 1866, the time of the inauguration of crown government, was published in the Handbook for 1892 and previous issues and to these the reader is referred for such information as he needs prior to the advent in Jamaica of Sir John Peter Grant.

"Law 30 of 1870," Sir J. P. Grant stated in his Blue Book Report, "regulated the disestablishment and the gradual disendowment of the Church of England in this Island, and authorized a constitution to be formed for the future government of the Church on the voluntary principle; gave power to Her Majesty, whenever the proper time arrived, to incorporate by charter the duly appointed representatives of the Church Communion after which incorporation the Governor would have the power to vest in such Corporate Body all Church property." The Law, framed on the Canadian and Irish precedents, also made provision "for the continuance of their stipends to those Clergymen upon the late Establishment who should continue in the due discharge of their ecclesiastical duties as members of the voluntary communion."

A constitution was then drawn up, by which the Church is governed to-day. The government of the Church vested in a Synod consisting of a Bishop, the clergy and the representatives of the laity chosen by the registered male communicants and by such of the non-communicant members as may declare themselves to belong to no other religious denomination. All representatives to Synod are to be themselves communicants. A Diocesan Council consisting of twelve clergymen and twelve laymen "to advise and assist the Bishop in all matters connected with the administration of the Diocese, not specially committed to the management of the Financial Board" is appointed annually. The Diocesan Financial Board administers such central funds as may be committed to its control, and the revenues of Church property, according to such rules as the Synod may approve, and consists of the Bishop, the Assistant Bishop, the Archdeacons and Commissaries, the members of the corporate body and 12 elected members, one of whom was annually to be chosen by the Synod as chairman of such Board. The corporate body (or rather the Incorporated Lay Body of the Church of England in Jamaica) holds the property and funds of the Church and exercises all the other rights and duties required of them under the law of disestablishment, and consists of four communicants, lay members of the Church to be appointed by the Synod.

The management of the parochial or local affairs of the Church is placed in the hands of church committees, elected by those qualified to vote for lay representatives, and to consist of not more than twelve members, two-thirds of whom should be communicants. The clergyman of the Church served was given the power of nomination, and was made chairman of the committee when in session. Two churchwardens were to be appointed for each Church from the elected Church committee—one to be chosen by the incumbent, the other by the church committee itself—and their duties were the care of the Church buildings, churchyards, and other Church property, the allocation of pews and sittings and the preservation of order in the Churches.

The Diocese of Jamaica is divided into fourteen rural Deaneries, which are generally coterminous with the civil parishes of the Island. A Council called "The Parochial Council" is appointed in each Deanery, and consists of the clergymen in the parish or Deanery and one communicant member of the Committee of each Church. The Councils are principally advisory bodies to the Bishop and central Bodies of the Church. The duties of a Parochial Council are to obtain the annual returns required by Synod, and to see that they are forwarded to the Secretary of the Synod, to receive reports every quarter from all the clergymen in the Deanery or combined Deaneries; to manage the local affairs of the Jamaica Home and Foreign Missionary Society; to enquire into the ecclesiastical condition and wants of the Deanery or Deaneries; the titles and tenure of land or property; the condition or repair of churches and other buildings, any cases of complaint against a congregation or its clergyman, or any other matter referred to the Parochial Council by the Diocesan Council, or the Diocesan Financial Board.

Bishop Courtenay retired in April, 1879, after a connection of a quarter of a century

with the Diocese, and Dr. Tozer, formerly Missionary Bishop of Eastern Africa, was appointed as his successor; but Bishop Tozer, after six months' service, had to retire on account of ill-health. On the 15th July, 1880, a Special Synod was held for the election of another Bishop. The Rev. Enos Nuttall, B.D., the incumbent of St. George's church, Kingston, was chosen, and was subsequently consecrated in St. Paul's Cathedral, London, on 28th October, 1880. Dr. Nuttall returned to the colony on the 20th November, 1880, and immediately assumed his duties as Bishop of Jamaica.

In 1893 Bishop Nuttall was elected Primate of the West Indian Province; and under date 3rd May, 1893, the then Lord Bishop of Antigua (as Senior Bishop) duly notified the election to the Bishops of the Province.

At a meeting of the Provincial Synod of the West Indies, held in London in July, 1897, Dr. Nuttall was unanimously chosen to be the first Archbishop of the West Indies.

In the year 1908 the Archbishop of the West Indies received the honorary degrees of D.C.L. and LL.D. from the Universities of Durham and Cambridge, respectively.

At a Special Synod held on the 12th September, 1888, it was unanimously resolved 'that the appointment of an Assistant Bishop was necessary to assist the Bishop of Jamaica, in consequence of the growth of the Diocese and the heavy work which its missionary character entails on him.' The Synod thereupon proceeded to consider the appointment, and having received a nomination of the Venerable Archdeacon Charles Frederick Douet, M.A., from His Lordship the Bishop, the question as to the confirmation of the nomination was put and unanimously agreed to. Archdeacon Douet proceeded to England and was consecrated a Bishop in Westminster Abbey on the 30th November. He returned to Jamaica on the 29th December, 1888, and retired from the office on the 30th September, 1904.

At the Synod of February, 1905, the matter of the appointment of a successor to Bishop Douet was duly considered, and it was decided to appoint a Co-adjutor Bishop, with right of succession.

The selection of his co-adjutor was entrusted to the Archbishop, and the Rev. Albert Ernest Joscelyne, D.D., Vicar of St. Peter's, Islington, accepted office. He was consecrated Bishop in Westminster Abbey on St. Luke's Day, October 18th, 1905, and arrived in Jamaica on 14th December, 1905. Towards the close of 1912 Bishop Joscelyne resigned office as from the 31st March, 1913.

The Synod of 1913 decided that the Archbishop's assistant should be Assistant Bishop without right of succession. A special Synod was held on 15th July, 1913, to receive the Archbishop's nomination of his assistant, with a view to his election and appointment, if the Synod so decided. The result was the unanimous election of the Archbishop's nominee, the Rev. George Frederic Cecil deCarteret, M.A., Vicar of Christ Church, East Greenwich, London. He was consecrated by the Archbishop of Canterbury in Southwark Cathedral on 18th October, and arrived in Jamaica on 7th November.

On 31st May, 1916, Archbishop Nuttall died at Bishop's Lodge, Kingston, and Bishop deCarteret administered the Diocese till 10th August, 1916, when at a special Synod of the Diocese he was unanimously elected Bishop of Jamaica. The election was also unanimously confirmed by the other Bishops of the Province of the West Indies.

At the Synod of February, 1919, the Rev. David Williams Bentley, M.A., Canon Missioner of the Diocese and Warden of the Theological College was, on the nomination of Dr. deCarteret, the Bishop of the Diocese, unanimously elected Assistant Bishop of Jamaica. His election was also unanimously confirmed by the Bishops of the Province, and he was consecrated in St. Paul's Cathedral on June 24th (Nativity of St. John the Baptist) by the Lord Bishop of London, in the absence of the Archbishop of Canterbury, and 17 other assisting Bishops. Soon after, the degree of D.D. was conferred on Bishop Bentley by his Alma Mater, the University of Durham.

On 31st July, 1927, Bishop Bentley resigned his position as Assistant Bishop, having been elected Bishop of Barbados. At a special Synod held on 28th and 29th December, 1927, the Rev. William George Hardie, M.A., Vicar of St. Luke's, Finchley, London, on the nomination of the Bishop of the Diocese, was elected Assistant Bishop of Jamaica. He was consecrated in Lambeth Palace Chapel on May 6th, 1928, by the Archbishop of Canterbury.

According to the latest printed returns (with omissions supplied and mistakes corrected) there are about 44,000 registered communicants of the Church of England in Jamaica. This figure, however, does not include the large number of adherents of the

Church who, though they are nominally members and attend the services, have not been enrolled as full members taking an active share in the work and responsibilities of the Church.

At the Census in 1911, 266,478 persons returned themselves as belonging to the Church of England. In 1922, the number was given at 116,224.

In regard to the finances of the Church for 1929, it may be stated that the receipts of money for all purposes paid into the credit of the Diocesan Church Fund for that year amounted to £26,300 2s. 0d.

The expenditure for Episcopal Supervision was £1,652 9s. 1d.

The Diocesan Expenses Fund shows an expenditure of £3,368 7s. 8d. This fund has no endowment and the whole expenditure has to be met by assessments on the Churches. It should, however, be borne in mind that this fund contributed £300 to the Clergy Pension Fund and £139 18s. 3d. to a Special Clergy Pension Fund; £94 16s. 6d. for removal expenses of clergy. The staff connected with the office—including Secretaries to the Synod, Diocesan Secretary, Diocesan Council, Diocesan Financial Board and Diocesan Education Board, the Accountant, two Clerks, and the Auditor—costs £1,358 3s. 4d. The other items of expenditure in this account comprise stipend of Canon Missioner, grant towards the insurance of the Cathedral, travelling expenses of Diocesan Secretary, printing, postages, stationery, rent, furniture, books and contingencies.

The grants from the General Sustentation Fund to the poor Churches amounted in 1929 to £167 4s. 8d. Some portion of the money expended consists of grants made by societies in England which now pass through the books of the Diocesan Financial Board, the appropriation of some of which is regulated by the Bishop of the Diocese. The great bulk of the expenditure goes to meet the salaries of the clergy and catechists and may roughly be stated at £20,076 17s. 10d. The capital funds of the Church on 31st December, 1929, consisted of £32,200 0s. 0d. in Debentures, Imperial War Loan, £24,750 15s. 0d., Canadian Victory Bonds, £2,045 2s. 3d., Jamaica Local Inscribed Stock, £64,141 5s. 5d., Colonial Bishoprics Fund, £2,700, Auckland City Tramway, £100, Conversion Stock, £500 0s. 0d. Total, £126,437 2s. 8d.

CHURCH OF SCOTLAND.

THE Church of Scotland in Jamaica has eleven Churches, four ministers, about 2,000 communicants, eight day schools, eleven Sunday Schools with scholars numbering about 1,300.

The Scots Church was built for the most part by Scottish people resident in Kingston, with the approval and aid of the Corporation, and was opened for service in 1819.

The building of the Scots Church in Kingston, cost £12,000 sterling. It was damaged in the earthquake, but was restored in 1910, at a cost of £2,000, when a new organ by Messrs. Rutt of London, England, was installed, at a cost of £1,000.

Two other congregations, at Falmouth and at Montego Bay, were founded later, but seceded from the Church of Scotland in 1843, taking the Church buildings and property with them.

Since that date ten other congregations have been formed in the parishes of Manchester and St. Elizabeth.

The Presbytery is as follows:

Moderator: Rev. J. M. Hunt, *Clerk:* Hon. Sir W. Morrison, Solicitor, Kingston; all Ordained Ministers with a representative Elder from each Kirk Session, *Members.*

PRESBYTERIAN CHURCH OF JAMAICA.

THE Presbyterian Church of Jamaica dates from 1823. In that year the Scottish Missionary Society (which, in 1796, was formed by Presbyterians of various sections in Edinburgh) received a request from several proprietors of estates in Jamaica to send out a minister to instruct their slaves. The first Missionary, Rev. George Blyth, arrived in February, 1924, and began work at Hampden, in Trelawny.

In 1847 the Scottish Missionary Society handed over all its church buildings and congregations to the care of the Synod of the United Presbyterian Church, and these, together with the others since gathered or added, in all now 74, form the Presbyterian Church of Jamaica. They are scattered over ten of the parishes of the island. Besides what are counted regularly organized congregations, there are 20 out stations where meetings are conducted for the worship of God and religious instruction.

In 1900 the United Presbyterian and the Free Church in Scotland were united to form the United Free Church of Scotland with which the Presbyterian Church of Jamaica is connected. The Theological College has its home at Woodlands, South Manchester. The Tutor is the Rev. Robert Johnstone, B.D.

The Synod of 1894 resolved to establish a mission to the East Indian immigrants in the island. In September of that year two East Indian converts who had been training as Catechists in Trinidad by the mission of the Presbyterian Church of Canada arrived, and the mission was commenced. There are now 7 Catechists at work, all of whom are the fruit of the Mission in Jamaica. This mission is superintended by the Rev. J. F. Gartshore, M.A.

The official organ of the Synod is "The Presbyterian," a monthly religious periodical.

In 1913 the Broughton Industrial Home was established in South Manchester with accommodation for 20 boys. While under the control of the Synod it is undenominational. It is an Industrial School under the law and is open to receive boys from any part of the Island. In 1917 it was enlarged to accommodate 40 boys. In August, 1919, the foundation stone of a new wing was laid, which provides increased accommodation for

the staff and for class work. Another Industrial Home for boys has been opened at "The Farm," Montego Bay, and the Home for girls which was opened on 1st August, 1922, at Carron Hall is now in operation. In connection with this Home Continuation Classes are held and a School of Domestic Science is conducted. These are also undenominational.

In 1884 the Presbyterian Incorporating and Vesting Law was passed by which all the mission property is held in trust. The Corporation are, Rev. R. Johnston, M.A., B.D., Rev. A. W. Ross, Rev. D. A. Rothnie, M.A., Sir T. L. Roxburgh, C.M.G., *Chairman*; Rev. G. S. Grey, Rev. J. F. Gartshore, M.A. and F. G. Sale, Esq.

General Board—Rev. H. Ward, *Chairman*, Revs. J. G. Macnee, J. G. Peterkin, I. A. Dell, T. B. Prentice, D. A. Rothnie, M.A., R. C. Gordon, W. W. Hardie, M.A., W. B. Pouchie, G. Hicks, B.A., C. M. Watler, J. S. Blackman, R. N. Dickson.

The General Board meets three times a year—in August, January, and after Synod. It has the oversight of the Mission work of the church, and deals with the questions of finance and education.

Each congregation is under the government of a Session of Elders, chosen by the communicants, at whose meetings the Minister presides. From any decision of the Session there is an appeal to the Presbytery of the district, which consists of the ministers and an elder from each of the charges; and from their decision there is an appeal to the Synod, which meets once a year, and consists of all the ministers and an elder from each charge, presided over by a Moderator elected annually. There are six Presbyteries, North-eastern, South-eastern, Northern, Southern, Western, and Grand Cayman and in these the elders and ministers all vote as one order. The same is the rule of voting in the Synod.

On the roll of Synod, there are 74 Congregations, 20 Outstations, 32 Ordained Ministers, of whom 9 have been sent out by the Mother Church and 23 belong to the Island. There are 34 catechists, 7 East Indian catechists, 42 ruling elders in the various congregations. The communicants on 31st December, 1923, numbered 12,975, the candidates 922, day schools 53, scholars on roll 9,985, average attendance 6,083; money raised for all purposes, £11,882 for ministerial salaries, £4,424. There is church accommodation for 22,000 persons. The Moderator for the year 1929, is the Rev. C. M. Watler. The Clerk of Synod is the Rev. D. A. Rothnie, M.A., Lucea.

The Synod celebrated the Centenary of the work of the Presbyterian Church of Jamaica in February, 1924, and as a Thank Offering instituted a Fund for Higher Education. From this has sprung the St. Andrew High School for Girls, Halfway Tree, which in conjunction with the Wesleyan Church, the Presbyterian Church is responsible for.

There are 189 girls on the roll.

CONGREGATIONAL UNION OF JAMAICA.

(In connection with the Colonial Missionary Society, London, Incorporated.)

THESE Churches were founded by the London Missionary Society, which commenced its operations in Jamaica in 1834.

When the Society relinquished its responsibility for the maintenance of its churches in the island, the Congregational or Independent form of church government was adopted; and, in 1876, the Congregational Union of Jamaica was formed. The work is now carried on in connection with, and is subsidized by, the Colonial Missionary Society, London, (Incorporated.)

In connection with this Union there are 34 churches, and a number of out-stations and meeting houses. The principal preaching stations are given below.

There are 11 ordained ministers, 2 of which are retired, 3,139 church members (communicants) and 224 candidates and inquirers. In connection with the Sabbath Schools there are 36 schools, 194 teachers, and 3,242 scholars.

The educational work of the churches is represented by 21 public elementary day schools, in which there are 3,087 children, with an average attendance of 1,820.

The Secretary of the Union is Rev. A. F. Blandford, B.A., Kingston.

WESLEYAN METHODIST CHURCH IN JAMAICA.

THE Wesleyan Methodist Church in the West Indies is the result of the labours of the Wesleyan Methodist Missionary Society. Its history in Jamaica dates from 1789.

The Churches in the West Indies are grouped into five Districts under the care and control of the Wesleyan Methodist Missionary Society.

The Jamaica District, which includes missions in the Republics of Panama and Costa Rica, numbers over 21,000 full and accredited members, 18,300 Sunday School Scholars, 45 Ministers and Preachers on trial, 500 Lay Preachers and 1,736 Class Leaders.

There is also a College and Hostel for Theological Students in Kingston, and a Cottage Home for Orphan Children at St. Ann's Bay. Two Deaconesses are employed to work among women and girls in Kingston.

FOREIGN MISSIONS.

The Methodist Connexion in Jamaica commenced the work of Foreign Missions in 1888, by sending its first missionary to the Isthmus of Panama. There are now other stations, and resident missionaries living in Colon, Costa Rica and Bocas-del-Toro. In the last named, successful missionary work is being done among the aboriginal Indians of the Valiente Tribe.

Rev. John Currey is Chairman of the District and General Superintendent. Rev. E. Armo n Jones is the Secretary. The Synod meets annually in Jamaica.

CHRISTIAN CHURCH.

THE Christian Church, known as Disciples of Christ, is a religious movement which had its beginning in 1809. It has as its object the union of all Christians on the common ground of the teachings of Christ and His apostles. It has as a governing body a yearly convention. The Jamaica work was opened in 1858, by the American Christian Missionary Society, and was taken over by the Christian Women's Board of Missions, in 1876.

The Jamaica Mission of the United Christian Missionary Society, working through a local organization, known as "The Association of Christian Churches," has twenty-five churches and a number of mission points, with a membership of 3,449.

MORAVIAN CHURCH.

THE Protestant Episcopal Church of the Unitas Fratrum, or Unity of the Brethren (commonly and now officially styled The Moravian Church, from the fact, that the original seats were in Bohemia and Moravia), commenced its labours in Jamaica as far back as 1754.

The number of communicants at the close of 1929 was 6,514 with a total membership of 13,347. There are 57 schools with 9,343 names on the books. The latest census gives the number of professed adherents as 35,522.

The Church for many years maintained two training colleges, one for males at Fairfield, the other for women at Bethlehem. Within recent years these colleges have received Government aid. The Fairfield College was begun in 1839, under the direction of the Rev. Mr. Holland, and was successfully carried on till 1899, when, owing to the enlargement of the Mico Training College and the subsequent withdrawal of aid by the Government from voluntary colleges for training male teachers, it was closed.

The Training College for women was begun at Bethabara in 1861. It was temporarily removed to Salem in Westmoreland in 1888; but has now been established in commodious buildings at Bethlehem, in the Santa Cruz Mountains. The teaching staff consists of the Rev. R. J. Fleming, Director, with three resident instructresses.

The Church in Jamaica is governed by the Synod which meets, as a rule, once in three years. The Church is directed, between Synods, by its Executive, the Provincial Elders Conference, the members of which are Bishop Westphal. (President), Rev. F. Weiss, B.D., Treasurer, and the Rev. J. A. Black, J.P., Secretary. The Right Rev. Bishop Westphal, B.D., is the Bishop in the Jamaica Province.

FRIENDS CHURCH IN JAMAICA.

THERE had been considerable work accomplished in and about Kingston in the seventeenth century, when George Fox, the founder of the Religious Society of Friends in England, visited Barbados and Jamaica. Unfortunately, that good work was allowed to cease with no permanent organization to continue what was well begun. But there was a Friends Meeting House in Kingston in 1740.

The present work of Friends in Jamaica covers a period of forty years, beginning with a religious visit to the Island of Rev. Evi Sharpless of Iowa, U.S.A., early in the eighties. Schools were opened wherever churches or evangelistic work was begun—sometimes the school preceded all other efforts, for it was recognized that the education of Jamaica's children was inseparable from evangelization of her people. Two properties were purchased in East Portland and St. Thomas, portions of which were sold in small plots to those who could not own a home except it could be purchased on easy terms.

The organization now comprises twelve churches; ten day schools, two Industrial Schools, the Happy Grove Secondary School, and a Continuation School for Girls at Highgate. The headquarters of the Church is at Sea Side, Hector's River P.O. The Secondary School is also at this point. The Industrial Schools are at Highgate. There is an Infant School at Albany. The Churches are along the east and north-east coast from Amity Hall in St. Thomas to Port Maria, also Cedar Hurst and Fort Stewart somewhat inland.

Co-operating with the above is a group of ten American Friends, missionaries employed and sent here by the American Friends Board of Missions, with headquarters in Richmond, Indiana, U.S.A.

SALVATION ARMY.

The Salvation Army Central America West Indies; West Territory. Territorial Staff.—Colonel Mary Booth, C.B.E., Territorial Commander; Brigadier Charles Smith J.P., General Secretary; Mrs. Brigadier Smith, Editor of the War Cry and Young Soldier; Major Thomas Allen, Social Secretary; Staff-Captain Robert Little, Financial Secretary.

The Headquarters for The Salvation Army in the Central America West Indies (Western) Territory: is under the command of a Territorial Commander, and is located at North Parade, and Upper King Street, Kingston. The Headquarters is divided into various Offices, with a responsible officer who has the oversight of particular branches of work. From this centre the work of The Salvation Army is directed in the following places: Jamaica, Cuba, Honduras, British Honduras, Panama, Bahamas, Costa Rica, Nicaragua, Santo Domingo, Haiti, Bermuda, Colombia and the Canal Zone.

The Territory is formed into five Divisions, these are under the direction of Divisional

Commanders who are responsible to the Territorial Headquarters, Kingston, Jamaica.

In Jamaica, the Army has a very large field of operation, which includes thirty infant schools, and also a School for the Blind. There is a Training Garrison for the education and training of those who are accepted to be Officers of the Salvation Army in the Territory, located in Orange Street.

The Headquarters of the Salvation Army in Jamaica is at the Parade Gardens. Brigadier Nicklin, is in charge. His division comprises 54 Corps of the Salvation Army and 230 Societies. The majority of the officers assist him in the probation work, of nine of the parishes in the Island. These officers deal with discharged prisoners when they go to the country, and they assist Major Allen, the Social Secretary in trying to find them work.

Brigadier Nicklin represents, as far as the spiritual side of the work is concerned in Jamaica, 21,000 soldiers, recruits, adherents, and followers.

The chief officer in charge of the Central Hall is Adjutant Edward Nye.

Life-saving Scouts of the World.—This is a Salvation Army Organization for boys, with Headquarters in Kingston. Lads between the ages of eleven and eighteen are eligible for enrolment as Scouts. The uniform is grey with red facings.

Life-saving Guards of the World.—This movement is along similar lines to the Life-Saving Scouts, and has been organized on behalf of young girls from the ages of eleven to eighteen. The uniform is blue with red facings. There is also in connection with this movement an organization for the younger boys and girls between the ages of eight to eleven, and these are known as the Chums and Sunbeams.

Chief Superintendent—Adjutant Alfred Nye.

The Social work of the Salvation Army apart from the other branches and other parts of the Territory, includes the Bethesda Home; (The House of pity and mercy, a home for girls) 153½ Orange Street; The Women's Hostel, Parade Gardens; The Men's Metropole, Peters Lane; The Home for waifs and strays, Orange Street; The Children's Home; The Discharged Prisoners' Aid Society Department; Enquiry Department for missing relatives; a labour Bureau for Men and Youths; A Bureau for domestic servants; The Police Court; affiliation work, Prison and Poor House visitation.

The affiliation cases under the Child's Welfare Association of Jamaica are dealt with. In the Central America West Indies West Territory, there are a net work of Hostels, Santiago de Cuba, Havana, Belize, Cristobal. The Officer in charge of Jamaica is Major Allen; Cuba, Brigadier Jose Walker; British Honduras, including Spanish Honduras and Guatemala, Adjutant Austin. Central America including Nicaragua, Costa Rica, Columbia, Panama, and the Zone, Brigadier William Joy. Bermuda and the Bahamas, Commandant Lewis.

The work among the Blind reaches throughout the Central America West Indies West Territory. All officers of the Salvation Army have equipments to teach any one that is blind, to read and write and do arithmetic by the "Braille System." There is a blind school, and industrial school in Kingston; augmented by a blind association, comprising of 250 members of the teaching fraternal who have undertaken voluntarily to teach the children in the country parts of this Colony who are blind to read and write.

There is a library, whence books are sent to students free of postage. From the industrial side many of these young people have been able to earn a little money at the moment. From an educational stand-point they are being taught reading, writing, arithmetic, type-writing, geography, sewing, in fact a fair elementary, academic, and industrial education. There are 2,000 blind people in Jamaica.

Salvation Army Discharged Prisoners' Aid Department.—The Salvation Army carries on the work among the ex-prisoners, on lines the same as those which were employed by the Discharged Prisoners' Aid Society, which ceased to operate in December, 1928.

The funds entrusted to the Salvation Army for this purpose, are dispersed in the following manner. (1) To provide temporary food and shelter when necessary, for a day or two, so as to give the released man or woman an opportunity to seek employment. (2) To assist them, when possible, in seeking work. (3) To supply necessary tools with which to work. (4) To assist with railway or boat fares, when thought advisable. (5) To supply necessary articles of clothing. (6) All conditionals from the chaplains as formerly, will be dealt with.

AFRICAN METHODIST EPISCOPAL CHURCHES OF JAMAICA.

THE African Methodist Episcopal Church Denomination was established in Philadelphia, Pa., in the year 1787 by Free Negroes. They separated from the white Methodist Episcopal Church, because they felt an under-current of racial feeling which prohibited complete religious freedom in that church to persons having African blood in their veins.

This denomination was introduced and an organization formed in Jamaica in 1914 by the Rev. Alfonso Dumar, B.D., from the United States of North America.

PART X.

PAROCHIAL INFORMATION.

THE PARISHES.

GENERAL HISTORY.

IN Hickeringill's "Jamaica View'd" published in the year 1661 appears what is probably the oldest English Map of the island. With the exception of Guanaboa, The Seven Plantations, The Angels and St. Jago de la Vega, only towns on the sea-board are mentioned in it, and there is no attempt to divide the island into parishes.

In a census taken in 1662 the Island was divided into ten districts as follows:—ten Precincts of Port Moranto; Morant; Yealoth; and Legene; the town of Saint Angelo Delvega [St. Jago de la Vega]; Between Black River, Bowen Savanna, and thereabouts; In the Angels Quarter; In the Sevens Plantations, Macaria, Quathebeca: In the Quarters Quainaboa and Quardelena; and Upon Point Caugway.

Sir Thomas Modyford, in his "View of the condition of Jamaica, the 1st of October 1664," reprinted in the appendix to the first volume of the "Journals of the House of Assembly" (Spanish Town, 1811), says "there is in the said Island but seven established parishes *videlicet*, the town and parish of St. Katherine's, St. Johns, to the town and parish of Port Royal, Clarendon, St. David's, St. Andrew's and St. Thomas, which are very large, and in them all but one church, that at St. Katherine's."

The parish of St. David was part of the precinct of St. Thomas-in-the-East and St. George was part of the precinct of St. Mary.

As a result of the survey ordered by Sir Thomas Modyford, and made by "Sergeant-Major John Man, Surveyor-General for His Majesty," who calculated that the Island comprised seven millions of acres, a map was prepared by Man and copied by "Mr. Innians, the surveyor," and published in the Blome's "Description of the Island of Jamaica" in 1671. There are included on this Map in addition to two unnamed precincts occupying approximately the positions of the present Hanover and Manchester; the precincts of St. Catherine, St. Andrew, Port Royal, St. David, St. Thomas, St. George, St. Mary, St. John, St. Ann, St. James, St. Elizabeth and Clarendon.

In the year 1673, Vere was formed by cutting off a portion of Clarendon but it still remained part of the precinct of Clarendon; and in 1675 when an act was passed for dividing His Majesty's Island of Jamaica into several parishes and precincts, St. Thomas-in-the-Vale was taken from St. Catherine; and Clarendon lost another piece out of which was formed St. Dorothy, which parish became part of the precinct of St. Catherine.

In "The State of Jamaica under Sir Thomas Lynch, His Majesty's present Captain General and Chief Governour, September 20th 1683," prefixed to the "Laws of Jamaica," (London 1684), it states "since that time (1661) it has been divided into Fifteen Parishes and they into eight Provinces or Precincts."

The first act on record having reference to the parishes of the island was read on the 11th May, 1675, by the Council, and sent to the Assembly with this Amendment, that the Magotty be annexed to the Sixteen-Mile-Walk, but continue still to pay all parochial duties to St. John's except to the repairing of the highways, until a church be built and a parish settled in the parish of St. Thomas-in-the-Vale (Journals of Assembly I. 9). A law was passed in 1677. The law itself had not been preserved, but it is recited in a law passed in 1861 (33 Car. 2). "An Act for the maintenance of Ministers and the Poor, and erecting and repairing of churches." ("The Laws of Jamaica," London 1684): "and whereas this island, in the twenty-ninth year of His Majesty's reign, by an Act of this Country, was divided into fifteen parishes, which were called, distinguished and known, by the several names hereafter mentioned, that is to say, *St. Thomas, St. David, Port Royal, St. Andrews, St. Katherines, St. Dorothys, St. Thomas in the Valley, Clarendon, Vere, St. Johns, St. Georges, St. Maries, St. Anns, St. James and St. Elizabeths*; Be it therefore enacted and ordained by the Authority aforesaid, That all and every of the said Parishes rest, remain and for ever hereafter be distinguished and known by the aforesaid respective Names, and by no other whatsoever, anything in this or any other Law to the contrary notwithstanding."

In 1692, on the destruction of the greater part of Port Royal by earthquake, most of the inhabitants that survived settled in hastily erected buildings in St. Andrew, on the harbour, and in the following year the parish of Kingston was formed.

In 1703, Westmoreland was formed out of a portion of St. Elizabeth. In 1723, Portland was formed, the land being taken partly from St. Thomas-in-the-East, and partly from St. George (by 10 Geo. I.); and Hanover was formed out of part of Westmoreland. In 1739 (12 Geo. II. ch. 6) parts of the Carpenters Mountains, heretofore esteemed part of St. Elizabeth and Clarendon, were transferred to Vere.

In 1758, the three counties of Surrey, Middlesex and Cornwall were created (by 31 Geo. II. ch. 15.) with a view to the more convenient holding of Courts of Justice. Kingston was declared the county town of Surrey; St. Jago de la Vega, that of Middlesex; and Savanna-la-Mar that of Cornwall. In the first named were the seven parishes of Port Royal, Kingston, St. Andrew, St. David, Portland, St. George and St. Thomas-in-the-East; Middlesex comprised St. Catherine, St. John, St. Thomas-in-the-Vale, St. Dorothy, Clarendon, Vere, St. Ann and St. Mary; while Cornwall had but four parishes, St. Elizabeth, Westmoreland, Hanover, and St. James. The next change was in 1770 when Trelawny was formed out of a portion of St. James.

In 1814 Manchester was created by taking parts from Clarendon, Vere and St. Elizabeth, thus transferring a portion of Cornwall to Middlesex.

In 1809 a law was passed (50 Geo. III.) for fixing the boundaries of the several Counties and parishes of this Island by which the extent and boundaries of the said several and respective Counties and Parishes of this Island, as laid down and delineated in the three maps of the representative counties and the general map of this Island, made and published by James Robertson, were taken as the bounds of the counties and parishes, and printed copies of the maps were recognized as evidence in all Courts of Justice in the Island of the boundaries of the said several countries and parishes.

In 1831, McGeachy and Smith, Surveyors, proposed to publish by subscription maps of the three counties at £20 apiece. They received the names of eighty-six subscribers, but the maps were never published. (*St. Jago Gazette*, Feb. 12, 1831.).

In 1841, the last parish to be created in the history of Jamaica, Metcalfe, was formed out of the parishes of St. Mary and St. George, whereby Middlesex again gained land this time at the expense of Surrey. The parishes then numbered 22. In 1844, an Act, (8 Vic. c. 39) was passed defining the boundaries of Kingston harbour.

In 1867, was passed the law for the reduction of the number of parishes. In Surrey, Kingston was increased by taking part of St. Andrew, a part of the parish and the whole town of Port Royal. St. Andrew took the remaining part of Port Royal parish; and St. David was merged into St. Thomas-in-the-East, and St. George into Portland, which also took the Manchioneal district of St. Thomas-in-the-East.

In Middlesex the recently created parish of Metcalfe was merged again into the parish of St. Mary. St. Thomas-in-the-Vale, St. John and St. Dorothy were all merged into St. Catherine, and Vere again became part of Clarendon; St. Ann and Manchester remaining as they were. In Cornwall there was no alteration, the five parishes remaining as they were.

In 1901 Port Royal was made a separate parish for municipal purposes, remaining still part of the electoral district of Kingston.

KINGSTON.

Topography.—Kingston is the Capital of the Island of Jamaica and is the largest and most important commercial town in the British West Indies. It covers, with its suburbs an area of about 1,080 acres, and is beautifully situated on regularly sloping ground (of about 90 feet per mile) on the northern shores of the harbour bearing its name.

The streets, at right angles to the sea were originally laid out by compass north and south; those parallel to the general run of the shoreline, east and west; but, in consequence of the variation of the compass, the north and south streets now have a bearing of north two degrees east, and the east and west streets bear north-west and south-east eighty-eight degrees. In consequence of former neglect, in permitting flood waters to flow down the north and south streets, they are now so worn as to be much below the general level.

King Street, running north and south, was originally the centre of the town and laid out at 66 feet wide; Queen Street, also 66 feet wide, was the centre running east and west but, in consequence of the town having been extended northerly and easterly, these streets do not now form the centres of the town. At the intersections of King and Queen Streets a plaza or parade ground was reserved, forming a square of ten acres in the centre of the town. This was formerly used as a market place and parade ground for the troops and

militia, but the central portion is now enclosed and converted into a garden, which adds much to the appearance of the town and to the comfort and enjoyment of the inhabitants. A road has recently been made through the centre.

The soil is a gravel bed formed by the detritus of centuries, produced by the Hope river and other smaller streams from the Liguanea mountains. It may here be mentioned that the ancient course of the Hope River (which now discharges at the back of the Long Mountain, six miles to the east of Kingston) is distinctly traceable through Papine and Mona and near the Hope Road and down to the sea about a mile-and-a-half to the east of Kingston.

On account of the gravelly nature of the soil on which Kingston stands surplus water readily sinks and finds its way to the sea; it, therefore, has little opportunity of creating malarial conditions.

Kingston was originally supplied with water by wells, most of which, in consequence of the gravelly nature of the soil, had to reach the sea level before the water was obtained. About the year 1848 a private company brought down water from the Hope River for the supply of the city. The government purchased the entire plant from the company and have very much improved the supply, not only by building reservoirs and filter beds and furnishing a larger quantity of water, but by extending the supply to districts formerly destitute of water. The pressure in the lower part of the town is sufficient, in cases of fire, to throw the water to the top of the highest houses. A further supply of water was obtained from the Wag Water, a river which flows to the northside of the island. This water is brought by a tunnel, of ancient construction through the main ridge of the island. The rights of Constant Spring and Temple Hall estates to this water have been purchased by the Government, as has the Mona Estates with its water rights. This further supply of water largely augmented the delivery; but the increase of population, particularly in the suburbs, rendered it necessary to seek additional sources of supply and these were obtained by purchase of the water rights of the Ferry River, about seven miles to the west of the city.

History.—In 1848 a prize of £40 was awarded to Dr. Arnold for his History of the parish of Kingston, but there is no evidence that it was ever published. The site of Kingston was not the first chosen by the English for the commercial capital of the island. Port Royal flourished as such until 1692, in which year occurred the great earthquake which destroyed that place and caused the death of 3,000 of its inhabitants. That dealt it a fearful blow. Many people remained there but most of the survivors removed to the lower part of Liguanea in St. Andrew, then the property of Sir William Beeston, Lieut.-Governor of the Island. They procured for their settlement the status of a town, a plan of which was drawn up by Colonel Christian Lilly, under the direction of the Government, the name selected being Kingston. There was not at first much progress in its settlement, the recollection of the former wealth and greatness of Port Royal giving the colonists a continued preference for that place; but the fire of 1703 completely destroyed the favourite town, and the disheartened inhabitants went in large numbers to Kingston, which the Assembly caused to be divided into lots and given to those who had lost their houses. A law was also passed directing the slave owners in the parish of Saint Andrew to send one out of every twenty of their slaves to build temporary huts for the refugees, and, as an encouragement for the early settlement of the new town, every house built within the year (1703) was exempted from taxes for seven years. Soon after this another law was passed declaring Kingston to be "the chief seat of trade and head port of entry" of the island.

From this time the prosperity of the town was assured, and in the year 1713 it was declared by law that the place should "for ever be taken and esteemed as an entire and distinct parish, with all the powers of any other parish," and, further, "that it should have the right of sending three Representatives to the Assembly."

So rapidly had the town grown that in 1716 it was thus described by a historian of the time:—

"Within the harbour and about six miles from the town of Port Royal lies the town of Kingston, first laid out and partially settled after the great earthquake. * * * It is now become greatly increased in houses, stores, wharves and other conveniences for trade and business, so that it is by much the largest town in the island; and if the island shall increase in people and new settlements (the consequences of trade and riches) it is likely to be much the fairest town in all the Indies for 'tis most commodiously laid out happily and beautifully situated, has many spacious houses in it, and more are daily building, is the residence of the greatest merchants and traders, and has resorting to it most of

the ships or vessels that come to the island, and in it is managed the greatest part of the trade of Jamaica."

In 1721 an Act was passed empowering the inhabitants to erect a Court House and Exchange: and for nearly half a century the town continued to grow in size and opulence and so important had it become in 1755 that the attempt was then made to constitute it the seat of Government. The Governor (Admiral Knowles) twice proposed and the Assembly twice rejected a bill for that purpose, but at length Knowles obtained a majority in the Assembly and a law was passed giving effect to the arrangement. Soon after the public archives were removed to Kingston and the superior courts were established there. But the change was unpopular throughout the island and numerous petitions against it were sent to the King. On the 3rd October, 1758, (after Knowles had left) the disallowance of the law was proclaimed and the records were returned to Spanish Town, escorted by "a considerable body of military."

In 1780 the town was severely stricken by a great fire which broke out at about 2 o'clock in the morning of the 16th May and continued until the following evening. The large and closely built portion of the town lying between King and Orange Streets was burnt down, the destruction of property being estimated at £30,000. But the town soon recovered from the effects of the conflagration and prospered to such an extent that in 1802 it was granted a Corporation under the style of "The Mayor, Aldermen and Common Council of the City and Parish of Kingston." The Court of Common Council was given a seal and empowered to make and ordain by-laws, ordinances and regulations for the good order of the city, not repugnant to prerogative or to the laws of the island. The following is a description of the city seal: On the obverse the island arms, crest, supporters and mottoes. Legend. *Sigi Commune Civit: Kingston in Jamaica.* Reverse, Britannia in the dress of Minerva, holding a trident in one hand, and in the other a mirror, reflecting the rays of the benign influence of Heaven on the produce of the Island; behind her the British Lion, supporting her shield, a conch shell at her feet, and at a distance a ship under sail. Legend, *Hos foveat, hos curat, servatque, Britannia Mater.*

In 1843 another great fire devastated a large portion of the city. It began shortly before 10 a.m. on the 26th of August in a foundry situated at the east end of Harbour Street and extended diagonally across the city until it reached the old Roman Catholic Chapel at the corner of Duke Street. Many of the best dwellings and much valuable property were consumed and a large number of persons were left in utter destitution. The sum of £10,149 16s. 2d. was distributed among the sufferers, of which £5,000 was voted by the House of Assembly. At this period a great deal of the foreign trade of Kingston had disappeared in consequence of the establishing of direct steam communication between the European and Spanish American States; still Kingston continued an important centre of commerce.

In March, 1862, another great fire occurred by which the commercial division of the city was devastated. Nineteen of the principal stores in Harbour and Port Royal Streets, three wharves, and the extensive and well built three storied house in which the Commercial Hotel was kept, were burnt down at a loss of £30,000. The value of the merchandise, furniture, &c., destroyed was estimated at £60,830, making a total of £90,830. Of this £9,400 was covered by insurances, leaving £81,530 as the total loss to the owners of the premises and stock.

Three years afterwards Representative Government was abandoned in Jamaica and Kingston ceased to be a corporate city. All the powers and immunities of the Common Council were transferred to a nominated Municipal Board created by Law 8 of 1866, the privilege of making ordinances for the regulation of the city being transferred to the Governor in Privy Council. Since 1885, its affairs have been administered by a Mayor elected every three years, similar to the parochial boards of the other parishes.

In 1923 for the purposes of administration the Parishes of Kingston and St. Andrew were amalgamated.

For many years it had become evident that the convenience of the Government and of the general public would be best served by a transfer of the seat of government from Spanish Town, and in 1872 Sir John Grant, with the approval of the Secretary of State for the Colonies, gave effect to the change. The chief courts of law had been removed a few years before, as well as the offices of some departments of government and the transfer of the Governor's permanent residence and of the Colonial Secretariat alone remained to be effected. Room for this department was provided in the spacious premises known as Head Quarters House (the official residence of the Officer in Command of the Troops) which was purchased for £5,000, whilst Bishop's Lodge, (the former residence of the Bishops of Jamaica situated in the Liguanea Plain, was also purchased for conversion into a Governor's Residence. The Legislative Council was thereafter con-

vened in Kingston and a Chamber for its deliberations found in the large hall of the ground floor of Head Quarters House.

A calamitous fire occurred in Kingston on the 11th December, 1882, by which a large section of the business portion of the city was destroyed. The total number of houses entirely destroyed was five hundred and seventy-seven, whilst twelve were partially destroyed. These places were inhabited by about six thousand persons. The total loss of house property was estimated at between £150,000 and £220,000. The number of houses totally destroyed in the several streets and lanes reached by the fire was as follows: Barry Street, 36; Church Street, 26; Duke Street, 2; Harbour Street, 55; King Street, 30; Little Port Royal Street, 3; Orange Street, 69; Port Royal Street, 55; Princess Street, 75; Tower Street, 58; West Street, 13; Luke Lane, 87; Mark Lane, 1; Matthew's Lane 35; Peter's Lane, 36; Temple Lane, 9; and Water Lane, 37; whilst one house in Duke Street, one in Orange Street, two houses in Port Royal Street, four in West Street, one in Luke Lane, two in Matthew's Lane and one in Peter's Lane were partially destroyed. Amongst the buildings destroyed were the two Jewish Synagogues; the premises of the Ordnance Department; the Government Savings Bank; the office of the Jamaica Mutual Life Assurance Society; part of the premises of the Colonial Bank and several wharf premises.

On the 14th January, 1907, the city suffered great damage from the disastrous Earthquake of that date and from fire. Much the same area as that devastated by fire in 1882 was destroyed in the fire of 1907 in addition to the havoc caused by the Earthquake. The loss of life was variously estimated as between 1,000 and 1,500. The value of property destroyed amounted to between £1,000,000 and £1,500,000. A Mansion House fund for the relief of the sufferers, amounted to £55,395, and a free Imperial Grant was made by Parliament of £150,000 and a loan of £800,000 was authorised. The relief funds were distributed by a Relief Committee afterwards the Assistance Committee, constituted by the Assistance Committee Law 20 of 1907. After considerable delay and much negotiations, and on the failure of an appeal in a test case to the Judicial Committee of the Privy Council, the Insurance Companies agreed to pay the claims to the extent of 85 per cent. on the face value of the policies, and the money was distributed in 1909.

The Imperial Loan was administered by a Loan Board created by Law. Up to 31st March, 1910, loans were made to the value of £326,000.

The city has in great measure recovered from the disaster of 1907. Myrtle Bank hotel is rebuilt; and in King Street substantial structures have been erected. Among these may be specially named the Bank of Nova Scotia and the building of Messrs. Nathan and Co., Ltd., Messrs. D. Henderson & Co., the Royal Bank of Canada and the Bee Hive. On the western and eastern sides stand the blocks of the new Public Buildings (Sir Charles Nicholson, Architect). The western block houses the Post Office, Treasury, Audit Office, and Customs; the eastern block contains the Supreme Court and Law Offices, the Office of Titles, and Surveyor General. The Colonial Bank in Harbour Street also demands notice.

The Roman Catholic Cathedral in North Street was opened for service on Sunday, 5th February, 1911. It is dedicated to Holy Trinity, and is a substantial building, beautifully decorated internally with mural paintings. In East Street there is the re-built Institute of Jamaica. The Ward Theatre, North Parade, was presented to the city by the late Lieut.-Colonel Ward, C.M.G., for many years Custos of the City. The offices of the Royal Mail Company in Port Royal Street, are also worthy of note. In 1924 Kingston was amalgamated with St. Andrew for the purposes of administration.

In January, 1927, H.R.H., the Duke of York laid the foundation stone of a War Memorial Clock Tower at the Parish Church.

The population of the city by the Census of 1911, was 59,674; males, 25,037, females, 34,657. In 1921 the population was 62,707; 26,185 males and 36,522 females. The estimated population on the 30th June, 1928, was 68,003.

There are two Building Societies doing business in the city and many of the important Fire and Life Insurance Companies of the world are represented by agents in Kingston. Besides these a Discount Society, an Ice Company, a Marine Insurance Company, a Telephone Company, an Electric Light and Power Company, and an Electric Tramway Company are in successful operation. The Banks now doing business are Barclays Bank, the Bank of Nova Scotia, the Royal Bank of Canada and the Canadian Bank of Commerce.

The city is lighted with gas, and many of the public and private buildings with electric light. The principal thoroughfares are traversed by electric cars. There is a commodious market at the lower end of King Street. In connection with this structure is a public landing place; and another market in Orange Street, near the Parade. In the

upper part of King Street and immediately opposite to the principal entrance of the Kingston Parade Gardens is a statue of Queen Victoria, by Gefowski, erected in commemoration of the sixtieth anniversary of her accession to the throne by a vote of the Legislature. A statue of Sir Charles Metcalfe stands at the foot of King Street. On the eastern side of the parade (just without the garden fence stands another full length marble statue, that of Edward Jordan C.B., "who through a long series of years and in times of danger, fearlessly stood forward as the champion of emancipation and for the removal of civil disabilities," erected by public subscription. The statue of another distinguished Jamaican, Doctor Lewis Q. Bowerbank, was erected in the year 1881, on the northern side of the garden, by his numerous friends and admirers. A statue of Father Dupont, a Roman Catholic priest, who for many years laboured among the poor of the city, erected at the north-east corner of the garden, was destroyed by the earthquake of 1907—a replica was erected in 1927. The Jamaica War Memorial, made of Jamaica stone and marble, unveiled and dedicated on the 11th of November, 1922, stands in Memorial Square east of the Public Buildings. There is a building in Orange Street known as the "Night Shelter" for the convenience of the peasantry coming to the Kingston Markets.

Lines of steamers touch at Kingston regularly, keeping up communication direct with England, the United States, Canada and Europe. Electric Cars run to Constant Spring to the north and Papine Corner to the north-east, about six miles in each direction. A branch runs along the harbour shore to Rock Fort Gardens. Another branch runs through Up-Park Camp and connects with Cross Roads.

Two daily, one tri-weekly and two weekly newspapers are published in the city, and there are several monthly publications. Postal deliveries take place three times a day, and posts are made up for the home parishes and some of the country parishes daily and by all trains leaving Kingston, and for all the country parishes. The markets are plentifully supplied. Fruit, vegetables and fish are abundant at reasonable rates.

The climate is dry. The thermometer has been as high as 93° in the hot months and has stood as low as 66° in the cool months.

PORT ROYAL.

The Harbour of Kingston is enclosed to the southward by a narrow strip about 7 miles in length; at the western extremity of which, at the mouth of the harbour lies the old town of Port Royal. This strip is known as the Palisadoes, and the town formed part of the parish of Kingston until 1900 when a law was passed creating the separate parish of Port Royal with a Parochial Board consisting of 1 naval and 1 military member, and elected members, with the Commodore as Chairman *ex officio*; until the removal of the Naval Authorities from Jamaica and the closing of the dock-yard on 31st March, 1905. By section 10 of the law (13 of 1900) it is provided that for purposes of collection of rates and taxes, Registration of Voters and for all judicial purposes the parish shall still form a part of the parish of Kingston. Port Royal was, prior to the great earthquake, "the finest town in the West Indies, and at that time the richest spot in the universe," the headquarters of the buccaneers, and as such the emporium and mart of their ill-gotten wealth.

At half-past 11 o'clock on the morning of the 7th June, 1692, the town was shaken by a tremendous earthquake. The rector of the parish at that time states in his narrative of the occurrence: "Whole streets with their inhabitants were swallowed up by the opening of the earth, which when shut upon them squeezed the people to death, and in that manner several were left with their heads above ground, and others covered with dust and earth, by the people who remained in the place. It was a sad sight to see the harbour covered with dead bodies of people of all conditions, floating up and down without burial, for the burying place was destroyed by the earthquake which dashed to pieces tombs, and the sea washed the carcasses of those who had been buried out of their graves. At Green Bay there is still the tomb of Lewis Galdy who, according to the inscription thereon, "was swallowed up by the earthquake, and by the providence of God was by another shock thrown into the sea and miraculously saved by swimming until a boat took him up. He lived many years after in great reputation, beloved by all who knew him and much lamented at his death."

As terror after the earthquake subsided new houses were erected and the place under the privateering system of the time, began again to flourish, but in the beginning of year 1703 a fire broke out at one of the crowded warehouses where a quantity of gun powder was deposited and in a few hours the whole town was in flames. With the exception of the Royal Forts and magazines not a building was left.

Notwithstanding these occurrences a number of persons who had left Port Royal returned to it and began its re-establishment. New houses were built and trade began

to be restored; but on the 22nd August, 1722, a storm passed over the town which swept the greater portion of the buildings into the sea and destroyed a number of lives. Of fifty vessels which were in Port Royal Harbour on that day four men-of-war and two merchant ships alone rode out the storm, but with all their masts and booms blown away. This further calamity was in time forgotten and Port Royal was again crowded with houses and enriched by the profitable trade caused by the war in which Great Britain was then engaged.

In 1779 Nelson was in command at Fort Charles, when the island was in a critical state through fear of invasion.

In 1816 on the 13th July, about mid-day, a fire broke out which in a few hours destroyed nearly the whole of the town, including the naval hospital; and left many of the inhabitants utterly destitute. A subscription was set on foot for their relief, which was liberally responded to, Kingston alone subscribing eleven thousand pounds. Since the occurrence of the fire the town has ceased to be a commercial centre and Port Royal for several years was of importance only as a naval and military station. Its importance in this respect has, however, been much reduced by the recent abolition of the naval yard and the removal of the Commodore from the station. Victoria Battery and other parts of Port Royal were much injured in the earthquake of 1907.

The naval hospital, which is now in charge of the Military Authorities, is a very fine building, built of iron and stone and is 380 feet long and 57½ feet broad. It can accommodate about 130 patients in the upper portion, and the ground floor, which is available for use in the event of any emergency arising, will accommodate about half as many more. A yellow fever hospital, added by Dr. Thomas Colan, as Deputy Inspector General, in which yellow fever cases could be isolated and treated was damaged in the earthquake and has since been demolished.

There has been established at the Admiralty Coal Wharf, which has been leased from the Naval Authorities, a Bunkering Station for supplying Coal, Water and Stores to British Vessels and others who in the past have been taking these commodities at St. Thomas, Norfolk and Newport News as also at Colon.

Port Royal has always hitherto been considered important as a naval station. As recently as the American war and the French occupation of Mexico the fleet on the North American and West Indian station numbered some twenty-five ships, a goodly portion of which were constantly calling at Port Royal to coal, to obtain fresh provisions and to re-fit and the Archduke Maximilian on his way to Mexico was met there by eleven ships-of-war.

A line of piping has recently been run between Rock Spring connecting the supply with that of Up-Park-Camp which does away with the constant pumping operations, at Rock Spring, which is resorted to on occasions when the supply at Camp is limited.

The place is generally reputed to be healthy, although as a matter of history epidemic of cholera, small-pox and yellow fever have occurred there. At one time Port Royal laid claim to be regarded as a sanitarium or marine resort, but owing to the want of house accommodation and other causes the people of Kingston do not now resort to it for change. In the church is a monument by Roubiliac. The streets of the town were first lighted by electricity in April, 1920. In 1911, the population was 1,268; 748 males and 520 females. In 1921 it was 1,004; 516 males and 488 females. The estimated population on the 30th June, 1928, was 1046.

ST. ANDREW.

This parish was originally called Liguanea, and the name still lingers round the plain. It now consists of what before the passing of Law 20 of 1867 comprised the parish of Port Royal and the parish of St. Andrew, less the parts known as Smith's Village, Hannah's Town, Fletcher's Town and the Town of Port Royal. There are no towns in St. Andrew and the principal villages are Halfway Tree, Gordon Town and Stony Hill, while a large settlement of villa residences has recently sprung up round Cross Roads where a market has been erected.

Halfway Tree, which is situated about three miles from Kingston, derives its name from a cotton tree dating from the conquest, which as late as 1866 stood at the intersection of four roads from Passage Fort to Stony Hill, and Spanish Town to Gordon Town, near the church. It is the head court station of the parish and has a post and a telegraph office, and a revenue office. It is also centrally situated in regard to the residences of the higher officials of the colony and of some of the leading merchants of Kingston. The parish church, which was built in the reign of Queen Anne, has been enlarged and renovated from time to time at considerable cost. It was much damaged by the earthquake of 1907, but has since been restored and enlarged. The original church stood on the old burial ground between King's House and the Constant Spring Road. There are some

interesting memorial slabs and stones in the church and churchyard. There is a good monument inside the church to James Lawes (son of Sir Nicholas Lawes, once Governor of the island) by John Cheer: monuments also to General Villettes, commander of the forces, to Admiral Davers, to Zachary Bayley and to Sir James Fergusson killed in the earthquake of 1907, whilst Lieutenant-Governor Rushworth, and Christopher Lipscomb, Bishop of Jamaica are commemorated in the churchyard. In the centre of this village stands a clock tower erected in 1913 in the memory of Edward VII. Not far from Halfway Tree is situated King's House (rebuilt since the earthquake of 1907: (Sir Charles Nicholson, Architect) the official residence of the Governor of Jamaica; and there was a large hotel at Constant Spring, three miles distant, recently burnt down but now being rebuilt.

Between Halfway Tree and Gordon Town on the Hope land are the Government Experimental Plantations with the office of the Director of Agriculture, the Island Chemist's Laboratory, the Farm School and the head works and reservoirs of the Kingston and Saint Andrew Corporation Water Works. The buildings of the Jamaica College stand on a portion of the lands. The cars of the Jamaica Public Service Company run between Kingston and Halfway Tree, and between Halfway Tree, Constant Spring and Hope Gardens.

There are two social clubs, the Liguanea, between Halfway Tree and Cross Roads, and the St. Andrew by Cross Roads. At both lawn tennis is a great attraction. At the former there is a golf course. There is another course at Constant Spring. By Cross Roads is the Nuttall Memorial Hospital opened in 1923 (Mr. S. C. Henriques, Architect).

Gordon Town is distant about nine miles from Kingston, in a north-easterly direction and contains a constabulary station, a court house and a post office and telegraph station. A little further up, at the foot of the hill leading to Newcastle, is a picket house in connection with the cantonment at that place.

The detachment of British Infantry (before its withdrawal from Jamaica in 1905) was stationed at the military cantonment at Newcastle on one of the spurs of the Blue Mountain Range. It is situated 3,974 feet above the sea amid charming scenery and in a very healthy climate.

Stony Hill is situated about ten miles from Kingston on the main road leading to Annotto Bay. The buildings at this place which formerly constituted the military barracks are now used for the purposes of a Boys and Girls Industrial School. In the Wag Water Valley is the Hermitage Dam which forms a reservoir for Kingston.

Up-Park Camp Barracks about $1\frac{1}{2}$ miles north of Kingston, contain the headquarters of the military authorities and a chapel.

The situation of this place is admittedly healthy and a constant sea breeze blowing over it makes the hottest days endurable. There is a splendid view of the harbour to be obtained from those barracks, which consist of parallel lines of buildings, two stories high. Most of them have been reconstructed since the earthquake of 1907. There is a Garrison Chapel, a hospital for the troops and a swimming bath of running water. The quarters of the field officers are separate buildings, each standing in its own compound.

On the northern boundary of Kingston are the Mico Training College—which was wrecked by the earthquake, rebuilt, later destroyed by fire, and again reconstructed—and Wolmer's Schools removed from Kingston in 1908.

On the introduction of coffee into the island in the year 1778 it was planted in this parish, of which it has ever since been the principal production. The coffee grown in St. Andrew especially in the higher altitudes commands a high price in the English markets. The properties were much damaged by the floods of 1909. In 1837 there were as many as one hundred coffee plantations in the parish, but now there are only seven of any importance. The Government established, many years ago, a Cinchona Plantation at Bellevue, some 5,000 feet above the level of the sea, and the cultivation of Cinchona was carried on by private proprietors, considerable tracts of crown lands being purchased under the very favourable terms conceded by the Government with a view to the encouragement of cinchona planting. Owing, however, to the heavy fall in the price of bark the cultivation was discontinued and the exportation ceased. The cultivation of tea was taken up at the Government Cinchona Plantation, but was not a success. The cultivation of tobacco is carried on principally at Temple Hall where it is conducted by Cubans. Bananas, pine apples and oranges are also productions of this parish. The area of the parish is 166 square miles. Resident Magistrates' Courts and Petty Sessions Courts are held at Halfway Tree, Gordon Town and Stony Hill. There is a house to house post office delivery in part of lower St. Andrew twice daily.

According to the census of 1911 the population of St. Andrew was 52,773; 24,861 males and 27,912 females. In 1911 there were 54,598; 24,717 males and 29,881 females. The estimated population on the 30th June, 1928, was 57,228.

ST. THOMAS.

The parish of St. Thomas, which now embraces the old parish of St. David, is one of the oldest parishes in the island. It may have been named after Thomas, Lord Windsor, Governor in 1662. It was settled by the Spaniards and was thus described by General Venables of the army of occupation in 1655: "Morante is a large and beautiful hato, being four leagues in length, consisting of many small savannahs and has wild cattle and hogs in very great plenty, and ends at the mine, which is at the cape or point of Morante itself, by which towards the north is the port of Antonio."

In respect of physical beauty this parish ranks high in the island. The sugar estates and banana plantations in the Plantain Garden River district present a pretty view when seen from the eminence above them called Quaw Hill. From this point to Port Antonio the whole district was once covered by flourishing sugar estates, but is now utilized largely for banana cultivation.

There are still two large Sugar Estates in cultivation in the parish, Albion and Serge Island where a dam, recently constructed on the property, supplies electricity for the factory. One of the oldest of Sugar Estates, now established in bananas is Belvedere, the original proprietor of which, Robert Freeman, was the first speaker of the House of Assembly. A Central Sugar Factory was opened at Duckenfield in 1926.

There are three important rivers in St. Thomas, namely, the Yallahs, Morant and Plantain Garden rivers, which when swollen by heavy rains, become formidable torrents and are quite impassable. Of late years additional bridges have, however, been built in the parish. The Morant Point Light House (erected by Sir George Grove, better known in connection with music) stands at the east end of the island in this parish. The principal towns or villages are Morant Bay, Port Morant, Easington, Bath, Yallahs Bay, Trinity Ville, Cedar Valley and Seaforth.

Morant Bay is the chief town and shipping port and is noted as being the principal scene of the disturbances of 1865. Nearly all the public buildings were then burnt down.

The town now contains a public general hospital, an alms house, a public works office, a court house, a constabulary station, a post office and telegraph station, three banks, an Episcopal church and Wesleyan and Baptist chapels, a market and a system of Water Works. Morant Bay is an open roadstead and the only danger in approaching the anchorage is Galatea Rock which has only 16 feet of water over it. As the soundings shoal gradually, vessels of any draught can anchor at Morant Bay. There are five fathoms of water within three cables of the beach.

Port Morant, lying seven miles eastward of Morant Bay, was formerly a shipping port of great importance. It is a very secure harbour, and vessels can, as a rule, leave as well as enter with the regular trade wind. The village of Trinityville, about 10½ miles from Morant Bay, is a populous and thriving place.

Bath is a populous village having a large number of dwellings, an Episcopal church and a Wesleyan chapel. A sulphurous hot mineral spring (of which an account is given in another portion of this work) is situated a little above the village. The original Botanic Garden of the island is in the village itself and is still maintained for the sake of its valuable trees and plants and for the propagation of cocoa.

There are an Episcopal church (originally built in the 17th century) and Wesleyan and Baptist chapels at Yallahs Bay; and in the vicinity are two large salt ponds, which supply an abundance of fine fish and are a source of livelihood to the villagers.

Easington which is in the interior of the parish, was the capital of the parish of St. David before it was merged into that of St. Thomas-in-the-East. There is a steel girder bridge over the Yallahs river at Easington.

Golden Grove is a collection of stores on the estate of that name, on which there is also a small Episcopal church, market, Cable Office and Post Office.

The area of this parish is 274 square miles. According to the census of 1911 the population of the parish was 39,330; males 18,873, females 20,457. In 1921 it was 42,501; males 20,508, females 21,993. The estimated population on the 30th June, 1928, was 45,940.

PORTLAND.

A lengthy essay on the Natural and Political History of Portland, by Andrew Gregory Johnston, was published in the "Literary and Scientific Journal" in 1848, having won one of the prizes of £50 offered to each parish of the island by the Government for the best account of such parish. This parish was named after the Duke of Portland, who was governor of the Island at the date of its formation. It includes the old parish of St. George and part of St. Thomas, from which it was originally taken in 1723 in accordance with proposals made by Sir Nicholas Lawes, a former governor, for revesting in the Crown Lands in the north-east of the island to be made available for intending

settlers from the Virgin Islands. It extends from the sea coast to the highest peak of the Blue Mountains and is noted for its fertility and the beauty of its scenery.

In 1732 it was decided to send a doctor to Port Antonio to look after the people there.

Port Antonio has two of the finest and securest harbours in the island. The western harbour is sheltered by a small islet, now called Navy Island (formerly Ruther's or Lynch's island). The entrance has been widened to suit the conveniences of large vessels which can lie alongside its wharves. Port Antonio is divided into Upper and Lower Titchfield. Upper Titchfield stands on a peninsula (formerly known as Patterson's Fort and Point) and contains, beside the residences of the gentry, Fort George, the old military barracks (dating from 1733), which have been converted into a school managed by a Local Board, the Titchfield School Board, financed by the Titchfield Trust, under the Jamaica Schools Commission. Lower Titchfield, or Port Antonio proper, extends along the sea-shore where the stores, wharves, court house and gaol are situated. The Episcopal church stands conspicuously in the lower portion of the town at the south-eastend.

There is a light-house on the Folly Point at the entrance of the harbour, which is a great aid to navigation. The A. G. A. lamp which was erected in 1916, to replace a lamp first erected in 1888, shows a flashing white light which gives a flash of 2 seconds duration followed by 8 seconds darkness, visible 13 nautical miles over an arc of 153° and is a 4th order dioptric. Port Antonio is supplied with very good water by means of pipes from a stream at Red Hazel, the reservoir being only a mile and a half from the town. The supply has been improved by the erection of a reservoir of 10 millions gallons capacity, and the use of mechanical pressure filters, the first of the kind to be used in the island. These improvements cost nearly £7,000. Port Antonio is a very favourite place with Americans. The Hotel Titchfield, which was totally destroyed by fire in January, 1910, was rebuilt during the same year and extended in 1911, to accommodate 250 guests.

There is a large and handsome Town Hall. The lower storey contains the offices of the court and parochial offices and the upper storey forms a town hall and court room. Market buildings were completed in Port Antonio, one on either side of West Street in 1885, and a square has been thus provided and laid out in palms. The revenue office erected in 1886, was blown down in the hurricane of 1917 and was re-erected as a one storey building. The extension of Port Antonio was previously retarded by the fact that all the lands in the immediate vicinity of the town are the properties of the Titchfield Trustees and the United Fruit Company. A law was passed giving power to sell the Titchfield lands, but it has not been thought advisable to put it in force. The Trustees have, however, realized the possibilities of the land, and have filled up the swampy portions, joining the Government and the Parochial Board in constructing concrete cement drains, also laying out new roads, and leasing the lands on easier terms. Five acres of these lands have been leased by the Parochial Board, who have laid it out as a Park and Pleasure Ground, called the Olivier Park, after a former governor, who opened it in 1904. The Port Antonio Cricket Club have also leased eight acres of the swampy land, reclaimed it and converted it into one of the best recreation grounds in the Island. An American gentleman also purchased a property called the Folly, adjacent to these lands and expended a considerable sum in erecting the first reinforced concrete building here, filled the adjacent swamps, and laid out the ground as a beautiful private park. Over £3,000 has been expended in recent years in improving the streets and laying concrete drains. Most of the residences, and all the streets and public buildings are lighted with electricity. The almshouses are at Prospect. The population of Port Antonio has increased from 1,784 in 1891 to a little over 7,000 at the census taken in April 1911.

The fruit trade, which was opened up in Portland in the year 1868, made Port Antonio a town of considerable importance, and the parish of Portland one of the wealthiest communities in the island. Fruit cultivation is the business of the large proprietor as well as the peasant, and the shipment of fruits constitutes the great bulk of the trade of the port. Port Antonio is chiefly interested in the fruit business, several shipping companies having offices there. The United Fruit Company own a large acreage of land in the parish.

The Maroon settlement, called Moore Town, is nine miles from Port Antonio on the banks of the Rio Grande, which is the second largest river in the island, but on account of the rapids formed by the hilly nature of the country through which it runs it is of no use for navigation.

St. Margaret's Bay is a thriving village of the west of the Rio Grande and on the railway line between Kingston and Port Antonio; it contains a substantial Episcopal church and carries on an extensive business in fruit. There is a police station and

the United Fruit Company have constructed a fine wharf here, and also at Hope Bay, a village lying a little further west. Hope Bay contains an Episcopal church, about 500 inhabitants, a Wesleyan church and a Constabulary station.

Buff Bay was the chief town of the old parish of St. George it lies between the Spanish River and the Buff Bay River and is on the railway line between Kingston and Port Antonio. This town contains a fine Episcopal church, and Wesleyan, Baptist and Roman Catholic chapels, a court house and town hall, a public general hospital, a constabulary station, a telegraph station and a market. Buff Bay is an important centre of the fruit trade. At times during the "northers" the coast is unapproachable by vessels. About two miles out of the town, on one side of Buff Bay river, lies a township of the Maroons called Charles Town. From Spring Garden east of Buff Bay river, going up the Spanish River Valley for four-and-a-half miles at Chepstowe there is a very fine waterfall known as "Fishdone." On Spring Garden were, until the latter years of the last century when they were washed away by a storm, the ruins of an old fort constructed to repel the buccaneers. There are at Low Layton 105 feet above sea-level, the remains of an extinct volcano. The Rio Grande, Buff Bay, Spanish, Swift and White Rivers which formerly presented formidable obstacles to the traveller during the rainy seasons, have now been bridged. The bridge over the Rio Grande is the longest in the island, the iron work alone being 480 feet in length, in six spans of 80 feet each.

Manchioneal lies on the north-eastern coast of the island; it is become of some importance since the fruit trade has been established. In the town are an Episcopal church, a Wesleyan chapel and a court house. Its principal exports are bananas and coconuts. The harbour, situated at the southern extremity of a coconut plantation, is very small; the entrance is only about half a cable wide and leads to an anchorage close off Shifto Point, barely exceeding one cable in diameter. From the anchorage to the southward is a narrow well-protected haven for small vessels. Manchioneal was the scene of some of the exploits of 'Tom Cringle,' recorded in his Log; and the Great House on Muirton is said to be one to which he was taken on his arrival from Cuba with yellow fever.

Darlingford, an extensive coconut plantation belonging to the heirs of Sir Charles Darling, a former Governor of Jamaica, stands around the village of Manchioneal.

There are great demands for lands with roads to them, especially by the small cultivators in the parish, owing to nearly all the large landowners needing their lands for their own purposes, and steps are being taken to open up new roads, some of which will give access to Crown Lands. Strong representations have been made for providing more roads to open up the thousands of acres of fertile land so as to increase the output of the small cultivators.

The area of the parish is 338 square miles. According to the census of 1911 the population of the parish was 49,360; 24,843 males and 24,517 females. In 1921 it was 48,970; males, 23,750 and females 25,220. The estimated population on the 30th June, 1928, was 54,046.

ST. MARY.

This parish was probably called after the Spanish port, Santa Maria. It includes the late parish of Metcalfe, as well as a part of the old parish of St. George, and possesses a great variety of agricultural resources, combined with much that is interesting from a geological, as well as a physical point of view. Nearly every product of the colony can be produced in it, although the supply of labour is very precarious, necessitating the somewhat extensive employment of East Indian immigrants. The roads, owing to the natural formation of the soil and the heavy traffic they are called upon to carry are difficult to keep in good condition. The copper mines at Job's Hill and the ferruginous springs of Newport only require easy means of access to become useful. The parish is exceptionally seasonable and is intersected by large rivers. The climate on the upland plains is warm and humid and vegetation is rapid; while in the hills it is cool though moist. Generally speaking, the climate is healthy, the prevailing sickness being intermittent fever unattended with much mortality. The chief products are bananas, oranges, logwood, fustic, pimento, coco, coffee and coconuts and sugar (manufactured chiefly by the small settlers). Copa and coconut oil are also manufactured in fairly large quantities. The banana cultivation is considerable, and the exports of the fruit exceed those of any other parish in the island.

The parish has three considerable towns, namely: Port Maria, Annotto Bay and Oracabessa, the last named having come into prominence as the result of the banana trade and of its good harbour. There are also in the parish several thriving villages and out bays; the chief of the former being Highgate, Hampstead, Gayle and Richmond and of the latter Salt Gut and Rio Nuevo.

The chief town and shipping port is Port Maria, situated somewhat nearer the western

w

than eastern end of the parish with a fairly good harbour, its complete exposure to "northers" being broken by Cabaritta Isle, which acts to a certain extent as a natural breakwater. Port Maria contains a public general hospital and an alms-house, a church, a kirk, a Baptist chapel, a Wesleyan chapel, a court house, a fine market, a post office and telegraph office and a government elementary school. The municipal buildings which are very substantial and commodious, being built of stone, were erected out of the bequest of Thomas Manning. They contain the town hall, the court house and offices, the revenue and parochial board offices and the constabulary station. There is a war memorial. The St. Mary poor house at Simpson Hill, $1\frac{1}{4}$ miles from the town built in 1896, at a cost of £4,200 has accommodation for 120 inmates and the staff. There are also several fine stores, seven wharves and a comfortable hotel. The Victoria Park opened in commemoration of Queen Victoria's Jubilee, is in the old parade ground next to the church. Gray's Charity is on Fort Haldane, where evidence of its military uses in the past still exist in the vicinity of, and possessing a commanding view of the town and harbour. Here a substantial building has been erected for the inmates connected with the charity. A supply of wholesome water is afforded the town by works constructed in 1886, and subsequently improved and extended. There is an organized fire brigade. There are social, tennis and cricket clubs.

Annotto Bay, on the railway line between Kingston and Port Antonio, is situated on the eastern side of the mouth of the Wag Water river (a corruption of *Agua alta*) and is distant about sixteen miles from Port Maria and thirty miles from Kingston, from which it is approached by what is termed the junction road. The town of Annotto Bay is intersected by three sluggish rivers which create swamps in the neighbourhood and render it, at certain seasons of the year, unhealthy; but the inhabitants on the whole enjoy tolerably fair health and longevity. It is a considerable shipping port, especially for logwood and bananas, the shipment of which is greatly facilitated by the recent construction of a railway to the siding at the sea beach. The town contains a public general hospital and alms-house, a court house and constabulary station, post office and telegraph office; also a fine large church at the eastern end of the town, Baptist and Wesleyan chapels and a government elementary school. The Maroon Town of Scott's Hall is situated on the junction road behind Castleton Gardens, 11 miles from Annotto Bay and 19 miles from Kingston. The parochial board in the year 1910 furnished the town with a fine and abundant supply of water, meeting the cost, nearly £5,000, entirely from its own resources. The reclaiming of the swamp lands is receiving attention. There is an organized fire brigade. There is a central sugar factory at Gray's Inn near Annotto Bay.

Oracabessa (Golden Head), situated eight miles west of Port Maria on the main road to St. Ann's Bay, has a safe little harbour, and is visited by steamers for bananas. It has a post and telegraph office, several small stores and wharves, a Baptist and a Wesleyan chapel and schools and a police station. The town is considered healthy and is visited as a health resort. The Parochial Board partly by loan and partly from their own funds have established a fine water supply. The water after being chlorinated is piped to the Town and affords a house to house service.

On the western side of the Gayle estate, is the village of Gayle. It contains a post and telegraph office, a market, pound and constabulary station, a church and a school. The court house a mile away was destroyed by the earthquake in 1907, and the local courts are now held in rented premises.

The village of Highgate is eight miles from Port Maria on the main road to Richmond. Owing to the proximity to the railway station at that place, and being within a mile of the recently constructed railway siding it has made considerable progress within the past few years. There are a market, a number of shops, a post and telegraph office, a church and an elementary school.

The village of Richmond (Meek Spring) sprang into existence as the result of railway extension. Upon its selection for a railway station; many stores, shops and residences were erected, and now Richmond is a populous and thriving centre in which a large volume of business connected with the fruit trade is transacted; there is a court house and constabulary station, a post and telegraph office, a market, a pound and a social tennis club.

It was near Rio Nuevo Bay that the last Spanish governor of Jamaica, Ysassi, built a fort when he attempted to re-conquer the island. The fort having been captured by the English, Ysassi escaped and left the island from Runway Bay in St. Ann.

The chief rivers from east to west are the Dry river, Annotto river, Wag Water Antrim river, Oracabessa river, Rio Nuevo and White river; there are also White Hall river, Haughton, Tiber, Flint and Pencar rivers, all of which are now bridged.

The area of the parish is 249 square miles. According to the census of 1911 the population of the parish was 72,953—37,523 males, and 35,433 females. In 1921 it was 71,404—males 35,157 and females 36,247. The estimated population on the 30th June, 1923, was 79,154.

ST. ANN.

This parish was for many years supposed to have been named after Ann Hyde, wife of James II; but the name really dates from the days of the Spaniards. It is the largest parish of the island and has been appropriately designated "The Garden of Jamaica." "When Columbus," says Bryan Edwards, "first discovered Jamaica he approached it "on the northside, and beholding that part of the country which now constitutes the "parish of St. Ann he was filled with delight and admiration at the novelty, variety "and beauty of the prospect." Hill, in his "Lights and Shadows of Jamaica History," thus writes of the parish, "Earth has nothing more lovely than the pastures and pimento groves of St. Ann:—nothing more enchanting than its hills and vales, delicious in verdure and redolent with the fragrance of spices. Embellished with wood and water, from the deep forests, from whence the streams descend to the ocean in falls, the blue haze of the air blends and harmonizes all into beauty."

St. Ann's Bay, the "Santa Gloria" of Columbus, is a town of some importance, in which considerable trade is carried on. It contains an Episcopal church, a Wesleyan chapel, a Baptist chapel, a Salvation Army hall, a court house, a public general hospital, a post office, a telegraph station, a good hotel and movie theatre. There is a fine market, and an excellent water supply obtained from the Roaring river. A war memorial has been erected in this township. The old vestry and slave records of the Board Office, now in the Jamaica Institute, provide interesting reading of bygone days. It does a large shipping trade, to which trade the regular steam communication between the United States and Jamaica has been a great incentive. Two miles to the westward of the town are the poor houses. Fine sea-bathing can be obtained at the Dunn's river sea-beach, four miles out from the town and at the Drax Hall Cove. The scenery between St. Ann's Bay and Ocho Rios is unrivalled, especially from Belle Vue, situated midway between these points.

Not more than a mile to the west of St. Ann's Bay is the site of the first capital of the island, "Sevilla Nueva" or "Sevilla d'Oro," as it was afterwards called. This town was founded by Juan de Esquivel, the first Spanish Governor of Jamaica, he having been commissioned and sent over by Diego Columbus (Christopher's son) the hereditary Viceroy of the New World, to establish a colony there. Esquivel arrived in Jamaica in November, 1509, accompanied by a number of the Viceroy's friends. Bringing with them the refinements of taste and the means of displaying it, they assisted in the foundation of Sevilla Nuevo, whose fame long attested its superiority over every other town which has since been built here." The town contained many buildings worthy of note, amongst which were a monastery, a cathedral, a theatre and many places. Sevilla did not long, however, continue the capital, having been abandoned for St. Jago de la Vega. Various reasons for the change have been given; some say that it was owing to the Spanish inhabitants of Sevilla having in their wars with the natives been suddenly and entirely cut off, and others assigned the desertion to a "visitation of innumerable ants" that destroyed all the provision grounds of the people and compelled them to find a home elsewhere. Bridges, attributes the abandonment to the depredations of the French filibusters, and states that "the northern coast of Jamaica afforded frequent spoils to this bold band of corsairs." As a matter of fact they found it unhealthy; but conditions have been vastly improved in recent years from the drainage of swamps, and the construction of concrete drains throughout the town. To the eastward of St. Ann's Bay, at Drax Hall estate there is a narrow cove described in the maps as Don Christopher's Cove, where Columbus on his fourth and last voyage to the West Indies is supposed to have stranded his two remaining vessels. Priors contains the remains of an old English church. Midway between St. Ann's Bay and Ocho Rios are the Roaring River falls, the largest in the island; the scenery there and at Belle Vue overlooking Roaring river with its magnificent sea view, and for some miles round is much admired by visitors and is well worth a visit. Application to the gate keeper of Roaring river and the payment of a small fee for keeping the road in repair will always ensure permission to view the falls, and a guide can easily be obtained. The power available from this splendid water fall has not yet been taken advantage of, but is one of the dormant assets of the colony, awaiting capital and enterprise. Free sea bathing may be had at Mamee Bay and Dun's River.

Colonel Charles Drax left a sum of money and a claim on his estate for founding a free school, which was held for a time at Walton, near Moneague. In 1885 this was,

by law, merged in the Jamaica High School (now Jamaica College) at Hope, in St. Andrew and a certain number of Scholarships provided for St. Ann's boys.

Fonthill, once the property of William Beckford (now attached to Drax Hall), was named after Beckford's property in England, Fonthill Abbey.

Ocho Rios, formerly called "Chereras," the "Bay of the Waterfalls," lies about seven miles to the east of St. Ann's Bay. The town is increasing in importance and the harbour, which is easy of approach, affords good shelter for vessels. For this reason and on account of the facilities in the way of getting good water at the Sailor's Hole and provisions, Ocho Rios was at one time very frequently visited by British Warships for the purpose of giving leave to the crews. Near the town is Shaw Park estate where there is an ice machine and refrigerating establishment and where Ysassi, the last of the Spanish Governors, had pitched his tent. He was discovered and pursued by the British troops, but subsequently escaped in a canoe to Cuba, from a spot about ten miles from St. Ann's Bay, which has since been known as Runaway Bay. Ocho Rios has an Episcopal church, Wesleyan and Baptist chapels, a post office and telegraph station, a market, court house and police station. On the way to Moneague the road runs through the celebrated Fern Gully. The Cascade Falls, 4 miles from Ocho Rios, are worthy of note. The Bogue and Belmont properties near Ocho Rios, with the river running down through both properties, are worth seeing.

Brown's Town is the largest of the rural townships of St. Ann, and is situated in the western interior part of the parish; it contains an Episcopal church and the Diocesan High School for girls, recently erected from the design of Major Caws, a Wesleyan chapel, a Baptist chapel, an Evangelist tabernacle, a court house, a government elementary school, a police station, a market called the "Norman Market," with a clock tower, in which is a clock presented by Sir Henry Norman and the Addison Park.

There is a Corn Meal Factory that provides for the consumption of native grown corn and has enhanced the value of this product. It possesses a large reservoir that provides for the inhabitants of this dry district a constant water supply in the most severe droughts. The Diocesan High School for Girls here is now one of the foremost educational institutions in the colony, and there is also a secondary school for boys.

Dry Harbour, so called on account of there being no fresh water stream or well there, is a town increasing in trade and prosperity and the harbour affords excellent shelter for vessels. It was at Dry Harbour that Columbus landed and took formal possession of the island. There are some very large caves about a mile-and-a-half from the village at Dairy that are often visited by tourists and are well worth the trouble which is necessary to thoroughly explore them: a guide can always be obtained at Dry Harbour or Runaway Bay, but permission must first be obtained from the owner of the property, Miss Raffington. There is also a large lagoon near by. There is a banana fig factory here. Subterranean springs discharge along this coast. There are excellent spots for sea-bathing, the white sands and clear water rivalling Montego Bay.

In the Dry Harbour Mountains there is a fine underground stream (probably the Cave River) flowing through a natural tunnel which can be explored for a considerable distance. At Cave Valley there is a thriving market and a police station. At Moseley Hall in the south-eastern corner of the parish there is a very fine cave that used to be frequently visited and there are several smaller but not less interesting ones in other parts of the parish. The dry bracing climate of the Dry Harbour Mountains is in high repute.

In the Pedro Hills is Edinburgh Castle on which property is situated the "sink hole" where the murderer Hutchinson is supposed to have thrown down the bodies of all his victims. At Pedro River there is a market.

The village of Claremont, (formerly called Finger Post) is increasing in size and importance; it has an Episcopal church and Wesleyan and London Missionary Society chapels, a post office and telegraph station, a market, a police station and a clock tower. Above Claremont on the Pedro road is the Ramble tea estate the first and only extensive tea plantation and factory in the West Indies.

Moneague, ten miles from Ewarton, is situated in a cool and pleasant part of the parish; it has a court house, a police station, a post office and telegraph station and a market; a good produce business is done here. There is also a fine hotel on a commanding site. The building is a handsome and comfortable one, and situate as it is, in one of the most charming districts of the island, attracts visitors from the northern climates seeking to escape the severity of the winter. Here a lake of considerable extent is apt to appear from time to time and last for a year or more. It last rose in 1916 and disappeared in 1918. There is also a hotel at Holly Mount on Mount Diavolo whence very fine views are obtained.

St. Ann with its healthy climate affords good prospects for settlers with capital. The productions of this parish are principally sugar, rum, coconuts, pimento, and coffee. The cultivation of bananas is extending, and the soil is suitable for citrus fruits. Pimento, the "all-spice" of commerce, grows luxuriantly in St. Ann in which it is indigenous, and cattle rearing is one of the chief industries of the parish. Coffee is extensively cultivated and sisal does well in the dry parts. There have been constructed in nearly all the dry areas of the parish large public tanks which have materially improved the well-being of the peasantry.

The area of the parish is 476 square miles. According to the census of 1911 the population of the parish was 70,651; 34,024 males and 36,627 females. In 1921 it was 70,922, males 33,190 and females 37,732. The estimated population on the 30th June, 1928, was 81,040.

TRELAWNY.

This parish derives its name from a former governor of the colony, Sir William Trelawny, who died in Jamaica in 1772. It was taken out of part of St. James in 1770. The principal towns are Falmouth, Stewart Town, Duncans, Clark's Town and Ulster Spring.

Falmouth is a town of considerable importance, and is more regularly laid out than any other town in the island, except Kingston; the streets are wide and clean and the public buildings are substantial and handsome. The court house, a building erected in 1812 at a cost of £12,000 currency in the days of Jamaica's extravagance, lofty and spacious, and affording accommodation for all the parochial and judicial offices, was almost destroyed by fire on 19th August, 1926. It contains full length portraits of General Sir John Keane, lieutenant-governor from 1827 to 1829, and of Sir Charles Theophilus Metcalfe, governor from 1839 to 1842, which were fortunately saved at the time of the fire. The building was restored and taken over from the contractors, Messrs Mais and Sant in November, 1929. There are internal improvements and a fine set of electroliers installed. The outward appearance remains as before. The other public buildings are the former district prison, now used as constabulary barracks and alms house, and the public general hospital. The Episcopal church, the Wesleyan chapel and the Kirk are all good buildings and well situated. The spacious Baptist chapel was erected under the auspices of William Knibb who played an important part in Trelawny both before and after emancipation. His body lies in the Baptist church yard. The military barracks now used as the Falmouth Government School, are spacious, solid buildings, and are capable of accommodating 700 men; they have always been regarded as being particularly healthy. The town is supplied with water from the Martha Brae River; it is conveyed to a reservoir built in the market square. The inhabitants are supplied by pipes laid down to their houses. There is a market in the square, and a park called Victoria Park to the west of the town.

The entrance to the harbour, which was difficult of access owing to a very narrow and intricate channel, has recently been widened and deepened. The depth of water in the harbour is ample and there is accommodation for a number of ships or steamers of large size.

Martha Brae, one-and-a-half miles inland from Falmouth, is supposed by some to have been the site of the old Spanish settlement of Melilla, which was abandoned soon after its establishment owing to the depredations of the French filibusters. The secret gold mine of the Spaniards is said to be in its neighbourhood.

Clark's Town, ten miles from Falmouth is the next largest town in the parish, and is important by reason of its central position. There is a good trade in produce here, and the ground provisions from Ulster Spring are nearly all sold here. There is an Episcopal church, a Baptist church, a post office, police station and a court house.

Stewart Town the only corporate town outside of Falmouth is the centre of a considerable trade in produce from the interior of Trelawny and the neighbouring parishes. It contains an Episcopal church and spacious chapels of the Wesleyan and Baptist denominations, a post office and police station; and there is a high school for girls at Westwood, hard by. The new Webb memorial church makes a good addition to the town.

Duncans is a town not very distant from the sea coast in which a brisk trade is carried on. There is a post office, telegraph station and police station, court house and Wesleyan and Baptist chapels.

Rio Bueno is an important shipping roadstead. A plentiful supply of water can be obtained a short distance up the river. It contains an Episcopal church, a telegraph office, police station and a Government School. There are other villages in the parish of some importance, namely: the Rock, Salt Marsh, Jackson Town, Wakefield, Deeside, Sawyers, Ulster Spring and Albert Town. The last named has become a place of import-

ance. The land is very fertile and there are a great number of prosperous small settlers in the district. There is a large Baptist church at Spring Garden in the immediate vicinity. There are also a Wesleyan chapel and a Baptist chapel, court house, a government school, police station and telegraph office at Ulster Spring. There is a constabulary station and a telegraph office and a cottage hospital in this district. Albert Town is also a place of some importance possessing an Anglican church and post office, and is growing in importance.

The long discussed Dornock Water Supply came into use during 1926-27. It affords very large area of the lowlands of the parish, a good and wholesome domestic supply of water, the beneficial effects of which are already being experienced. The work was executed by the Public Works Department and cost some £35,000, being borne equally by the Island and Parochial Board of Trelawny. This is one of the most successful Water Schemes inaugurated in the Island, and is being extended to Calabar, Stewart Castle and Duanvale.

The productions of this parish are principally sugar and rum, pimento, coffee, coconuts and ginger and a large quantity of dyewoods and some bananas. The parish is noted for its fine flavoured rums, the prices obtained for which enabled many of the estates to keep up cultivation in spite of adverse seasons when the price of sugar did not repay the cost of production. The estates have all along and still have a comparatively good supply of native labour. By the in-givings of 1837, Trelawny contained 76 fine sugar estates, two coffee plantations and several pens and settlements. It was then said that the parish produced more sugar than any other parish in the island. The cultivation of bananas was considerable. The parish offers fine scope for the operations of sugar factories, three of which are now in operation. The area is 332½ square miles. According to the census of 1911 the population of the parish was 35,463; 16,432 males and 19,031 females. In 1921 it was 34,602; males 15,954, females 18,648. The estimated population on the 30th June, 1928, was 38,394.

There are 125 miles of main roads and 309 miles of parochial roads in the parish.

ST. JAMES.

This, one of the smaller parishes of the island, was named after the Duke of York (afterwards James II). Montego Bay, the most important town in the parish ranks next to Kingston and Port Antonio in point of population. The chief buildings in the town are the court house, the Episcopal church, with the monument to Rosa Palmer by Bacon, and Trinity chapel, the Presbyterian church, the Roman Catholic church, the chapels belonging to the Wesleyan and the Baptist denominations, the custom house and the old barracks. The terminus of the railway line from Kingston is at Montego Bay.

The sanitary condition of the town has been much improved by the filling up of the swamp adjoining the creek, which had been a nuisance of long standing. There is a large market, and extensive mercantile stores indicate the commercial importance of the town. Montego Bay was called "Manteca Bay" by the Spaniards from its being the great emporium for lard. Sir Hans Sloane states that the boiling of swine's flesh into lard constituted the early commerce of the place. The bay is an open roadstead and the anchorage is quite safe during the period of the ordinary land and sea breezes which range from N.N.E. to S.E.; but between November and March, when northers sometimes blow in, accompanied by a heavy sea, a second anchor is sometimes necessary and accidents have been known to occur. Sea-bathing is a great institution at Montego Bay, the inhabitants claiming that the "Doctor's Cove" and the White Sands are the best bathing places in the island. The town has a supply of excellent water. There is an ice factory and a telephone system in the town, which is lighted by electricity.

The surrounding hills are dotted with fine residences, some of which like Grove Hill (mentioned in "Tom Cringle's Log") have historic interest.

The late Spring Hill Hotel, overlooks the Bay and is now attached to Pleasant Hill, the home of Cornwall College, with accommodation for boarders as well as day scholars.

The productions of the parish are principally sugar, coffee and bananas.

At Ducketts, Seven Rivers and Chesterfield, in a district of large rainfall, are considerable estates in banana cultivation, while the United Fruit Company have a large area under cultivation at Mocho, and Garlands near Catadupa station.

Cambridge now the second place of importance in the parish, owes its position entirely to the fruit cultivation in its vicinity.

The provision of a road from Catadupa station into the interior has immensely stimulated the development of a district rich in agricultural resources, while the land in the Montego River valley is eagerly sought and rapidly rising in value.

There is a central sugar factory at Rose Hall. The area is 234 square miles. Accord-

ing to the census of 1911 the population of the parish was 18,767 males and 22,609 females. In 1921 it was 34,602; males 15,954 and females 18,648. The estimated population on the 30th June, 1928, was 46,707.

HANOVER.

Kingston and Port Royal excepted, this is the smallest parish in area in the island. When it was formed the Assembly wished to call it St. Sophia in honour of the mother of George I., but in this it was over-ridden by the Council, and the name was chosen with reference to the reigning family in England. The only town, Lucea, is one of the most picturesque of the towns of Jamaica. It contains amongst its principal buildings a handsome court house; Episcopal and Presbyterian churches, Catholic church opposite the Court House and chapels belonging to the Wesleyan and Baptist denominations and a market. The Episcopal church is beautifully situated at the entrance of the fine harbour. The whole western shore of the landlocked harbour is fringed with houses and the hills above are studded with residences embowered in foliage which are fanned the live-long day with the pure, fresh sea-breeze. The harbour although of small dimensions, is one of the best harbours on the north side of Jamaica. Its entrance is about three cables wide, but within, it sweeps round into a most picturesque basin, about three-quarters of a mile in diameter, capable of receiving vessels of the largest size. The banana trade has attained to considerable dimensions here, while the export trade in yams to the ports of the island is vigorously maintained. Fort Charlotte, which was built for the defence of the harbour, stands on the peninsula that overlooks the channel. In the barracks is kept Rusea's school, which affords secondary education for boys and girls; Government elementary schools; Public Works office and residence, residence of Inspector of Police, Public General Hospital, Customs boat-house and boatmen's quarters. The former prison buildings are used as constabulary barracks and almshouse.

The village at Green Island further westward, is a shipping port in which are Episcopal and Presbyterian churches, and a Baptist chapel. Of recent years this township has witnessed considerable development chiefly of the banana trade.

On the other side of Lucea, about 8 miles eastward is Mosquito Cove.

There are some very valuable grazing pens in this parish, of which the best known are Shettlewood, Burnt Ground, Knockalva, Haughton Grove and Sadler's Hall. A traveller who visited this property in 1866 wrote in a work subsequently published by him, that "the manager had introduced the Hereford breed and shewed grass-fed oxen of fine form and enormous size, which would attract admiration and possibly carry off prizes at the great English cattle shows." Shettlewood, Ramble, Haughton Grove, Burnt Ground and Challacoomb Castle are amongst the other most valuable breeding pens in this parish. Shettlewood is now famous for its Indian cattle which are preferred by planters for working purposes to any other description, owing to their activity and hardihood as well as their immunity from the attacks of ticks.

The parish is mountainous and well watered, the highest summit is the Dolphin Head which affords a good land-mark for mariners.

The productions of the parish are principally bananas, sugar and rum, pimento, ginger and arrowroot. The peasantry are chiefly employed in planting ground provisions of which the Lucea yam enjoys a great reputation in the island.

The area is 167 square miles. According to the census of 1911 the population of the parish was 37,432; 17,615 males and 19,817 females. In 1921 it was 38,360; males 18,046 and females 20,314. The estimated population on the 30th June, 1928, was 42,865.

WESTMORELAND.

The parish of Westmorland (now for many years misspelt Westmoreland) was formed in 1703. It was probably so called as being the westernmost parish in the island.

Savanna-la-Mar, the chief town, is one of the most important towns in the island in regard to the extent of its commerce, and the chief town of the county of Cornwall. The chief places of worship are the Episcopal church, the Presbyterian church, the Baptist chapel, the Wesleyan chapel and St. Joseph's Roman Catholic Church. Distributed through the parish are at least 20 large and substantial places of worship belonging to all the principal Christian denominations. The town is supplied with water from one of the numerous springs which rise from the Rock at Sweet River Pen, four miles distant. A drinking fountain and a horse trough were presented to the town by the late Mr. E. J. Sadler; a commodious new market was opened during 1892. There is also a telephone service and an ice factory. A reading room has been established and there is a Masonic Lodge, a Forrester's Court, Ancient Order of Mechanics and Burial Scheme Society.

Contiguous to the town of Savanna-la-Mar is Manning's Free School, managed by a local Board under the Jamaica Schools Commission, which offers the means of obtaining a liberal education, and takes a good place amongst the educational institutions of the island.

The sad fate of Savanna-la-Mar in the hurricane of 1780 can never be remembered without horror. "The sea bursting its ancient limits, overwhelmed that unhappy town and swept it to instant destruction, leaving not a vestige of man, beast or habitation behind. So sudden and comprehensive was the stroke," says Bryan Edwards, "that I think the catastrophe of Savanna-la-Mar was even more terrible, in many respects than that of Port Royal."

Besides Savanna-la-Mar there are Bluefields, Parker's Bay, Scott's Cove, and Negril as shipping places, and several small townships. Bluefields the site of the Spanish town of Oristan, was for a time the residence of Grosse the naturalist. The "Spanish road from Bluefields Bay to Martha Brae, by the head of the Great River," as Long wrote, is said to be still in existence.

Some 10,000 to 12,000 acres of the parish are morass lands, which however afford maintenance in dry weather to numbers of stock. Making allowance for this, fully three-fourths of the remainder of its area consists of hills of moderate elevation, amongst which many of the chief breeding pens are located, the remaining one-fourth being low lands of alluvial formation in which are situate the sugar estates.

A new police station constructed of stone has been erected on the Park Lands to replace that destroyed by fire in 1922, and a new Court House has also been put up at an estimated cost of £14,000.

Of late years an impetus has been given to the growing of sugar cane for which the parish has always been famous. In 1909 a large factory was established at Frome at which the canes grown on Belle Isle, Fontabelle and Frome are made into sugar.

Westmoreland is still fairly wooded, and has long been remarkable for the regularity of its annual rains, a natural advantage enabling its agricultural operations to be carried on without much fluctuation to the great advantage of its labouring population.

The water supply to Savanna-la-Mar has been improved at a cost of £2,674 the source being on Carawina pen. In 1925 the water supply was improved at a cost of £9,248. There is a building society which has been in existence since 1874 and there are two Banks doing business, the Bank of Nova Scotia and the Colonial Bank.

Cane farming has increased considerably, also the cultivating of rice which affords a permanent source of income to the small agriculturists and East Indians. Cattle rearing is also extensively carried on.

The parish is also well watered by numerous rivers and streams, the principal of which are the Negril, New Savanna, Morgan's Gut, Smithfield, Bowen's River, Bluefields, Robins, Roaring River, Great River and the Cabaritta, the last named being navigable for boats of about 8 tons for some twelve miles from its mouth.

There is a considerable East Indian settlement at a place called Paul Island, where the marsh lands are suitable for the growth of rice. The coolies successfully grow large quantities of that article and sell it at remunerative prices to the shopkeepers in the neighbourhood. Considerable business is also done in logwood.

There is a factory at Water Works for the hulling of rice, and a Dyewood Factory at Paradise near Savanna-la-Mar.

Coffee and ginger are cultivated to some extent in the higher lands and the abundance of logwood trees, as well as of flowering or fruit trees throughout the pens or other settled lands, afford encouragement to the keeper of bees. Rum, sugar, logwood, pimento, banana, coffee and honey are the chief products.

Between 16th and 18th November, 1912, the parish was visited by a hurricane which caused destruction and destitution throughout the parish; only one life however was reported lost. Owing to the great destruction of houses and the need for accommodation for the poorer classes of persons the Parochial Board erected six tenement buildings, four on the Poor House land and two at Newmarket.

A new Industry has been started in the parish, viz.—The banana, and hundreds of acres have been planted out particularly in the Grange, Williamsfield, Water Works and St. Johns Districts. New markets have been erected at Savanna-la-Mar, Grange Hill, Petersfield, Little London, Frome, Bethel Town and Barham.

The area of the parish is 308 square miles. The population in 1911 was 66,456; males 31,795 and females 34,661; the increase for the last twenty year-period being 13,006. In 1921 it was 68,853; males 32,437 and females 36,416. The estimated population on the 30th June, 1928, was 76,693.

ST. ELIZABETH.

Saint Elizabeth, one of the largest parishes, was probably named in honour of Elizabeth, wife of Sir Thomas Modyford, comprises an area of 462 square miles.

The chief town and shipping port is Black River, situated at the mouth of the river of the same name. The appearance of the town has been very much improved during recent years. More business is transacted in Black River than in most places of the same size, while its unsavoury reputation for unhealthiness is not warranted by the Registrar General's statistics. The principal buildings are the court house, the public general hospital, the Bank of Nova Scotia and the Collectorate—the two former of which are situated at some distance to the westward of the commercial part of the town—the parish church, the prison and the market.

The court house presents a fine appearance from the sea and at once attracts the attention of the visitor. In the parish church are many interesting memorial tablets recalling to the memory of the living the many good qualities of the departed Saint Elizabeth gentry. The handsomest of these mural tablets are those on either side of the chancel to the memory of Robert Hugh Munro and Caleb Dickenson, founders of the Munro and Dickenson's Trust. The market place is a plain but graceful iron structure; excellent markets are held twice a week, on Wednesdays and Saturdays. The town enjoys an ample house-to-house supply of pure water brought from the Y.S. Spring. It was the first town in Jamaica lighted by electricity.

An interesting feature of the town of Black River is the large quantity of logwood piled up on the wharves awaiting shipment. The bar at the mouth of the river is a serious hindrance to the speedy loading and despatching of the vessels; the lighters which convey the cargoes from the wharves on either bank of the river to the shipping frequently ground on the bar, causing waste of time and much extra labour. The factories at Lacovia and Elim for the extraction of dye from logwood are now closed. At Rahine, Appleton and Holland there have been erected up-to-date Sugar Factories, supplied with canes from extensive cultivation.

The principal villages of the parish are Lacovia, Santa Cruz, Balaclava, Newmarket, Siloah and Malvern. There is also a Maroon township called Accompong on the northern boundary of the parish. The precipice known as "Lovers Leap" is in Yardly Chase.

St. Elizabeth is more diversified by mountains and plains than any other parish of the island. The northern and north-eastern parts are mountainous while an extensive plain occupies the central and southern districts. Through this plain, dividing it into two sections, runs from north to south the Santa Cruz range of mountains; at the southern extremity the range terminates abruptly in a sheer precipice which descends 1,600 feet to the sea. This precipice is known as "Lovers Leap."

The Santa Cruz Mountains are well known for their charming climate which is at the same time both cool and dry. The thermometer seldom rises above 80° F. in the hottest months, while there is an entire absence of that excessive humidity which is a serious drawback to much of the higher lands of the island. The district is a centre of educational activity. Foremost among the schools situate in the bracing air of these Mountains, are the two schools of the Munro and Dickenson's Trust that for girls at Hampton and that for boys at Munro College, and the Moravian Female Training School at Bethlehem. On the slope of the mountain is the Manning Home for the waifs and stray children.

At Malvern there are boarding houses. The lowlands of the parish may be divided into three parts: one portion—and that a very considerable one—being taken up with morass; a second consisting of savannahs; and the third comprising some of the finest country for stock raising and grazing purposes in the island. Rising far up in the northern interior of the parish, tumbling down through the gorges there until it reaches the plain and then sluggishly creeping through the morass, comes the Black River. The stream is navigable for lighters for nearly 30 miles of its course and forms a valuable highway for the conveyance of the produce of the upper parts of the parish to the sea, while goods are conveyed by the same means from the seaport to the interior. The Grosmond and Y.S. tributaries have been opened up. The river abounds with crocodiles; while in it as in the less important streams which flow through the morass, fish are plentiful. The Y.S. Falls are an object of interest to sightseers, as are the Maggotty Falls on the Black River.

The savannahs deserve some notice. In dry weather they are huge brown wastes, but after rain no land recovers more quickly or is more wonderfully fertile. The well-being of the inhabitants of these districts therefore depends more directly than elsewhere on the rainfall. St. Elizabeth is the largest corn-producing parish of the island, most of it being grown on the savannahs, where, in good seasons, the yield is very large. Parts

of the savannahs are also famous for horses, which are reckoned amongst the best bred in Jamaica. These are raised principally by settlers, some of whom possess beautiful specimens of the stud horse and brood mare. The abundance of corn naturally enables the owners to feed their stock well, and they declare that there is a peculiarly nutritive property in their savannah grass, which renders it superior to any other for horses.

The lowlands of St. Elizabeth boast of such properties as Gilnock, Font Hill, Pepper, Longhill, Goshen, Friendship and Warminster; these and many others being famous for the quality of their cattle, horses and mules.

St. Elizabeth produces sugar, rum, pimento, coffee, logwood, ginger and tobacco, besides the minor products. Some districts are particularly well adapted for the cultivation of ground provisions, of which there is usually a good supply throughout the parish. Banana cultivation is becoming extensive in the northern parts of the parish. Sisal hemp also grows freely, as is shown by the cultivation at Lititz by the Government.

At Santa Cruz there is a well organized alms-house, with an infirmary attached. Poor relief is also afforded extensively on the out-door system. The parish is traversed in all directions by excellent roads. One hundred and ten miles of parochial roads were transferred to the Public Works Department under Law 17 of 1890, thus leaving a larger amount of local funds for the improvement and maintenance of the roads which still remain in the care of the parochial authorities.

According to the Census of 1911 the population was 78,700; 36,967 males and 41,733 females. The increase since the Census of 1891 was 16,444. In 1921 it was 79,381; males 36,090 and females 43,291. The estimated population on the 30th June, 1928, was 89,970

MANCHESTER.

Manchester was created from parts of the adjoining parishes of St. Elizabeth, Clarendon and Vere in 1814, and was named after the Duke of Manchester who was then governor of the Island. In August, 1816, a meeting of the committee of the vestry was held to arrange the erection of a court house, church, gaol, and parsonage to make the town of Mandeville. Sixty acres were purchased from Robert Crawford, owner of Caledonia property, and thus Mandeville, the chief town, and one of the prettiest towns in the island, came into being. Its situation on the top of a mountain 2,061 feet above sea level is very picturesque and the tidiness and cleanliness in which the buildings are kept are remarkable. It is in a central part of the parish and contains an Episcopal church, a Wesleyan chapel, a chapel belonging to the London Missionary Society, a Baptist chapel, a free school, a court house, a constabulary station and a public general hospital, a large and convenient market, and a Maternity hospital. It has billiard, tennis, golf, cricket, and ladies clubs, and polo and gymkhana grounds and Cinema Theatres at Mandeville and Christiana.

Mandeville has a very good water supply, with three large reservoirs holding 1,800,000 gallons. The hotels, some boarding houses and the hospitals are supplied with water from the reservoir. There are a good private school for girls, a Diocesan school for boys and an amalgamated secondary school for boys and girls managed by the trustees of the Manchester schools. There is a branch of the Bank of Nova Scotia.

Mandeville is much frequented as a winter resort for visitors from Great Britain, Canada and the United States. The climate is salubrious and the temperature ranges from 70° to 75° in the day time, to 48° to 54° at night. Here are situate two private Observatories.

The Government Elementary School is built of local stone.

Porus is a populous village; containing an Episcopal church, a Baptist chapel and a fine chapel of the London Missionary Society, a court house and a constabulary station. Christiana is the centre of the ginger growing district. Alligator Pond is a shipping port of some importance. There are four Railway stations in the parish: Porus, Williamsfield, Kendal and Green Vale. The nearest station to Mandeville is Williamsfield, five miles distant. The Manchester orange has obtained a name in the foreign markets for its flavour, and is exported to a considerable extent. The principal products of the parish are coffee, pimento, ginger, and citrus fruit.

The area of the parish is 302 square miles. According to the census of 1911 the population of the parish was 65,194; 30,931 males and 34,262 females. In 1921 it was 63,942, males 29,506, females 34,436. The estimated population on the 30th June, 1928, was 72,203.

CLARENDON.

The parish was named in honour of the celebrated Lord Chancellor. It is one of the largest parishes in the island and for electoral and revenue purposes it is divided into three districts, upper, middle and lower.

The principal towns or villages in the upper district are Chapelton, Spaldings, Rock River and Frankfield; in the middle district, May Pen, Four Paths and Hayes; and in the Vere or lower district, the Alley and Milk River. The shipping ports and wharves are at Salt River and Carlisle Bay.

May Pen is the most important township of the parish and is the head station under Law 20 of 1867. In the court house are the courts office, collectorate and parochial offices. The town contains a hotel, a market, an almshouse, a police station, an Anglican church, a Wesleyan church, a Roman Catholic chapel, a post and telegraph office, a garage, a cordage factory, and several up-to-date stores.

A new bridge for railway purposes to relieve the congestion of the present bridge (which serves both for road and railway purposes) has been completed.

There is a flourishing industry of Sisal cultivation carried on in the neighbourhood.

Spaldings is a prosperous village situated near to the border of the parishes of Clarendon and Manchester. It contains a market, Presbyterian and Anglican churches, dry goods stores, post and telegraph office. The climate is unsurpassed and a thriving business is done in the purchasing of island produce, principally ginger and coffee.

Chapelton, the principal town of upper Clarendon, is on the Rio Minho branch of the Railway, and contains an Episcopal church, St. Paul's; a Congregational church, Salem, in connection with the London Missionary Society; a court house, (containing offices of the Assistant Collector of Taxes, and the Clerk of the Courts, both stationed in Chapelton), constabulary barracks, and Inspector's quarters, a public general hospital, public works office and store, a large covered market, post and telegraph office, and several large stores. There is a War Memorial Clock Tower. The population of Chapelton is about 900. It stands on a small hill which is naturally drained on every side, and is remarkably healthy, as indeed are undoubtedly the whole of Upper Clarendon and the Clarendon mountains.

Rock River is a small village about five miles to the east of Chapelton, near an abandoned sugar estate of the same name, and contains a constabulary station and a few shops.

Frankfield, the terminus of the Rio Minho branch of the Railway, is an important village 12 miles to the northwest of Chapelton on a good driving road, and is the centre of a large and flourishing agricultural district and the temporary terminus of the Rio Minho Valley railway extension. In the village are 2 churches, a market, a post office, a dispensary and several shops. A District Medical Officer resides in Frankfield.

Frankfield is the most important buying centre for bananas in the parish, and there has been great expansion due to the railway extension.

The small settlers of Upper Clarendon produce quite a considerable amount of sugar known as "wet sugar" for local consumption. This is manufactured by an iron mill, known as the "Exhibition" mill drawn by one animal—the principal make being the "Chattanooga"—The name "Exhibition" was adopted by the peasantry because it was first shown at the Exhibition in 1891, and replaced the old "John Crow" mills made of wood. The small settlers also produce quite a considerable amount of cane which is sold to the Mercedes Central Factory and other Centrals in Mid Clarendon and Vere.

Four Paths is situated on the main road about four miles west of May Pen. There is a railway station in its immediate vicinity. It also has a new Government School Building and a few shops. It has a public market, constabulary station and a post office.

Hayes is a small village about seven miles south of May Pen, built on a savannah of the same name. It would be difficult to account for its existence on so arid and unproductive a site, but it has nevertheless a substantial public market, generally well attended and supplied, post office, and numerous small stores. The water supply has been improved at the instance of the parochial board and an aermotor and tank have been erected in the only available well in the locality. Banana cultivation is now being carried on in the vicinity on the Dry River property, recently acquired by the United Fruit Company, and there are two central sugar factories unfortunately not operating at present due to drought and low sugar prices.

Milk River (formerly called The Rest) is reached by an excellent level road, a branch from the main road between Four Paths and Porus, or from Clarendon Park station, a distance of 10 or 11 miles. The village has a church, shops, a post and telegraph office, and a constabulary station. The Milk River is navigable for lighters for four or five miles. The river used to abound in crocodiles, but the constant passage of boats has made them scarce. The Milk River Bath (of which an account is given in another part of this Handbook) stands on the west bank of the river about three miles from the village.

The Alley, which was formerly the capital of the parish of Vere (now incorporated with Clarendon) is a small village on the banks of the Rio Minho and is rendered of some importance from the fact of its being in the immediate proximity to a large number of sugar estates, all under one ownership (except Bog) the United Fruit Company. In this district may be seen some of the finest cane and banana cultivation in the island, the estates of Money Musk, Amity Hall, Bog, Moreland, Hillside, having very large acreages in canes and bananas, while they have also all the latest and most improved machinery and appliances for the manufacture of sugar and rum. A large acreage has been put under banana cultivation which acreage is being continually increased. The village contains an interesting Episcopal church, one of the oldest in the island, a court house, (with a sub-collectorate), constabulary station, a post and telegraph office; and in the vicinity is a large public general hospital. [For an account of the irrigation works see Part XIII of this Handbook.]

Carlisle Bay is noted as being the spot where the colonial militia met the French under DuCasse in 1694, and after three days' gallant resistance drove them to their ships with a loss of 700 men. The invaders had already for nearly a month plundered and destroyed the sea-side plantations and murdered or kidnapped the gentry and their slaves. This, in words of Bridges, was "the most formidable attack which was ever made upon the shores of Jamaica."

Sawkins says in his report on the Geology of Jamaica: "The geology of this parish is perhaps more interesting than that of any in the island. The Clarendon mines at Charing Cross and Standford Hill afford a nearer approach to true lodes or mineral veins than any of the other metalliferous deposits of Jamaica." Copper mining on Keyes, Retreat and Provost, has been carried on from time to time.

There is a very fine main road from Chapelton to Cave Valley in St. Ann, and under the provisions of Law 17 of 1890, the Public Works Department has taken over and reconstructed some 90 miles of the most important of the old parochial roads, thus making wheeled traffic possible to nearly every district of the parish. Further important main road construction is now being carried out to provide feeders for the Railway.

The Bull Head, rising to a height of 3,600 feet or thereabouts and situated near its northern limit, is the highest land in the parish. This mountain is as nearly as possible the centre of the island and is a conspicuous object to vessels making the island from the south. The ascent is easy and the view from it on a clear day magnificent. It commands the entire parish; to the north lies the parish of St. Ann; to the west the Manchester hills, and eastward an uninterrupted prospect to the Blue Mountain Peak.

The Round Hill in Vere is a conspicuous object arising out of the plain, and seen from great distances. The climate of Upper Clarendon including the Mocho mountains is unsurpassed in the island, and the scenery is beautiful.

A fine tobacco plantation was for some years worked principally by Cubans at Morgan's Valley, near Chapelton (once the property of Sir Henry Morgan, who settled it and called it after his own name). It was abandoned some years ago, but tobacco cultivation on a considerable scale has since been resumed. Several indigo walks were established in the Vere district by the early English settlers, but they had to be abandoned in consequence of the heavy import duty which was levied on the article in the English market. At one time 50,000 cwts. of indigo per annum were produced from these plantations. The area of the parish is 474 square miles. According to the census of 1911, the population of the parish was 73,914; 36,412 males and 37,502 females. In 1921 it was 82,455; 39,554 males, and 42,901 females. The estimated population on the 30th June, 1923, was 93,300.

ST. CATHERINE.

This parish derived its name from the Queen of Charles II. In the first act in which it is mentioned it is correctly spelled Katherine. It consists of what before the passing of Law 20 of 1867 constituted the parishes of St. Catherine, St. Dorothy, St. John and St. Thomas-in-the-Vale. The chief towns and villages are Spanish Town, Old Harbour and Linstead.

Spanish Town, or Saint Jago de la Vega, was the ancient capital of the island. It is situated on the banks of the Rio Cobre, from which it derives its water supply. Amongst the more important public buildings was the old King's House (formerly the official residence of governors of the island) built in 1762, but unfortunately burnt down in 1925. Other important buildings are the building formerly used for the House of Assembly and the Legislative Council, the cathedral, the court house, the Record Office, the Registrar General's Office, the Middlesex and Surrey county gaol, the St. Catherine District Prison, the Lepers Home, and the constabulary depot buildings. There are two Episcopal churches, namely, the cathedral church, dedicated to St. Catherine, and Trinity chapel.

The remains of several of the Governors of Jamaica and of their wives and of the more eminent early settlers of the colony are interred within the cathedral or in the churchyard attached. There are several good monuments by Bacon, the Effingham tomb, the memorial to Archbishop Nuttall and others. The town also contains a Roman Catholic church, and chapels attached to the Wesleyan and Baptist bodies; and a Synagogue, the land for which was purchased in 1704, commodious markets, an alms house and a public general hospital, Beckford and Smith's Middle Grade School, partly endowed. There is also a town hall, in which there is a stage for dramatic representations, and a club and telephone service. At this town is the junction of the north and west branches of the railway.

Among the antiquities of the town may be noted the marble statue of Rodney, by Bacon, and the two large bronze guns which were captured by the Admiral in 1782 from the French fleet under Count de Grasse; the "Eagle House," once surrounded by a moat, and formerly the residence of the Earl of Inchiquin when governor of Jamaica; a tamarind tree in the grounds of the Infant School, which local tradition points out as that under which Colonels Tyson and Raymond were shot or mutiny in 1660, and the foundations of the old Spanish White Cross Church and of the Convent attached to it, which may still be traced in the street named thereafter.

The drive from Spanish Town to Bog Walk, past the power station which supplies the electric motive power for the Kingston tramways from the Rio Cobre, is a favourite with visitors. The "Bog Walk" affords one of the finest bits of scenery in the island.

"A torrent gushing in misty depths and fighting its downward course among scattered rocks, the narrowness of the long ravine or den through which it rushes, and the steepness and loftiness of the precipices on either side, with the richness and variety of tropical vegetation growing in all the exuberance of its foliage on every spot where a plant can rest—these features unite in imparting to the scene all the imposing effect of blending beauty and grandeur." This, written by King in 1830, is equally true to-day.

Old Harbour contains a court house, an Episcopal church, a Wesleyan chapel and a public market. About a mile from the town stands the old parish church, built by the earlier English settlers. The town is supplied with water from a river six miles off. The Ludford endowed school is also here.

Old Harbour Bay was formerly called "Esquivel," after the Spanish Governor of that name, who established it as a ship-building port. It possesses a fine harbour studded with little low cays and rocky islets. When Columbus discovered it, it was inhabited by thousands of Indians, the most intelligent and the most civilized of all the aborigines of the Antilles that he had seen. There are an Episcopal church and a Baptist chapel in the village.

Linstead, which is situated in the centre of an almost circular hollow shut in by mountains, is a thriving township. It contains a court house, a Presbyterian church, a Wesleyan chapel, a public general hospital, an alms house and many fine stores. There is a good water supply and a market. An Episcopal church and a Baptist chapel are in the vicinity. The railway extension to this place developed the great resources of the surrounding country and rendered it one of the most important trading centres in the island. The Episcopal church near Linstead has become historical from the circumstance of all the public records having been deposited there under a militia guard during the period of the anticipated French invasion of 1805. Ewerton is the terminus of one branch of the railway which joins the Port Antonio branch at Bog Walk.

Six miles from Spanish Town to the south-east is Passage Fort, the landing place of the English conquerors in 1655, and the place where the Rio Cobre empties itself into the sea. It was once a port of some importance and was connected with Spanish Town (then the seat of government) by a line of stage-coaches; it is now a fishing village, with a few houses, the principal building being a small chapel belonging to the Baptist denomination.

About four miles from Passage Fort and six miles from Spanish Town lies the sea-side village of Port Henderson, which was once a place of considerable resort for change of air. It contains a mineral spring which is enclosed as a bath. The buildings afford comfortable accommodation for visitors. There is a main road between Spanish Town and this place. In the immediate neighbourhood is the quarantine station (of which a full account is given in another part of this work). On the hill at the back of the lodgings is Rodney's lookout, from which the admiral kept watch over the adjacent sea. On the grounds of the quarantine station (Green Bay) there is still the tomb of Lewis Galdy who was "miraculously saved" from the earthquake of 1692.

Not far from Spanish Town is Bernard Lodge Sugar Factory one of the most modern in the Island.

Between Port Henderson and Passage Fort (on the seaward) is Fort Augusta, which was once a military station. All ammunition and other combustible materials used to be deposited here by vessels proceeding to Kingston. The fort was planned by Captain Knowles (afterwards governor of the island) for the protection of Kingston.

There are many grazing pens in the plains of St. Catherine which are remuneratively managed as sheep and cattle farms; and the salt ponds district (lying between Spanish Town, Port Henderson, and Passage Fort) is noted for the excellent quality of its mutton and for the fine fish taken from the large salt pond, especially the well known calipeva. The inhabitants of Spanish Town were formerly supplied with salt to the extent of 5,000 bushels a year from the pond referred to.

The principal products of the parish are sugar, rum, coffee bananas, oranges, grape fruit, corn, tobacco, cocoa, grass and milk. The Rio Cobre canal which irrigates the St. Catherine's plains has proved a boon to the inhabitants in rendering profitable the cultivation of bananas and other fruits and various kinds of cereals. The cultivation of fruit, especially bananas, is fast superseding the sugar cane. There is an important factory of logwood dye at Spanish Town.

The area of the parish is 470 square miles. According to the census of 1911 the population was 88,104, of whom 43,359 were males and 44,745 were females. In 1921 it was 96,501, males 47,650 and females 48,851. The estimated population on the 30th June, 1928, was 106,066.

PAROCHIAL BOARDS.

THE Parochial Board of each parish except Port Royal, and the united parishes of Kingston and St. Andrew, consists of the person representing the electoral district in the Legislative Council, the Custos of the parish, and from 9 to 15 persons elected by the taxpayers who are qualified to vote at elections for members of the Legislative Council. In 1900 Port Royal was constituted a separate parish for all purposes of municipal administration, and a Board was formed consisting of the Commodore (Chairman), a Naval Officer, Military Officer and two elected members (Law 13 of 1900). When the naval station was abandoned the senior military officer became chairman.

In 1923 the parishes of Kingston and St. Andrew were amalgamated for the purposes of civic Administration.

The Parochial Boards manage all the local affairs that had formerly been in the hands of the Municipal and Road Boards. This change was effected by Law 16 of 1885 now repealed, with amendment Laws; and Law 17 of 1901 in the consolidated law.

The qualifications and disqualifications of members of a Parochial Board under Law 17 of 1901, Section 24 are as follows:—

No person shall be capable of being elected a member of the Parochial Board of any Parish, or, having been elected, of sitting or voting at any meeting of such Board:—

KINGSTON AND ST. ANDREW CORPORATION.

By a law passed in the Spring Session 1923, of the Legislative Council, called the Kingston and St. Andrew Corporation Law, 1923, the Corporate bodies known as The Mayor and Council of Kingston, the Kingston General Commissioners and the Parochial Board of St. Andrew were dissolved, and on the 1st May, 1923, all their several powers, duties and obligations were transferred to a Commissioner appointed by the Governor, to be vested in him until an election should be held, under the provisions of the Law, of the Mayor, Aldermen and Councillors of the New Corporation.

The Corporate Area extends to the limits of the parishes of Kingston and St. Andrew as set out in a schedule attached to the Law, and is divided into four Urban, two Sub-urban and two Rural Wards. The Council comprises ten Councillors, one to be elected by the burgesses registered in each ward and six ex-officio members who are the persons from time to time holding the following offices:

- The Member of the Legislative Council for Kingston.
- The Member of the Legislative Council for St. Andrew.
- The Superintending Medical Officer.
- The Director of Public Works.
- The Custos of Kingston.
- The Custos of St. Andrew.

The Councillors elect from among themselves four Aldermen whose term of office is the period for which they remain Councillors.

The Mayor and Deputy Mayor are elected annually from among the Aldermen and Councillors.

The Honourable H. A. L. Simpson, O.B.E., was appointed by the Governor to be the Kingston and St. Andrew Commissioner; he assumed the duties of the office on the 1st May, 1923, and, having accomplished the fusion of the several Corporate Bodies, handed over the duties of Commissioner to the Council of the New Corporation which was elected on the 8th April, 1924.

PART XI.

IMPERIAL COLLEGE OF TROPICAL AGRICULTURE.

THE Imperial College of Tropical Agriculture was incorporated in September, 1921, as the outcome of recommendations made by the Tropical Agricultural College Committee appointed by Viscount Milner in 1919 in their Report (Command Paper 562).

The object of the College is to promote the study of Tropical Agriculture in suitable surroundings and to create a body of British expert agriculturists well versed in the knowledge of the cultivation of land in the tropics, of chemists and of scientific advisers possessing an intimate knowledge of the means of combating pests and diseases and to conduct research. The College buildings are at St. Augustine, near St. Joseph, Trinidad, on land granted to the College by the Government of Trinidad and Tobago. The funds of the College are derived from contributions from Colonies and industries participating in the movement and an imperial grant. The Imperial Department of Agriculture, founded in 1898, was amalgamated with the College on April 1st, 1922. The academic year extends from October 1st to June 30th. The following courses and facilities for study are available:—

1. A one-year course in elementary Agricultural Science for students unable to afford a three-year's course of study, with some practical acquaintance with the scientific side of tropical planting and the more up to date and efficient methods of production and management.

2. Courses for agricultural officers selected for Colonial service in tropical agricultural departments.

3. Post Graduate research in connection with problems arising in tropical agriculture and more especially those connected with plant pathology, agronomy and physiological botany. There is also a Diploma Course for students resident in the Caribbean area.

Tropical Veterinary Science is also an important branch of the College curriculum and a Chair of Tropical Sanitation and Hygiene has been established.

The tuition fees are £50 per annum, but a limited number of students from contributing colonies and industries are admitted on the nomination of the respective local Governments or Industries, without the payment of tuition fees. Other students from contributing Colonies are admitted on payment of tuition fees of £25 per annum. Further particulars regarding the College can be obtained from the Secretary, The Imperial College of Tropical Agriculture, 14 Trinity Square, London, or from the Chief Clerk and Registrar, St. Augustine, Trinidad, B.W.I.

JAMAICA AGRICULTURAL SOCIETY.

Office—11 North Parade, Kingston.

A SOCIETY of Agriculture was formed in 1895, with the Governor as President, the objects being to obtain useful information and disseminate it, encourage improved cultivation of products, improved breeds of stock, and watch over the interests of agricultural industry generally.

A Board of Management was formed, originally, consisting of the elected members of the Legislative Council, who were members of the Board *ex officio*, 14 members elected by the Society, and 14 members nominated by the Governor, who held office for three years.

Changes have been made and the Board now consists of the Governor as President, the Colonial Secretary and the Director of Agriculture, *ex officio*; three vice-presidents, and fourteen members elected by the Society triennially.

The Society receives a grant from the Government.

The subscription for membership of the Society is five shillings per annum, foreign members six shillings.

One of the first matters undertaken was that of organizing local associations of agriculturists in different parts of the island; and there are now 211 affiliated Branch Societies at work in the various parishes. Some of the Branch Societies are important local organizations, holding shows and local competitions in agriculture, and watching over the agricultural interests of their community.

Premiums have been offered for new cultivations of staple products. Seeds and plants together with printed instructions, have been widely distributed. Lectures and demonstrations under the auspices of the Society are regularly given by the various Agricultural Instructors, of whom there are now twenty (including two specialists for Silk and Bee-keeping); and a Supervisor.

The attention of the society was early given to the important question of stock-breeding. Two Hackney stallions, one Welsh pony stallion and a number of well bred pigs, goats and poultry were imported from Great Britain, the United States and Canada. The good results of the action of the Board in this direction are now most marked. Premiums were also given for selected stallions and bulls, to stand in certain districts at reduced fees, but these having served their purpose were discontinued. The late Sir Alfred Jones presented to the Society in 1903 two Aberdeen-Angus bulls and one Shorthorn bull, and in 1906 presented two dairy Shorthorn bulls to the government which were placed in the care of the Society. His late Majesty King Edward VII, presented the island with a Hereford and a Shorthorn bull from his herds at Windsor, and these were placed in the care of the Society.

The Society publishes a monthly journal, the first number of which was issued in January, 1897. It is sent free to all members of the Society and formerly of the local branches and has an issue of about 5,000 copies per month. Branch members under a more recent rule now subscribe 6d. each per annum toward the cost of the journal. The society has undertaken a number of experiments in various products, has caused special investigations to be made, when necessary, into obscure diseases among live stock and fruit trees, has sought to encourage the extension of present industries and to start new ones and to open up fresh markets for island products. The office of the Society, is regarded in the light of a bureau of agricultural information, and constant applications, local and foreign are received and dealt with by the staff on almost every conceivable subject connected with the agriculture of the colony. The office has also proved of great use as a medium for the supply of agricultural wants, and for the bringing of buyers and sellers of live stock, plants and seeds together. In 1901, the society appointed local agricultural instructors in Manchester, St. Ann, Trelawny and Clarendon, with the principal aim of improving the cultivations, and the quality of the produce of small settlers, and generally to advise

them in their agricultural operations. In 1906, on the recommendation of the Society an arrangement was made by the Government with Elder Dempster and Co., for £500 per annum to be paid in lieu of the appointment of Instructors under the Direct Line Contract and with this amount an extension of the work of the Society's Instructors was arranged. This sum ceased at the expiration of the Contract in January, 1911. The number of Instructors, however, has been gradually increased, as this work commended itself to agriculturists.

The following list gives the names of the *Instructors* and their postal addresses.

Supervisor of Instructors, E. Arnett, Claremont; Agricultural Instructors, W. Cradwick, Mandeville; J. Briscoe, Montpelier; L. A. Wates, Port Antonio; H. L. Mossman, Linstead; A. P. Hanson, Stony Hill; M. Rennie, Brown's Town; H. W. Lynch, Myersville; C. C. Hastings, Great Valley; J. A. Banks, Richmond; O. P. Martin, Buff Bay; P. St. L. Bacquie, Chapelton; U. A. McLaren, Yallahs; H. A. Darby, Claremont; Assistant Instructors—W. Z. Buckley, Bath; C. M. A. Robotham, N. M. Thompson, H. B. McKenzie, V. C. Atkinson, Chapelton, P. Hofman-Bang, Shooters Hill, special for silk; H. H. Coots for Beekeeping.

In December 1900, a Banana Conference, in 1901, and 1905, Orange Conferences, and in 1904 a Cotton Conference were held in Kingston under the auspices of the Society.

A competitive scheme for prizes for best kept small holdings was in force up till 1915 and groups of parishes were dealt with each year in rotation,—the amount awarded in each year in three classes being £25 for each parish competing. This was discontinued during the war period and Food Growing Competitions substituted, which were highly successful in producing an abundance of local foodstuffs.

This Competition for the Best Small Holdings, is again being carried through in each parish. These competitions are organized by the Instructors of the Agricultural Society and operated through the Branches.

Grants were also made to Agricultural Shows held under the auspices of the Branch Societies, for some years past, averaging ten shows a year. These were discontinued in 1915, but renewed in 1924.

RETURNS published by the Revenue Department for the year ending 31st March, 1928, and compiled from ingivings made by taxpayers under the provisions of Law 15 of 1903, show that of the acreage alienated from the Crown 852,902 acres are returned as being in wood and ruinate, and 1,157,586 acres as under care and cultivation. This latter acreage may in its turn be divided into land and appropriated to pastoral purposes, and that devoted to agriculture in the more limited application of the term; 880,346 acres of the whole being grazing lands and 277,240 acres of lands which have been subjected to tillage. Of the tilled lands 43,605 acres are under cultivation of cane, and besides providing for home consumption, the products of this crop exported during the year ended 31st December, 1928, were as follows:—48,716 tons, valued at £709,848; rum, 807,503 galls., valued at £78,831.

The area in cultivation of coffee is given as 19,195 acres of the crop lands, and the exports of the berry amounted to 8,832,328 lbs., valued at £378,118. The area in bananas, is shown at 88,974 acres, the output of this fruit reaching the total of 17,080,897 stems valued at £1,773,695. Coconut palms are shown to cover an area of 39,670 acres, the Export Table giving the shipments at 31,104,831 nuts, valued at £159,426. The only other specific cultivation covering any appreciable area, is that of cocoa, which is returned as 4,782 acres, the exports being 5,044,380 lbs., valued at £110,011.

THE following rules for the sale of Crown Lands to settlers were approved by the Governor. (See Gazette Notice, 168, March 16, 1916).

1. A Land Board shall be appointed in each parish in which the Government owns sufficient Crown Lands to justify its creation. The Board shall consist of the Member for the Parish, the Chairman of the Parochial Board, the Collector of Taxes and two other members to be appointed by the Governor. The Board shall elect its own Chairman and the quorum shall be the Chairman and two others. The Board shall forward its recommendations to the Colonial Secretary.

2. The duties of the Board shall be to consider and advise the Government as to the best means of opening up Crown Lands for settlement and as to the methods of providing means for making and maintaining roads into such Crown Lands.

3. No more than 300 acres will be granted to one purchaser, nor less than 5 acres, except in cases specially approved by the Governor, nor shall any two grants of 300 acres be allotted to run continuously and contiguously without such approval. The Governor will so far as practicable adopt the general principle that out of every block say of 1,000 acres not more than one block of 300 acres should be sold.

4. The price at which the land will be sold may be learnt at the office of the Surveyor General or from the Bailiffs in charge of the different parcels. The value of land to be sold shall be fixed by the Surveyor General in consultation with the Local Land Board with the approval of the Governor.

5. Each applicant for the purchase of land must submit a recommendation from a person of good standing to whom he is personally known.

6. The Surveyor General on receipt by him of an application in the form endorsed hereon accompanied by a recommendation and on deposit of one-fifth of the price of the land shall cause a survey to be made of the quantity of land applied for, the applicant receiving notice as to the time when the survey will be made. Applicants' lots shall run continuously and contiguously with no blank land between lots, and possession will not be allowed to any applicant till survey has been made defining the lot purchased.

7. Any application may, however, be refused, and the deposit refunded, by the Surveyor General, at any time previous to the delivery to the applicant of the Certificate mentioned in Rule 10, whether the survey approved by the Surveyor General mentioned in Rule 6 entitling the applicant to possession has been made or not; and on tender refund of the deposit the application shall be deemed to be withdrawn.

8. On the survey being made and approved by the Surveyor General, the applicant shall be entitled to possession of the land allotted to him on such survey, subject, as in Rules 7 and 9, to refund of deposit and cancellation of sale previous to delivery of Certificate.

9. If the applicant shall be dissatisfied with the situation or configuration of the land allotted to him on such survey, and shall within fourteen days after the survey give written notice thereof to the Surveyor General, or to the Surveyor who made the survey, or to the Bailiff in charge of the land he shall be entitled to a refund of one-half of the amount deposited by him as above and his application shall be deemed to be withdrawn.

10. If such notice shall not be given, the applicant shall on approval of the survey by the Surveyor General, be deemed to be the purchaser of and to be in possession of the land allotted to him on such survey, and as soon thereafter as practicable a Certificate shall be delivered to him by the Surveyor General, who shall keep a duplicate of such certificate in his office.

CONTROL OF PLANT DISEASES.

THE control of plant diseases is regulated by Law 10 of 1925, "The Protection from Disease (Plants) Law, 1925" and the Orders made thereunder, the principal provisions of which are as follows:—

1. The Governor in Privy Council has power to declare any disease of plants to be a 'notifiable plant disease' and the Governor to issue an order prescribing the treatment to be followed by the owner or occupier for the treatment of such notifiable plant disease.

In the case of a notifiable plant disease the owner or occupier and every person having the charge or management of land who knows or suspects the existence of a notifiable plant disease on the land of which he is the owner or occupier or has the charge or management shall with all practicable speed give notice in writing to the Director of Agriculture of the fact of the land or of any plant thereon being so infected or suspected, and should in such notice give all information in his power as to the extent and nature of the disease. The said notice shall be served personally on the Director of Agriculture or shall be addressed to him by registered post.

Where the occupier or the person having the charge or management of land is charged with an offence under the Law, he shall be presumed to have known of the existence of the disease, unless and until he shows to the satisfaction of the Court that he had not knowledge thereof and could not with reasonable diligence have obtained that knowledge.

For the purposes of the Law, the decision of the Director of Agriculture as to the presence or identification of any notifiable or infectious plant disease is final.

A fine not exceeding £50 can be inflicted for a breach of an order made under the Law or for failure to notify a notifiable plant disease.

At present the Panama Disease of Bananas and the Mediterranean Fruit Fly are the only plant diseases declared to be notifiable plant diseases to which the above requirements apply.

2. An "Infectious Plant Disease" is a disease so declared by the Governor in Privy Council for which the Governor has power to make an order for treatment by the owner, occupier or manager concerned.

No notice of such a disease to the Director of Agriculture is required.

If the owner or occupier or the person having the charge or management of any land fails to carry out the measures prescribed in the order so issued, the Director of Agriculture or any person authorised by him in writing may enter on such land and may carry out the measures prescribed in the order and the cost of carrying out these measures is recoverable from such owner or occupier as the case may be at the suit of the Director of Agriculture or any person authorised by him in writing, as a Civil Debt before the Resident Magistrate for the parish in which the land in question is situated.

The Bonnygate Disease of Bananas, The Black Weevil Borer of Bananas, the Bud-rot Disease of Coconuts, and the Mosaic Disease of Sugar Cane have been declared to be "Infectious Plant Diseases" under this Law, and Orders prescribing measures for their treatment have been issued.

IMPORTATION OF ANIMALS.

THE LAWS at present regulating the importation of animals are Laws 24 of 1890, 33 of 1893, 17 of 1895, 1 of 1898, 19 of 1909, 23 of 1920 and 13 of 1924.

By Law 23 of 1920, it is an offence if any person shall import into Jamaica any animal without the written permission of the Governor or some person authorised by the Governor, and any animal imported without such written permission or in respect to which any prescribed conditions relating to its importation has not been complied with may be destroyed. The Director of Agriculture has been appointed to be the person authorised under Section 4 of the Law to grant permission to import animals.

The following animals are exempt from the operation of this law: Bulls, cows, oxen, heifers, steers, calves, horses, mules, asses, dogs, sheep, goats, swine, domestic poultry, cage birds, live turtle, live fish, rabbits, guinea pigs, cats, monkeys, bees.

Law 24 of 1890 defines the words "cattle," "animal," "disease," and "foreign."

1. "Cattle" means bulls, cows, oxen, heifers, steers and calves. Horses, mules and asses are included in the term by Law 1 of 1898.

2. "Animals," except where it is otherwise expressed, means cattle, sheep, goats and swine. Dogs are added by Law 19 of 1909.

3. "Disease" means cattle plague or rinderpest, anthrax, contagious pleuro-pneumonia, foot and mouth disease, sheep pox or sheep scab, or any other contagious disease which is known to attack cattle or other animals. Glanders and farcy are added by Law 1 of 1898 and rabies by Law 19 of 1909.

4. "Foreign" denotes a country outside of the Island of Jamaica and its Dependencies, and when applied to animals and things, means brought to Jamaica from a foreign country.

Law 24 of 1890 provides that "all cattle and animals" imported from a foreign country shall, on arrival and before being landed, be examined and inspected by an Inspector appointed by the Governor, and shall then be placed in a depot on the coast to be provided by the Government, and be there kept in quarantine at the risk and expense of the importer for not less than 14 days exclusive of the day of landing.

Cattle or animals, however, imported from the United Kingdom or any British possession or from the United States of North America are exempt from this provision provided the importer declares in writing that they are, and the Inspector believes them to be imported for breeding purposes only.

Law 33 of 1893 provides that, whilst cattle or animals are kept in quarantine, if it should appear to the Inspector that any animal is diseased, it shall be lawful for the Inspector, in his discretion, to cause such animal to be slaughtered; and the Inspector shall also keep in quarantine for at least 14 days or such longer period as the Governor may from time to time determine from the day when any animal is found to be diseased any animal that shall have been within the same enclosure as such diseased animal.

Should it happen that disease breaks out among any cattle or animals in quarantine to such an extent that the Inspector considers that it would be dangerous to the Island to let them or any of them out of quarantine, all such animals shall be slaughtered with the approval of the Governor.

Cattle and animals quarantined under the Law must be inspected by the Inspector before being released.

The Governor in Privy Council is empowered—

1. To fix a scale of fees and charges to be paid by the owner or consignee of cattle or animals landed at the quarantine depot.
2. To make such general or special orders as he may think fit for prescribing the ports or limits at which alone foreign animals may be landed.

By the Animals Contagious Diseases (Prohibition and Restriction) Order, 1925, as amended by the Animals Contagious Diseases (Prohibition and Restriction, Amendment Order, 1926, the importation of cattle and animals is prohibited from all foreign countries excepting the United Kingdom, Canada and the United States of America, while from these latter countries, animals may be imported only on a Permit first had and obtained from the Governor or some person authorised by him. The importation of dogs is prohibited from all countries excepting the United Kingdom, and from this latter country, dogs may be imported only under the following conditions:—

(a) Each consignment of dogs shall:—

- “(i) In the case of dogs imported from Great Britain, be accompanied by a Certificate of the Ministry of Agriculture and Fisheries stating that there has been no Rabies among unquarantined dogs or other animals in Great Britain during six months immediately preceding the embarkation of any dog from Great Britain for any place in this Island.
- “(ii) In the case of dogs imported from Northern Ireland, be accompanied by a Certificate of the Imperial Secretary's Department stating that there has been no Rabies among unquarantined dogs or other animals in Ireland during six months preceding the embarkation of any dog from Ireland for any place in this Island and
- “(iii) In the case of dogs imported from the Irish Free State, be accompanied by a Certificate of the Department of Agriculture and Technical Instruction stating that there has been no Rabies among unquarantined dogs or other animals in Ireland during six months immediately preceding the embarkation of any dog from Ireland for any place in this Island.”
- (b) Each consignment of dogs shall be shipped directly from the United Kingdom of Great Britain and Ireland and shall not associate or be in contact during the voyage, with any dog from any country other than the United Kingdom of Great Britain and Ireland or with any dog which has not been released from quarantine in the United Kingdom of Great Britain and Ireland in respect of the disease known as Rabies.
- (c) On arrival at any port in this Island every such dog shall be examined by the Inspector appointed under the Law, and if free of infectious or communicable disease may, after permission in writing for such landing has been obtained from such Inspector be landed at such port of Entry.

The Governor in Privy Council is empowered at any time to make such general or special orders as he may think fit for prohibiting or restricting and regulating the importation of foreign animals or for the better execution of the Laws to prevent the importation of cattle or animals suffering from contagious or infectious diseases, or for the purpose of in any manner preventing the introduction or spreading of disease by carcasses, fodder, litter or other thing whereby disease may be introduced or spread.

Fees for inspection of imported animals.

The Inspector shall be paid by the person importing cattle or animals a fee of four shillings per head on “cattle” as defined above and 2s. per head on the smaller animals, i.e., sheep, goats, swine and dogs. All fees are to be paid before the animals are landed, or when in quarantine before being removed.

IMPORTATION OF BEES LAW, 1920.

By this Law it is enacted that no bees, honey or beekeepers stock shall be brought within the limits of this island, save with the permission in writing of the Director of Agriculture first had and obtained and any bees etc. imported without such permission may be seized and destroyed at any time by any Customs or Constabulary Officer.

Any person found guilty of an offence against this Law, is liable to a penalty not exceeding Fifty Pounds, or in default of payment to imprisonment for any term up to three months.

CONTAGIOUS DISEASES OF ANIMALS.

A Law was passed in December, 1922, which repealed Law 1 of 1909, Law 21 of 1910 and Law 23 of 1917. This Act gives very wide powers for executive action in the control of Contagious Diseases of Animals.

"Disease" is defined as Cattle Plague, Pleuro-pneumonia, Foot and Mouth Disease, Sheep Pox, Sheep Scab, Swine Fever, Farcy, Glanders, Rabies, Anthrax and any disease so declared by the Governor in Privy Council.

Every owner of an animal infected with or suspected of being infected with diseases shall—

- (a) keep that animal separate from animals not so affected, and
- (b) immediately give notice to the Inspector of Police or other principal Officer of Police in the district where the animal is or to a commissioner appointed under the Law who shall report immediately to the Director of Agriculture.

The Law provides for the appointment of Commissioners and of a Chief Commissioner and calls for the services of a Government Veterinary Officer and of Inspectors.

The fullest powers are reserved (based on the Imperial Act) for the making of Orders dealing with all contingencies associated with the control of Contagious Animals Diseases by the State. Penalties are provided for breaches of the Law and of Orders made there-under.

Power to spend up to £10,000 on the Warrant of the Governor for the costs of administering the Law has been given.

DIVIDING FENCES LAW.

PREVIOUS to 1888, the laws on the subject of Dividing Fences were 15 Vic. c. 22 and Section 24 of 15 Vic. c. 11.

Law 14 of 1888 placed the matter on a more satisfactory basis. Section 3 of the Law enacts that "every occupier of land shall as between himself and the occupier of the adjoining land, be liable to bear one-half of the expenses of erecting and maintaining a sufficient dividing fence to separate their respective holdings," while Section 5 provides for giving notice by the one occupier to the adjoining one, for construction or repairs of the fences, and enables the former to have the work done if his neighbour refuses, and to recover half the cost of the work so done.

Section 10 enacts with certain provisos that "where the occupier of land is not the owner thereof, and is not as between himself and the owner bound by the terms of his tenancy to bear the expenses of erecting or repairing the fence dividing such land from the adjoining land, he shall, on being obliged to defray any such expense under the provisions of this Law, be entitled to recover the same from his landlord as money paid at his request, or to deduct the same from his rent as the same falls due."

CATTLE TRESPASS.

THIS matter is regulated by Law 13 of 1888, as amended by Law 14 of 1892, the provisions of which are briefly these: It is the duty of the proprietor of stock (including horse-kind, cattle, sheep, pigs, goats and poultry) to take proper and effective measures to prevent such stock from trespassing on the land of other persons and he is responsible in damages in respect of any injury done by such stock trespassing on the land of other persons provided that within 48 hours of the discovery of such injury the party aggrieved gives notice of the nature thereof to the proprietor or person in charge of the stock, and allows him and his valuers free ingress to the land. No person in occupation of any land abutting on a public road is entitled to recover any damages for trespass by stock being lawfully driven on such road under proper care and control, unless the land is secured by a fence sufficient to keep out ordinary stock of the class of animal committing the trespass. If in any action under this law the owner of the stock proves that his land is enclosed by good and sufficient fences and that he has adopted all reasonable and proper precautions for the confinement of his stock and that they have nevertheless through some accident beyond his control and which he could not reasonably have provided against, escaped from his land the party complaining will not be entitled to recover any sum unless he can show that he had fenced his land with a fence sufficient to keep out ordinary tame cattle and horsekind.

Any person who wilfully opens or leaves open any gate, or breaks down or injures

any fence or other contrivance provided for the purpose of confining any stock, with intent to allow such stock to trespass off the land on which the same is confined, is liable on conviction in a Resident Magistrate's Court, to imprisonment with or without hard labour for a period not exceeding twelve calendar months.

POUNDS.

In 1897 the old Pound Laws 15 Vic., chapter 11, 22 Vic., chapter 17, and sections 1 and 7 of Law 16 of 1872 were repealed and a new Pound Law, No. 19 of 1897 was passed.

It enacts that the control of all pounds be vested in the parochial board of the parish, and that charges shall be paid out of the General Purposes Fund to which all fees shall be paid in. Parochial boards to appoint keepers and make rules, with the approval of the Privy Council.

The owner of land may impound stock trespassing thereon. Animals to be impounded within 24 hours, unless a Sunday intervenes. The distrainer may claim seizure fees from the owner of any animal or from Pound keeper when pounded.

The Poundkeeper when owner of impounded stock is known must serve a notice on him and may claim a fee for doing so as also on delivering animal to owner, a fee may be charged and expenses of keep if kept over one day.

Animals are to be kept separate and must be fed.

A separate enclosure must be provided for animals suffering from disease, and such animals may be destroyed, on the order of a justice of the peace, and the carcass burned.

Sheep need only be advertised in the Gazette for two weeks and it is not necessary to advertise goats and pigs. A notice respecting the pounding of such animals must be posted at the pound and at the nearest constabulary station.

Animals may be sold with the consent of a justice of the peace after advertising the proposed sale. The title of a purchaser is secured under the Law. The owner of the animal so sold is entitled to the net proceeds of the sale if proving ownership within one month.

If proceeds do not cover expenses poundkeeper may recover from owner.

Goats, kids, hogs, pigs (or poultry—(Law 6 of 1904) may be killed by the person on whose land they may be trespassing—but notice must be immediately given to the owner of the animal, who may have the carcass, which he must remove within six hours or it may be buried, destroyed or removed by the owner of land.

Enticing an animal to trespass, in order to pound it, is an offence under the law. The parochial board is responsible for the death of animals dying from want of food or care, unless there is proof that there was no wilful act of neglect.

It is an offence to ill-treat or make use of pounded animals, or to rescue or attempt a rescue of pounded animals.

Animals are not to be impounded singly when there are more than one, to increase the expense to owner or the fees to the distrainer.

All actions under the Law must be commenced within three months of the cause of action. A penalty not exceeding £20 may be imposed where none has been specially provided for and may be recovered by summary process before a Resident Magistrate or two justices of the peace.

SCHEDULE II.

SEASONS AND PRICES FOR FRUITS, VEGETABLES AND OTHER

ECONOMIC PRODUCTS IN KINGSTON.

As there is a good deal of misapprehension with regard to the seasons for the various crops grown in Jamaica, and the duration of the season for each crop, the principal market in Kingston was visited by the late Mr. W. Harris, F.L.S., Superintendent of Public Gardens, once a week for some months for the purpose of noting the various products offered for sale, and the prices charged to consumers. These prices, which are revised from time to time, are at least one-third, and frequently three or four times higher than the prices paid by the retail dealers to the growers of the commodities enumerated. The prices noted for economic products such as ginger, annatta, &c., were those paid by a large exporting firm to the producers.

It will be readily understood that the seasons vary somewhat according to prevailing weather conditions and the prices also vary according to supply and demand. The prices of all commodities have fluctuated so much during recent years that those quoted are only approximately correct.

Approximate Seasons for fruits, vegetables and other products.

N.B.—The prices quoted are given as a rough guide to general value but are in no sense commercially accurate.

STEAM COMMUNICATION.

COMMUNICATION between Kingston and the outports of the island, and between the different outports, is maintained by two motor vessels, operated by the Royal Mail Steam Packet Company, a coastal steamer operated by the United Fruit Company, and by sailing vessels which trade regularly around the Island, bringing up Island produce to Kingston for transhipment by ocean steamers to Europe, Canada, the United States and other parts of the world, and taking down goods intended for merchants, traders and others at the outports which have been landed in Kingston by Ocean Steamers.

In addition to these coastal steamers and sailing vessels, the Royal Mail Co., United Fruit Co., Columbus Line and Aluminum Line frequently have cargo steamers which bring through freight from Great Britain, the United States and other parts of the world and land direct at certain outports.

Local freight from Kingston is sometimes taken by these vessels to the outports.

A three weekly mail service is maintained with the Cayman Islands by the M/S "Cimboco" of the Cayman Islands Motor Boat Co.

Communications with the Turks and Caicos Islands is infrequent and irregular and is conducted chiefly by sailing vessels with an occasional steamer of the Columbus Line calling there for salt for Canada, which takes mails and passengers from Kingston.

All facilities for bunkering steamers with coal and fuel oil can be obtained in Kingston.

Off Kingston there is good holding ground anchorage in from 6 to 8 fathoms off the town; the majority of vessels lay alongside the different wharves to discharge or take in cargo, the depth of water ranging from 12 to 36 feet.

Coals and provisions can be readily obtained in Kingston at reasonable market prices.

Ballast is obtained through the authorities at the General Penitentiary from the Quarry at Rock Fort. It is put on board vessels by convict labour, at a charge at the Quarry Wharf of 2/ a ton, and at Kingston of 3/6 a ton.

LIGHT HOUSES.

THE care and management of all light houses are by Law 8 of 1900, vested in the Director of Public Works.

Morant Point.—This light house is situated at the extreme east end of the island and carries a revolving white light, elevated 100 feet above high water which is visible at a distance of 21 miles at sea in clear weather.

The illuminating apparatus is a third order holophotal light, revolving once in eight minutes, and giving a flash every minute. This was erected in 1889, in place of the original apparatus.

The position of the light house is in latitude 17° 55' north, and longitude 76° 12' west.

Plumb Point.—This light house, built in the year 1853 stands on the Palisados, at Great Plumb Point, at the entrance to Kingston Harbour. The tower, 70 feet in height, is built of stone and cast iron and carries a third order dioptric light. The illuminating apparatus, is of the dissolved acetylene system and the character of the light is single flashing giving a flash of 1½ seconds duration followed by 7½ seconds darkness. It is arranged to show a white light over the entrance of the eastern navigable channel and a red light over the foul ground and the south channel for a distance of 12 miles. The white light is visible at a distance of about 20 miles in clear weather. The position of the light house is in latitude 17° 56' north, longitude 76° 47' 30" west.

Folly Point Port Antonio.—This light house was built under the powers of Law 17 of 1886. The tower is constructed of masonry and is fire proof throughout. The optical apparatus is dioptric of the fourth order shewing a flashing white light, which gives a flash of two seconds duration followed by 8 seconds darkness. The light is visible at 13 miles distance over an arc of 153°, the backward rays being reflected by a dioptric mirror. The illuminant used is compressed acetylene gas. The position of the light house is in latitude 18° 11' north, longitude 76° 27' west.

Negril Point.—A light house was erected at South Negril Point at the extreme western end of the island in July, 1895.

The tower is of concrete 66 feet high above ground, and the light is elevated 100 feet above sea level.

The apparatus is a second order dioptric, with a 5 wick burner, occulting, exhibiting the light for 57½ seconds, with periods of 2½ seconds of darkness intervening.

The position of the light house is in latitude 18° 15' north, longitude 78° 23' west.

Galina Point, (near Port Maria).—This light is situated on a concrete tower 44 feet above high water in approximately lat. 18° 25' north, and long. 76° 55' west, and is of the dissolved acetylene system giving a white flash of ½ second duration visible at a distance of 15 miles, followed by 5 seconds darkness.

Portland Point.—A new light house is being built on Portland Point, the extreme Southern end of the Island. It is expected this light will be put into operation during the year.

PART XIII.

ADMINISTRATIVE BODIES.

KINGSTON GAS WORKS.*

The receipts for the year ended the 31st March, 1929, were £15,828 9s. 4d. and the expenditure £13,130 1s. 10d., without the charges for interest, sinking fund of £1,012 14 3. The prices charged for gas, &c., are as follow:—

For each street lamp, per annum	£7 0 0
For gas consumed for illuminating purposes—per 1,000 cubic feet	0 10 0 less
15% discount for prompt payment for the first 20,000 cubic feet and 5% extra for any quantity in excess thereof.			
For coke, per ton	£3 5 0	For temper lime, per puncheon	£2 5 0
For tar, per gallon	0 1 0 retail.	For temper lime, per barrel	0 9 0

The introduction of incandescence gas lighting has effected a marked improvement in illuminating power, with a considerable reduction in consumption and consequent cost of lighting.

The New Roadway named Seymour Place through the Parade Gardens is lighted by means of sixteen "Rochester" incandescent gas lamps giving an aggregate of 6,300 candle power, a successful example of the latest development of incandescent gas lighting.

KINGSTON AND LIGUANEA WATER WORKS.†

THE City of Kingston and the plain of Liguanea are supplied with water from four sources, namely, the Hope River, the Wag Water, the Ferry River and the Hermitage Dam.

The Corporation constructed an impounding reservoir at Hermitage in the Wag Water Valley to hold 500 million gallons for the purpose of conserving the surplus flow in the river for use during periods of drought and for augmenting the existing supply to cope, with the rapidly increasing demand for water. The Dam which was opened on the 4th of May, 1927, is 142 feet high from lowest point of foundation to crest level, with a length of 700 feet approximately. The crest of the Dam is surmounted with a reinforced concrete gangway or footbridge giving access to the Valve Tower, the gangway having 31 spans each of 15 feet thus providing a spillway with a total length of 465 feet for the passage of flood water. The area of the impounded water extends to about 35 acres, the area draining to the reservoir being about 6 square miles. The Dam is situated about 12½ miles from Kingston at an elevation of 1,633 feet above sea level the highest point in the drainage area being 4,700 feet above sea level. In connection with these works a Hydro-electric Scheme is proposed to generate sufficient power to light the streets of Kingston and suburbs with electricity and to drive the pumping machinery at the Sewerage Pumping Station.

The city and suburbs are supplied with filtered water from Constant Spring and Hope and to render the filtration even more efficient the Corporation have increased their filtration area by the erection of Pressure Filters at Cavaliers of the continuous type, having an additional capacity of 3 million gallons per diem, and have installed chlorinating Plants at Constant Spring and Cavaliers.

The supply from all sources is on the constant and high pressure system, and the consumption by the town of Kingston and St. Andrew, amounts, on an average, to about 10,000,000 gallons in 24 hours, distributed to the ratepayers through 180 miles of connecting services. A meter system is being gradually developed and at present there are upwards of 100 water meters installed.

* For the history of the Gas Works, see the issue of the Handbook for 1926.

† For the history, see the Handbook for 1926.

The water supplied to Kingston is of excellent quality as shown by the following analysis by the Director of Agriculture and Island Chemist:—

KINGSTON LOAN BOARD.

Office: Public Buildings, Kingston.

THE Kingston Loan Board was constituted under the provisions of The Earthquake Loan Administration Law, 1907, for the purpose of making, administering and recovering loans out of the moneys raised under The Earthquake Loan Imperial Law, 1907.

The Board consists of eight persons, three of whom are appointed by the Governor, on the nomination of the Elected Members of the Legislative Council, and five appointed by the Governor together with the Chairman.

Loans under the Law could be made in the defined district of any parish for the purpose of restoring or repairing buildings damaged or destroyed by the earthquake of 14th January, 1907, or subsequent fire, or for erecting new buildings of substantial value in the district damaged by the earthquake or fire to an extent not exceeding the amount of such loss or damage. No person was precluded from obtaining a loan from the Board, because he had prior to applying for same, replaced or restored or erected the buildings on the premises in respect of which the application was made. All loans made by the Loan Board are secured on a first mortgage of the freehold in respect of which the same is made. The making of loans has ceased. The Board has power, however, to make a new loan on the realization of a security. Such loans are very few in number.

The defined districts under section 9 of the Law are:—

The whole of the parishes of Kingston, St. Andrew, Port Royal, St. Catherine, St. Thomas, Portland, and the Richmond District of the parish of St. Mary.

The loans are payable by annuities under the following scale.

AGRICULTURAL LOAN SOCIETIES BOARD.

Public Buildings, Kingston.

A LAW for the Encouragement of Agricultural Loan Societies was passed by the Legislative Council in 1912.

The Board framed rules under section 5, sub-section (1) for the control and superintendence of such Societies as may borrow from the funds placed at the disposal of the Board by the Legislative Council for the purpose of making loans. These rules were approved by the Governor in Privy Council on 15th October, 1912.

To meet the situation caused by the hurricane and drought of 1912, the Legislative Council passed Law 36 of 1912; and resolutions approving of advances over £200 being made by the Treasurer, on the recommendation of the Board, to owners and lessees of sugar works and plantations damaged or destroyed by the hurricane, as well as on cane crops on the ground.

Under Law 36 of 1912, Agricultural Loan Banks were used as the medium for distributing loans up to £200 to hurricane and drought sufferers. Under this head, the Board made loans amounting to £48,821.

It was necessary to frame new rules to meet the situation; and such rules were

approved by the Governor in Privy Council on 23rd January, 1913, rescinding those passed on 15th October, 1912.

Under the resolutions of the Council, the Government approved of loans, on the recommendation of the Board, as under:—

On cane crops on the ground	£ 2,500
To owners and lessees of sugar works and plantations	£14,910

On 23rd September, 1915, the Legislative Council allocated £2,500 for the purpose of making loans to repair damage done by the storm of August, 1915.

In October, 1916, Law 37 of 1916, was passed to enable the Board, through the Banks, to make loans up to £200 for the purpose of resuscitating cultivations damaged by the hurricane of August of that year. Funds were provided for the purpose as well as for making loans of over £200 on the same lines as in 1912 by the Government on the recommendation of the Board.

On account of the damage done by the hurricane of 23rd September, 1917, Law 24 of 1917 was passed on the same lines as Law 37 of 1916. Funds were provided for making loans under the new law of not over £200 to planters.

The following is a summary at 31st December, 1929, of the transactions of the Banks with the Board.

Total loans	£128,581 1 4
Repayments	113,668 13 10
Balance .. .	£14,912 7 6

The Land Settlement Scheme, started in 1920, whereby a Loan Bank is enabled to purchase a property for re-sale to small settlers has been taken up enthusiastically. Advances amounting to £56,641 3s. 11d. to nine Banks have been made under this head, and £34,059 19s. 8d. was repaid to 31.12.28.

The following are the lengths of the Main and Distribution Canals on the Milk River scheme now in use:—Main Canal, St Jago to Raymond's Reservoir 16m. 14c.; Branches 7m. 55c. Total 23m. 69c.

The water for the Cockpit scheme is derived from the Cockpit river, a never failing spring-fed river which issues from the Brazilletto hills near the 18th mile post on the road from Old Harbour to the Alley.

The present scheme utilises 5,000 cubic yards per hour, and is capable of being extended to over 10,000 cubic yards per hour.

The channels connecting the Cockpit river and the Irrigation channels formerly laid down for the purposes of supplying the various sugar estates in Eastern Vere, have a total length of about 7½ miles, and are divided into two portions, a low level canal and a high level canal. The low level channel, about 2½ miles long, extends from the Cockpit river to the pumping station where a pumping plant is erected.

SPANISH TOWN WATER WORKS.*

THE Rio Cobre Canal Commissioners, who were also the Spanish Town Water Commissioners, having been abolished, the Colonial Secretary of Jamaica, was by Law 23 of 1898, substituted for them. Within certain limits the water rate is compulsory under the new system. The prevailing minimum rate is 1s. per month, while formerly for an intermittent supply it was 5s. per month.

WATER RATES.

The following is the compulsory water rates within the prescribed limits:—

One shilling per month, and in addition thereto twopence for every £10 or fractional part thereof by which the value of any property as defined by Law 2 of 1904, shall exceed £40, provided that the rate payable shall in no case exceed sixteen shillings per month.

Inns, taverns, wholesale or retail spirit stores, laundries, livery stables, lodging houses, manufactories, or printing offices, or for any trade or business requiring water other than for domestic use; such additional rate shall be paid, as the Colonial Secretary shall specially declare.

These Water Works are under the management of the Director of Public Works.

Collector—The Collector of Taxes for St. Catherine.

Superintendent of Works—F. E. Taylor, salary £40 per annum.

OLD HARBOUR WATER WORKS.†

THE following is the scale of monthly rates for houses within the limits of the Old Harbour water supply district:—monthly in advance.

1. On all properties of the gross value of £40 and below a monthly rate of 2/.
2. 3d. for every additional £10 in gross value or fraction thereof per month.
3. The maximum rate to be collected from any one property for each single connection to be 20/ per month.

Linstead Water Works.‡

THE works were completed and came into operation in July, 1893, but rates were not collected until March, 1894. Several hydrants are laid in the streets of the town and a valuable supply of water is to be had in case of fire. The area in which the water pipes are laid is about 1½ miles in diameter. The supply is from two distinct streams, the one called the Berkshire Hall river and the other the Cistern gully.

The distance traversed in the laying of the mains is for the 4-inch pipes 2½ miles and for 6 inch pipes 6 miles. The source of the Berkshire Hall stream is 340 feet above Linstead, and that of the Cistern gully 540 feet. Linstead is now supplied by both streams.

The number of houses supplied at present is about 400, each having a ½ inch galvanized pipe, with stop cock.

An extension of the service was taken to the Wakefield district about 2½ miles from Linstead—

Viz: Service pipes completed 12th November, 1926.

Stand pipes completed 1st April, 1927.

Rates were fixed and came into effect 1st April, 1928. There are about 180 rate payers in this district.

The revenue derived from both Districts is about £640.

FALMOUTH WATER WORKS.

THE DORNOCH WATER SUPPLY SCHEME.

THIS scheme, commenced in January, 1925, is designed to give a domestic supply of Water to certain areas in Upper Trelawny. It consists of the utilization of certain falls on the Dornoch River at a point about three miles from its source where turbine-driven pumps raise water to a high level reservoir on the summit of Baron Hill, an elevation of about 900 ft. above the river. From this reservoir the water is distributed by gravity through some 13 miles of steel water mains serving the districts of Duncans, Clarks Town, Jackson Town and Kinloss. The work was completed in 1927.

MILK RIVER BATH.

THE mineral water of the Milk River Baths is one of the most remarkable of its kind in the world. The Baths are situated at the foot of the Round Hill in Vere, Clarendon, which is of limestone formation, and are about 50 yards from the edge of the Milk River and about two miles from the sea. The water, which is extremely saline, issues from a crevice in the rock direct into the baths through which it flows at a rate of 240 gallons per minute, or 345,600 gallons per day. The temperature of the water maintains a uniform 92 degs. Fah. throughout the year. Besides being rich in mineral salts it possesses a high radio-activity which renders it of the utmost therapeutic value, which is not surpassed by any mineral bath in the world. Gout, rheumatism, sciatica, lumbago, neuralgia, eczema, kidney and liver troubles are the complaints for which this water is specially recommended.

The Chemical analysis, made in 1923 by Mr. Barnett, is as follows:—

				Parts per 100,000.
Calcium	60.03
Magnesium	69.49
Sodium	784.77
Sulphate	189.30
Bicarbonate	10.06
Silica	1.20
Chloride	1375.00
Total	2489.85

Besides traces of Potassium, Lithium, Iodine and Bromine. Radio-activity equal to 160.2 x 10-10 curies per litre, or 43.25 Mache units.

There is a Telephone Office at the Baths. All the lodging houses are screened against mosquitoes. The following charges are made: weekly rate for boarding for one person, £4 4s. 0d., and for two persons, £8 including bath. For each bath taken by a visitor, 1/. Bath disconnected from main building, 6d. Boarding 10/ per day.

The river from the Bath to the sea is two miles; it abounds in fish, and the scenery is very picturesque. Pleasure boats are kept by the Directors for the use of visitors at a charge of 1/- per hour or fractional part thereof. There is fine tarpon fishing. The buildings of the Bath have been renovated, and the main building has been thoroughly overhauled and modernised, and an annex has been added to same. The distance from May Pen Station to the Bath is 13½ miles, and the fares (for conveyance) are, for 1 person 14/-, for 2, 16/- by motor car, or about 9d. per mile each way.

It will be found to the greater convenience of visitors to take a motor car at May Pen Station. Motor cars may be also obtained at Milk River. From Clarendon Park to the Bath, the fares are, for 1 person, 15/-, for 2, 20/.

Vehicles are run from Milk River to Clarendon Park Railway Station and also to May Pen Station.

BOARD OF MANAGEMENT—The Custos of the parish (*Ex-officio Chairman*), the Superintending Medical Officer, the Director of Public Works, the Hon. Member for the parish. *Three Members nominated by the Parochial Board*—W. F. March, W. E. C. Buchanan, I. B. Fox. *Secretary & Manager*—Arthur Linton, Milk River P.O.; *Matron*—Mrs. M. Weise, Milk River P.O.

BATH OF ST. THOMAS THE APOSTLE.

THESE waters are of special value in rheumatic and kindred ailments. Tradition asserts that they were discovered by a negro who in his own person found their efficacy.

The legislature of the day granted £1,250 currency (equal to £750 sterling) to purchase the springs and 1,130 acres of land surrounding them. Directors were appointed as early

as 1703, and were empowered to make a road, erect buildings and provide necessities for patients. In 1749 the Directors were empowered to dispose of part of the land and to form a town, and the town of Bath thus sprung into existence; it was for many years the resort of the *elite* of Jamaica Society. Dr. Dancer, the Island Botanist, was in charge of both bath and garden at the close of the 18th century.

The Government having disallowed the vote for the upkeep of the garden, the Corporation has taken it over. The Jamaica Agricultural Society now uses it for a cocoa nursery. The acreage of land now in possession of the Corporation is 179 $\frac{3}{4}$ acres.

The thermal springs at Bath issue from rocks of an igneous character above the level of the Sulphur River in a gorge about one and a half miles from the town of Bath. The waters are conducted through covered channels into a storage tank, known as the "Kettle," where it has a temperature of 122 degs. Fah. The water is drawn off through pipes as required for use in the baths where the temperature is reduced to a suitable degree by water which is obtained from a cold mineral spring. The waters are of special value in rheumatic and kindred ailments and especially for the treatment of skin diseases.

The Chemical analysis taken by Mr. W. I. Barnett, B.Sc., Deputy Island Chemist, in 1923, is as follows:—

			Parts per 100,000.	Parts per 100,000.

JAMAICA CIVIL SERVICE MUTUAL GUARANTEE ASSOCIATION.*

THE Jamaica Civil Service Mutual Guarantee Association was established under the law of 1872; it is recognized by the Government thereunder; and is managed by a committee of four public officers, none of them being of a lower rank than chief clerk. The appointment of two managers is vested in the Governor and they hold office during his Excellency's pleasure; the other two are elected by the associates for a term of three consecutive years.

Any civil servant of the Crown who has obtained the Governor's permission to give security in the shape of the guarantee of the Association, and who has expressed his willingness to be bound by its rules is eligible for membership, and the managers are required to give full and fair consideration within a reasonable time to all applications, deciding whether they will accede to them or not and communicating the result forthwith to the applicant and the government. When an associate has been admitted to membership he can withdraw only by obtaining the Governor's permission and giving the managers twelve months' notice, but by giving one month's notice the managers can exclude any associate from further membership.

Immediately on his acceptance and the guarantee of his fidelity being given an associate becomes liable to contribute, and is required to contribute by way of loan, a sum not exceeding 5 per cent. of the amount of his bond, payable monthly at the rate of one per cent. per annum for a period of five years. The managers, however, have the power to call upon the associates to contribute a further loan at one fixed rate per cent., when they are of opinion that the ordinary loans are insufficient to yield the income required to carry on the business; there has never been any necessity to do this. On the contrary the interest accruing on the subscribed loans has so accumulated as to induce the managers during the year 1886 so to amend the rules of the Association, as to allow its division every third year among associates whose bonds are then in full force and effect, and in terms of this amendment a sum of £6,639 16s. 5d. has been written up to credit of associates.

On the withdrawal from the Association an associate is entitled to a refund of the full amount of his contributions and share of profits, if the Association has incurred no losses during his membership, or to the proportion remaining to his credit after the losses have been provided for.

The rules of the Association were first approved by the Governor in Privy Council on the 27th August, 1872, and the preliminary arrangements being completed guarantees were issued on the 1st October in that year. From that date to the 31st March, 1928, a period of nearly fifty-six years, losses by the defalcations of associates incurred to the amount of £3,910 4s. 4d.

The loans of associates are levied at the Public Treasury from time to time as they become due and placed to the credit of the Managers, who are required to invest the amount in island debentures or deposit it in the Government Savings Bank. The assets of the Association on 31st March, 1929, amounted to £11,575 11s. 8d., namely, Island Debentures and Inscribed Stock £9,132 7s. 6d.; War Loan £1,235; Jamaica 5% Inscribed Stock £500, Government Savings Bank £26 5s. 6d., Treasury £681 18s. 8d. But however satisfactory the financial position of the Association may be, a review of the transactions of the period presents a more gratifying feature in the testimony it bears to the completeness of the supervision and audit of accounts and to the integrity of the officers employed in the collection and disbursement of public moneys. When it is considered that this Association guaranteed more than nine-tenths of the public officers required to give security, and included in that number the whole of the officers charged with the collection of the excise, customs and internal revenue, all the Parochial Treasurers through whom local disbursements are made and many other disbursing officers, no stronger evidence can be adduced of the integrity of the public officers of the colony than the fact that the losses of the Association for a period of upwards of fifty-six years have been under £80 per annum.

The office is at the Collector-General's Office, Kingston.

PART XIV.

BENEVOLENT AND TRUST FUNDS AND INSTITUTIONS.

RECTORS FUND.

THE Jamaica Rectors Fund was established in 1797. It was intended to provide annuities for the widows and orphans of the then clergy of the island. The capital on the 31st March, 1930 was £9,106 5s. 2d. on which the Treasury pays six per cent. under the authority of Law. By a legislative enactment, Law 14 of 1882, the Government has guaranteed the pensions at the full rates of £52 a year to widows and £26 and £17 6s. 8d. a year to orphans of each class respectively, as a set-off to the claims of the trustees in regard to lapsed rectories. After receiving a report on the condition of the fund by the actuary, the trustees, with the sanction of the Government, have, since 1st April, 1923, paid the following rates:—widows, £72; first class orphans, £46 a year. The Act further constitutes the Incorporated Lay Body of the Church of England in Jamaica, the residuary legatee of the Rectors' Fund.

Sons cease to receive the benefits of the fund at 18 years of age; daughters receive their annuities till marriage or death. The annuities paid by the Fund in 1929-1930, amounted to £335 1s. 0d. The Trustees are the members of the Diocesan Financial Board for the time being.

Secretary—R. Foster.

ISLAND CURATES FUND.

THE Jamaica Island Curates Fund was established in 1844 by an act of the legislature. It is intended for the benefit of widows and children of deceased island and other curates. The amount of twenty-five pounds four shillings a year was deducted by the Public Treasurer from the stipend of each island curate and credited to the account of the fund. The capital on 31st March, 1930, was £22,102 8s. 0d. This existing capital will be gradually reduced by payment of annuities as there are now no remaining subscribers. The allowances to widows are at the rate of eighty-three pounds per annum and to children £53 per annum, having been raised to these amounts on the advice of the Actuary, as the result of his valuation of the Fund as it stood on March 31st, 1929. Sons ceased to receive the benefits of the fund when they come of age. Daughters continue to receive their annuities till marriage or death. The annuities paid by the Fund in 1929-1930, amounted to £1,674 19s. 4d. Under the provisions of the law, and subject to the advice of the actuary, the fund is managed by a Board consisting of the members of the Diocesan Financial Board for the time being. *Secretary*—Venerable Archdeacon Simms, M.A.

WIDOWS AND ORPHANS OF CLERGYMEN OF THE DISESTABLISHED CHURCH.

THIS fund provides pensions for the widows and orphans of deceased clergymen of the disestablished church of Jamaica.

It is maintained by abatements at the rate of four per cent. from the salaries of the clergymen; by amounts received as offertories from the churches for the purposes of this fund, by donations and bequests of property or money from societies, institutions, or individuals, and by the proceeds of insurances or other investments.

The pensions are thus regulated: On the death of an associate leaving a widow and children by such widow only, his widow receives a pension according to the actuarial table attached to the Canon regulating the fund, with any bonus additions that may have been declared at valuations of the fund, and on her marriage or death the amount is divided among the orphans of such associate in the following proportions:—If three in number or less each receives one-fourth of the amount to which the widow was entitled, but if more than three the pension is equally divided between them. If the clergyman dies leaving orphans but not a widow, the amount to which his wife would have been entitled had she survived him is divided among the orphans in the proportions above stated. If a clergyman dies leaving a widow and also children by a previous wife entitled to pensions the total pension is divided on fixed principles laid down in the Canon. The pensions of boys cease at the age of eighteen, and of girls on marriage or at the age of twenty-one.

From the amount received as offertories the Financial Board may make such monthly or other grants to the widows and orphans of clergy (whether they were associates or not) as to the Board may seem necessary.

On the formation of the Fund in January, 1881, 37 of the then non-state-paid clergymen became associates. It being compulsory "on every future clergyman of the Diocese to contribute to the fund," all the Clergymen who have since been ordained have been enrolled. With a few exceptions, which the Bishop, with the concurrence of the Diocesan Council and Financial Board has considered might be properly made. The result was a membership of 97 on the 31st December, 1929. A Canon was passed by the Synod of 1890 requiring medical examination in the cases of future associates. Of the number of clergymen who became associates 35 have died, three as bachelors and thirty-one leaving widows and children. Nineteen widows are at present on the Fund.

The abatements from salaries during the year, 1929, amounted to £336 15s. 6d., the interest on the money invested yielded £632 1s. 0d., a grant from the Guarantee Fund in aid of interest £316 0s. 5d.; and the Interest on Ice Shares £2 8s. 0d. The expenditure included £35 3s. 0d. for Insurance Premiums, £916 14s. 0d. for Annuities. Medical fees £2 2s. 0d., Preparing papers for Actuary £14 4s. 0d., Printing 15s. 0d., leaving a balance on Dec. 31st., 1929, of £16,004 9s. 0d. to the credit of the Fund.

The lives of 6 clergymen are insured for £150 each in the Jamaica Mutual, and 1 in the Standard Assurance Company, on account of the Fund. The value of these policies is an asset of the Fund in addition to the cash balance just mentioned, as is also a balance of £4,251 18s. 3d. on Guarantee Account.

Four churches contributed to the Voluntary Fund during the year 1929, giving a total of £18 18s. 0d.

From this Fund £20 was given to the widows of deceased clergymen, and there is a credit balance of £34 2s. 5d.

A valuation of the Fund as it stood on December 31st, 1928, showed a surplus of assets over liabilities of £1,882, of which £1,286 was allocated in making additions to some existing and all prospective pensions.

The Financial Board is required to invest all moneys and property received on behalf of the Fund and to manage its general affairs. The details of management are left to a Committee of the Board.

According to Law 14 of 1882, the Widows and Orphans branch of the Fund has been made the residuary legatee of the Rectors and Curates Funds of the late Established Church in Jamaica.

COMMITTEE OF MANAGEMENT—The Rt. Rev. the Lord Bishop of Jamaica, the Ven. Archdeacon Simms, M.A., J. M. Nethersole. *Honorary Secretary*—Ven. Archdeacon Simms, Ropley, Gordon Town P.O.

PENSION AND ANNUITY FUNDS FOR CLERGYMEN OF THE DISESTABLISHED CHURCH.

THE Pension Fund provides for the pensioning of superannuated clergymen of the disestablished church. Its resources consist of an annual contribution from the Diocesan Expenses Fund of the Diocese of not less than three hundred pounds; and of donations, bequests, and collections made specially for this branch of the fund.

A clergyman on reaching 65 years of age may claim a retiring pension; and any clergyman who by a joint resolution of the Bishop, the Diocesan Council and the Financial Board may be declared superannuated (whether at, before, or after sixty-five years of age) may claim a retiring allowance. The pension is for the present fixed at the rate of £1 10s. paid from this Fund for each year of continuous service; which is raised to £2 by a grant from the Diocesan Expenses Fund, but no pension can exceed £60.

No pension can be paid for less than ten years continuous service; but any clergyman who may be compelled to retire before he has completed that period may be paid a gratuity not exceeding five pounds for each year of service. There were eight pensioners on the roll on January 1st, 1930.

The Fund opened the year 1929 with a credit of £8,431 11s. 5d. This, with a grant of £200 from the Diocesan Expenses Fund and £521 2s. 6d. for interest and £3 8s. 0d. from Synod Offertories, gives a total of £9,246 1s. 11d. Pensions amounting to £470 3s. 0d. have been paid leaving £8,795 18s. 11d. as the balance of the Fund at the end of the year 1929.

The Synod in 1926 by resolution created an Annuity Fund in order to provide an addition to the small pensions granted from the Pension Fund. The Fund is

provided by a fixed annual payment of £4 compulsory on all Clergy, present and future of the Diocese except those who may be exempted on the ground of age or for other sufficient reason.

The rate of annuity for those that may begin before the first valuation of the Fund has been fixed on the advice of the Actuary; but may be increased or diminished in the case of those that may begin during each future quinquennial period on the advice of the Actuary given in accordance with his valuation of the Fund. The receipts during 1929 have been £276 Os. 0d. from payments by the Clergy and £61 12s. 6d. for interest. One clergyman became an annuitant on the Fund during the year but died shortly after receiving only 8s. 9d. The balance of the Fund on December 31st, 1929, was £1,247 1s. 10d. The Clergy Pension and Annuities Fund as they stood on Dec. 31st 1929, will be submitted to the Actuary during the present year for valuation and advice.

The Fund is managed by the same Committee of the Financial Board as the Widows and Orphans' Fund.

FLETCHER'S TRUST, KINGSTON.

MARTHA BELLINGER FLETCHER, by her will dated 15th July, 1847, devised and bequeathed her real and personal estate to the Hon. Hector Mitchell and Thomas B. Wiltshire upon trust to manage and rent out the same, and with power to sell and invest and apply the clear yearly revenue among such of the blind, poor and destitute of Kingston as should be recommended to the trustees by the ministers of the churches or places of worship to which they may belong. Hector Mitchell and Thomas Wiltshire proved the will and sold all the personal and certain portions of the real estate.

On the 27th May, 1853, Mitchell died, leaving Wiltshire surviving. By instrument made between Thomas Wiltshire of the first part, Rev. D. H. Campbell, Rev. W. West and Rev. D. J. East of the second part, and the churchwardens of Kingston of the third part, the churchwardens were appointed trustees in the room of Hector Mitchell and Thomas Wiltshire. It appears that Wiltshire never interfered with the management of the estate.

On the death of Mitchell his creditors filed a suit in Chancery against his estate, and the churchwardens of Kingston on their appointment as trustees of Fletcher's Trust filed a petition in the suit for recovery of the sum of £314 2s. 1d. which was in his hands at the time of his death. The result of this petition was that the sum of £187 19s. 3d. was recovered as the *pro rata* proportion of the debt which was due to the trust.

The sum received, less solicitor's costs, namely, £130 Os. 0d., was by direction of the Chancellor paid into the Treasury and thereafter drawn out on the receipt of the churchwardens (Dr. C. Campbell and Mr. C. Goldie) and lodged to the credit of an account called "Fletcher's Trust" in the Government Savings Bank, where it remained until 1912 when it was invested in Local Inscribed Stock yielding 3½%. This Trust is now administered by the Kingston and St. Andrew Corporation.

SARAH MORRIS TRUST, KINGSTON AND ST. ANDREW.

THIS trust arose out of a legacy of a Miss Sarah Morris of Kingston, whose will was proved on the 22nd of December, 1809, in which after making several bequests, she bequeathed all the rest, residue and remainder of her estate, both real and personal, to be sold and invested, and the proceeds to arise therefrom, at interest, to be distributed from time to time unto and among the poor of the parishes of Kingston and St. Andrew, who receive the pay or bounty of the said parishes, in proportion to the number of the poor of the said parishes."

The money of the trust is invested in Island Debentures and in Local Inscribed Stock the total sum so invested being £2,150. The interest is divided between the parishes of Kingston and St. Andrew, in proportion to their total pauper expenditure. Out of the sum received by Kingston, the Kingston and St. Andrew Corporation distributes annually during the Christmas season small doles to the poor in addition to their usual allowances. In view of the large amount of credit applicable to the Kingston poor from this trust, the City Council gave during the Jubilee holidays a substantial dinner to the in-door poor as well as an extra allowance of money and clothing to the out-door poor.

D'ESPINOSE BEQUEST.

CHARLES D'ESPINOSE, formerly a merchant in the city of Kingston, who died in Paris on the 7th of April, 1875, by his will dated 7th June, 1867, bequeathed the sum of one thousand pounds "in aid of any fund or establishment that may be formed for the relief

of the destitute poor of Kingston." To this will there was a codicil, dated the 25th May, 1872, declaring that this legacy should be increased to £2,000, "subject to the conditions and control already stated in the will."

In the absence of any fund or establishment which could be considered in keeping with the testator's intention, the executors and executor of D'Espinose's will in 1882 proposed to the City Council of Kingston that the money should be invested for the benefit of the City Dispensary, with the Bishop of Jamaica and the Vicar Apostolic of the Roman Catholic Church, as Trustees, and the Board approved of this appropriation of the bequest.

WOOD'S BEQUEST, KINGSTON.

R. T. Wood, bequeathed in 1879 a sum of £1,900 in Island Debentures to the City Council of Kingston, the interest to be distributed amongst the poor of Kingston. The interest is distributed annually at New Year, by the Kingston and St. Andrew Corporation.

GREGORY'S CHARITY, SPANISH TOWN.

MATTHEW GREGORY, Doctor of Medicine (who died 31st December, 1779, aged 86) by deed, dated 22nd March, 1765, conveyed certain property in trust, the proceeds of which and profits arising therefrom were to be applied towards relieving any distressed persons in or from any part of the colony, coming to St. Jago de la Vega, to bind out poor children to trades, and to portion orphan girls at marriage. By Law 34 of George III the trustees are the Chief Justice of the Island, the Custos of St. Catherine and the clergyman for the time being in charge of the Cathedral, Spanish Town; the last-named of whom has the administration of the fund, the annual income of which is £144 (vide 28 Vic., Cap. 23). 42 distressed persons receive help.

FLETCHER'S CHARITY, SPANISH TOWN.

In March, 1714, George Fletcher by will bequeathed, after sundry intermediate devises to the churchwardens and vestrymen of St. Catherine all his real estate to be applied to the use of three poor widows of the parish of St. Catherine, to be selected from time to time by the said churchwardens and vestrymen.

The real estate consisted of 800 acres of land in St. Elizabeth, 227 acres near Highgate, St. Catherine, a pen near the Angels, and a house in Spanish Town in which the widows were to reside. All the property has since been sold.

The moneys derived from the sales were appropriated to the use of the parish, part having been expended in the building of a House of Correction, now the District Prisons.

The annual value of the trust property after the final sale of the lands was set down at £91 4s.

In 1847 the Act 10 Vic., cap. 45 was passed, which authorised the justices and vestry to raise a sum for the payment of the annuities as an item of parochial expenditure, but there is no record of any rate having been levied for this purpose, although provision was made for the widows' pensions each year in the parochial estimates.

By the Act 21 Vic. cap. 44 the power of the parishes to raise taxes was abolished and the liabilities of all the parishes were assumed by the Government. Since then provision has been made for the payment of the pensions at the rate of £30 8s. per annum out of general revenue.

Three ladies of Spanish Town are now receiving under the trust the pensions awarded by the Parochial Board of St. Catherine, fixed by the law.

GRAY'S CHARITY, ST. MARY.

On the 10th of May, 1854, John William Gray, of the parish of Saint Mary, merchant made a will, in which he directed that after his death a sum of £5,000 should be paid by his executors into the hands of the Governor of Jamaica for the time being, "to be by him appropriated for the use and benefit of the respectable poor of the parish of Saint Mary in the establishment of a poor house for the exclusive benefit of the respectable poor of the parish of Saint Mary, to be established and secured by legislative enactment in the manner he, the Governor, may deem best, so that it may be of lasting advantage."

Gray died in 1854, one month after making his will. Owing to delay in realizing the estate the bequest of £5,000 was not paid over to the Governor until the year 1863, when it was invested in the Island Securities.

Some correspondence thereafter ensued between the executors and the Government as to the best means of carrying out the wishes of the testator, but, with the exception of its having been arranged that Fort Haldane, at Port Maria, which was transferred to the Jamaica Government by the Secretary of State for War under the provisions of the Act 25 Vic. Cap. 4 should be sold to the Charity for the purposes of a poor house for the sum of £250, no practical step was taken in connection with the bequest until July, 1872, when Law 42 of 1872, "A Law to establish and secure Gray's Charity, and to authorise the Governor to appoint Trustees for the management thereof," was passed. By this time the bequest had increased by accumulation of interest to the sum of £8,056 14s. 6d. The Governor, Sir John Peter Grant, under this Law, appointed as trustees the Auditor General, the Custos of Saint Mary and the Inspector-General of Police.

Matters dragged on—still without any benefits conferred by the Charity—until July, 1877, when rules for the management of the Charity were passed by the Governor in Privy Council, under the 6th section of Law 42 of 1872. These rules provide, *inter alia*, that fourteen inmates should be admitted to the poor house, who were to receive a weekly allowance of 8s., with water and furniture, but were to provide their own food. These rules further regulated the expenditure on account of the institution, the duties of the clerk and matron, and the arrangements for quarterly meetings of the trustees.

It does not appear that any inmates were received into the Charity until the 15th of August, 1880; but since that date a home has been found in the Charity for twelve suitable persons. The total amount of the funds of the Charity is, Jamaica 4% Debentures, £2,400; Jamaica 4% Inscribed Stock, £8,376; Jamaica 4% Local Inscribed Stock, £3,700; Vere Irrigation Cockpit Scheme, 4½% Debentures, £402; War Loan Stock, 5%, £760; National War Bonds at 5%, £500; Jamaica Loan Inscribed Stock, 1942–1972 at 4½%, £500, Deposit in Government Savings Bank £106 15s. 8d.—Total, £16,743 15s. 8d.

NIGHT REFUGE AND PAROCHIAL DISPENSARY.

THE Building at No. 3 Hanover Street used as a Night Refuge and Parochial Dispensary was destroyed on 14th January, 1907. The temporary office of the Inspector of Poor is at the old Wolmer's School, the entrance being from Church Street or Temple Lane. The Dispensary is at 86 Hanover Street. JAMAICA MASONIC BENEVOLENCE.

THE purposes of this institution are the relief of necessitous and impoverished members of the masonic order, their widows, orphans or other dependent relatives, by weekly, monthly, or yearly allowances, by donations; by the granting to them of clothing, food or implements of workmanship; by providing education for their children; by aiding in their passage from the island; or by such other charitable means as may come within the scope and objects of the association.

The funds are raised by voluntary donations and by annual subscriptions from lodges and chapters and from individual masons and others; and include collections made at masonic banquets and the proceeds of concerts, bazaars, dramatic and other entertainments.

Every mason subscribing 10s. or more per annum is entitled to vote for the members of the board of directors and to all the other privileges of membership.

Particulars in this regard are only furnished confidentially to individual subscribers or to subscribing lodges on application to the Treasurer. The D'Espinose bequest of £2,000, which yields £80 per annum, enables the Dispensary to render aid to 75 free recipients, nominated by the trustees of the Trust. Further, from the growing resources of the institution provision is now made for the attendance of a qualified nurse in cases of confinement; the nurse holds an order to summon the medical officer if complications arise.

The nurses now employed hold certificates from the Jubilee Lying-in-Hospital.

The building completed in 1895 was wrecked in the earthquake of January, 1907. It was rebuilt at a cost of £869 15s. 6d. towards which a grant of £500 was made by the Assistance Committee.

KINGSTON SAILORS HOME,

42 Church Street, Kingston.

THIS Institution was founded in 1864 through the exertions of the Rev. George Cheyne with the co-operation of other philanthropists.

The Institution was maintained by annual subscriptions from the merchants and other leading members of the community, and for some years prospered. But in the year 1879 it was found that, while the contributions received were inadequate for the efficient support of the Home there were no means of preventing defalcations on the part of dishonest inmates, and an appeal was made to the Government for aid. A law was thereupon passed by the Legislative Council, Law 30 of 1879, placing the Institution on a more substantial footing than before. A corporate body was established for the management of the Institution and the office of superintendent was created with definite powers. The principle on which government grants were to be made was laid down to be that of a sum equal to double the total amount of voluntary subscriptions received during the previous year. Since then the Institution has annually received a liberal grant from the government. The section of the law providing for the government grant, has been amended by Law 32 of 1906, to read as follows—"or such less sum as the Governor may think necessary or desirable for the carrying on of the Home in a proper and efficient manner."

In the year 1883 the directors succeeded in providing better accommodation for the

inmates. Having purchased a site in Church Street they erected thereon suitable buildings at a cost of £1,065, and the same were formally opened by the Governor Sir H. W. Norman on Thursday, the 6th March, 1884. The building was destroyed by the earthquake of 1907, but was rebuilt in 1908 and was re-opened for use in January, 1909, by Sir Sydney Olivier.

Subscribers to the Home, subject to the discretion of the Managing Director, may recommend any destitute seaman holding a good conduct certificate for free board and lodging at the Home.

SAILORS REST AND READING ROOM,

18 Duke Street, Kingston..

This Institution was founded by the late Mrs. Denniston in 1898, to give sailors visiting the port a pleasant room in which to sit, read papers and books, play games and have music and write letters home. Cool drinks, cigars and cigarettes, tea, breakfast, dinner, lunch and supper are provided at reasonable rates. Soldiers are also made welcome.

This Institution was taken over by the British Sailors Society after Mrs. Denniston's death in 1917. A Sailors Brotherhood has been organized: the object being to uplift seamen physically, morally and spiritually.

Clean and comfortable beds are provided for any mercantile marine, naval men or soldiers having night liberty.

During 1919 the Rest was thoroughly renovated, and there are now fifty beds available, and with mattresses on the floor 100 men have been accommodated.

SOLDIERS HOME.

This Home, in Brentford Road, Cross Roads, was opened by Lady Stubbs in November 1929. The possibility of its establishment was brought about through a ready response, by friends in the United Kingdom to a S.O.S.—Save Our Soldiers—published in the August issue of the "Forward," a magazine published for the Soldiers, in connection with the Sandes' Homes.

The aim of the Home is to have a wholesome christian atmosphere prevailing it which shall result in developing nobleness of character in all who patronise it, by providing healthy recreation, literature and refreshment, so that it may prove to the men of European Troops stationed here a real "Home away from Home."

In September Miss Vaughan forwarded nearly £300 to Mrs. McHardy asking that a suitable place be secured and equipped by the time the 1st West Yorkshire Regiment arrived here.

KINGSTON CHARITY ORGANIZATION SOCIETY.

THE objects of the Society are the Charitable Relief and the general welfare of the Poor of Kingston and the adjacent parts of the parish of St. Andrew. It will seek:

1. To bring into harmonious co-operation with each other and the Poor Law Authorities, the various charitable agencies and individuals in the district, and thus to check the evils of overlapping relief caused by simultaneous but independent action.
2. To investigate thoroughly the cases of all applicants for charitable relief, and to secure from the proper charities, or from charitable individuals suitable and adequate relief for deserving cases.
3. To assist from its funds all suitable cases in which temporary aid will tend to permanent advantage, and for which adequate assistance cannot be obtained from other sources. This assistance may (when possible and desirable) take the form of loans, or gifts of money for the individuals needing it.
4. To repress mendacity by the above-named means, by the distribution of investigation tickets, and by dealing with cases of imposture.
5. To inculcate habits of prudence, self-reliance and thrift on the part of those who are aided.
6. To promote the establishment of subsidiary efforts, dealing with such matters as
 - (a) Free Registry of all classes of labour; (b) Provision of food for hungry persons; (c) The proper housing of the Poor (d) Assisting moneyless people to return home; (e) The establishment of suitable industries to supply work for the poor, including market-gardening or any other light agricultural work.

LADY MUSGRAVE WOMEN'S SELF-HELP SOCIETY.

THE Women's Self-Help Society was founded by the late Lady Musgrave, and formally opened as a depository by Dr. Nuttall, (late Archbishop of the West Indies) on 1st November, 1879. During these years it has successfully carried out its objects, viz.: the

DD

development of some of the specially feminine industries of the island (thereby fostering self-help), and that of providing employment for poor needle-women.

At the sale rooms of the society, there is a large assortment of Jamaica curiosities, baskets, jippi-jappa hats, drawn thread work, embroidery, as well as native jams and pickles. An attractive show of antiques, in silver, brass and Sheffield plate will also be found.

The premises at 8 Church Street, opened in 1890, were built in memory of Mrs. Charles and Mrs. Duncan Campbell, who were associated with Lady Musgrave in the foundation of the Society, and by their untiring labours, aided in placing it in its present position of success and efficiency. These premises were destroyed in the earthquake and fire, but through the courtesy of the Mayor and Council of Kingston who gave rooms in the Council building, the society's work was continued. A new building was erected in 1911 at the corner of Duke and Harbour Streets.

The Society is self-supporting, and has done so well in the past year, that they have been able to keep up their charities without the annual subscriptions formerly paid by the members of the committee. Depositors are charged 2s. in the £ commission on articles sold.

JAMAICA PERMANENT BUILDING SOCIETY.

Office, 133 Tower Street, Kingston.

THIS Society, formed in the year 1878, was incorporated in 1906. The attractive feature of the Society is its "Proprietary Shares" which ensures a permanent fund of £14,530 as a special security to depositors, subscribing members and borrowers.

New rules passed in October, 1917, make provision ensuring bonuses of £3 and £2 per share, respectively, to borrowers on matured 10 year and 7 year advanced shares. Loans are made at $7\frac{1}{2}$ per cent. interest; repayable by £20 shares to mature in 4, 7 or 10 years at $\frac{7}{6}$, $\frac{4}{6}$ and $\frac{2}{6}$ respectively, and interest $\frac{2}{6}$ per month on each £20 advanced or loaned.

The amount of loans to the end of the year, 1928, was £80,679 2s. 5d., and the sum of the subscription shares to the credit of members was £30,768 15s. 9d.; deposits at 5% per annum, £28,599 4s. 7d.; interest payable half-yearly. Funds are always available for making loans on security of approved freeholds to non-members as well as members of the Society.

THE JAMAICA MUTUAL LIFE ASSURANCE SOCIETY.

At the close of the year 1843, W. Wemyss Anderson (a founder of the Society) Alexander Barclay, Edward Jordon, James Davidson, John Samuel Brown, Henry Franklyn and John B. Purrier, met for the purpose of forming a Life Assurance Society in Jamaica for the encouragement of systematic thrift and providence on a co-operative basis among the people of Jamaica. Having arranged the necessary preliminaries a public meeting was held at the Kingston Court House on the 26th January, 1844, when it was agreed that "The Jamaica Mutual Life Assurance Society be now formed." Application was then made to the House of Assembly for the necessary Law of incorporation and the draft Bill was referred to a Committee of the House.

On the passing of the Law a Board of Directors consisting of the gentlemen first named with Alexander Barclay as Chairman, was appointed, and the first Policy was issued, on the 1st May, 1844. To the end of that year 53 policies were issued, assuring £31,450.

The Society commenced business without capital—not a shilling! Provision was made that should any policy become a claim by death before the Society's Funds had reached the amount, interest should be paid to the claimant and the claim should be a first charge on the funds; this arrangement was never resorted to as the necessity never arose.

The success of the Society during the past eighty-six years has been remarkable; it has experienced uninterrupted prosperity, and this is strikingly demonstrated by the fact that in no instance have the Directors found it necessary to disturb the investments in order to meet any claims made on the Society. It has also always declared a bonus every three years. The early supporters and subsequent upholders can with

pleasurable pride refer not only to the prosperity that has attended the Society, but to the substantial benefits conferred on the families of the deceased Assurers; and it is with no little gratification that the Directors have been able to announce that the operations of the Society in 1921, reached over one and a half million sterling.

Security—Every three years a complete investigation of the Society's financial position is made by a qualified Actuary including a Valuation of liabilities, and the surplus is divided among the policy-holders.

Protection—Policies are protected in case of non-payment of premiums so long as the indebtedness does not exceed the cash surrender value.

Investment—The Bonuses paid compared favourably with those of the best Offices in the world.

DIRECTORS—Col. A. H. Pinnock, *v.d.*, *Chairman*; Hon. Leonard deCordova, *Deputy Chairman*; T. N. Aguilar, A. H. D'Costa, L. P. Downer, Hon. Sir Wm. Morrison, J. H. Philipps, F. M. Kerr-Jarrett.

VICTORIA MUTUAL BUILDING SOCIETY.

THIS, the second Building Society formed in Kingston, was established on the 1st December, 1878, under the patronage of Sir Anthony Musgrave, then Governor of the Island, and under the authority of "The Benefit Building Societies Act, 1855," and was incorporated December, 1898, under "The Building Societies Amendment Law, 1897."

The object for which the Victoria Mutual Building exists are twofold. Firstly, to provide for shareholders and depositors a perfectly sound and profitable investment for large or small sums of money; and secondly to employ the funds thus obtained in making advances by way of Mortgage on Freehold Property; principal and interest being repaid by easy monthly instalments. The system adopted by this society of requiring loans to be repaid by equal monthly instalments is such that, as each repayment includes a portion of the capital sum, the margin of security is ever increasing and the possibility of risk is ever diminishing.

The ultimate value of each share is twenty pounds (exclusive of bonus), realisable by monthly payments of two shillings and sixpence during a period of ten years.

Borrowers are charged interest at the rate of $7\frac{1}{2}\%$ payable monthly, but in return the Society awards interest and bonus. Thus one share on which £15 shall have been paid will be worth at the end of ten years £20, irrespective of the bonus which may be granted. Loans on Mortgage of Freehold Property are granted for a period of ten years, but if at any time the Mortgagor wishes to reduce his payments, he can do so with the permission of the Directors, by getting his loan capitalized. This means smaller payments for shares and interest, with the result that the capitalized loan continues for a further ten years period. This arrangement does not entail any additional Law charges.

The Law Charges vary from 50/ on a loan of £60 to £10 15/ on a loan of £800, and thereafter 20/ extra for every additional £100.

The Society affords a means for investment of capital at an adequate rate of interest combined with absolute security, at 5% per annum, payable half yearly on 1st June and 1st December. The Receipts for the year ended 30th November, 1929, amounted to £197,763 17s. 8d., and the Assets were £567,264 14s. 8d. The Permanent Guarantee Fund amounted to £25,047 1s. 5d.

ST. THOMAS MUTUAL BENEFIT BUILDING SOCIETY.

THE Society was established in 1897. The rate of interest is $7\frac{1}{2}$ per cent. Subscription shares are 2s. 6d. each per month, for a term of 10 years, at expiration of which each share is worth £20.

Acting Chairman, J. G. Marshall; *Secretary*, J. H. Williams.

ST. ANN BENEFIT BUILDING SOCIETY.

THIS Society was inaugurated early in 1874, and incorporated in 1901. Its establishment was largely due to the efforts of its first President, the Hon. Michael Solomon, and its Secretary and Founder the Revd. Josias Cork, both of whom died in 1892.

The history of the Society shows a steady progress. Its benefits have been felt more in the parish and adjoining parishes generally, than at St. Ann's Bay recently. This is chiefly owing to the fact that there have been but few lots available for building purposes within the precincts of the town; and although the number of new buildings erected is, on an average, more than two in each year of the Society's existence, purchases of house property, not requiring more than repairs, have taken place and the acquiring of freeholds which could not have been effected except with the aid of the Society, besides many have been enabled by their savings to settle and help themselves in various ways who without the existence of the Society would have found it utterly impossible. A feature of the Society is a special plan whereby Loans from £300 and upwards can be made without taking the full numbers of shares for re-payment for 7 or 10 years, quarterly payments of Interest at Special Rates.

The Society has also a Depositors Branch on which 4% interest p.a. is paid on Deposits from £1 upwards, which has been steadily increasing yearly.

THE BOARD OF DIRECTORS AND STAFF—J. A. Dickenson, *Chairman*; Harry Stephenson, *Vice-Chairman*; J. J. Lyon, A. B. Reirie, S. M. Roche, R. E. Burrowes, and Dr. F. W. Hunter; *Secretary*, Ernest G. BROWN'S TOWN BENEFIT BUILDING SOCIETY.

THE Brown's Town Benefit Building Society was established in the year 1893, and incorporated in 1899. The new offices of the Society were opened in April, 1929. The Reserve Funds at the end of its thirty-sixth financial year stood at £7,900 0s. 0d; the assets were £86,038 0s. 0d. The net gain for the year was, £2,144 0s. 0d. The total bonus payable on each £10 matured share was in Class A 22; Class B, 32; and each share two years old and upwards, even if withdrawn before maturity, gets a bonus. This Society issues subscription shares in four classes, viz.—Class A, 7 years; Class B, 10 years; Class C, 15 years; Class D, 20 years; and Paid-up Shares in Class A, 7 years. The value of each share in each class at maturity is £10 with bonus in addition. Deposits are also received and interest calculated thereon at 4 per cent. and 5 per cent. according to amount. Loans are made on landed security under any one of the above classes of shares and also under the new system of limited shares and deferred shares, at rates varying from 6 per cent. to 8 per cent. according to amount and period.

The Society makes loans on real property for a period of 7 or 10 years. Temporary loans are also made to shareholders on the security of their shares to the extent of two-thirds the amount standing to their credit.

PEOPLE'S DISCOUNT AND DEPOSIT COMPANY (LIMITED).

The People's Discount and Deposit Company (Limited), was established in 1879 by the Rev. W. Clarke Murray, aided by a few gentlemen to whom he made his plan known. His main object was to provide help for a large class of industrious and enterprising people who, not having influence to secure them business relationships with the Colonial Bank, were reduced to the necessity of applying to private individuals for the means necessary to aid them in their business undertakings. A company was therefore formed to raise a capital fund, by the issue of shares, for the purpose of discounting island and

other bills of exchange or promissory notes, or other obligations, making advances of money on mortgage and other securities, and otherwise transacting business as bankers, save and except the issuing of a paper currency or bank notes, and also to receive deposits on current accounts or otherwise.

CABLE COMMUNICATION.

"IMPERIAL CABLE ROUTE."

THERE are two Imperial Cables working direct from Halifax, Nova Scotia, to London.

These cables provide a "no delay" service across the Atlantic. The Halifax Office of the Imperial Cable is situated in the same building as the Direct West India Cable Company's Office, so that no delay takes place in transferring messages from one Cable to the other.

The "Via Imperial" route is at present the most direct route between Jamaica and Great Britain and Europe, and is the only British owned Cable route crossing the North Atlantic.

In order to obtain the advantage offered by this direct and expeditious route, senders of cables should always specifically mark their cables "Via Imperial" for which indication no extra charge is made.

The rates "Via Imperial" are the same as those via other routes, with the exception of W.L.T. messages.

DEFERRED PLAIN LANGUAGE TELEGRAMS.

Telegrams in plain language at half-rate are accepted with very few exceptions for all parts of the world and are forwarded on the condition that they may be subjected to such delay as may result through the cables being occupied by traffic upon which full rates have been paid, but they will not be deferred for more than 24 hours.

The sender must write before the address one of the following indications which is charged for as one word:—

L.C.F. French.

L.C.O. Language of the Country of Origin.

L.C.D. Language of the Country of Destination.

Deferred telegrams without text are not admitted. Only plain language may be used.

Registered or abbreviated addresses may be used in the address.

WEEK-END-LETTER TELEGRAMS.

Week-End-Letter Telegrams at quarter rate, with a minimum of 20 words, are accepted for Great Britain and Ireland, U.S.A., Canada, Newfoundland, and British West Indies, Bermuda and Turks Island by the Direct West India Cable Co., Ltd.

These messages must be entirely in plain language and must bear the paid prefix "W.L.T." which must appear as the first word in the address. Such telegrams must reach the office of the Company before closing hour on Saturday, and are deliverable at destination on the following Monday morning. Otherwise than as noted above W.L.Ts. are governed by the same conditions as deferred telegrams.

1. The Bermuda route is practically an All-Cable Connection between Jamaica and New York, Jamaica and Boston, and Jamaica and Ireland. There are two transmissions only, viz., at Halifax and Canso, and (high speed automatic) direct working from Jamaica to Halifax is secured by a special arrangement at Bermuda.

2. The Companies' arrangements secure to them several Atlantic cables, and telegrams to Canso for Great Britain pass over British territory only.

3. A complete landline and cable connection to all parts of Canada and the United States, etc., and the above Companies' working arrangements with the Canadian Pacific Railway Telegraph (Head Office: Montreal), and the Postal Telegraph and Commercial Cable Companies (Head Office, New York), provide them with collecting offices and agents in all parts of Canada, the United States, Great Britain and Ireland and the Continent of Europe.

4. The Joint Telegraph Systems are the most complete in the world. They are entirely free of all outside control, and have established a name for accuracy, speed and economy.

To their combined efforts is due the existence of the present low rates now charged on telegrams passing between Great Britain, Canada, the United States and the West Indies.

WIRELESS.

The Company have a ship to shore licence for wireless working from their offices at Kingston, Jamaica (call sign "VQ.I.") for communication with ships at sea. Rate, 10d. per word.

COMBINED CABLE AND WIRELESS ROUTE.

Messages routed "Via Bermuda-Marconi" are accepted by the Direct West India Cable Co. for transmission to Halifax, where they are handed over for direct transmission to London by the Marconi Transatlantic Wireless Circuit.

Telegrams for Switzerland, Spain and France are transmitted beyond London to Country of Destination by High-Speed Automatic, Duplex Wireless Circuits, thus providing remarkably rapid and accurate route.

Full particulars in regard to this service and rates may be had on application at the office of the D.W.I. Cable Co., Ltd.

A modern high-powered Wireless Station has been erected by the Direct West India Cable Co., Ltd., near Stony Hill, 12 miles from Kingston, at an elevation of 1,500 feet above sea level.

The station, which opened for traffic on January 1st, 1928, comprises a Marconi 25 K.W. Continuous Wave (Independent Drive) Valve Transmitter, working on a fixed wave-length of 2,880 metres, and is designed to work by remote control from the Cable Office of the Company in Kingston. The Receiver is a Marconi apparatus using Note Filter Circuits and other means for eliminating "static." A working range of 2,500 miles can be maintained by this station.

The Aerial comprises a multiple T cage system supported on two lattice steel towers 300 feet high 600 feet apart. Ships at sea fitted with continuous wave apparatus may be communicated with at long distance at stated periods of the day, namely 1400/1430. 1800/1830 and 0030/0130 G.M.T. (9-9.30 a.m., 1-1.30 p.m. and 7.30-8.30 p.m. local Jamaica time).

The present home of the club is at No. 59, 61 and 63 Hanover street, Kingston. The former club house, a massive brick structure, erected in 1891, was completely wrecked by the earthquake of the 14th January, 1907. The present club house is designed on a somewhat different plan, is less massive but in its construction all the known safeguards against earthquake effects have been introduced. No. 65 Hanover street has since been purchased, the building thereon taken down, and the land added to the club premises.

The club is managed by a committee consisting of 20 elected members, two of whom are by vote of the others chosen president and vice-president.

For members residing permanently out of the Island, the subscription is 10s. 6d. A gentleman on a visit to the island may be introduced once in any period of three months by a member as an honorary member, by entering the name of such gentleman and his own in the book kept for that purpose. On approval by the committee at the next subsequent meeting, such gentleman may continue as honorary member, until the expiry of fourteen days from his introduction, without charge. Should he desire to have this period extended, the committee may, on application, accede thereto for a period not exceeding six months on payment by him of the sum of 21/ monthly in advance; but should he in the meantime become a permanent member of the club such payments shall be deducted from the regular subscription payable on election. It was re-introduced into Jamaica in 1914, by the Right Revd. Bishop deCarteret after a lapse of about ten years, and is now known as the Jamaica Regiment Church Lads' Brigade. It is governed here by a Governing Body under the chairmanship of the Bishop of Jamaica. This Body has authority from the English Governing Body to organize and control the work in Jamaica, and to issue Commissions to Officers. The Kingston Company is composed of Platoons from Parish Church, All Saints' Church, St. George's Church, St. Michael's Church and St. Matthew's Church, Allman Town, with approximately 200 members and ten officers. A Platoon is attached to Lucea. An annual Camp is held. Sports are held every year. A Miniature Rifle Club has been recognised by the Governor. Physical Training forms part of the work of the C. L. B., and being definitely a Church movement, religious training is carried out by the Platoon Chaplains.

JAMAICA CHAMBER OF COMMERCE AND MERCHANTS' EXCHANGE.

(ROYAL JAMAICA SOCIETY OF AGRICULTURE AND COMMERCE.)

THERE was a Society of Merchants of Kingston which acted in a corporate capacity as early as 1766. In 1839 there was a Kingston Chamber of Commerce, of which Robert Hibbert was Treasurer. A Jamaica Chamber of Commerce existed about 1840. A Jamaica Society of Agriculture was established in May, 1885, its objects being as follows: 1. To take action in all matters connected with the agriculture and trade of the colony. 2. To offer facilities for considering and discussing all schemes or proposals having for their object the increased development of the industrial resources of the colony. 3. To promote interchange of experiences among the members of the Society with reference to the improvement of the breed of stock, the opening up of new markets for the sale of cattle, horses. 4. To co-operate with kindred Associations in the West Indies and elsewhere, in constitutional efforts for the removal of all unjust fiscal or other disabilities, such as foreign export bounties, which deprive the colony of the natural advantages of soil and climate and exert an injurious influence on every department of commercial and industrial activity. 5. To afford opportunities for reading papers, delivering lectures, or holding discussions upon subjects of general interest. 6. To aid the holding and conducting of agricultural shows, fairs and competitions in different parts of the island. 7. To perform in its capacity of a regularly constituted responsible Association the functions of a recognized medium of communication with the Government, conducting the correspondence and representing the interests of its members in all matters falling within the province of the Society. 8. To exercise the province of Arbitrators (when solicited so to do by contending parties) in all matters agricultural or commercial, with a view of an economical and peaceable solution of differences.

The government of the society is vested in a council chosen from the general body of members in the month of November in each year. The election of members is entrusted to the council. Gentlemen residing outside the island are eligible for membership. The roll of to-day numbers over 370 members. The society is now in communication with most of the Chambers of Commerce throughout the world to which its annual reports are regularly forwarded and are members of the Associated Chambers of Commerce of the West Indies, and the Federation of the Chambers of Commerce of the British Empire.

In February, 1886, the Society opened for the use of members "The Merchants' Exchange," where the latest shipping intelligence may be obtained. In the year 1895, the Chamber had the honour to receive through the Secretary of State for the Colonies the consent of Her Most Gracious Majesty Queen Victoria to add the prefix "Royal" to its title. To-day the Chamber's official name is "The Royal Jamaica Society of Agriculture and Commerce," but when a re-organization took place in 1922, it was decided for the purposes of convenience that the ordinary designation should be "The Jamaica Chamber of Commerce and Merchants' Exchange."

In 1923 Monthly Luncheons were inaugurated, and in 1924 a Monthly Journal was started which is circulated throughout the Island of Jamaica and amongst the principal

AGRICULTURAL PRODUCE ADVISORY BOARD.

THE Agricultural Produce Law of 1926, came into effect on April 26th, under the administration of the Hon. A. S. Jelf, c.m.g., then Acting Governor of the Island. The Law provides for the inspection of all classes of island produce exported from the Island, and is intended to secure a uniform and high grade export trade. The actual work of inspection of produce started in July, 1927, and the value of this inspection has been fully borne out by the general support which the Law has received from all sections of the island and from all branches of our island produce trade.

A systematic inspection has taken place of all produce buying depots, which has resulted in a more sanitary condition of these houses. Produce intended for export has been carefully examined, and in several instances where not considered by the Inspector as fit for export, such produce has been condemned and destroyed by the Police. Such condemnation was, in effect, a valuable lesson to all growers, and has resulted in greater care being exercised by the entire trade which has had a very healthy effect on the island's export trade.

In the administration of this Law, there is provided an Advisory Board to the Government, a staff of Inspectors and a Secretary. The office is in the West Block of the Public Buildings.

Advisory Board:—Hon. F. C. Wells-Durrant, K.C., M.A., Attorney General of Jamaica, *Chairman*; Hon. A. G. Nash; Hon. D. T. Wint; H. H. Cousins, M.A., Director of Agriculture; L. L. Carrington, Secretary, Jamaica Agricultural Society; A. H. D'Costa, V. L. George.

The object of its establishment is to promote and increase tourist traffic to Jamaica. The duties and powers of the Board are to make enquiries and to collect such information as the Board may think necessary for the purpose of promoting the thorough advertising of Jamaica as a Tourist Resort, and for such other purposes as in the judgment of the Board will materially facilitate and increase the tourist traffic to and from Jamaica.

Power is conferred on the Board to adopt all such measures as it may think necessary for thoroughly advertising Jamaica as a Tourist Resort and to appoint agent or agents; to make such contracts as it deems necessary, and, subject to the approval of the Governor in Privy Council, make any contract for the provision of steamship communication.

The Law provided for a contribution not exceeding £3,000 from the Government for the year 1922-3 subject to the condition that a similar amount was contributed by any Hotel or Steamship Company or any Mercantile Company or by any person, but no amount was to be contributed out of the public revenue for the year 1922-23 unless contributions from private sources amount in the aggregate to at least £2,500.

The amount actually received by public subscription was £2,642, the Government contribution being £2,629 18s. 0d. In 1924-25 and 1925-26, further sums of £1,000 each year, were provided for, and for the years 1926-27, 1927-28, and 1928-29, the Government Grants were £1,250. For 1929-30 the Government granted £1,250 and in addition the amount of £250 provided £250 was raised by the Board from other sources.

The Board has made to the Government a number of recommendations aiming at the development of internal needs, such as the re-erection of Constant Spring Hotel, the erection of new hotels, the development of the mineral baths and the modernising and beautifying of Kingston, etc.

It has published and distributed large quantities of literature including the Jamaica Bulletin. In January, 1924, motion picture films were taken by the Canadian Government Motion Picture Bureau—by arrangement with the Board, and these films were shown in Jamaica; in London at the British Empire Exhibition and in Canada. Other measures have included advertising in newspapers and magazines abroad, press articles, the entertainment of distinguished visitors to Jamaica, broadcasting cables, lantern lectures and personal work through the Board's Official agents—The West India Committee, in London, and the Canadian-West Indian League in Montreal. All of these Clubs take part in the Senior Competition and either the Junior Competition or the Minor Cup Competition, as also do the St. Catherine C.C., who have their ground at Spanish Town. All the grounds have improved considerably as to condition, and particularly the pitch. The climate and nature of the wicket tend to make very fast pitches.

The principal Clubs outside of Kingston are the St. Catherine C.C., the Middlesex C.C. of St. Mary, the Port Antonio C.C., the Brown's Town C.C., the Montego Bay C.C., the Port Maria C.C. and the St. George's C.C. of Buff Bay, and the grounds have improved considerably, particularly the Middlesex C.C. at Palmer's Park.

Cricket is played at all the Secondary Schools.

The Jamaica Cricket Association was formed in 1925 to govern Cricket in Jamaica,

and all the principal Clubs in the Island are affiliated to it. It is governed by a Board of Control which has assumed the duties formerly carried out by the Jamaica Cricket Council and the Managing Committees of the several Cup Competitions.

Keen rivalry is shown in the competitions, the principal one being the Senior Cup Competition, which was won in 1929 by the Melbourne Cricket Club.

The M.C.C. Team, which toured in the West Indies the winter of 1925-26, and visited Jamaica in March, was captained by the Honourable F. S. G. Calthorpe and was probably the strongest side which has ever visited the West Indies. Three Matches were played, the first was won by the visitors and the other two were drawn. A team captained by the Hon. L. Tennyson visited the Island early in 1927. All the Matches were drawn. In February 1928, the Hon. L. H. Tennyson again brought out a team, and of the three matches played, two were won by Jamaica and the other drawn.

In February 1929, Mr. (now Sir) Julien Cahn brought out a very strong team. The Tour proved in every respect most successful. Four matches were played in Kingston, one against a Next XV two against All Jamaica and one against a West Indian XI in which players from some of the other West Indian Islands took part. Of the four matches played two were won, one by All Jamaica and the other by the West Indian XI. The other two matches were drawn.

An M.C.C. Team under the captaincy of the Hon. F. S. G. Calthorpe, toured the West Indies in the Winter of 1929-30 and visited Jamaica in March, 1930.

For the first time on record official Test Matches were arranged and of the four played the West Indies won one and England one, the other two were drawn.

The West Indies Cricket Board of Control met in Jamaica in April, 1930, and selected a West Indies Team which includes four Jamaicans, to tour Australia in the winter of 1930-31.

The Board of Control consists of:—

Sir William Morrison, *President*; C. H. Burton, *Vice-President*; J. M. Nethersole, *Hon. Treasurer*; D. P. Lacy, *Hon. Secretary*; V. G. Sasso, *Asst. Hon. Secty.*; P. J. O'Leary Bradbury, Major G. S. Cox, *m.c.*, L. V. D. Samuel, R. K. Nunes, V. C. McCormack, P. L. Carder, R. H. Fletcher, L. McCarthy, W. Gordon Hilton.

FOOTBALL.

The official Season lasts from 1st September to 31st March, but the game is really played from October to February. It has been thought advisable to permit the game to be played for a duration of 60 minutes, not including the interval.

A Football Club was formed in Kingston in 1893, and for some years played against Military teams from Camp, Newcastle and Port Royal.

The Jamaica Football Association Challenge Shield Competition (commonly known as the "League") was inaugurated in 1898, and for many years the Military team proved too strong for the civilians. To stimulate play amongst the local clubs, a civilian league called the F. N. Martinez Cup Competition, after the name of the donor, was commenced in 1906. The Kingston C.C. won this trophy outright in 1913-14, when Mr. Martinez again placed another cup at the disposal of the Association.

A Junior League was formulated in 1920, Messrs. Wilson & Co. (Chicago), offering a trophy for competition, the league to be known as the "Wilson Junior League."

A fourth competition to be competed for (at the end of each season) by all clubs (civilians and military) was started in the 1922-23 season. Mr. Martinez again presenting the trophy.

(Mordecai Cup) *Fifth Competition* Junior Knockout under the same rules as senior K.O. (started 1929-30.)

With the commencement of the season for 1924-25, all the competitions were revised, owing to the unwieldiness of the old competitions and the abnormal popularity that the game was creating.

The competitions now number five.

SEASON 1929-30.

1. Jamaica F. A. Shield Competition (Senior League)—Won by Melbourne C.C. F.C.
2. Martinez Cup Competition (Civilian Competition)—Won by Melbourne C.C. F.C.
3. Martinez Championship (Knock-Out)—Won by Kingston C.C. F.C.
4. Wilson Cup (Junior League)—Won by Wolmers School, F.C.
5. Mordecai Cup (Junior Knock-out) won by Kingston (Junior) C.C. F.C. (Mordecai Cup.)

The Association is governed by a Committee consisting of the Officers and eight other members annually elected. All past presidents are *ex-officio* members of this Committee. Referees are examined and receive an honorarium to cover travelling expenses while several medical gentlemen have accepted appointments as honorary surgeons.

In 1909, the Governor, Sir Sydney Olivier, presented a Shield for competition confined to teams from Secondary Schools. At present it is held by Cornwall College. St. George's College is also the holder of a cup presented by Sir W. H. Manning for competition amongst secondary schools in and near Kingston.

LAWN TENNIS.

The Jamaica Lawn Tennis Association is affiliated to the Lawn Tennis Association, England, and is composed of the following Clubs:—The Kingston C.C., The St. Andrew Club, The Garrison Lawn Tennis Club, The Melbourne C.C., The Liguanea Club, The

Kensington C.C., The St. George's C.C. Combined Banks Athletic Club Country Clubs: The Manchester Club, The Morant Bay L.T.C., The Montego Bay L.T.C., Brown's Town L.T.C., St. Catherine and Prison C.C. May Pen L.T.C. All these clubs, with the exception of the Manchester Club, possess excellent grass courts; the Manchester Club has good hard courts.

A yearly inter-club Men's Doubles competition for a cup, and an annual "All Jamaica" Tournament have been held since the year 1900. These tournaments have been very successful and have proved beneficial in improving the standard of play in the island. The Tournament is also open to certain visitors to the island and advantage thereof has been taken by visitors each year. Only championship events are played.

No tournament was held in 1915 or 1916 owing to the war, but the Committee decided to hold that for 1917 late in the year, and devote the proceeds to the Red Cross Funds. Only souvenirs were given and the result of the Tournament was a success in every respect; in particular adding a sum of well over £100 to the funds. The Tournament was held in 1918 for the same object, and resulted in a sum of well over £400 being added to the Red Cross Fund.

The Inter-Club Jamaica Lawn Tennis Challenge Cup was won by the St. Andrew Club in 1928, Kingston C. C. 1929.

Towards the end of 1921, the Association decided to form a Minor Cup Competition on the same lines as the Major Competition, and a suitable Cup was obtained by the Association for this purpose. Holders: 1927, Melbourne C. C.; 1928, Melbourne C.C., 1929, Melbourne C. C.

In 1923, the Officers of the Garrison presented the Association with a Challenge Cup for a Mixed Doubles Inter Club Competition—Holder 1927—Melbourne C. C. 1928, Melbourne C. C. 1929, Melbourne C. C.

Tennis in the Island was given a further impetus when in December, 1927 and 1928 the Jamaica Lawn Tennis Association made arrangements for Mr. A. E. Beamish the leading English tennis coach to visit Jamaica. He was in the island nearly three months and gave lessons at most of the Kingston and St. Andrew Clubs and in Mandeville and Montego Bay. His wife who accompanied him gave some excellent exhibitions of tennis in matches against local players.

Jamaica Hard Court Championships are played at Manchester Club, Mandeville. In February, 1924, the Association held an inaugural Annual Open Championship Meeting on the grounds of Liguanea Club, at which leading players from the United States of America competed:—Messrs. Vincent Richards, H. Throckmorton, Carl Fisher, R. L. Baggs, A. S. Craig and M. Goldman.

The second Open Championships was held on the grounds of Liguanea Club, February, March, 1925, when the following well known players visited the Island to compete—Messrs. Vincent Richards, H. Voshell, T. Harada, Dr. Rosenbaum and E. W. Feibleman.

The third Open Championships were also held on the grounds of Liguanea Club, February, 1926, when the visiting players were H. Voshell (Captain), T. Harada, Beales Wright, A. H. Chapin, Mrs. A. H. Chapin, Miss Molly Thayer.

GOLF.

GOLF owes its introduction into Jamaica to the Mandeville Course which in 1891 consisted of six holes at Brumalia, the property of Mr. Lewis. The course has since been extended to nine holes.

In 1896 the Kingston and St. Andrew Golf Club was formed. Their links were situated at Solomon's Pen, now known as Retreat. In 1902 the club transferred its home to Constant Spring Hotel grounds, and in 1908 the club changed its name to that of The Jamaica Golf Club. In 1910 a course was laid out in the grounds of the Liguanea Club. In 1918 the Constant Spring Golf Club was started.

Courses of varying character are to be found throughout the Island at Moneague (1923), Montego Bay (1924), Green Castle (1925), Mackfield and Port Antonio, and courses are now in the process of formation at Belmont (near Malvern), Morant Bay, and Seville (near St. Ann's Bay).

In 1925 The Jamaica Golf Association was formed with a view to fostering the progress of golf in the island. Several handsome trophies have been handed over to the Association by the Trustees of the defunct Jamaica Golf Club. The Officers of the Association are:—*President*—John Findlay; *Hon. Secretary*—W. THE ST. MARY COUNTRY CLUB.

THE St. Mary Country Club is situate in the parish of St. Mary on the Northside of the Island adjoining the sea and is about 5 miles from the town of Annotto Bay and about 30 miles from Kingston over the Junction Road.

The Golf Course and Club House are located on the Green Castle Commons, the Estate being one of the properties of the Atlantic Fruit Company, Limited, which Company has very generously given the Club the greatest possible support and encouragement in a variety of ways.

The Club, which largely through the generosity of its Patron, Mr. F. B. Adams of New York, was started in 1926, now possesses a fine Club House, with spacious lounge and verandahs quite near to the sea. The well laid out 9 Hole Golf Course is the only Seaside Course in the Island, and there is a commodious Bath House at the Club's Bathing Beach where excellent sea-bathing can be had.

The Links are really beautiful, from every tee can be had a view of the sea, and the views from the 3rd and 5th Greens are very extensive taking in as they do the Town Harbour of Annotto Bay, with the range of the Blue Mountains in far distance to the Eastward, as well as the sea for miles around.

The Turf is excellent for Golf and the Holes are varied and interesting. Space does not permit of a detailed description, but mention must be made of the Famous 8th Hole or "Waterloo" as it is so well called—where the Player has to play over an inlet of the sea on to a green about 160 yards from the Tee.

Hon. Secretary—Roy Johnson, Annotto Bay.

POLO.

POLO has been played in Jamaica for many years and, as is the case in most other Colonies, was first introduced by the Officers of His Majesty's Army. The Garrison Polo Club was originally the only Polo Club in the island, and, when this was so, civilians were elected as honorary members and allowed to use the Club. The game, however, rapidly became popular and after a few years the Kingston Polo Club was formed; subsequently the game spread to the country parishes and clubs were formed in St. Ann, St. Mary, St. Catherine and St. James.

When war broke out in 1914, seven Polo Clubs were in existence in Jamaica, but they all, with the exception of the St. Ann Club, went out of existence as a great majority of the members proceeded overseas to serve in His Majesty's Forces. No Polo was played in Jamaica between the years 1915 and 1919. The Garrison Polo Club re-started in January, 1920, and the Kingston Club in April of the same year. There are now four Polo Clubs in existence:—The Garrison, Kingston, St. Ann, and St. Elizabeth.

The All Jamaica Polo Association was formed in 1906, it went out of existence in 1915, and was resuscitated in 1921. The Association is the controlling body for polo and polo pony racing in the Colony. A bi-annual Tournament is held under its auspices each June and December when a "Senior" and a "Junior" Cup are competed for by all the clubs affiliated to the Association.

In 1923, Colonel J. A. Hartigan, C.M.G., D.S.O., R.A.M.C., presented a cup to be competed for by teams of young players who are members of recognized polo clubs, and this cup is competed for once a month between October and July.

The Captain and Officers of H.M.S. "Constance" have presented a cup to the Garrison and Kingston Clubs and this Cup is competed for by teams composed of members of those clubs.

In December, 1927, Mrs. Marescaux presented the Jamaica Polo Championship Cup in memory of her husband the late Col. O. M. S. Marescaux, and this cup is played for twice a year in June and December.

Polo teams from Jamaica have on several occasions visited the other West Indian Islands and Costa Rica.

BOXING.

THE Jamaica Boxing Board of Control is the executive body of the Jamaica Boxing Association, which body was formed in the early spring of 1928. Its objects are (a) To raise the standard of Professional Boxing; (b) To encourage Boxing in Jamaica; (c) To control all Amateur and Professional Boxing in Jamaica in accordance with rules made by the Board of Control; (d) To act as a central court of appeal.

Accordingly, rules were framed, based on those adopted by the National Sporting Club, the Imperial Services Boxing Association and the Amateur Boxing Association, but adapted to local conditions.

Championship belts have been provided for some weights in the professional classes,

Public Schools Championships have been held, and Amateur Championship will be organised shortly.

With a view to increasing interest in amateur boxing the Board of Control has been presented by an anonymous donor with a miniature bronze statue of a boxer holding his guard, six bronze medals and six silver ones, with provision for the names of winners to be inscribed on the face, and on the reverse side is an impression of a boxer (in the prize ring) on guard.

During the year ending June 30, 1930, over 25 members were enrolled into the Jamaica Boxing Association, a fair percentage of these being ladies.

RIFLE SHOOTING.

THE West Indian Club, in its efforts to forward and encourage sport in the West Indies, arranged in 1910 with the various authorities there, to shoot annually on Empire Day, or within fourteen days before or after that day, and concurrent with the "Daily Mail" or any other competition. The cup is held by the winning team for one year and if not competed for within the fourteen days, it is deposited at the Colonial Bank in the Colony in which it is held. The competition is open to teams of ten, the best eight scores to count from either the Militia, Local Defence Force, Police, Volunteers, Rifle Club or Rifle Associations of at least one year's standing or a team made from a combination of those forces, of any island of the British West Indies including the Bahamas, the Bermudas, British Guiana and British Honduras, and is a home and home shoot, and members of H. M. regular forces, whether attached to any unit qualified to compete or not, are not eligible to be included in a team.

Distances, number of shots, targets, and conditions are the same as the King's 1st stage, as specified for the previous year's National Rifle Association meeting at Bisley.

General rules are laid down for the pattern of rifle, time limits, dress, score sheets, status of range officer and other details. The following competitions have been held:

The Cup when held by Jamaica is kept in the History Gallery of the Institute of Jamaica.

JAMAICA SCHOOLS MINIATURE RIFLE ASSOCIATION.

THE Jamaica Schools Miniature Rifle Association was formed in 1906 in order to promote rifle shooting in the secondary schools of the island. Mr. A. E. Perkins took a great interest in the movement and presented the Perkins Shield for annual competition; this trophy has been won seven times by Munro College, five times by Wolmers School, and nine times by Jamaica College.

The late Dr. G. C. Henderson was for many years president of the association and in order to perpetuate the memory of his connection therewith, the gold medal awarded annually (on certain conditions) to the boy who makes the best score in the competition for the Perkins Shield is now called the Henderson Medal.

SOLICITORS COMMITTEE.

PRIOR to the year 1896, persons wishing to enter the legal profession (Solicitor branch) in this island had to pass a preliminary examination in certain prescribed subjects conducted by some local examiner appointed by the Supreme Court, or if they had passed the University of Cambridge local examination, or such like examinations, they were exempted from preliminary examination and were allowed to enter into articles. At the expiry of due service under articles they were examined in Law by papers set by one of the Judges of the Supreme Court.

On the passing of Law 36 of 1896, the conduct of all the examinations was placed in the hands of a committee constituted under that Law, two of whom, namely, the Attorney General and the Crown Solicitor, are *ex-officio* members, and the other members (5 in number) practising solicitors appointed by the Judges of the Supreme Court. In addition to the preliminary and final examinations article clerks are required to pass an intermediate examination (Book-keeping being one of the subjects) as in England. The preliminary examination is conducted by the committee locally, but the intermediate and final papers are set by the Law Society's examiners in England, and transmitted to the committee in this Island through the Government. The syllabus of subjects for Intermediate and Final examination each year is published in the Jamaica Gazette.

In addition to the conduct of the above examinations, the committee has entrusted to it the investigation of complaints of parties alleging professional misconduct against any solicitor. Should the complainant establish a *prima facie* case of misconduct against the Solicitor a report is then made to the judges of the Supreme Court and the matter brought before that Court by motion and dealt with.

Under the Imperial Act (Colonial Solicitors Act, 1900) in certain cases mentioned in the Act and the Order of Council made in pursuance thereto on May 16, 1904, Jamaica solicitors who have been in practice before the Supreme Court of the Island for not less than 3 years, and being male British subjects, on complying with certain prescribed requirements, may be admitted solicitors in any part of the United Kingdom, viz.: England, Scotland or Ireland, or in any two of those parts only, on application to the Master of the Rolls in England, to the Lord Chancellor of Ireland in Ireland and for admission as a law agent in Scotland to the court of sessions in Scotland. (A perusal of a copy of the Order in Council may be obtained on application to the Secretary to the Solicitors Committee.)

English solicitors are admitted to practise as solicitors in Jamaica on payment of a stamp duty and on satisfying the Supreme Court or a Judge of that Court as to identity, character, and that such applicant is a duly admitted solicitor in England.

Persons desirous of entering into articles are advised to refer to Laws 9 of 1869 and 36 of 1896, and the regulations made under the latter Law. The same can be had on application to the Secretary to the Solicitors Committee.

JAMAICA YOUNG WOMEN'S CHRISTIAN ASSOCIATION.

In January, 1921, Miss Grace H. Saunders on the invitation of the Upward and Onward Society came from England, sent by the World's Young Women Christian Association Committee. After preliminary enquiries, she at a meeting at King's House, called by Lady Probyn, on February 8th, explained the object of the Association, which Association throughout the world numbers over eight hundred thousand members, and it was resolved to establish a Y.W.C.A. in Jamaica. An Advisory Council was appointed, and until June when she was obliged to return to England had the guidance and assistance of Miss Saunders. In view of the then general business depression no special appeal was made for funds, but some hundreds of pounds were collected.

Lady Probyn interested herself in raising the funds needed for the purchase of premises and invited the assistance of ladies and associations, too numerous to mention, throughout the island, and Montague House was purchased in February for the sum of £1,400 out of the £2,700 collected by the efforts of Lady Probyn. In February, 1922, Miss E. Picton Tuberville, O.B.E., representing the World's Y.W.C.A. came to Jamaica, and her appeal week resulted in the collection of £1,164.

Montague House, 1E North St., having been adapted under the guidance of Lady

Probyn, for use as a hostel, was furnished by the Council and opened in February, 1923.

There is hostel accommodation for 29 residents and transients. Visitors from other countries and from the country districts of Jamaica can secure comfortable accommodation at a moderate rate. The ground floor premises serve the purpose of a club for business and professional girls in Kingston which has at present a membership of over 400. Additional buildings serve as club centre for some 300 industrial girls. Branches have been opened in Black River, Browns Town, Port Maria, Sav-la-Mar and St. Ann's Bay.

JAMAICA SCOTTISH SOCIETY.

In the days when Sugar Cane was King in Jamaica, when the price of sugar was high and there were many sugar estates in Jamaica, mostly small, but mostly prosperous, many hundreds of young Scotsmen were brought out as Field Overseers and Engineers in the works. There was then a strong Caledonia Society in Jamaica, whose chief functions were to hold Highland Games and a Dinner once a year. With the advent of cricket and football, and their increasing popularity, the Highland Games were discontinued. For some years the Caledonia Society was moribund, but again was enthusiastically re-established as "The Jamaica Scottish Society" on new lines. It holds an Annual Dinner on St. Andrew's Day (30th November) and is also a Benevolent Society, having a fund to assist stranded or other unfortunate Scotsmen.

During the war period, substantial amounts were sent to "The Scottish Red Cross Society" the fund to aid Scottish Prisoners of War in Germany, etc.

Without this information it is impossible to determine the method of control best adapted to local conditions. The Anti-Tuberculosis League can render invaluable aid in the Survey and, when control measures have been decided upon, the League's work will be of far reaching significance, for the control of Tuberculosis is an undertaking with high humanitarian purpose."

PART XVII.

MEANS OF COMMUNICATION.

TRAVELLING IN JAMAICA.

By way of introduction to the information about means of travelling in Jamaica, it will be useful to give a brief outline of the main roads of the island, these being the means usually adopted for through travel, although some of the better kept parochial roads are used to a considerable extent.

The island has been divided physically by nature, into the northside and the southside, the existence of the central mountainous country being the cause of the division. In the eastern end of the island the lofty range of the Blue Mountains extending from north of Kingston to the sea coast near Manchioneal accentuates the division. In the central and western portion it is by no means so marked, in fact in the very centre of the island there is a stretch of country running east and west of about 30 miles in length occupied by the valleys of three rivers, each of these sinking into the limestone soil and with no visible connection with the sea.

On account of the conformation of the island as above described the system of main roads, until comparatively recent years, consisted of a belt line running round the island, with few exceptions, along the sea coast, with loop lines on the plains of St. Andrew, St. Catherine and St. Elizabeth, and with three cross connections from the south to the north; one by way of Stony Hill from Kingston to Annotto Bay; a second, from Spanish Town to St. Ann's Bay, by way of Mount Diablo, and the third from Savanna-la-Mar to Montego Bay via Mackfield; these three roads crossing the central range of hills at elevations of about 1,350 feet, 1,800 feet, and 1,000 feet, respectively. Commencing at Kingston and going to the east-end, then turning westerly along the northside until Green Island is reached and then returning by the southside to Kingston, the old system of main roads passed through all the principal ports and towns in the island. Founded on it as a basis, there have been, either constructed as new roads, or more generally taken over from parochial roads and reconstructed, a very large number of other main roads, creating with the original roads a network over the whole of the inhabited portion of the island, and affording communication between the old northside and southside lines by some fifteen different routes, the whole length of main roads aggregating at the present time 1,944 miles, of which nearly the whole are driving roads, of a width nearly everywhere sufficient for a double line of traffic, and generally maintained in very good condition, although necessarily liable in times of excessively heavy weather to severe damage from flooded rivers and landslips, and from the heavy scouring effect of the rains on the surface of the roads, especially those on steep gradients. On some of the roads, especially on some of the parochial roads recently taken over, heavy gradients are to be encountered, but it has been the aim in recent years to improve the roads in this respect. Many improvements in this direction have taken place, and in new roads steep gradients have been very carefully avoided.

Some of the main roads of recent construction attain much greater elevations than those of the original system. In St. Elizabeth the road over the Santa Cruz mountains reaches a height of 2,200 feet at Malvern; in Manchester the road from Shooter's Hill through Christiana to Ulster Spring touches the 3,000 feet level at Coleyville; the driving road up the Blue Mountain Valley in St. Thomas attains 2,750 feet at Arncliffe Gap; while the road from near Gordon Town via Newcastle to Buff Bay crosses the main ridge of the Blue Mountain at Hardware Gap at a height somewhat over 4,000 feet; and the road to Mavis Bank rises to a height of 2,800 ft. at the gap at Guava Ridge. All of these roads, as also many others in various parts of the island, afford exquisite views to the traveller, but the Newcastle road gives a succession of views of hills, plains and sea, which are surpassingly striking and beautiful.

MILITIA HISTORY.

THE Restoration in England in 1660 was followed by the substitution in Jamaica of a Civil Governor for the Military Officer, who up till that time had administered the affairs of the Colony. This was followed in 1662 by the conversion by Lord Windsor, the first Royalist Governor, of the greater part of the garrison into five regiments of Militia. This militia was composed exclusively of European residents in the island, and negroes were rigidly excluded. In "The State of Jamaica under Sir Thomas Lynch," which appears as preface to the first edition of "The Laws of Jamaica" published in London in 1684, occurs the following account:—

"The Militia in this Island is better armed, and much better disciplined than in England and do much more duty, as waiting on the Governors, guarding forts, especially in Port Royal, where there are Ten Companies of about 200 in each, one of which watches every night. All the Militia is commanded by the Governor, as Captain-General, according to His Majesties powers and the Act of Militia. There's eight regiments in the eight provinces, and a troop of horse in every province that makes one regiment. At Port Royal is a Captain of the Castle (and three honorary Captains of Forts) and twelve gunners and Matrosses, all paid by the King, out of the Revenue arising in the Island; these lodge in the Castle and forts, and take a constant care of the guns, arms, ammunition, &c. In Port Royal is a castle and four forts, wherein are mounted 145 guns."

In the 18th and early 19th centuries the organization was more or less feudal and each estate was called upon to provide its quota for the militia. Towards the end of the 18th century, natives were admitted to the force and records show that its strength in 1783 was 6,793; and in 1792 it was 8,172 of which one quarter were natives. It was then organized as 3 regiments of horse and 14 of foot. In 1805 during the war with France, the militia rose to what appears to have been its maximum strength, 10,000 foot, and 1,000 horse. There were three regiments of horse, one in each county, and eighteen regiments of foot, one for each parish.

The Volunteer movement in England was reflected by the establishment of a small Volunteer Force in Jamaica. This rose to a strength of 84 officers, 583 other ranks, and 260 horse. They were, however, shortly afterwards disbanded, and the Kingston Light Horse alone remained in existence. After good service in the 1865 Rebellion, this also ceased to muster for parades and the volunteer movement died.

In 1879, a Militia Law was passed which was amended in 1887 and 1891. Under these laws, the Jamaica Militia Artillery and Jamaica Militia Infantry were raised. The latter was finally disbanded in 1906, in the belief that such a training school for citizens was superfluous in an age of established peace, and that in any case the people of the West Indies could not possibly be of any consequence in any imaginable war of the then future.

Some of the members of the Jamaica Militia Infantry formed themselves into the St. Andrew Rifle Corps, and this body was kept up at the expense of the public though never recognized as a military body by the Imperial Government, owing to their organization.

KINGSTON INFANTRY VOLUNTEERS.

Prior to the outbreak of the war there existed an unrecognized Volunteer Corps known as the St. Andrew Rifle Corps. This Corps, though not recognized as a military body was partly supported by the Government, grants being made to it each year for training and for ammunition and transport. The majority of its members had been members of the former Kingston Infantry Militia.

On the outbreak of war, when it was found desirable to enroll the Corps as part of the new Volunteer Force, it was decided to disband the Corps and to re-enlist the men in a Company of the Volunteer Force to be designated as "The Kingston Infantry Volunteers." The Commanding Officer of the Corps was accordingly authorized, under Warrant by the Governor, to enlist persons to serve as members of a Company of the Volunteer Force to be designated as the Kingston Infantry Volunteers. This was done and Commissions were issued to the Officers of the Corps.

RIO COBRE HOME.

For the children of War Contingent men.

IN response to representations that the children of men who had joined the various war contingents were not being maintained, the Legislature voted the sum of £1,200. The Rio Cobre Hotel at Spanish Town was handed over in May, 1917, by the Government to be a temporary home for children of men who had enlisted. Mr. Frank Isaacs undertook the charge of the Home.

The benefits of home training were subsequently extended to children other than those of B. W. I. R. men on payment of the cost of their maintenance: 57 such children have been admitted from the parishes.

Children of school age attend the Government Elementary School at Spanish Town and assist generally in the domestic work of the institution and in keeping the grounds clean and tidy.

On 31st Dec., 1928, there were 67 children remaining in the Home of various ages from 5 years to 13 years of age. Suitable situations are found for those who reach the latter age.

PART XIX.

MISCELLANEOUS INFORMATION.

NATURALIZATION OF ALIENS, PASSPORTS, &c.

I. NATURALIZATION OF ALIENS.

By the 1st section of the Act 35 Charles II., cap. 3, the Governor of Jamaica is empowered by instrument under the broad seal of the island, "to make an alien or aliens, foreigner or foreigners, being already settled in the island, or such as shall hereafter come to settle and plant in it, having first taken the oath of allegiance, to be, to all intents and purposes, fully and completely naturalized;" and the person so naturalized thenceforward has and enjoys for himself and his heirs "the same immunities and rights of, and unto, the laws and privileges of this island in as full and ample manner as any of His Majesty's natural born subjects have or enjoy within the same," or as if the person concerned had been born within any of His Majesty's realms or dominions.

The provisions of this Act have frequently been had recourse to, and this was especially the case in the years during which emigration to a large extent from Cuba and Hayti took place in consequence of the disturbances in those countries.

The procedure under this Act is as follows: A petition is presented to the Governor setting forth particulars of the individual desirous of naturalization, the fact of his having settled in the island or his intention to do so, as the case may be, and his willingness to take the oath of allegiance. To this petition should be affixed the signatures of at least two respectable citizens as a guarantee of the good character and *bona fides* of the petitioner. If after such further enquiry as may be deemed necessary the Governor should decide on granting letters of naturalization, a writ of *dedimus* is issued for the administration of the oath of allegiance to the applicant, and, when this writ is returned executed, the letters of naturalization are issued, and an intimation to that effect is published in the Jamaica Gazette by Authority. Letters of Naturalization are subject to a Stamp Duty of £2.

Naturalization under this Act confers no rights outside the limits of Jamaica.

Under the 6th section of the Act 14 Vic. cap. 40, any woman married to a natural born subject or person naturalized in Jamaica shall be deemed to be herself naturalized and to have all the rights and privileges of a natural born subject.

It has been held that the children of an alien who has been naturalized in the colony, born before their father's naturalization, do not become British subjects by the naturalization of their father, whether they are, or are not of age at the time of their father's naturalization.

Certificates of naturalization granted in Great Britain give the holders the rights and privileges of British subjects in the Colonies except in certain Dominions.

The British Nationality and Status of Aliens Act 1914.

The above Act now regulates the Naturalization of Aliens in the United Kingdom the following section gives the authority to the Government of any British Possession to grant Certificates of Naturalization to Aliens:—

8.—(1) The Government of any British Possession shall have the same power to grant a certificate of naturalization as the Secretary of State has under this Act, and the provisions of this Act as to the grant and revocation of such a certificate shall apply accordingly, with the substitution of the Government of the Possession for the Secretary of State, and the Possession for the United Kingdom, and also, in a Possession where any language is recognised as on an equality with the English language, with the substitution of the English language or that language for the English language.

Provided that, in any British Possession other than British India, and a Dominion specified in the First Schedule to this Act, the powers of the Government of the Possession under this section shall be exercised by the Governor or a person acting under his authority, but shall be subject in each case to the approval of the Secretary of State, and any certificate proposed to be granted shall be submitted to him for his approval.

(2) Any certificate of naturalization granted under this section shall have the same effect as a certificate of naturalization granted by the Secretary of State under this Act.

An applicant for a certificate of Naturalization must satisfy the Governor—

(a) That he has resided in His Majesty's Dominions for not less than 5 years, in the following manner, that is to say, for one year immediately preceding the application in the colony and for a period of four years within the last eight years before the application either in the colony or in some other part of His Majesty's Dominions.

(b) That he is of good character and has an adequate knowledge of the English language and

(c) That he intends if his application is granted either to reside in His Majesty's Dominions or to serve under the Crown.

By Law 26 of 1922, persons landing or embarking at any place in the Island are to be in possession of a valid Passport or Permit issued not more than two years previously; any Alien coming to the Island must have Passport, or Permit vised by the British Consul or Vice-Consul in the Country from which he embarks.

"PERMITS."

Under the Emigrants Protection Law, Law 41 of 1924, a permit is required by all persons proceeding as passengers from the Island to places proclaimed under the Law. The following sections relate to the granting of such permits:—

1. It shall be lawful for a permit officer forthwith to grant a permit to the applicant if he establishes to the satisfaction of the permit officer:—

- (a) that he has already made such proclaimed place his temporary home, or is carrying on business there, or,
- (b) that being a native of or domiciled in this Island he is possessed of independent means sufficient to remove all risk of his having to be repatriated at any time at the cost of this colony or that he has deposited the sum of one pound and five shillings in the Treasury to cover such note, or that, if he has been recruited by a recruiting agent, such agent has paid into the Treasury the sum of one pound and five shillings and entered into such agreement as is hereinafter mentioned.

2. If an applicant for a permit, who has deposited the sum of one pound and five shillings in the Treasury, is recruited by a recruiting agent who pays into the Treasury in respect of such recruit the sum of one pound and five shillings, as he is by this Law required to do, such recruit shall, on application, have repaid to him personally or to his legal personal representative, the sum of one pound and five shillings deposited by him in the Treasury, and any permit granted to any such recruit by reason of the deposit by him in the Treasury of the sum of one pound and five shillings, shall, on his being recruited as aforesaid, be void, and a new permit shall be obtained by him.

2. No person recruited by a duly registered recruiting agent shall receive a permit, unless a contract has been entered into between such persons and the recruiting agent on behalf of his principal, and the form and substance of such contract has been approved by the Governor in Privy Council.

4. Any such contract shall, inter alia, provide:—

- (a) that the agent or his principal may not at any time deduct from the wages of the emigrant, or otherwise obtain from him repayment of the sum of one pound and five shillings, or any part thereof, paid by the said recruiting agent under
- (b) the terms of this Law;
- (c) that the contract shall be cognizable before and enforceable in the Courts of this Island, or at the place of employment, at the option of the emigrant; and
- (d) that no person shall be at liberty to contract himself out of the provisions of this sub-section of this Law.

5. Any such permit as aforesaid shall be in force for one week from the granting thereof.

6. The Governor in Privy Council may, as to any proclaimed place other than the Republic of Panama, from time to time fix and determine such sum in lieu of the sum of one pound and five shillings mentioned in the immediately preceding section as he may deem sufficient to remove all risk of an emigrant to such proclaimed place having to be repatriated at any time at the cost of this colony. Any sum so fixed shall be published in the Jamaica Gazette and thereupon, as to such proclaimed place the sum so fixed shall be the sum to be deposited as in the immediately preceding section mentioned.

Law 36 of 1919 places certain restrictions on Immigration and provides for the removal from the Island of prohibited Immigrants. It repeals Law 25 of 1905.

LETTERS PATENT FOR INVENTIONS.

THE legal formalities in the matter of the application for and obtaining Letters Patent for Inventions are enacted in the Act 21 Vic., cap. 30, "The Patent Law Amendment Act, 1857," as amended by Law 15 of 1891. A brief outline, in general terms, of the course to be pursued in applying for Letters Patent is given below:—

The person desiring that Letters Patent for an invention should be granted to him should first forward to the Governor his formal petition in the form annexed to 21 Vic., cap. 30, accompanied by a declaration that he is the true inventor or discoverer of the thing for which he desires the Letters Patent, together with a description or specification with drawings where necessary, shewing in clear and exact terms the nature of the invention. He should then publish for at least four weeks in the Jamaica Gazette and in

one local newspaper a notice of his having made such application stating in general terms the nature of the invention in respect of which Letters Patent are sought. Copies of the Gazette and Newspaper containing this notice should be lodged in the office of the Colonial Secretary.

The Governor will then give his order for the reference of these papers to the Attorney General for examination, and if the Attorney-General is satisfied that the application for the Letters Patent may properly be granted he returns the papers to the Governor with a certificate to this effect; and if he sees reason for disallowing the application he gives a certificate embodying his reasons for this conclusion.

The applicant for Letters Patent is required to send up with his petition the sum of £3, which is sent to the Attorney General as his fee when the papers are referred to him by the Governor. Letters Patent are subject to stamp duties to the amount of £2 10s. and 5s. on a Power of Attorney, if necessary.

Letters Patent have effect for a period of 14 years from the time of being granted which may be extended by the Governor for a further term of seven years.

The Register of Patents registered is kept at the Island Record Office, Spanish Town, and is available for each search by the public on payment of a fee of one shilling for each hour of search or part thereof.

LIMITED LIABILITY COMPANIES IN JAMAICA.

THE Register of Companies registered under the Trading Companies Laws of Jamaica is kept at the Island Record Office, Spanish Town, and is available for search by the public on payment of a fee of one shilling for each inspection.

LAND SURVEYORS.

THE law now in force relating to land surveyors is Law 31 of 1894, which repealed Law 33 of 1869, the previously existing statute on the subject.

The Law has been amended by Law 20 of 1902, Law 20 of 1908, and Law of 15 1928.

The law provides for the infliction of a penalty not exceeding £50 on any person (a) who runs a boundary, or opens lines between two properties, the occupier of which do not both concur in engaging his services; or (b) describes himself, or holds himself out as a surveyor of land, or falsely takes or uses in the island any name, title or addition implying a qualification as a land surveyor.

Section 4 of the law provides that no person shall be qualified to receive a commission as a land surveyor unless he is at least 21 years of age and produces satisfactory evidence of character, and either is a corporate member of the Institute of Surveyors of England, or of the Institution of Civil Engineers of England; or has passed the Cambridge Junior Local Examination in Arithmetic, Grammar, Dictation, Geography, Algebra, Euclid, plane Geometry and plane Trigonometry; has subsequently to his passing such examination been bound by indenture to serve for three years as an apprentice to a commissioned surveyor of land; and, has after the expiration of such term of service, duly passed the examination referred to in Sections 9 and 10 of the Law.

Law 20 of 1902 amended this section by the insertion after the words "Cambridge Junior Local Examination" the words "or other examination or examinations of at least equal standard approved by the Governor in Privy Council."

Law 20 of 1908 further amended Section 4 of Law 31 of 1894 by inserting between the words "England" and "or" in the third line of sub-section 1 the following words:—"or possesses some other qualification of at least equal standard, approved by the Governor in Privy Council."

Law 15 of 1928 further amended Section 10 of Law 31 of 1894 by repealing the second paragraph thereof and substituting a person claiming to be entitled under this Law to become a Commissioned Land Surveyor by reason of possessing any of the qualifications prescribed by the Law shall apply to the Supreme Court or to one of the Judges thereof in Chambers if the said Court is not sitting and shall on production to such Court or Judges of satisfactory evidence of his possessing such qualifications be entitled to an order as aforesaid.

The sections of the law quoted below are those of greatest general importance:—

9—Any apprentice who has duly served his full term of three years in conformity with the provisions of this law may apply by way of motion to the Supreme Court for an order to be examined under the provisions of this law; and it shall be lawful for the Supreme Court, on being furnished with satisfactory proof, that such person is at least

twenty-one years of age and is of good character, and that he has duly served for three years under articles of apprenticeship duly executed and recorded, and has otherwise complied with the requirements of this Law, to make an order directing the Surveyor-General and a commissioned surveyor to be appointed by the Court to examine such person as to his qualifications to receive a commission as a surveyor of land.

10—Such examination shall embrace the theory and practice of land surveying and levelling, and the accurate and neat delineation to scale upon paper of the notes taken in the field, the practical use of the principal instruments used therein and their adjustments, and topographical drawing:—and if the result of such examination shall appear satisfactory to the examiners, they shall certify to the Supreme Court, or to one of the judges thereof, in chambers, if the said court is not sitting, that such person hath been found qualified, and the said court or judge shall thereupon cause an order to be entered up in the office of the registrar of the court authorizing such person to take out a commission to act as surveyor of land.

11—On presentation to the Governor of an attested copy of the said order or, in the case of a person apprenticed before the coming into operation of this law, of an order made under section 8 of Law 33 of 1869, the person named therein shall be entitled to receive a commission as a land surveyor, which commission shall be impressed with a stamp duty of thirty pounds in lieu of all other stamps and fees whatsoever, and shall be signed by the Governor, and shall be published in the "Jamaica Gazette;" Provided, that if the stamp duty of thirty pounds on articles of apprenticeship made and entered into before the coming into operation of this law shall have been already paid then such commission shall bear a stamp of one pound only.

13—Any commissioned surveyor who shall intentionally, or through negligence, carelessness, or culpable ignorance, make an incorrect survey, or deliver an incorrect plan of any land, shall be liable on the complaint of any person aggrieved thereby to have his commission as commissioned surveyor cancelled by order of a Judge of the Supreme Court, or to be temporarily suspended from the exercise of his office as a surveyor during such time as may be fixed by a Judge of the Supreme Court, or to incur a penalty not exceeding fifty pounds, and such surveyor shall further be required to repay any sums of money that he may have received from the complainant in consideration of such survey or plan, if it be so ordered by such judge.

PETROLEUM, CALCIUM CARBIDE, GUNPOWDER AND EXPLOSIVES.

RULES regarding Petroleum, Calcium Carbide, Gunpowder and Explosives are given in the "Handbook of Jamaica" for 1925.

BIRDS, FISH AND MAMMAL PROTECTION.

Birds—The indiscriminate destruction of fish in the rivers and streams of the island by the use of explosives and of poisonous and intoxicating herbs (of which latter there is great variety in Jamaica, and which are easily accessible to any one who wishes to make use of them), and the wholesale destruction of wild birds of all kinds in and out of season which prevailed, rendered a law for the protection of birds and fish absolutely necessary, Law 32 of 1885 was therefore passed by the Legislature.

In this law certain birds which were being rapidly exterminated on account of the value of their plumage, as well as others that are specially useful to agriculture as insect destroyers, are now absolutely protected, while certain edible birds, fishes and creatures have now a close season provided, during which it is unlawful to kill them.

The protected birds are divided into two classes: those named in the one class are protected all the year round and those named in the other class are protected during certain months only.

A general Consolidating Law, 33 of 1914, repealed, previous legislation on this subject and enacted under Section 2 of the Law, Schedule I, the following:—

Sec. 2—(1) Any person who shall kill, wound or take, any bird or the eggs of any bird specified in the first Schedule to this Law, or who shall have in his possession any such bird killed, wounded or taken, or the eggs of any such bird taken, after the passing of this Law, or any part thereof, shall be guilty of an offence against this Law.

No fish can be taken in any river or stream between the 1st June and the 1st October, and any pot, net or engine used in any river or stream during that period may be destroyed by any person. In July, 1899, the Governor acting under Law 16 of 1889 declared that the provisions of Sec. 6 of Law 32 of 1885, should cease to apply so far as the Cabaritta River in Westmoreland and the adjoining morass are concerned, to Mudfish, Blackfish, Godamies and Eels. It is unlawful to use at any time any method of poisoning, stupefying, or intoxicating fish, or to destroy fish by explosion of dynamite or other explosive substance, in any harbour, bay, creek, pond, river or stream, or to make use of any seine, net, pot, or engine for catching fish with meshes or spaces of less than 1½ inches between knot and knot, or bar and bar. In any harbour or bay (but not in any river or stream) a cast or shrimp net not above 2½ fathoms long and not joined to any other net may be used. Land turtle are not protected.

Every offence against the Laws (32 of 1885 and 4 of 1887) is punishable on summary conviction with a fine not exceeding five pounds.

Mammals. On the 5th July, 1920, the Governor under section 3 of Law 33 of 1914, declared that Coneys should be included in the Second Schedule to the Law and that the close season for Coneys shall be from the 1st January to the 31st December in each year.

THE BLUE MOUNTAIN PEAK.

THE Blue Mountain Peak—an altitude of 7,388 feet, the highest point in the British West Indies, was at one time a somewhat arduous undertaking as there was no riding road to the summit, and the ascent had to be made on foot by a very steep and ill-defined track. Through the generosity of Governor Sir Henry Norman, and a few gentlemen having property in the district, a riding road to the Peak was constructed, and the ascent can now be made, in good weather, on horseback or on foot.

Two days suffice for the trip. The first part of the journey, a distance of nine miles to Gordon Town, can be made by automobile or buggy; but the electric cars to Papine, will take the visitor to within a short distance of Gordon Town, and vehicles are obtainable thence to Gordon Town, where riding ponies can be procured. Buggies *must* be ordered in advance from Bolton's stables, Gordon Town, or his Duke Street Office. Another way of doing the trip is to go by automobile from Kingston to Mavis Bank, via Gordon Town, a distance of about 17 miles and the remainder of the journey—about 12 or 13 by horse or mule—in all about 30 miles from Kingston. There is a small hut erected for the shelter of those who desire to spend the night on the Peak to witness the sunrise. Extensive views of the south, north and eastern coasts of the island may be obtained on a clear day—and the coast of Cuba is sometimes visible to the north.

Information as to this trip may be obtained from the Tourist Bureau of the Tourist Trade Development Board, 85 Barry Street, Kingston.

THE MORANT CAYS AND PEDRO CAYS.

ABOUT the year 1825, some Jamaica planters in St. Thomas-in-the-East planted coconut trees on these cays for the use of shipwrecked sailors. The coconut trees have all died and are now extinct.

The Morant Cays and the Pedro Cays were taken possession of on behalf of the British Crown in the years 1862 and 1863, respectively, and it was at first intended that they should be annexed to Jamaica. It was, however, subsequently decided not to annex these cays to any colony but to give the Governor of Jamaica power to "deal with" all guano islands or cays within the West Indian naval station which were not already dependencies of any British Colony and which were, or might be, declared to be subject to British Sovereignty. Accordingly Letters Patent were issued in June, 1864, authorising the Governor of Jamaica to grant leases of and licenses to take guano from such islands. Leases have under this authority from time to time been granted by the Governor of Jamaica to different persons.

In 1882 complaints were made by Jamaicans who were then gathering guano that they had been subjected to outrages by an American vessel. Accordingly on the 12th October, of that year Commander the Hon. W. J. Ward, acting on the instruction of Commodore Dunlop, formally took possession of the Island for the British Crown.

The original intention was later carried out, and by Letters Patent under the Great Seal of the United Kingdom these cays were formally annexed to the Colony of Jamaica, so as to give the Governor, Courts of Law and Magistrates full jurisdiction over them, and the then Governor, Sir Anthony Musgrave, on the 9th of May, 1882, under the authority of those Letters Patent, issued a Proclamation declaring that the date of annexation should be the 1st of June, 1882. For judicial purposes these cays form part of the parish of Kingston.

The Morant Cays are situated about 33 miles to the south-east of Morant Point, Jamaica, and consist of three small islets. The sea birds arrive at these cays in great numbers during March, and in April the islets are covered with their eggs, which are collected and conveyed in schooners to Jamaica; later in the summer, turtle are caught, but the supply is becoming scarcer every year.

The Pedro Cays are situated some 40 or 50 miles to the S.W. of Portland Point on the

south coast of Jamaica and consist of four cays or islets, known, respectively, as North-east, Middle, South-west and South Cays. Temporary huts have been erected on these cays and coconut trees have been planted on the N.E. and S.W. Cays.

The Morant Cays and the Pedro Cays are leased to the Jacobs' Commercial and Shipping Agency, Ltd., Kingston.

PLAGUE, CHOLERA AND YELLOW FEVER.

INSTRUCTIONS to Captains of vessels particularly when there is no doctor on board to enable them to carry out the provisions of the International Sanitary Convention signed at Paris on 3rd December, 1903, with respect to Plague, Cholera and Yellow Fever, are given in the Handbook for 1925.

ELECTION INFORMATION.

THE duty of registering the persons entitled to vote at elections for Members of the Legislative Council and of the Parochial Boards (including the City Council of Kingston) is discharged by the Collectors of Taxes of the several parishes.

The lists are revised and settled in March and April of each year at Courts held for the purpose by the Resident Magistrates who are the "Revising Judges."

Under Her Majesty's Orders in Council, of 3rd October, 1895, each parish of the island now of itself constitutes an electoral district having the right to elect a member to the Legislative Council.

Returning Officers for Legislative Council elections are appointed by the Governor under Section 2 of Law 21 of 1884, and for Parochial General Elections under Section 12 of Law 17 of 1901. At Bye-elections for the Parochial Board the Returning Officer is appointed by the Chairman of the Board.

1. MEASURE OF LENGTH.

12	Inches	=	1 Foot
3	Feet	=	1 Yard
5½	Yards	=	1 Rod or Pole
40	Poles	=	1 Furlong
8	Furlongs	=	1 Mile
69 1/510	Miles	=	1 Degree of a Great Circle of the Earth.

An inch is the smallest lineal measure to which a name is given, but sub-divisions are used for many purposes. Among mechanics the inch is commonly divided into *eighths*. By the officers of the revenue and by scientific persons it is divided into *tenths*, *hundredths*, &c.

Particular Measures of Length.

A Nail	=	2¼ Inches	} Used for measuring cloth of all kinds.
Quarter	=	4 Nails	
Yard	=	4 Quarters	
Ell	=	5 Quarters	
Hand	=	4 Inches	} Used for height of horses.
Fathom	=	6 Feet	
			} Used in measuring depths.
Link	=	7 In. 92 hddths	
Chain	=	100 Links or 66 ft.	Used in Land Measure to facilitate computation of the content, 10 square chains being equal to an acre.

2 MEASURE OF SURFACE.

144	Sq. Inches	=	1 Sq. Foot
9	Sq. Feet	=	1 Sq. Yard
30½	Sq. yards	=	1 Perch or rod
40	Perches	=	1 Rood
4	Roods	=	1 Acre
640	Acres	=	1 Sq. Mile

3. MEASURE OF SOLIDITY AND CAPACITY.

DIVISION I.—SOLIDITY.

1,728	Cubic Inches	=	1 Cubic Foot.
27	Cubic Feet	=	1 Cubic Yard.

DIVISION II.—CAPACITY.

4	Gills	=	1 Pint	=	34½	—	nearly
2	Pints	=	1 Quart	=	69½	—	
4	Qrts.	=	1 Gallon	=	277½	—	
2	Galls.	=	1 Peck	=	554½	—	
8	Galls.	=	1 Bushel	=	2218 1-5	—	
8	Bush.	=	1 Quarter	=	10½	—	nearly
4	Qrs.	=	1 Load	=	51½	—	

The four last denominations are used for dry goods only. For liquids several denominations have been heretofore adopted, viz:—

For Beer, the Firkin of 9 Gallons, the Kilderkin of 18, the Barrel of 36, the Hogshead of 54, and the Butt of 108 Galls. Flour is sold nominally by measure but actually by weight reckoned at 7lbs. avoirdupois to a gallon.

4. MEASURE OF WEIGHT.

DIVISION I.—AVOIRDUPOIS WEIGHT.

27½	Grains	=	1 Drachm	=	27½	gr.
16	Drachms	=	1 Ounce	=	437½	—
16	Ounces	=	1 Pound (lb.)	=	7000	—
28	Pounds	=	1 Quarter (qr.)			
4	Quarters	=	1 Hundredweight (cwt.)			
20	Cwt.	=	Ton			

This weight is used in almost all commercial transactions and in the common dealings of life.

The particular weights belonging to this Division are as follows:—cwt. qr lb.

14	Pounds	=	1 Stone	=	0	0	14	} Used in the Trade
2	Stone	=	1 Tod	=	0	1	0	
6½	Tod	=	1 Wey	=	1	2	14	
2	Weys	=	1 Sack	=	3	1	0	
12	Sacks	=	1 Last	=	39	0	0	

DIVISION II.—TROY WEIGHT.

24	Grains	=	1 Pennyweight	=	24	gr.
20	Pennyweights	=	1 Ounce	=	480	—
12	Ounces	=	1 Pound	=	5760	—

These are the denominations of Troy Weights when used for weighing gold, silver, and precious stones, except diamonds. But Troy Weight is also used by Apothecaries in compounding medicines, and by them the ounce is divided into 8 drams, and the dram into 3 scruples, so that the scruple is equal to 20 grains.

For scientific purposes the grain only is used; and sets of weights are constructed in decimal progression from 100,000 grains downwards to 1.100th of a grain.

The *carat*, used for weighing diamonds, is 3½ grains. The term, however when used to express the fineness of gold, has a relative meaning only. Every mass of alloyed gold is supposed to be divided into 24 equal parts; thus the standard for coin is 22 carat fine, that is, it consists of 22 parts of pure gold and 2 parts of alloy.

5. ANGULAR MEASURE.

OR DIVISIONS OF THE CIRCLE.

60	Seconds	=	1 Minute
60	Minutes	=	1 Degree
30	Degrees	=	1 Sign
90	Degrees	=	1 Quadrant
360	Degrees or 12 Signs	=	1 Circumference.

WEIGHTS AND MEASURES, *continued.*

6. MEASURE OF TIME.

60 Seconds	= 1 Minute
60 Minutes	= 1 Hour
24 Hours	= 1 Day
7 Days	= 1 Week
28 Days	= 1 Lunar Month
28, 29, 30, or 31 days	= 1 Calendar Month
12 Calendar Months	= 1 Year
365 Days	= 1 Common Year
366 Days	= 1 Leap Year

In 400 years 97 are leap years and 303 common.

THE METRIC SYSTEM.

WEIGHTS.

[The Metric unit of weight is the GRAMME = 15.44 grains English. It is the weight of cubic centimetre of distilled water.]

Miligramme	= 1000th of a gramme	= .0154 grains English
Centigramme	= 100th "	= .1544 "
Déctigramme	= 10th "	= 1.544 "
GRAMME	= 15.44 "
Decagramme	= 10 grammes	= 154.4 "
Hectogramme	= 100 "	= 1544 "
Kelogramme	= 1000 "	= 32½ oz. Troy = 2.2057 lbs. av.
Myriagramme	= 10000 "	= 321½ oz. " = 22.057 "

* * * 51 Kilogrammes make 1 cwt. and very nearly ½ lb. besides.

MEASURES.

Length.

[The Metric unit of linear measure is the METRE = 39.3708 inches. It is the 10 millionth part of the arc of the meridian from the equator to the pole.]

Millimètre	= 1000th of a metre ..	= .03937 inches
Centimètre	= 100th " ..	= .39371 "
Décimètre	= 10th " ..	= 3.93708 "
METRE	..	= 39.3708 = 3.2809 ft.
Décamètre	= 10 metres ..	= 32.809 ft. = 10.9363 yds.
Hectomètre	= 100 " ..	= 328.09 ft. = 109.363 yds.
Kilomètre	= 1000 " ..	= 1093.63 yds. = 621.38 miles
Myriamètre	= 10000 " ..	= 10936.33 yds. = 6213.82 miles

NOTE 1—Since the fraction of $\frac{1}{5}$ is equal to the decimal .625, the Metric kilomètre differs but little from the $\frac{1}{5}$ ths of an English mile; the difference being .625— $\frac{1}{5}$ = 100362, which is less than the 4-1000th, or the 1-250th of a mile; so that by estimating a kilomètre at $\frac{1}{5}$ ths of an English mile, we make an error in excess, of less than one mile in 250 miles. For the ordinary purposes of comparison therefore we may regard 8 kilomètres as equal to five miles; so that the distance between any two places, expressed in kilomètres, may be converted into English miles, near enough for general itinerary objects, by multiplying the number of kilomètres by 5, and then dividing the product by 8; as in the instance in the margin, where we see that 40 kilometres make 25 miles.

Surface.

[The Metric unit of superficial measure is the *ARE* = 119.603 sq. yds. It is the square of 10 mètres; that is, of a *décamètre*.]

Centiare = 100th of an <i>are</i> = 1 square mètre =	1.196 sq. yds.
<i>ARE</i> =	119.603 "
Decare = 10 ares =	.2471 acres
Hectare = 100 ares =	2.471 "

Capacity.

[The Metric unit of capacity is the *LITRE* = 61.02705 cubic inches. It is the cube of one-tenth of a mètre, that is, of a *décimètre*.]

Millitre = 1000th of a litre = 1 cubic centrimètre =	.06103 cub. in.
Centilitre = 100th " =	.6103 "
Décilitre = 10th " =	6.1027 "
<i>LITRE</i> =	61.02705 "
Décalitre = 10 litres =	610.2705 "
	2.201 gallons
Hectolitre = 100 litres =	3.53166 cub. ft. = 22.0097 gal.
Kilolitre = 1000 " = a cub. metre =	35.31658 " = 220.0967 "
Myrialitre = 10000 " =	353.1658 " = 2200.9667 "

In the measurement of *solids*, a cubic metre is called a *stère*, a 10th part of which is a *Décistère*, and 10 *stères* is a *Décastère*.

It will be seen, from the preceding Tables of Weights and Measures, that the *Mètre*,—the unit of *length*, is an element entering into even the system of *weights*, as well as into linear, superficial, solid, and quantitative measurements. It is on this account that this system of weights and measures is called the *METRIC SYSTEM*: it is at the same time a *Decimal* system; because, proceeding from the fundamental unit, the ascending gradations are uniformly at a tenfold rate, and the descending gradations are uniformly by *tenths*.

TURKS AND CAICOS ISLANDS.

GEOGRAPHICAL.—The Turks and Caicos Islands lie between 21° and 22° N. latitude and 71° and 72° 50' W. longitude, at the south-east end of the Bahama Islands, and just below the tropic of Cancer. They lie about 90 miles to the north of the Dominican Republic, about 720 miles to the south of Bermuda, and about 450 miles to the north-east of Jamaica.

They consist of two groups of islands, separated by a deep-water channel about 22 miles wide known as the Turks Islands passage. The Turks Islands lie to the east of the passage and the Caicos Islands to the west. The area of these islands is estimated to be about 166 square miles, but, as no thorough survey of the group has ever been made, this figure may be below the mark.

The Turks Islands consist of two inhabited islands, Grand Turk and Salt Cay, four uninhabited islands or cays, and a large number of islets and rocks. These islands derived their name from a species of cactus found there by the early settlers, the scarlet head of which was said to resemble a Turkish fez.

The Caicos Islands, which lie to the west of the channel, surround the Caicos Bank, a triangular shoal 58 miles long on its northern side and 56 miles long on its eastern and western sides, respectively. The northern and eastern sides of the bank are bounded by a chain of islands, separated from each other by narrow passages or channels.

HISTORICAL.—The Turks and Caicos Islands were discovered in 1512 by Juan Ponce de Leon while on a voyage from Puerto Rico. These islands remained uninhabited, probably on account of the sterility of the soil and the scanty rainfall, until the year 1678, when a party of Bermudians arrived and established the salt raking industry. From that date onwards parties of Bermudians used to resort annually to the Turks Islands to rake salt, arriving about the month of March and returning to Bermuda about November when the salt raking season was over. Several attempts were made by the Spaniards and the French to obtain possession of the islands. In the year 1763 the King was pleased to appoint an agent, Mr. Andrew Symmer, "to reside there and by his residence on the spot to insure the right of the island to His Majesty." By an Order in Council in 1781 regulations were approved for the management of the salinas (salt ponds) and for the preservation of order in general amongst the inhabitants. In 1790 Colonel Alexander Murray arrived as the agent of the Crown, and in 1799 an act was passed by the Bahama Legislature which placed the Turks and Caicos Islands under the Bahama Government, and so they remained until 1848 when, in answer to a petition from the inhabitants, the Queen granted a separate charter to the "Turks Island and the Islands and Cays commonly known as the Caicos Islands." Under this charter the islands had an elective Legislative Council and a President administering the government, but this system was found burdensome in the altered circumstances caused by the fall in the price of salt, and in 1873, a petition was presented to the Queen praying for the abrogation of the charter. The islands were then annexed to Jamaica and still remain one of its dependencies. Under this new arrangement the government is administered by a Commissioner as chief executive officer, who is also President of the Legislative Board and Judge of the Supreme Court.

CONSTITUTION.—The Legislature consists of a Legislative Board comprising the Commissioner as President, 3 official members, and 4 unofficial members nominated by the Crown. The Governor of Jamaica has a supervising power over the local government and his assent to the ordinances of the Legislative Board is necessary. Laws passed by the Legislative Council of Jamaica which are in express terms made applicable to the Turks and Caicos Islands take effect there. The Supreme Court of Judicature of Jamaica has jurisdiction in matrimonial and divorce causes and has been constituted a Court of Appeal from the Supreme Court of the Dependency.

CLIMATE.—Although the islands are within the tropics the climate is not unhealthy. The severe heat in the hot months is tempered by the constant sea breezes. The temperature ranges from 60° minimum to 93° maximum. The average rainfall in the year 1928, from observations taken at five stations throughout the islands, was 26.56 inches. The maximum precipitation was recorded at Cockburn Harbour measuring 30.89 inches and the minimum at Grand Turks, registering 23.07 inches. The average annual rainfall, during the five years 1924-1928 amounted to 25.13 inches.

Grand Turk.—Grand Turk is situated on the eastern side of the Turks Islands passage, and is approximately 7 miles long and $1\frac{1}{2}$ miles wide. It is the capital, and the Commissioner resides there. The island has a population of about 1,568, of whom about four-fifths are of African descent. The only settlement is Cockburn Town, on the western side of the island, where almost the entire population live. The town contains the various public offices and the prison; several stores, a market, a public library and reading room, four churches (two Anglican, one Wesleyan, and one Baptist), and Masonic and other society lodges. There is a local public telephone system connecting the public offices, business places and private residences. Vessels lie at anchor about 500 yards from the shore, and cargoes are conveyed between ship and shore by lighters. There is a lighthouse at the north-east end of the island. The elevation of the light is 108 feet above sea-level. This light can be seen 15 miles off in clear weather. There is a range of low hills running almost the entire length of the island on the eastern side, the greatest elevation being about 75 feet. The island is covered with low, scrubby vegetation, with stunted, hardy trees scattered here and there. The principal industry in Grand Turk is the production and export of salt, for which there is a good demand in the United States and Canada for meat packing and fish curing purposes. The salt ponds cover about 230 acres. There are 5 salt crushing mills on the island. Automobiles and horse-drawn carriages are used as conveyances. Cricket and football are played under the management of the Athletic Club, and tennis is played on hard courts throughout the year.

Salt Cay.—Salt Cay, which lies about 7 miles to the south-west of Grand Turk, is the only other inhabited island of the Turks Islands group. The area is about 4 square miles. The population, about 360, depend almost entirely on the salt ponds, 120 acres in extent, for their living.

South Caicos.—This island is situated at the south-east end of the Caicos Island and it is the only island of that group in which the salt industry is carried on. The area is about 8 square miles and the salt ponds (including reservoirs) cover about 400 acres. The population of South Caicos is about 650. The Government is represented by a District Commissioner, who resides at Cockburn Harbour (also known as East Harbour).

East Caicos.—This island, the north-eastern of the group, was formerly devoted to the cultivation of sisal and the production of fibre. The industry was abandoned in 1919, and the island is now uninhabited.

Middle Caicos.—Separated by a narrow passage from East Caicos lies Middle Caicos or, as it is sometimes called, Grand Caicos. This island, the largest of the Caicos group, is 25 miles long and 12 miles wide. On it are situated the villages of Lorimers, Bombarra and Conch Bar, with a total population about 780. The inhabitants are engaged in agriculture including cotton growing.

North Caicos.—To the north-west of Middle Caicos lies North Caicos, an island about 12 miles long, with fertile soil. The principal settlements are Kew and Bottle Creek. The population of this island is about 1,400, mostly engaged in agriculture and fishing.

Parrot Cay, Dellis Cay, and Others.—Lying to the west of North Caicos are several small cays, the principal ones being Parrot Cay and Dellis Cay. The cultivation of cotton was abandoned at Parrot Cay, 1925.

Providenciales or Blue Hills.—Continuing the chain of islands, which in the form of a semicircle encloses the eastern and western sides of the Caicos Bank, and to the westward of the islands just mentioned, is the island of Providenciales, or Blue Hills, one of the largest of the Caicos group. This island is 17 miles long by 12 miles wide, and contains a population of about 730. On this island sponge fishing is carried on.

West Caicos.—West Caicos, also known as Belle Isle, is situated about 12 miles to the south-west of Providenciales. This island is about 8 miles long and 2 miles wide. A large amount of money was spent in an attempt to develop the resources of this island, which attempt was abandoned, and the island is now uninhabited.

Vital Statistics.—The estimated population of the Dependency at the end of 1928 was 5,504.

The white population, numbering about 200, is composed almost entirely of the descendants of the Bermudians. During the year 1928, 183 births were registered, giving a birth-rate of 33.1 per 1,000. During the same period 91 deaths were recorded, the death rate being 14.4 per 1,000 30 marriages were registered.

The value of the trade of the Dependency for the last 5 years was as follows:—

		1924	1925	1926	1927	1928
		£	£	£	£	£
Imports	43,253	41,573	48,850	47,693	41,776
Exports	31,495	39,062	35,936	24,064	31,755
<hr/>		<hr/>				
Total	..	74,748	80,632	84,786	71,756	73,521
<hr/>		<hr/>				

Imports and Exports.—The value of the imports during the year 1928 amounted to £41,676. The value of the goods imported from the United Kingdom was £4,431; from British Dominions, £4,012; and from foreign countries, £33,323. The imports consisted mainly of general merchandise, including food, drink and clothing.

The exports were valued at £31,755. Shipments to the United Kingdom were valued at £1,443. The value of the exports to Canada was £13,023, and to the United States, £9,550. The bulk of the exports consisted of salt (coarse and fishery).

Finance.—The currency consisted of British gold and silver coins and currency note issued by the local Government, but gold coins were scarce and seldom seen. The Government paper currency in circulation amounted to £6,000; the notes being of the following denominations: five shillings, ten shillings, and one pound. The Government Savings Bank had 922 accounts open, with £19,047 on deposit, at the end of the year. The investments amounted to £18,321. There were no private banks doing business in the Dependency.

Education.—The sum of £840 was granted in 1928 to the Board of Education for the maintenance of the primary schools throughout the Dependency. There were nine Government elementary schools supported in this manner. The number of scholars whose names were enrolled was 854 and the average attendance was 622.

The Secondary School at Grand Turk received a grant from the Government of £150. The average attendance at this school was 28.

During the year 1924, a Centre for the Cambridge University Local Examinations was established at Grand Turk and examinations have been held each year in December.

Communication.—Mails to and from the United Kingdom and other parts of the world were despatched and received via New York about twice a month by the steamers of the Clyde, Columbus, Royal Netherlands West India Mail lines. There is occasional communication with Jamaica by the Elders and Fyffes Line.

The Government radio-telephone service enabled messages to be transmitted between Grand Turk, Salt Cay, Cockburn Harbour and passing ships.

The cable of the Direct West India Cable Co. Ltd., between Halifax and Bermuda and Jamaica touches at Grand Turk and connects the Dependency with other telegraphic systems of the world. The company supplies a News Bulletin daily, for which the Government pays a yearly subsidy of £120. In 1924, a new submarine telegraph cable was laid between Barbados and Grand Turk.

CAYMAN ISLANDS.

The following account is based on the Annual Report of the Dependency for 1928:—

Geographical.—The Cayman Islands consist of three small islands in the Caribbean Sea, lying north-west of Jamaica, and approximately mid-way between that island and the south-west coast of Cuba. Sixty miles intervene between Grand Cayman and Little Cayman, and ten miles east of the latter is Cayman Brac. The group lies between 79.83 and 81.30 west longitude and the 19th and 20th parallels of north latitude. Grand Cayman the largest of the islands, is 17 miles in length from east to west, four miles in width at the east and seven at the west. No part of the island is more than 50 feet above the surrounding ocean. Cayman Brac is 11 miles long by one and a quarter miles at its widest. Traversing its length from east to west is a central ridge of rock with precipitous sides, 150 feet high at the eastern end and sloping to the general level a few feet above the sea at the western end. Water-worn caverns are noticed along the entire length of this ridge locally called the Bluff, indicating that the low land around the base, much the smaller part of the island's area, has been recently, in a geological sense, elevated above the sea. Little Cayman, the smallest of the group, is flat and largely a sand ridge above the surrounding ocean. There are no outlying cays or reefs. The 100 fathoms ocean depth closely encircles the islands. A basin in the ocean floor, known as Bartlett's Deep and said to be one of the deepest areas in the Caribbean, lies parallel with and south of the islands from 25 to 50 miles off shore.

Historical.—The islands were discovered by Columbus on the 10th May, 1503, but were not occupied by the Spaniards. They were first called Las Tortugas, on account of the number of turtle in the surrounding waters. The present name is supposed to be derived from "caiman"—alligator—this reptile being at one time numerous in the smaller islands. Settlement flowed from Jamaica in the first half of the 18th century; but many of the present inhabitants bear the surnames of British seamen wrecked either on the islands or on the neighbouring coast of Cuba who have remained domiciled in the Dependency.

Constitution.—In the early days of settlement public affairs were managed by the Justices of the Peace, appointed by the Governor of Jamaica, acting with and under the direction of a locally elected "governor." To this body elected vestrymen were subsequently added, and in 1833 a *Custos* was commissioned. In 1863 an Act was passed by the Imperial Parliament (26 and 27 Vic. chapter 31) recognising the existence of facts and resolutions passed by the local body and validating such as should be subsequently assented to by the Governor of Jamaica. As provided in the Imperial Act, the Legislature of Jamaica may make laws for the peace, order and good government of the Dependency, and may amend or repeal any of the laws locally passed. Under the provisions of Jamaica Law 24 of 1898, as amended by Law 33 of 1920, the Governor of Jamaica has power to appoint a Commissioner to administer the affairs of the Dependency. The Commissioner

performs the duties of Collector-General and Treasurer, and presides in the Grand Court, where when sitting alone, he has the powers of three Justices of the Peace. The Assembly of Justices and Vestry consists of the Commissioner as President, twenty-two Justices named in a General Commission of the Peace, and twenty-seven elected Vestrymen representing the several districts. Five Justices and eight Vestrymen form a quorum. There is an appeal from the Grand Court of the Cayman Islands to the Supreme Court of Judicature of Jamaica; and this Court has exclusive jurisdiction in matters of divorce.

Geological Survey.—In 1924, Dr. C. A. Matley, D.Sc., Government Geologist of Jamaica, visited the Dependency for the purpose of studying its geology. Apart from its scientific interest, the geology of the islands was one of local speculation, for in the previous year an oil-pro prospector, impressed by the conformation of the land in its relation with the surrounding ocean floor, had visited the islands and shown some activity in securing, prospecting and boring rights over large areas of land. Dr. Matley describes the islands as being the only projecting peaks of the submarine Cayman Ridge which extends from the Sierra Maestra Range of Cuba to the Misteriosa Bank in the direction of Honduras, with the exposed surfaces composed of a fairly hard semi-crystalline massive white limestone, a part of the white limestone formation of Jamaica, forming the central and more elevated portion of each island, and a younger calcareous formation, an outer and lower coastal platform, made up of reef-building corals, mollusca, corals, sand and marl with a hard crust due to cementation by carbonate of lime.

Emigration and Immigration.—Emigration of others than the sea-faring population has increased to the Central American Republics, but the total is inconsiderable and the absence temporary. There is no immigration other than the return of natives after varying terms of absence.

Public Health and Sanitation.—The staple food of the people consists of cassava, yams, sweet potatoes and bread-fruit, all locally grown, and the ordinary wheat and corn products by way of imports. These constitute an almost entirely starchy diet which induces mild digestive disorders.

Vital Statistics.—There were 189 births in 1928 (36 per thousand) and 58 deaths (11 per thousand). The population is estimated at 5,750 in 1928.

Imports and Exports.—The imports for the year (£38,793) are below the average of the previous five years, but, if the inflated years 1921-22 are ignored, about normal.

The exports (£13,289) are substantially above the normal average for the previous half decade, £10,120 being from the turtle fisheries.

Trade, Agriculture and Industry.—The values of the imports and exports are both below the averages of the previous five years. If, however, the abnormal trade in spirits in 1923 and 1924 (of which there is now none) be disregarded, the imports are somewhat below the normal average, while the exports show an advance.

The catch of green turtle, returned as 2,416 of merchantable size, and the price obtained (£2 each), were about the average. The hawksbill fishery about 1,500 head of a value of £5,295.

The export of thatch-palm rope was £1,647 in the year under review. This small industry provides an aid to livelihood to many, who, being without a vigorous bread winner, would otherwise be unable to maintain themselves.

The following tabulation shows the variance in value of imported and exported merchandise:

	Imports.	Exports
	£	£
1927 ..	40,964	13,422
Average 5 years ..	43, 56	12,457
1928 ..	38,793	13,289

The excess of imports over exports is balanced by the remitted wages of seamen in every part of the world, the earnings of island vessels not in the turtle fishery and the contributions to dependents here of men working ashore in the United States and in the ports of Central America.

Two cattle dips were in operation throughout the year and a third was opened in October. Four dips were operated in 1928. Material benefits in reduction of tick pest have accrued from their use.

Shipping.—Georgetown is a Port of Registry, having on its register 53 small sailing vessels and 12 small motor driven craft, with a total tonnage of 3,367 tons. Five vessels with a total tonnage of 101 were built in 1928.

In 1928, 204 sailing vessels entered, and 217 cleared from the Dependency, the total tonnage being 29,309.

Banking Facilities.—There are no branches of banks in the Dependency. Remittances are made from abroad by drafts on American banks or branches of banks established in Jamaica, which are cashed in the shops and serve as remittances in payment for imports.

Education.—Nine Government primary schools were in operation throughout 1928. These, with ten private schools, had 1,081 pupils enrolled and an average daily attendance of 850. The total expenditure in the Government schools was £1,672. There are no aided schools and no secondary schools.

Meteorological.—Observations are taken at Georgetown only. The rainfall amounted to 41.87 inches. The heaviest rainfalls were in October (10.39 inches) and August (6.89 inches) and the largest single day's rain (July 1) was 4.5 inches. The air temperature ranges from 70 to 80 degrees Fahrenheit in the months October to March, and 10 degrees higher in summer. No cyclonic disturbances approached the islands in the year under review.

Communications.—In the year under review a long desired mail, passenger, and freight service, by motor vessels specially built, was established with Jamaica, 15 voyages per annum. There is also frequent intercourse with ports in Florida, Cuba, and Honduras by sailing vessels. Roads suitable for vehicular traffic connect the more important settlements, and from these branch a system of bridle paths.

Postal and Telephone Services.—Foreign mails are received through Jamaica and the Isle of Pines, Cuba; and all outgoing vessels to whatever port directed are the bearers of mails.

DROUGHT CONDITIONS.

After suffering from a deficiency of thirteen inches of rainfall in the year 1928, the Island rainfall, again, for 1929 shewed a marked shortage of sixteen inches: registering a total of 60 ins., as against the normal of 76 ins. But the severity of the drought in 1929 was keenly felt, during the first part of the year, in the southern sections of Manchester, Clarendon and St. Catherine. In Southern Manchester the rainfall from December, 1928, to March, 1929, was about one-half, in Southern Clarendon about three-quarters and in Southern St. Catherine less than one-half of the normal. The number of rainy days was also somewhat below the average. The parish of Kingston had only 3.68 ins. of rain from December, 1928, to July, 1929 (8 months) representing a mean of only 0.46 inch per month. Lower St. Andrew had a similar experience of shortage. The drought also extended to some of the remainder of the parishes (Northern Division) to a lesser severity.

The seriousness of the conditions of the famine stricken districts necessitated the Secretary of the Board of Supervision, being commissioned by the Government to concentrate all efforts in order to alleviate, and direct relief to, the suffering peasantry, with the assistance of the several Parochial Boards, concerned.

Appreciable rains fell from about August to December, 1929, which considerably recovered the acute situation.

Returning to Haiti he entered on a political career, but, being on the losing side, he came to Jamaica. During the epidemic of influenza although not registered to practise in Jamaica, he did what he could to alleviate the sufferings of needy patients. He spent the years from 1923 to 1926 in Paris studying medicine and then qualified in England to practise in Jamaica, where he was successful until November, 1928, when he returned to Paris where he died on December 1st.

BRIGADIER-GENERAL J. A. COXHEAD, C.B., late R.A., the sixth son of John Coxhead, of London, was born on March 10th, 1851, and went to Merchant Taylors' School in 1862. He entered the Royal Artillery from Woolwich in 1872. From 1883 to 1887 he was private secretary and A.D.C. to Sir Henry Norman, Governor of Jamaica. In 1895 he served with the Chitral Relief Force, and in the South African War he commanded the Royal

Artillery of the Indian Contingent till the relief of Ladysmith; being made C.B. in 1900. In 1903-4 he was Assistant Military Secretary at Headquarters; from 1904 to 1907 Brigadier-General, R.A., Northern Command India, and Inspector of Artillery, Northern Army, India, till he went on retired pay in 1908. He died at Walsingham, Norfolk, on the 27th of September.

REV. DONALD DAVIDSON, a native of Inverness, was educated at Glasgow University. In 1888 he came to Jamaica as successor to the Rev. John Radcliffe, pastor of the Scotch Kirk, Kingston. He left Jamaica for work in his native Scotland in 1895. For many years he ministered at Invergorrie near Dundee. He died on the 16th of February.

MADAME CLARA DEMONTAGNAC, nee MYERS, was born in Hampshire, England in 1842. She received her musical education under the best masters in London, and soon rose to fame, singing at the Albert Hall, St. James' Hall, the Crystal Palace and at most musical centres throughout Great Britain. Compelled to leave England for a warmer climate, she came to Jamaica in 1896 and established classes in singing and voice training. She lectured at the Institute of Jamaica on the great musical composers, and when in 1908, the Secretary of the Institute undertook to represent the Associated Board of the Royal Academy of Music and the Royal College of Music she supported the movement warmly. She was the first Honorary Representative of the Royal Academy of Music in Jamaica. She produced in Jamaica the "Belle of New York." This was followed in 1904 by the "Messiah" for the production of which three artistes were brought from England and a pipe organ built which was subsequently presented to the city of Kingston. Mr. DeMontagnac sang the bass solos. About this time she married Mr. Noel DeMontagnac. She and her husband went to England after the Earthquake of 1907, when she was elected an Associate of the Royal Philharmonic Society. At the close of the War, she and her husband returned to Jamaica; and with the assistance of her husband organized in 1928 the first Symphony Orchestra of Jamaica, the performance of which she conducted. When the Musical Society of Jamaica was formed in 1926, Madame DeMontagnac was made an honorary member. She died in Kingston on the 16th of May.

NOEL DEMONTAGNAC, the son of Gustav de Montagnac, was born in Jamaica in 1870. In early life he was employed in the Army Ordnance Department. When Miss Clara Myers reached Jamaica in 1896 his fondness for music attracted him to her, and the friendship ended in marriage and close and steadfast mutual labour in the cause of Art. After the Earthquake of 1907, Mr. deMontagnac and his wife went to England, when he took up insurance work, which he continued on their return to Jamaica in 1917. His talents were of a versatile character and he did good work in literature, music and photography; his best known literary production being "Negro Nobodies," one of the volumes of the "Oversea Library." His colour-photography was of a high order. He was Musical Critic to the "Gleaner" for a number of years and afterwards to the "Daily Mail." He also wrote a series of articles on musical subjects. He also wrote some poems of merit. Under the *nomme de guerre* of "Dardenella" he contributed for some years articles to the "Gleaner" on styles and fashion of dress and social notes. He survived the loss of his wife but a few months; he died in Kingston on the 23rd of October.

JOSEPH IVANHOE GADPAILLE, son of Charles Gadpaille (of France), was born at Kingston on the 15th of May, 1853. He was educated at the Collegiate School, Kingston. He engaged in many enterprises in connection with the French Panama Canal Company Works, about the year 1881. He became accountant to the Boston Fruit Company under Captain Baker, in the parish of St. Thomas. He was a member of the Parochial Board of St. Thomas for several years. He was subsequently a member of the Mayor and Council of Kingston, and the Parochial Board of St. Andrew up to the time of their dissolution in 1922. He was Consular Agent for France from 1911 to 1926 and a commercial Agent.

He died in Kingston on the 10th of December, and was buried in the Roman Catholic Cemetery.

WILLIAM ABRAHAM HEYLIGER came to Jamaica and entered the Civil Service in 1883. After serving as deputy clerk and clerk of the Courts, he was made the first clerk of the Kingston Court on its formation in 1910, which post he held until his retirement from the service in 1925. He died at Mandeville on the 7th of March.

WALTER BELINFANTE ISAACS, I.S.O. was born at Ramble in the parish of Hanover on the 6th of December, 1864. He was educated at Potsdam School (now Munro College), and entered the public service in 1882, his whole service being in the Revenue Department. He became junior collector for Portland in 1902 and senior collector six years later. In 1919 he became Supervisor of Revenue and Valuation Commissioner. In 1925 he was made Island Treasurer, and he was for a time a nominated member of the Legislative Council, and received the medal of the Imperial Service Order. He died in Lower St. Andrew on the 6th of January and was buried in the Jewish cemetery.

WALTER JEKYLL, the youngest son of Edward Joseph Hill Jekyll of Wargrave Hill, Berks, formerly Captain in the Grenadier Guards, was born at Bramley House, Surrey on the 27th of November, 1849.

He was educated at Harrow and Trinity College, Cambridge, where he graduated with honours in 1872. He later took the M.A. degree. After leaving Cambridge he was ordained, and became Curate of Heydon of which Cure his friend the Hon. and Rev. Latimer Neville was Rector. Later he was appointed to a minor Canonry of Worcester—a post for which his fine voice and knowledge of music especially fitted him. After a few years he proceeded to Malta as Chaplain, but soon afterwards renounced his Orders, having found that he had no vocation for the Church.

After this he spent some time in Italy studying singing at Milan under the famous master Lamperti. He then returned and settled in London, but as this did not suit him he moved to Birmingham, where he taught music and gave penny singing lessons to poor people.

Finding the English winters trying he went to the West Indies, in 1895 after his mother's death, and, after a short visit home, settled finally in the Blue Mountains in Jamaica which he found much to his taste.

His house in the Blue Mountains was shaken down in the Earthquake of 1907, and he—giving the property to his headman—then moved to a hired house at Mavis Bank, nearer Kingston.

After a time owing partly to the fact that he became unable to continue hill walking he removed to Hanover and lived in a hired house near Lucea and latterly in a house at Bower Hill, near Riverside.

Throughout his Jamaican career the same desire to help his fellow men manifested itself, as it had done in early life in England.

He took a deep interest in Claude McKay, the poet of the Jamaica Constabulary, and was instrumental in his going in 1912 to Tuskegee which put him on the road to fame.

In 1907 he published, through the Folk-Lore Society—"Jamaican Song and Story."

In 1912 he wrote an Introduction to McKay's "Songs of Jamaica" the second book of that author.

For a time he devoted much study to the works of Schopenhauer, which resulted in 1911 in the publication of "The Wisdom of Schopenhauer as Revealed in some of his principal writings. Selected and translated by Walter Jekyll, M.A."

He presented all the works he had consulted on its completion to the Institute of Jamaica, to the Library of which he was wont during a period of many years to send, after he had finished reading them, the books which he acquired either by presentation or purchase. A great student himself he had much helpful sympathy for other students. He died at Bower Hill, Hanover, on the 17th of February, 1929. He lies buried in the churchyard of the parish church at Lucea.

REV. JAMES PARRINGTON KELL KING was born at Harmony in Portland on the 18th of November, 1853. After serving as a book-keeper on an estate he entered the public service in 1880 and rose to be an Assistant Collector of Taxes. He retired on a pension in 1914 and was ordained deacon and priest of the Church of England. He acted as rector in various parts of the Island. He died in Kingston on January the 13th.

EDWARD WODEHOUSE LUCIE-SMITH, O.B.E., the son of Sir John Lucie-Smith, a former Chief Justice of Jamaica, was born in Demerara on the 21st of March, 1860. He came to Jamaica in early life and was educated at St. George's College. After a short service in the Collector-General's department he entered the Colonial (now Barclays) Bank. After serving in the branches at Martinique and Trinidad, he returned to Jamaica in 1895 as Assistant Manager, and became manager in 1901, which post he filled with distinction until 1926 when he retired. He was then made a Director of the Bank. He was made a Privy Councillor and a nominated member of the Legislative Council but he retired from the last-named position. He was made an O.B.E. for services rendered

during the War. He was President of the Jamaica Club, and a member of the Kingston Loan Board, the Board of Managers of the Government Savings Bank and the Sugar Industry Aid Board. He was a keen member of the Church of England and was one of the Business Referees of the Church. His advice on matters of finance was always valued by the Government. He died on the 29th of November.

REV. WILLIAM MARTIN LUMSDEN, B.D. was born at Alligator Pond, Manchester on the 14th of September, 1876. He was educated at the Mico College and at the Presbyterian Theological College. After being ordained he was appointed to the Sterling and Green Island Cure, 1908. In 1916 he went to Falmouth. In 1919 he went to Port Maria, but he had to relinquish this work owing to ill-health and he returned to his first cure of Green Island, where he died on the 4th of March. He took part in the educational and civil work of the parishes of Westmoreland and Trelawny being a member successively of both Parochial Boards.

JOHN AMOS PADDYFOOT, was born in Jamaica in 1870, and studied medicine in Canada and Edinburgh. For many years he was municipal surgeon at Colon. On the outbreak of War he returned to Jamaica and became attached to the Medical Staff at Up-Park Camp. He was later appointed to the Staff of the General Hospital, Kingston, but he resigned that post to take up a general practice in Kingston. He was later appointed Medical Officer of the Kingston and St. Andrew Poor House. He died in Kingston on the 5th of February.

She began as parochial worker for the Kingston Parish Church and became Head Deaconess of the Deaconess Home (now House) in 1901, and developed the training of nurses and the educational side of the work, establishing schools at Spanish Town, Montego Bay, Brown's Town, in addition to the Deaconess Home School and High School in Kingston. He left Jamaica in early life and was educated at Rugby and Oxford.

Through "Family circumstances" (probably the mismanagement by the attorney of his father's estate) he had to leave the University without taking a degree, but he was later made an honorary fellow of his college, University.

He became an Assistant in the British Museum in 1861. He was soon transferred to the Manuscript Department and there developed, under Sir Frederick Madden and Sir Edward Bond, that knowledge of palaeography for which he later became noted through his publications, being, with Bond, the founder of the Palaeographical Society in 1873. He became in 1888 Director and Principal Librarian of the British Museum which post he held with much distinction until 1909.

"THE HANDBOOK OF JAMAICA : A RETROSPECT,"

BY FRANK CUNDALL.

With the present issue "The Handbook of Jamaica" has reached its fiftieth year of publication.

During a period of one hundred and thirty years before the first issue of the Handbook in 1881 there were a series of Almanacs published, probably yearly; but there are gaps in the series commencing in 1751 in the West India Reference Library of the Institute of Jamaica. With few exceptions the years 1751 to 1930 are covered by a collection of 159 works of reference (109 Almanacs and 50 Handbooks) which contain a valuable amount of information for students of Jamaica history, and can be equalled probably by no other colony.

The first of the series "The Merchants Pocket Companion or an Almanac" issued in 1751, was printed at Kingston by William Daniell.

Daniell is known to have printed Votes of the Assembly, but no copies exist. He probably published Almanacs but none other than that for 1751 is known.

The next Almanac we come to is that for 1776 printed by James Fannin in Montego Bay (the first and only Almanac known to have been printed at that town)*

In 1778 Thomas Woolhead published an "Almanack and Register" at Kingston, and in the next year it was published by his widow Ann Woolhead, (presumably in 1780) and also in 1781.

From 1782 to 1785 Douglass and Aikman, "Printers to the King's most Excellent Majesty" printed an "Almanack and Register" William and Alexander Aikman were Scotchmen who had migrated to South Carolina, and at the American Revolution came on to Jamaica. It was William that was in partnership with David Douglass, who was also driven to Jamaica by the Revolution.

From 1786-1788 they bore the imprint of Alexander Aikman.

In 1788 "The New Jamaica Almanack" also appeared, published at Kingston by Bennett and Dickson for Thomas, Stevenson and Co., Stationers, King Street. It was a little more ambitious than its predecessors and contained an "Essay on the Culture of Coffee," and a "A Brief History of Jamaica." In 1789 these articles also appeared.

In those days it was possible to produce almanacs to date: a second and even a third edition was printed. The copy in the West India Library of the Almanac for 1790 is "Second edition, corrected to 12th January." In 1791 it was printed by

In Long's History (1774) we read under Montego Bay: "A Printing-Press has lately been set up here" Fannin published the Cornwall Chronicle and County Gazette" from 1781 to 1806.

David Dickson. In the same year appeared "The Royal Almanac," printed by Alexander Aikman.

In 1793 the "New Jamaica Almanack" was printed by David Dickson at St. Jago de la Vega for Stevenson and Aikman, and 1794, 1795, 1796, 1797 "for Thomas Stevenson" only.

From 1798 to 1804 it was printed by Stevenson and Aikman. From 1805 to 1807 by Stevenson and Smith. In the issue for 1806 is a specially prepared map of Jamaica containing a general plan of Port Royal. From 1809 to 1812 it was printed by Smith and Kinnear.

In the issue for 1811 the most useful addition of "The Givings-In for the different parishes" is first given. The List, which was continued down to 1812 affords a most valuable source for tracing planters and properties, with particulars of stock and slaves during the period covered.

In 1810 (and presumably in 1811-13) 1814 and 15 "The Royal Register and Jamaica Almanac" was published by Alexander Aikman, junior.

In 1816 the same work, produced by the same printer became "The Jamaica Almanac" and contained the useful "In-Givings." This continued till 1831.

In 1832 the same Almanac bears the imprint "Kingston printed at the Office of the Royal Gazette."

In 1833 the imprint is "Alexander Wells Aikman," and with that issue the "In-Givings" unfortunately cease.

The volume for 1836 was printed by William Carver, Harbour Street, Kingston.

In 1838 there were two Almanacs, one was "Printed at the office of the Royal Gazette and Jamaica Times" the other by Jordon and Osborn.

In 1839 an Almanack was printed by Cathcart and Sherlock. Beside descriptions and historical account of the colony, it contains two interesting articles.

In the issue of 1840, by the same printers, the useful In-Givings re-appear but in that for 1842 (compiled and printed by William Cathcart) they are omitted. This was the "fifth volume of the Jamaica Almanac, on that improved arrangement of the contents adopted by the late Mr. Sherlock." The same compiler and printer issued the almanacs for 1843 to 1847.

In 1846 the In-Givings are included.

In 1849 "Kidd's Jamaica Almanac", compiled by William Joseph Kidd* was printed by Jordon and Osborn, both well known as politicians. It was a poor substitute for the Cathcart's. In the same year appeared at Falmouth (apparently the only effort) "The New Jamaica Almanack," printed at the office of "The Messenger."

In 1850 appeared "Henderson's Jamaica Almanack," combined with "Letts' Diary" a poor affair. This went on till 1870. In 1860, also appeared "Who's Who" in which is incorporated the Jamaica Almanac and "What's What" edited and printed by James Gall. This appeared the following year.

In 1865 first appeared "DeCordova's Pocket Book and Almanac" printed by M. deCordova and D. McDougall.

In 1868, it became incorporated in "Who's Who and What's What" published by deCordova and McDougall. An edition appeared till 1873. In 1874 it became Macdougall and Co.'s Jamaica Pocket Book." It appeared in 1875.

In 1876 DeCordova published "Who's Who and What's What in which is incorporated deCordova's Almanack" which continued till 1877.

In 1876 appeared "J. Murray Auld and Co's. Jamaica Pocket Book"; it also appeared in 1879.

James Gall brought out a "Who's Who? and What's What" for 1879-80, which contains more information than the publications of the previous ten years or more, but this was the last of the Almanacs.

In 1881 appeared "The Handbook of Jamaica for 1881" in practically the same form as it has to-day. Its compilation did great credit to the "two members of the Jamaica Civil Service" who compiled it. The one was A. C. Sinclair, Superintendent of the Government Printing Office and the other Lawrence F. Fyfe of the Colonial Secretary's Office. The useful special articles included in this as in subsequent issues, will be found recorded on p. 563.

This new venture had the approval of the then Governor, Sir Anthony Musgrave, and subsequent editors have been appointed by the Governor for the time being.

The work was printed at the Government Printing Office and "published by authority."

*He was brother to the painter Joseph Bartholomew Kidd, well known for his views of Jamaica which were lithographed in 1840.

It was later considered expedient to vary this by saying "This Handbook, though in part compiled from official records, is not an official publication."

The issue for 1882 appeared under the names of the Co-editors Sinclair and Fyfe. The third volume appeared as for 1884-85 was published in June, so as to include the statistics of the year 1883-84, and this plan was continued until 1892 when the calendar year again became the year of the Handbook.

In 1886-7 a travesty of the Colony's Arms—with a gold cross on a silver shield (copied from the old Legislative Council) and a Crown above the crest,—appeared on the title-page.

In 1890-91 S. P. Musson (afterwards Island Treasurer) took the place of Fyfe.

In 1891-92 S.P. Musson took the place of the recently deceased Sinclair, and his co-editor was Mr. (now Sir) Thomas Laurence Roxburgh.

In 1898 Mr. Roxburgh became chief editor and the late Mr. J. C. Ford, the Superintendent of the Government Printing Office became co-editor.

In 1903 Mr. Roxburgh resigned, Mr. Ford became chief editor with Mr. A. A. C. Findlay as co-editor. In 1907 Mr. Findlay resigned and the present editor joined with Mr. Ford. Mr. Ford, after twenty-two years of co-editorship of the "Handbook" relinquished it when he retired from the office of Superintendent of the Government Printing Office, and in 1920 the present writer became sole editor.

WHEN YOU BUY LUBRICATING OILS
SEE YOU GET "OILINESS"

"OILINESS"

"Oiliness" is that property of an oil which causes it to form a continuous film on bearing surfaces. It is quite distinct from viscosity or "thickness," but yet is of the greatest practical importance. Wells & Southcombe patented a process for increasing the "oiliness" of lubricating oils, and oils so treated are commercially known as "Germ" Oils.
